Rambus to Host Analyst Meeting

LOS ALTOS, Calif., Oct 21, 2002 -- Rambus Inc. (Nasdaq:RMBS), the world's leading developer of chip-to-chip interface technology, will host an analyst meeting at The Fairmont Hotel in San Jose, California on October 28th from 7:30 a.m. to 9:00 a.m. PT.

During this event, Rambus' management will provide a strategic and financial overview of the company. In addition to presentations, the event will provide investors the opportunity to meet senior members of the Rambus management team. Rambus' analyst meeting will be followed by the Chip2Chip Conference, which is an industry event designed to tackle the growing challenges of chip-to-chip communications in this age of multi-gigahertz systems. Following the Chip2Chip Conference, Rambus will host the annual Rambus Developer Forum, also at The Fairmont Hotel, on Tuesday, October 29.

The analyst meeting presentations will be available live via the Internet at www.rambus.com, in the investor relations section of Rambus' web site. For a week following the event, interested parties will be able to access an archived version of the audio presentations.

About Rambus

Rambus is the leading developer and marketer of breakthrough chip-to-chip interface technology, products and solutions to the electronics industry. The company licenses its technology in the form of ASIC cells that are incorporated into high-performance memory and logic chips by 25 of the world's top semiconductor makers. The company's ASIC cells and system-level solutions are incorporated into hundreds of unique electronic products.
