Forward-Looking Statements

This presentation includes forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward looking statements are based on management's current expectations, are not guarantees of future performance and are subject to certain risks, trends, and uncertainties that could cause actual results to differ materially from those projected, expressed or implied by such forward-looking statements. Many of these risk factors are outside of the company's control, and as such, they involve risks which are not currently known to the company that could cause actual results to differ materially from forecasted results. Factors that could cause or contribute to such differences include those uncertainties regarding the impact of the COVID-19 virus on our business and the economy generally, and those other matters disclosed in the company's Securities and Exchange Commission filings. The forward-looking statements in this document are made as of the date hereof and the company does not undertake to update its forward-looking statements.

APPENDIX

Non-GAAP Financial Measures

EBITDA is defined as net income (loss), plus interest expense net of interest income, income tax provision (benefit), depreciation and amortization. Adjusted EBITDA is EBITDA adjusted for the items of income and expense and expected incremental revenue and cost savings as described in the company's senior secured credit agreement covenant calculations. Management believes that the inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA is appropriate to provide additional information to investors about one of the principal measures of performance used by the company's creditors. In addition, management uses EBITDA and Adjusted EBITDA to evaluate the company's performance.

Depreciation expense for property and equipment and amortization expense of capitalized internally developed software costs relate to ongoing capital expenditures; however, amortization expense associated with acquired intangible assets, such as customer relationships, software, tradenames and non-compete agreements are not representative of ongoing capital expenditures, but have a continuing effect on our reported results. Non-GAAP financial measures of operating adjusted net income from continuing operations and operating adjusted net income from continuing operations per share, in the opinion of the company, provide comparability to other companies that may not have incurred these types of non-cash expenses or that report a similar measure. In addition, net income and net income per share have been adjusted for certain other charges, as seen in the following reconciliation.

EBITDA, Adjusted EBITDA, operating adjusted net income from continuing operations and operating adjusted net income from continuing operations per share have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analysis of the results as reported under GAAP. These measures may not be comparable to similarly titled measures reported by other companies.

(1) The Series A Preferred Stock dividends have not been included in the calculation of operating adjusted net income from continuing operations and operating adjusted net income from continuing operations per diluted share. Likewise, the weighted average diluted share counts do not include the effect of assumed conversion of the Series A Preferred Stock.

(2) The effective tax rate at the end of each period presented was used to determine the amount of income tax on the adjustments to net income. There was no income tax benefit related to the goodwill and other intangibles impairment because these items were not deductible for income tax purposes.
