

IAMGOLD

Corporate Presentation

December 2019

TSX: IMG | NYSE: IAG

Cautionary Statement

All information included in this presentation whether in narrative or chart form, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, other than statements of historical fact, constitute forward looking information or forward-looking statements and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: the Company's guidance for production, cash costs, all-in sustaining costs, depreciation expense, effective tax rate, and operating margin, capital expenditures, operations outlook, cost management initiatives, development and expansion projects, exploration, the future price of gold, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing and amount of estimated future production, costs of production, permitting timelines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to, the use of the words "may", "will", "should", "continue", "expect", "budget", "forecast", "anticipate", "estimate", "believe", "intend", "plan", "schedule", "guidance", "outlook", "potential", "seek", "targets", "strategy", "superior" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The Company cautions the reader that reliance on such forward-looking statements involve risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements, and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to, changes in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, and financing; mining tax regimes; ability to successfully integrate acquired assets; legislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities including geotechnical difficulties and seismicity; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; negotiations with respect to new, reasonable collective labour agreements may not be successful which could lead to a strike or work stoppage in the future, and any such strike or work stoppage could have a material adverse effect on the Company's earnings and financial condition; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; the ability to deliver gold as required under forward gold sale arrangements; the rights of counterparties to terminate forward gold sale arrangements in certain circumstances, the inability to participate in any gold price increase above the cap in any collar transaction entered into in conjunction with a forward gold sale arrangement, such as the collar entered into in conjunction with the gold sold forward in January of 2019; and the risks involved in the exploration, development and mining business. The Company is also subject to litigation and legal and political risks. With respect to development projects, IAMGOLD's ability to sustain or increase its present levels of gold production is dependent in part on the success of its projects. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. Development projects have no operating history upon which to base estimates of future cash flows. The capital expenditures and time required to develop new mines or other projects are considerable, and changes in costs or construction schedules can affect project economics. Actual costs and economic returns may differ materially from IAMGOLD's estimates or IAMGOLD could fail to obtain the governmental approvals necessary for the operation of a project; in either case, the project may not proceed, either on its original timing or at all.

Exploration Target Potential: The potential quantity and grade of the exploration targets referred to are conceptual in nature and insufficient exploration work has been completed to define a mineral resource. The property will require significant future exploration to advance to a resource stage and there can be no certainty that the exploration target will result in a mineral resource being delineated. The exploration targets are consistent with similar deposits in the area, deposit models or derived from initial drilling results.

For a more comprehensive discussion of the risks faced by the Company, and which may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the company's estimated future results, performance or achievements expressed or implied by forward-looking information or forward-looking statements, please refer to the Company's latest Annual Information Form, filed with Canadian securities regulatory authorities at www.sedar.com, and filed under Form 40-F with the United States Securities Exchange Commission at www.sec.gov/edgar.shtml. The risks described in the Annual Information Form (filed and viewable on www.sedar.com and www.sec.gov/edgar.shtml, and available upon request from the Company) are hereby incorporated by reference into this presentation.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

All amounts in this presentation are expressed in U.S. dollars except as otherwise noted.

Technical Information and Qualified Persons

The mineral resource estimates contained in this news release have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The "Qualified Person" responsible for the review and approval of all year-end mineral resource and reserve estimates for IAMGOLD contained herein is Lise Chenard, Eng., Director, Mining Geology. Lise has worked in the mining industry for more than 35 years, mainly in operations, project development and consulting. She joined IAMGOLD in April 2013 and acquired her knowledge of the Company's operations and projects through site visits, information reviews and ongoing communication and oversight of mine site technical service teams or consultants responsible for resource and reserve modeling and estimation. She is considered a "Qualified Person" for the purposes of NI 43-101 with respect to the mineralization being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has verified the data disclosed, and data underlying the information or opinions contained herein.

