

Corporate Presentation

May 2021

TSX: IMG | NYSE: IAG www.iamgold.com

Cautionary Statement

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

All information included in this presentation whether in narrative or chart form, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, including statements in respect of the prospects so fithe Company's projects, other than statements of historical fact, constitute forward-looking information or forward-looking statements and are based on expectations, estements and are based on expectations, estements and are based on expectations, estements with respect to: the Company's guidance for production, cost of sales, total cash costs, all-in sustaining costs, depreciation expense, effective tax rate, capital expenditures, operations outlook, development and expansion projects, exploration, the future proice of gold, the estimation of mineral reserves and mineral resource estimates, the timing and amount of estimated future production, costs of production, estimated amount of throughput, grade, estimated average life of mine strip ratio, recovery rates, recovered gold, gold production, production schedule, timelines, currency fluctuations, initial capital, sustaining capital, gold price assumption, requirements for additional capital, estimated labour requirements, fluctuations in cash reserves, estimated wage forecast and job creation, generation of economic activity, estimates with respect to key project metrics, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage, as well as Project metrics and estimations of value including "net present value", "NPV", "internal rate of return", "IRR" and "payback". Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to, the us

The Company cautions the reader that reliance on such forward-looking statements involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements. These risks, uncertainties and other factors include, but are not limited to, charges in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative initiation, legislative, political or economic risks and new developments in the jurisdictions in which the Company carries on business; the failure to obtain in a timely manner from authorities key permits, authorizations or approvals necessary for exploration, development or operation, operating or technical difficulties in connection with mining or development activities, including geotechnical difficulties and major equipment failure, such as a conveyor belt breakdown; and seismicity, such as the seismic event that occurred at Westwood mine on October 30, 2020; laws and regulations governing the protection of the environment; employee relations; attraction and retention of key employees; availability and increasing costs associated with mining inputs and labour, negotiations with respect to new, reasonable collective labour agreements may not be agreed to; the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs, the speculative nature of exploration and development, including the risks of diminishing quantities or grades for eserves; illegal mining; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; the inability to participate in any gold price increase above the cap in any collar transac

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

All amounts in this presentation are expressed in U.S. dollars except as otherwise noted.

Technical Information and Qualified Persons

CAUTIONARY NON-GAAP PERFORMANCE MEASURES

This presentation includes certain non-International Financial Reporting Standards ("IFRS") measures such as life of mine total cash costs and life of mine average AISC. These measures are not defined under IFRS and should not be considered in isolation. The Company believes that these measures, together with other measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the operating and financial performance of the Company. The inclusion of these measures is meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with IFRS. These measures are not necessarily standard and therefore may not be comparable to other issuers. For a reconciliation of these measures to the most directly comparable financial information reported in the consolidated financial statements prepared in accordance with IFRS and for an explanation of how management uses these measures, see "Non-GAAP Performance Measures" in the MD&A filed on SEDAR at www.sedar.com.

QUALIFIED PERSON AND TECHNICAL INFORMATION

The technical and scientific information relating to exploration activities disclosed in this document was prepared under the supervision of and verified and reviewed by Craig MacDougall, P.Geo., Executive Vice President, Growth, IAMGOLD. Mr. MacDougall is a Qualified Person as defined by National Instrument 43-101.

The Mineral Resource and Reserve Estimates contained in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The Qualified Person ("QP") responsible for the review and approval of all year-end Mineral Resource and Reserve Estimates for IAMGOLD contained herein is Lisa Ragsdale, Eng., Director, Mining Geology. Lisa has worked in the mining industry for more than 15 years, mainly in operations, project development and consulting. Lisa joined IAMGOLD in January 2018 and acquired her knowledge of the Company's operations and projects through site visits, information reviews, and ongoing communication and oversight of mine site technical service teams or consultants responsible for mineral resource estimates. Lisa is considered a QP for the purposes of NI 43-101 with respect to the mineralization being reported on. The technical information has been included herein with the consent and prior review of the above noted QP. The QP has verified the data disclosed, and data underlying the information or opinions contained herein.

Drilling results in this presentation have been prepared in accordance with NI 43-101 Standards of Disclosure for Mineral Projects. The sampling of, and assay data from, drill core is monitored through the implementation of a quality assurance - quality control ("QA-QC") program designed to follow industry best practice. The QP responsible for the supervision of the preparation, verification, and review of these results is Craig MacDougall, P.Geo., Executive Vice President, Growth for IAMGOLD. Mr. MacDougall is a QP as defined by NI 43-101.

