Rambus Announces Resetting of Infineon Patent Trial Date

LOS ALTOS, Calif.--April 27, 2004--Rambus Inc. (Nasdaq:RMBS), a leading provider of chip interface products and services, today announced that the retrial of Rambus patent claims against Infineon has been reset from June 10, 2004, to a new date in the fall of 2004. The new date is expected to be set before the end of May 2004. The date change was at the initiative of the trial court judge, who, among other things, cited the number of pretrial issues that remain to be resolved, and the possible need for time for Rambus to appeal certain of those rulings prior to trial.

About Rambus Inc.