The technical information for Sadiola contained in this presentation has been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The "Qualified Person" responsible for the supervision of the preparation and review of all technical information for IAMGOLD is Philippe Gauthier, BSc. Mechanical Engineering and MSc Mechanical Engineering, the Director Development Projects for IAMGOLD. Philippe has worked as mechanical engineer for 28 years, mainly in mining and project development. He joined IAMGOLD in 2008 and acquired his knowledge of Sadiola through his work on the Infrastructure and Plant Engineering for an internal feasibility report in 2010, his work to update the documentation and engineering subsequent to that report and his most recent site visit on August 28, 2015. He is considered a "Qualified Person" for the purposes of NI 43-101 with respect to the technical information being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has read and verified the data disclosed, and data underlying the information or opinions contained herein.

Drilling results in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects. The sampling of, and assay data from, drill core is monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. The "Qualified Person" responsible for the supervision of the preparation, verification, and review of these results is Craig MacDougall, P.Geo., Senior Vice President, Exploration for IAMGOLD. Mr. MacDougall is a Qualified Person as defined by National Instrument 43-101.

Loma Larga - PEA Qualified Persons and NI 43-101 Disclosure The technical information in this presentation has been prepared by independent Qualified Persons employed by Roscoe Postle Associates Inc. ("RPA"), including Katharine Masun, P.Geo. (Mineral Resources), Jason Cox, P.Eng. (Mineral Reserves and economics), and Kathleen Altman, Ph.D., P.E. (metallurgy and processing). By virtue of education and relevant experience, the aforementioned are "Qualified Persons" for the purpose of NI 43-101.

For readers to fully understand the information in this presentation, they should read the Technical Report in its entirety, including all qualifications, assumptions and exclusions that relate to the information set out in the Technical Report which qualifies the technical information contained in the Technical Report. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Report describes the Mineral Resource and Mineral Reserve estimation methodologies and the assumptions used, and to which those estimates are subject. INV Metals' AIF includes details of certain risk factors that could materially affect the potential development of the Mineral Resources and Mineral Reserves and should be considered carefully. A discussion of these and other factors is contained in "Risk Factors" and elsewhere in the Company's AIF, which was filed on SEDAR on March 1, 2016.

Cautionary Note to Investors Concerning Estimates of Measured and Indicated Resources

This presentation uses the term "indicated resources". We advise investors that while that term is recognized and required by Canadian regulations, the United States Securities and Exchange Commission (the "SEC") does not recognize them. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Cautionary Note to Investors Concerning Estimates of Inferred Resources

This presentation also uses the term "inferred resources". We advise investors that while this term is recognized and required by Canadian regulations, the SEC does not recognize it. "Inferred resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.

Making the Case for IAMGOLD

Creating Superior Shareholder Value

REINFORCING THE MODEL

- Operating cost management to achieve positive cash-flow;
- Capital expenditures reflect value-adding initiatives.

Operational improvements at our current sites:

- Debottleneck Essakane mill;
- ✓ Essakane CIL/Heap Leach Feasibility Study;
- Continue Saramacca development;
- Redesign in progress at Westwood.

Disciplined approach to realizing value:

- ✓ Right-sizing Westwood;
- ✓ First production from Saramacca;
- ✓ Issue Nelligan Initial Resource Estimate;
- Exploitation concession at Boto well advanced;
- Work within budget for all development projects.