For readers to fully understand the information in this presentation, they should read the relevant Technical Report in their entirety, including all qualifications, assumptions and exclusions that relate to the information set out in the Technical Report which qualifies the technical information contained in the Technical Report. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Report describes the Mineral Resource and Reserve estimation methodologies and the assumptions used, and to which those estimates are subject. INV Metals' AIF includes details of certain risk factors that could materially affect the potential development of the Mineral Resources and Mineral Reserves and should be considered carefully. A discussion of these and other factors is contained in "Risk Factors" and elsewhere in the Company's AIF, which was filed on SEDAR on February 17, 2021.

Exploration Target Potential: The potential quantity and grade of the exploration targets referred to are conceptual in nature and insufficient exploration work has been completed to define a Mineral Resource. The property will require significant future exploration to advance to a resource stage and there can be no certainty that the exploration target will result in a Mineral Resource being delineated. The exploration targets are consistent with similar deposits in the area, deposit models or derived from initial drilling results.

Cautionary Note to Investors Concerning Estimates of Measured and Indicated Resources

This presentation uses the terms "measured resources" and "indicated resources". We advise investors that while that term is recognized and required by Canadian regulations, the United States Securities and Exchange Commission (the "SEC") does not recognize them. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Cautionary Note to Investors Concerning Estimates of Inferred Resources

This presentation also uses the term "inferred resources". We advise investors that while this term is recognized and required by Canadian regulations, the SEC does not recognize it. "Inferred resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.

IAMGOLD – Positioned for Profitable Growth

- Diversified Operating
 Portfolio
- Operating in three regions (North/South America, W. Africa) with 2021 guidance of 630-700koz¹
- Disciplined approach to realizing value targeting a self-funding model at each operation
- Operating improvements: Essakane optimization, Saramacca ramp-up, Westwood 'hub-and-spoke'

- Culture of Accountable Mining
- Zero Harm® commitment and Focus on Safety, while building strong community partnerships
- Rapid COVID-19 response with extensive steps taken to protect the health & safety of employees and contractors

- Compelling Value & Production Growth
- Peer-leading organic growth profile targeting gold production to >1 Mozpa by 2024 as Côté Gold brought online^{2,3}
- Attractive value opportunity relative to peers on P/CF, EV/EBITDA and P/NAV metrics

Strong Financial Position

- Strong liquidity position of close to \$1.5B, including \$968M in cash & cash equivalents, and improving operating margins at existing operations⁴
- Fully funded growth pipeline

V

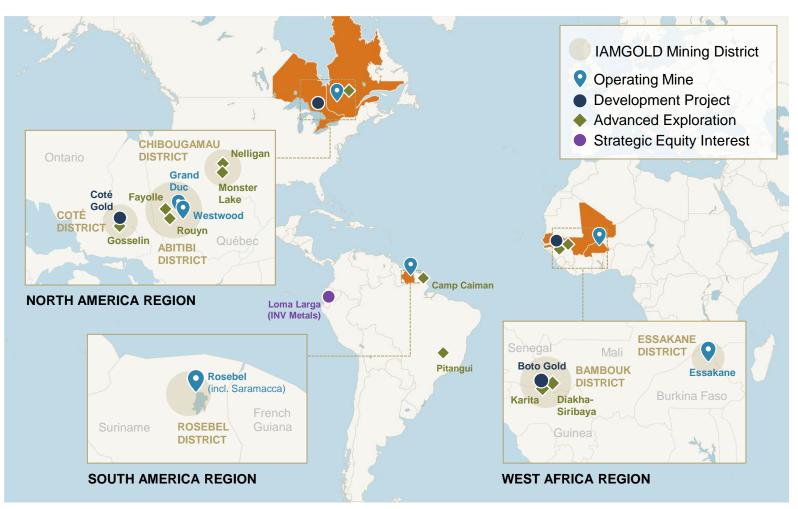

Robust Pipeline of Projects

- Industry leading Reserve growth exceeding 75% since 2016 to 13.9Moz⁵ as at YE20
- Near-site district growth: Saramacca (Rosebel), Gosselin (Côté), Fayolle / Rouyn (Westwood)
- Re-seeding the pipeline with long-term growth: Bambouk and Chibougamau Districts

Environmental, Social and Governance (ESG)

Zero Harm® is our commitment to continually strive to reach the highest standards in human health & safety, minimize our environmental footprint, and work co-operatively with our host communities