Our Operations

Essakane, Burkina Faso

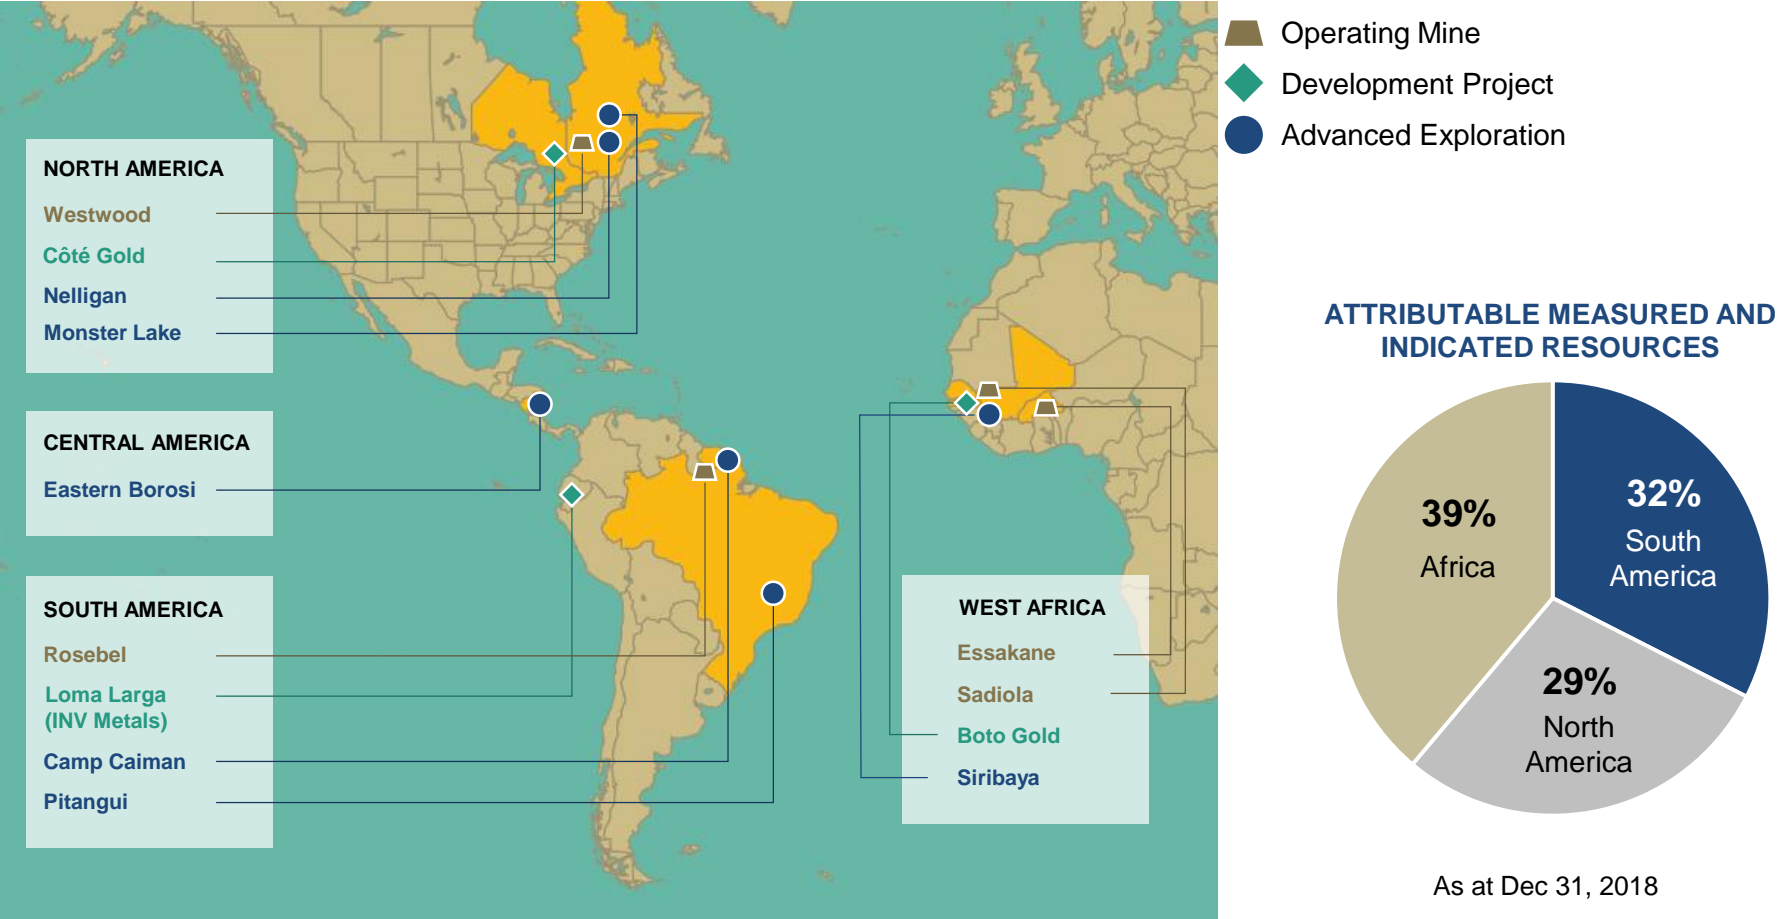

Rosebel, Suriname

Westwood, Canada

Diversifying Our Portfolio

MAP OF OPERATING, DEVELOPMENT AND EXPLORATION PROJECTS

Environmental, Social and Governance (ESG)

Zero Harm remains both a goal and journey:

- Respecting the natural environment, building strong community partnerships and putting the health and safety of our employees first.

Strong environmental, social, and governance practices have always been part of the way IAMGOLD conducts business:

- As a member of the Mining Association of Canada, IAMGOLD is proud to implement the **Toward Sustainable Mining** framework at all operations, one of the first members to do so.
- Implementing the World Gold Council's **Responsible Gold Mining Principles**, designed to provide confidence to investors, supply chain participants, and other stakeholders that gold has been produced responsibly.
- IAMGOLD has worked hard to ensure we rethink the traditional mining model while staying profitable and sustainable in a world that faces new environmental and operational realities, receiving recognition for our ongoing efforts:
 - › Received **highest level** (GA-1) of Moody's Corporate Governance for the Metals and Mining Sector;
 - › Ranking as one of the **2019 Top 50 Sustainable Companies in Canada** by Corporate Knights;
 - › Inclusion in the **2019 Bloomberg Gender Equality Index** for organizational commitment to equality and advancement women in the workplace.
- 2018 highlights include:
 - › Commissioning of the **world's largest hybrid solar/thermal plant** at Essakane, Burkina Faso
 - › Investment of \$1.35 million to **improve community access to high-quality medical care** in Suriname
 - › **Renewal of our financial commitment with Laurentian University** in Ontario, contributing \$2 million over 5 years to the engineering department
 - › Signing of an **Impact & Benefit Agreement** with Mattagami First Nation and Flying Post First Nation in Northern Ontario

Near Term Catalysts

H1 2019

- ✓ \$170 Million Gold Prepay Agreement
- ✓ Diahka-Siribaya Updated Resource

H2 2019

- ✓ Essakane CIL and Heap Leach Feasibility Study
 - ✓ Nelligan Initial Resource
 - ✓ Saramacca Production Targeted
- Expect delivery of Boto Mining Permit
- Preliminary Westwood Plan Update

Rosebel Gold Mine, Suriname

Rosebel – Overview

OVERVIEW

Ownership	<ul style="list-style-type: none">95% IAMGOLD, 5% Government of Suriname
Mining Method	<ul style="list-style-type: none">Conventional open pit methods
Production Status	<ul style="list-style-type: none">Began commercial production in 2004
LOM	<ul style="list-style-type: none">Updated 43-101 disclosed Q3 2018 with mine life to 2033, including Saramacca
2019 Guidance	<ul style="list-style-type: none">240 – 260 koz\$40mm sustaining capex\$60mm non-sustaining capex

KEY INITIATIVES

To improve mined volumes, recoveries, communiton, productivity and safety performance.

Increased Reserves & Resources

- Rosebel's 39% increase in reserves extends mine life to 2033 including Saramacca

Brokopondo district in north eastern Suriname

Saramacca Development

- First ore delivered October 31, 2019
- Road progressing well, completion expected Q1'20
- Pit optimization and underground being studied