Recent **Highlights**

- Received Mining Association of Canada's prestigious Towards Sustainable Mining® (TSM) Excellence Award in the Environmental category for innovative recycling of plastic at Essakane
- Implementing the World Gold Council's **Responsible Gold Mining Principles**
- Received highest level (GA-1) of Moody's Corporate **Governance** for the Metals and Mining Sector
- Ranked 10th out of 116 global mining companies on the Corporate Knights 2021 Global 100 Sustainability scorecard
- Included in the 2021 Bloomberg Gender-Equality Index for the 3rd consecutive year, and recognized among 380 global companies that foster a more inclusive and equitable workplace

- Commissioned the world's largest hybrid solar/thermal plant at Essakane
- Investment of \$1.35 million to improve community access to high-quality medical care in Suriname
- · Public-Private Partnership with Canada's Gov't, One Drop Foundation, and Cowater on Triangle d'Eau project; Completed Phase I bringing potable water to 60,000 people near ESK; Advancing Phase II (75,000 people)
- Rosebel Community Fund, with initial funding of \$2.5 million to provide grants to local projects with positive economic and/or social impacts. Recently funded \$400,000 for solar LED street lights for public security, electrification and potable water supply in communities around Rosebel and Saramacca
- V.E. (Vigeo Eiris)¹ ESG ranks IAMGOLD 4th out of 45 sector peers
- In April 2021, upgraded to a rating of AA in the MSCI* ESG Ratings assessment, placing IAMGOLD among the top 15% of precious metals companies
- Investing \$950,000 in a 4-year Giants of Africa program, aimed at encouraging the development of youth through sports in Burkina Faso, Senegal and Mali

Fore more information, see our 2019 Sustainability report at https://www.iamgold.com

COVID-19: Q1 2021 Update

Health & Safety Protocols Embedded in our Operations and Projects

- **Essakane** implemented additional measures including thermal screening of all personnel and visitors entering site and Ouagadougou office; 20-bed field hospital and medical confinement house established in Ouagadougou in 2020 remain to accommodate any future COVID-19 cases.
- Westwood in addition to existing protocols, random antigen testing on site to further protect workforce against COVID-19.
- Rosebel increased COVID-19 cases in Suriname and site led to a temporary suspension of daily commuting by employees during the quarter; offsite employees required to remain at site during their work cycle; to enable mining capacity to increase to full complement, added 150 beds in Q1; addition of further 210 beds in the second quarter.
- Côté in addition to existing protocols, combination of PCR and antigen testing of all personnel and visitors entering site; mandatory antigen testing at Sudbury and Timmins bus terminals to detect COVID-19 cases before individuals board buses.

Community Support and Engagement

- Donations to local communities in response to the COVID-19 pandemic, allocating US\$1.5M globally in 2020, including: Cleaning equipment and supplies / PPE / Life support equipment.
- Rosebel Community Fund and SEMiF finance new BOG cooling system of the Central Laboratory which
 provides critical testing capacity for HIV, Malaria, Influenza, Tuberculosis and more recently COVID-19.
- Contributing \$250,000 to UNICEF to support the International ACT-A / COVAX Emergency Response.

Completed Phase I of the Triangle d'Eau Project, bringing potable water to 60.000 people near Essakane¹

BOTTOM: Grand Duc Open Pit Operations

KEY NOTES

Current Status

- Assessing business continuity following seismic event in the west part of the mine in Q4 2020
- Staged recall commenced in Q2 2021, with activities focused on training and rehabilitation work⁴

Progressing Development

- Targeting safe, profitable, long life mine
- Potential to focus on near term mining in the East Zone of the mine

Resource Conversion

- Delineation drilling to target conversion of resources into reserves
- Focus on upgrading resources at the satellite Grand Duc open pit

Northwestern Québec, Canada

Westwood – "Hub-and-Spoke" Model

ATTRACTIVE DISTRICT EXPLORATION POTENTIAL THAT COULD SUPPLEMENT EXCESS MILL CAPACITY

FAYOLLE PROPERTY (OP) 100% ACQUIRED FROM MONARCH GOLD IN JUNE 2020

- ~35 km northeast of Rouyn-Noranda and ~29 km northwest from Westwood
- 39 mineral claims covering an area of 1,373 hectares (14 km²)
- Resource estimate work ongoing with focus on high-grade near-surface mineralization
- Target production 20-25koz over 2 years, commencing Q4 2022, pending permitting¹
- Historical 2019 drill highlights²:
 - 6.1m grading 8.37 g/t
 - 2.7m grading 50.94 g/t
 - 3.0m grading 37.97 g/t
 - 4.0m grading 15.79 g/t

B ROUYN GOLD PROJECT (UG)