Consolidating Prospective Land Packages

- Secured exploration rights to the Brokolonko property

Rosebel – Overview of Site

Road to Rosebel Mill

Essakane Gold Mine, Burkina Faso

Essakane – Overview

OVERVIEW

Ownership	<ul style="list-style-type: none"> 90% IAMGOLD, 10% Government of Burkina Faso
Mining Method	<ul style="list-style-type: none"> Conventional drill, blast, load and haul surface mining method
Production Status	<ul style="list-style-type: none"> Began commercial production in July 2010 Plant expansion was completed on time and under budget at the end of 2013 Expanded plant nameplate capacity on 100% hard rock from 10.8 Mtpa to 12.0 Mtpa Falagountou satellite deposit mining commenced in 2015
LOM	<ul style="list-style-type: none"> 2018 LOM, with Heap Leach in series demonstrate life to 2030
2019 Guidance	<ul style="list-style-type: none"> 380 – 390koz \$40mm sustaining capex \$70mm non-sustaining capex

KEY INITIATIVES

CIL (carbon-in-leach) Debottlenecking

- Improve throughput and gravity recovery, \$9M capex
- ~10% Increase in CIL Mill throughput on hard rock 2020+

Falagountou & Satellite Prospects

- Growing 4 satellite prospects within 10–15 km of mill
- Gossey initial attributable resource of 338 koz¹

² Refer to IAMGOLD news release dated November 6, 2019

North-eastern Burkina Faso, West Africa

Heap Leaching²

- FS results released Nov 6, 2019
- 12 year mine life (2020 – 2031)
- Heap Leach at end of mine life, after CIL
- Will use existing CIL crushing circuit
- Initial capex \$115M (incl. \$9M CIL optimization)

CIL/HL Feasibility Study Highlights¹

PRODUCTION PROFILE

HIGHLIGHTS	PFS	FS
Mining Capacity	70.0 Mtpa	55.0 Mtpa
CIL Milling Capacity (100% hard rock equivalent)	10.8 Mtpa	11.7 Mtpa
HL Processing Capacity	10.0 Mtpa	8.5 Mtpa
HL Tonnage	61.9 Mt	43.1 Mt
LOM Average Annual Gold Production (CIL)	416k oz (2020-2026)	433k oz (2020-2026)
LOM Average Annual Gold Production (HL)	72k oz (2020-2026)	73.6k oz (2027-2031)
LOM Average Recovery Rate (CIL / HL)	92.1% / 55%	92.1% / 67%
Mine Life	8.5 years	12.0 years
LOM Average Direct Cash Costs	\$707/oz	\$778/oz
LOM Average AISC	\$946/oz	\$949/oz
After-tax NPV @6%		\$874 M
Average diluted grade (CIL / HL)	1.17 g/t Au / 0.43 g/t Au	1.24 g/t Au / 0.40 g/t Au
Initial Capital Expenditure (+20% / -15%)	\$155 M	\$115 M (2025-2026)

¹ Refer to IAMGOLD news release dated November 6, 2019

Essakane – Regional Exploration Targets

BROWNFIELD SUCCESS

- ~1 Moz of resources delineated at Falagountou West and East, 8 kilometres east of Essakane; evaluating potential to increase resources at both deposits
- Approximately 24km RC and diamond drilling on the mine lease and surrounding concessions planned for 2019

GOSSEY DELINEATION DRILLING PROGRAM

- Initial Resource Estimate¹ with over 70% of the delineated resources contained within shallow, soft, saprolite and transition hosted mineralization:
- 10.5 Mt of Indicated Resources grading 0.87 g/t for 291koz
- 2.9 Mt of Inferred Resources averaging 0.91 g/t for 85koz

2018 EXPLORATION PROGRAM

- Gossey-Korizena trend +20 km, anomaly adjacent to Markoye shear
 - › Numerous artisanal sites, encouraging RC drill results
- Continued exploration along trend of other regional targets:
 - › Tin Taradat | Gourara | Tassiri | Sokadie

¹ Refer to IAMGOLD news release dated Dec 12, 2018

Westwood Gold Mine, Canada

Westwood – Overview

OVERVIEW

Ownership	<ul style="list-style-type: none"> 100% IAMGOLD
Mining Method	<ul style="list-style-type: none"> Underground
Production Status	<ul style="list-style-type: none"> Commenced commercial production July 2014 Progressing development
LOM	<ul style="list-style-type: none"> Mine life to 2033
2019 Guidance	<ul style="list-style-type: none"> 95 – 105koz \$15mm sustaining capex \$20mm non-sustaining capex

KEY INITIATIVES

Progressing Development

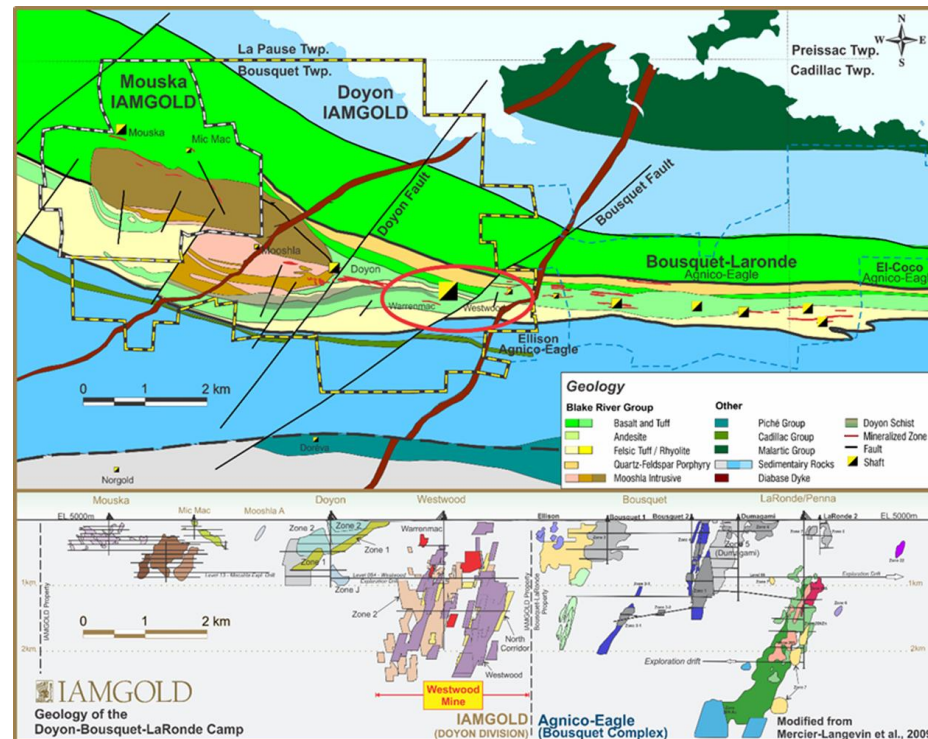

- Targeting safe, profitable, long life mine
- Plan under review, preliminary update Q4'19, including opex
- NI 43-101 Study expected H1'20

Significant Resource Conversion Year over Year

- Reserves increased by 3% year-over-year to 1.2 Moz¹

¹ Refer to news release dated Feb 19, 2019

Northwestern Québec – A Prolific Gold Mining Camp

Strategic Review Study

- Geotechnical management plan implemented
- Improved micro-seismic system
- Improved ground control packages

Exploration Review

Karita – Along Trend to Boto and Diakha

KARITA, GUINEA¹

- Strategically located along the prolific Senegal-Mali shear zone between Boto Gold Project in Senegal to the north, and Diakha-Siribaya Project in Mali to the south.
- Reported results from 2019 drilling program, comprising 16 reverse circulation (RC) drill holes totalling 1,839 metres.