OPTION TO ACQUIRE 100% FROM YORBEAU RESOURCES

- 4 km south of Rouyn-Noranda and ~40 km west from Westwood
- 4 known gold deposits on a 2,700 hectare property covering a 12 km stretch of the prolific Cadillac-Larder Lake Break
- Exploration Target Potential¹ of 400-600koz at 6-8 g/t Au at underground Lac Gamble zone
- Anticipated 3-4 year permitting timeline¹
- Recent drill highlights³:
 - 9.8 m grading 27.8 g/t
 - 9.8 m grading 10.4 g/t
 - 29.7 m grading 9.0 g/t
 - 7.6 m grading 9.7 g/t

Construction Review

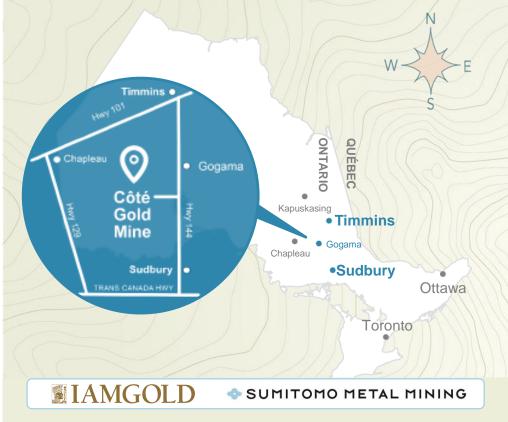

Transformational Value in Canada

CÔTÉ GOLD – CONSTRUCTION PROGRESS

- Major earthworks commenced ahead of schedule, focused on road widening and overburden stripping
- Commenced water management infrastructure for the tailings management facility
- Temporary camp complete with construction of permanent camp underway
- Procurement and expediting of major equipment contracts are progressing with the contract for the mining fleet being awarded in Q1
- 2021 Focus areas: earthwork construction, haul road construction, initial open pit pre-stripping and water management infrastructure around pit site
 - Commission portion of permanent camp in Q2 (fully commission in Q3)
 - Civil works underway at plant site, concrete activities expected to start in Q2

- Ownership: 92.5% JV (70:30 IAMGOLD/SMM); 7.5% 3rd party
- · Mining friendly jurisdiction near Gogama, ON, Canada
 - 130 km SW of Timmins, and 200 km NW of Sudbury
- Skilled local labour pool
- Close to infrastructure:
 - 6km west of Highway 144
 - Close to two main rail lines
 - Existing power supply 45 km from site

2021 OUTLOOK

- Côté district greenfield budget of \$2.8 million
- ~13,000-16,000 metres of planned diamond drilling, including 12,000-14,000 metres of delineation drilling
- Targeting maiden resource estimate in H2 2021

DRILL HIGHLIGHTS (2019/2020)²

- 342.5 metres at 0.98 g/t Au
 - incl. 225.0 metres at 1.34 g/t Au
- 412.0 metres at 1.28 g/t Au
 - incl. 221.4 metres at 1.47 g/t Au
- 353.0 metres at 1.04 g/t Au
 - incl. 46.0 metres at 3.39 g/t Au
- 202.0 metres at 1.22 g/t Au
 - incl. 151.0 metres at 1.50 g/t Au
- 86.0 metres at 5.57 g/t Au
 - incl. 30.4 metres at 14.70 g/t Au

Boto Gold – High Margin Investment in Prospective District

OVERVIEW

Location	Senegal, West Africa
Ownership	 90% IAMGOLD / 10% Gov't of Senegal
Mining Method	Conventional open pit
Highlights	 Along same trend as B2Gold's Fekola Mine in Mali
	 Mining permit received in 2019 for an initial period of 20 years¹
	 De-risking for future construction decision: advancing early works (access road, plant engineering, camp, sustainability)

OPTIMIZATION STUDY HIGHLIGHTS¹

(100% basis, LOM Average)

Mine Life	11 years	
Mining Capacity: open pit	38 Mtpa	
Processing: crush, grind, gravity, leach, CIP (hard rock equivalent)	2.7 Mtpa (HR equivalent)	
Strip Ratio (waste:ore)	7.5 : 1	
Head Grade	1.71 g/t Au	
Recovery Rate	89.4%	
Annual Gold Production	130,000 oz	
Annual Gold Production (years 1-6)	160,000 oz	
Total Cash Costs (TCC)	\$778/oz	
All-in Sustaining Costs (AISC)	\$842/oz	
Initial Capital Expenditures	\$271 million	
Sustaining Capital Expenditures	\$68 million	

PROJECT ECONOMICS (100%)¹

RESERVES AND RESOURCES²

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
P&P Reserves	26,136	1.7	1,434
M&I Resources*	36,510	1.6	1,830
Inferred Resources	7,376	1.8	422