Drill hole highlights¹:

- KRC19-006: 29.0 m grading 2.96 g/t Au
- KRC19-009: 16.0 m grading 3.17 g/t Au
- KRC19-011: 21.0 m grading 9.01 g/t Au

Appendix

2019 Production and Cost Guidance

	Full Year Guidance ¹
Essakane (000s oz)	380 – 390
Rosebel (000s oz)	240 – 260
Westwood (000s oz)	95 – 105
Total owner-operated production (000s oz)	715 – 755
Sadiola Joint Venture (000s oz)	50 – 55
Total attributable production (000s oz)	765 – 810
Cost of sales ² (\$/oz)	\$910 – \$960
Total cash costs ³ – owner-operator (\$/oz)	\$860 – \$910
Total cash costs ^{3,4} (\$/oz)	\$860 – \$910
All-in sustaining costs ³ – owner-operator (\$/oz)	\$1,100 – \$1,140
All-in sustaining costs ^{3,4} (\$/oz)	\$1,090 – \$1,130

¹ The revised outlook is based on 2019 full year assumptions with an average realized gold price of \$1,300 per ounce, U.S.\$ / Canadian \$ exchange rate of 1.33, € / U.S.\$ exchange rate of 1.13 and average crude oil price of \$63 per barrel.

² Cost of sales, excluding depreciation, is on an attributable ounce sold basis (excluding the non-controlling interest of 10% at Essakane and 5% at Rosebel) and does not include the Sadiola Joint Venture which is accounted for on an equity basis.

³ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

⁴ Consists of Essakane, Rosebel, Westwood and the Sadiola Joint Venture on an attributable basis.

2019 Capex Outlook

GUIDANCE UPDATED AT Q2

\$millions	Sustaining ¹	Non-Sustaining	Total
Essakane	\$40	\$70	\$110
Rosebel	\$40	\$50	\$90
Westwood	\$15	\$20	\$35
Owner-operator	\$95	\$140	\$235
Corporate and Development Projects ²	-	\$40	\$40
Total (±5%)^{3,4}	\$95	\$180	\$275

1 Sustaining capital includes capitalized stripping of \$5 million for Essakane and \$2 million for Rosebel. In accordance with the World Gold Council guidance on all-in sustaining costs, capitalized stripping of \$35 million is included in non-sustaining capital for Essakane.

2 Includes estimated attributable capital expenditures for the Côté Gold Project (70%) for the first nine months of 2019.

3 Includes \$14 million of capitalized exploration and evaluation expenditures. Refer to the Exploration section of this MD&A.

4 Excludes capitalized borrowing costs and \$10 million of principal lease payments.

Hedge Position – Q3 2019

	2019	2020	2021	2022	2023
Foreign Currency					
Canadian dollar contracts (millions of C\$)	71	186			
Rate range ¹ (\$/C\$)	1.25 - 1.39	1.30 - 1.36			
Hedge ratio	63%	50%

Hedge ratio	89%	75%	75%	50%	
WTI oil contracts (barrels) ⁵	125	489	456	348	348
Contract price range (\$/barrel of crude oil)	40 - 60	43 - 60	46 - 62	45 - 62	47 - 60
Hedge ratio	90%	75%	75%	49%	49%

¹ The Company executed Canadian dollar collar options, which consist of Canadian dollar call and put options. The strike prices for the call options are C\$1.25 and C\$1.30. The strike prices for the put options are C\$1.39 and C\$1.36. The Company will recognize a gain from the difference between a lower market price and the Canadian dollar call strike price. The Company will incur a loss from the difference between a higher market price and the Canadian dollar put strike price.

² During the second quarter 2018, the Company purchased €100 million in cash at a rate of 1.1960 to be used for 2019 expenditures, all related to West African mining operations and projects. As at the third quarter 2019, €84 million were used primarily for expenditures related to West African mining operations and projects. The remainder of this cash was held in short-term investments and cash and cash equivalents at September 30, 2019.

³ The Company executed euro collar options, which consist of euro put and call options. The strike price for the put options is €1.14. The strike price for the call options is €1.20. The Company will recognize a gain from the difference between a lower market price and the euro put strike price. The Company will recognize a gain from the difference between a higher market price and the euro call strike price.

⁴ The Company executed Brent and WTI collar options, which consist of Brent and WTI put and call options with strike prices within the given range in 2019 through 2023. The Company will incur a loss from the difference between a lower market price and the put strike price. The Company will recognize a gain from the difference between a higher market price and the call strike price.

⁵ Quantities of barrels are in thousands.

Gold Price Assumption	\$1,250/oz
After-tax NPV (6%)	\$261 million
After-tax IRR	23.0%
Payback Period	3.4 years

Mineral Reserves and Resources

2018 Mineral Reserves and Resources

Mineral resources (“resources”) and mineral reserves (“reserves”) have been estimated as at December 31, 2018 pursuant to Canadian securities regulatory requirements, specifically the requirements of National Instrument 43-101 and the definitions of resources and reserves incorporated therein. Consistent with National Instrument 43-101, resources are divided into “inferred,” “indicated” and “measured” based on the level of geological confidence in the mineralization, and reserves, into “probable” and “proven” upon at least a pre-feasibility study having been undertaken on the indicated and measured resources. Measured and indicated resources are inclusive of proven and probable reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability and are not guaranteed to have economic viability. Inferred resources are too speculative geologically to have any economic considerations applied to them that would allow a translation into reserves.

Cautionary Notes to U.S. Investors

The United States Securities and Exchange Commission (“SEC”) limits disclosure for U.S. reporting purposes to mineral deposits that a company can economically and legally extract or produce. IAMGOLD uses certain terms in the Annual Report, such as “measured,” “indicated,” or “inferred,” which may not be consistent with the reserve definitions established by the SEC. U.S. investors are urged to consider closely the disclosure in the IAMGOLD Annual Reports on Forms 40-F filed with the SEC.

Gold Mineral Reserves¹

100% BASIS RESERVES

As at December 31, 2018	Proven			Probable		
	Tonnes (000s)	Grade (g/t)	Contained Ounces (000s)	Tonnes (000s)	Grade (g/t)	Contained Ounces (000s)

Total measured and indicated resources³							1,047,330	1.1	37,333
Total inferred resources							265,837	1.3	11,071

1 Mineral resources have been estimated at December 31, 2018, using a gold price of \$1,500 per ounce for Essakane, Rosebel, Côte Gold, Boto Gold, Saramacca, Gossey, Monster Lake, Pitangui, and Diakha-Siribaya, \$1,400 per ounce for Sadiola, and \$1,200 per ounce using a 6.0 g/t Au cut-off over a minimum width of 2 metres for Westwood.

2 Mineral resources have been estimated at December 31, 2018, using a gold price of \$1,500 per ounce gold price, and a \$23 per ounce silver price for Eastern Borosi. Underground resources are estimating using a cut-off grade of 2.0 g/t gold equivalent with

a minimum width of 2.4 m and open pit resources are estimated using a cut-off grade of 0.42 g/t gold equivalent over a 3.0 m minimum width. Resources are disclosed as gold equivalent ounces calculated using the formula: $AuEq (g/t) = Au (g/t) + Ag (g/t) / 101.8$

3 In mining operations, measured and indicated resources that are not mineral reserves are considered uneconomic at the price used for reserve estimations but are deemed to have a reasonable prospect of economic extraction.

4 Due to rounding, numbers presented may not add up precisely to the totals.

Côte Gold Project – Reserves & Resources History

CÔTÉ GOLD - IMG ATTRIBUTABLE RESERVES & RESOURCES

- CIM NI43-101 Definitions were followed for the classification of Mineral Reserves and Resources. Please refer to the appropriate IAMGOLD Corporate disclosure for greater detail.
- Indicated Mineral Resources are inclusive of Mineral Reserves. Mineral Resources are constrained within a pit shell
- 2012.10 and 2012 YE Mineral Resources were estimated using an assumed gold price of \$US1,600 / troy ounce; All other Mineral Resource estimates used an assumed gold price of \$US1,500 / troy ounce

- 2017 and 2018 Mineral Reserves are estimated using an assumed gold price of \$US1,200 / troy ounce
- Mineral Resources up to 2016 are reported at 92.5% Ownership; Mineral Reserves and Resources for 2017 and 2018 are reported at 64.75% Ownership

1 For 2018 Reserves, see News Release dated February 19, 2019

2 Measured and Indicated Resources are inclusive of Reserves