^{*} Inclusive of mineral reserves

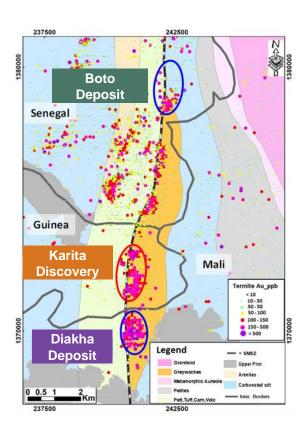

Bambouk District: Boto – Karita – Diakha-Siribaya

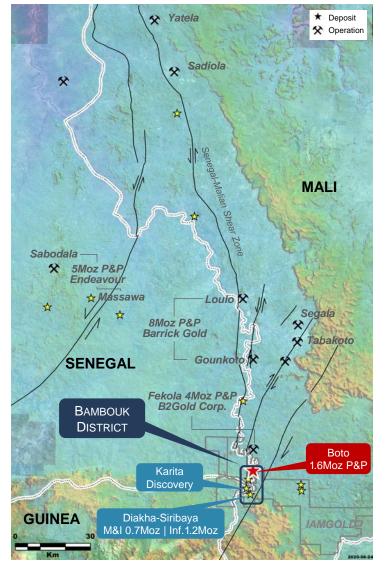

KARITA DISCOVERY (100% INTEREST)

- Located in north-eastern Guinea covering an area of 100 km²
- Acquired 100% in 2017 as a granted exploration permit
- Initial resource estimate expected in 2022
- Reported results from 2019 drilling program, comprising 16 reverse circulation (RC) drill holes totaling 1,839 metres. Highlights included¹:
 - 29.0 m grading 2.96 g/t Au
 - 16.0 m grading 3.17 g/t Au
 - 21.0 m grading 9.01 g/t Au

DIAKHA DEPOSIT (90% INTEREST)

- Located less than 1 km south of Karita across the border of western Mali
- 8 contiguous exploration permits covering 596.5 km²
- Hosts an indicated resource of 18.0 million tonnes grading 1.28 g/t for 0.7 Moz and inferred resources of 23.2 million tonnes grading 1.58 g/t for 1.2 Moz²
- ~28,000 metres of infill drilling is planned in 2021 to upgrade inferred resources

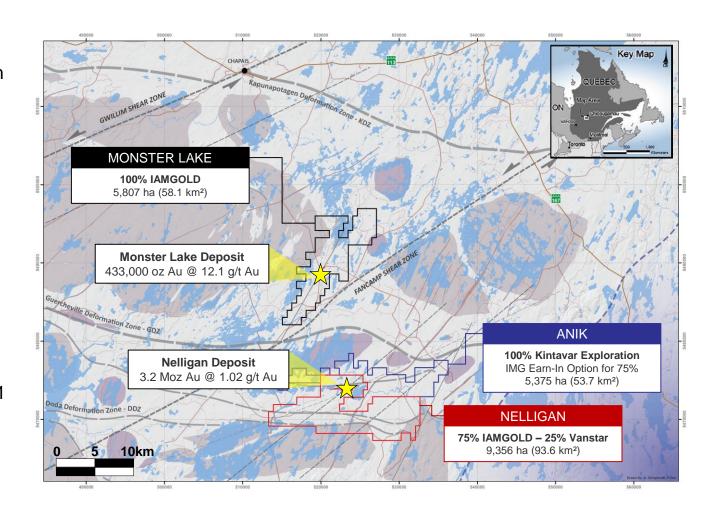

Chibougamau: Emerging Prospective District in Québec, Canada

NELLIGAN (75% JV INTEREST)

- Located 60 kilometres southwest of Chibougamau, Québec
- Exercised option to increase undivided interest to 75% (from 51%), following completion of NI 43-101 Technical Report
- Completed initial resource estimate, comprising 97 million tonnes grading 1.02 g/t Au for 3.2 Moz¹
- Awarded 2019 AEMQ Discovery of the Year
- Recent drill highlights²:
 - 39.1 metres @ 2.14 g/t Au
 - 17.3 metres @ 7.62 g/t Au

MONSTER LAKE (100% INTEREST)

- 15 kilometres north of Nelligan
- Consolidated 100% ownership in 2020
- Hosts an inferred resource of 1.1 million tonnes grading 12.1 g/t for 433,000 oz¹
- Recent drill highlights³:
 - 3.8 metres @ 16.9 g/t Au
 - 2.82 metres @ 5.63 g/t Au
 - 12.3 metres @ 2.09 g/t Au

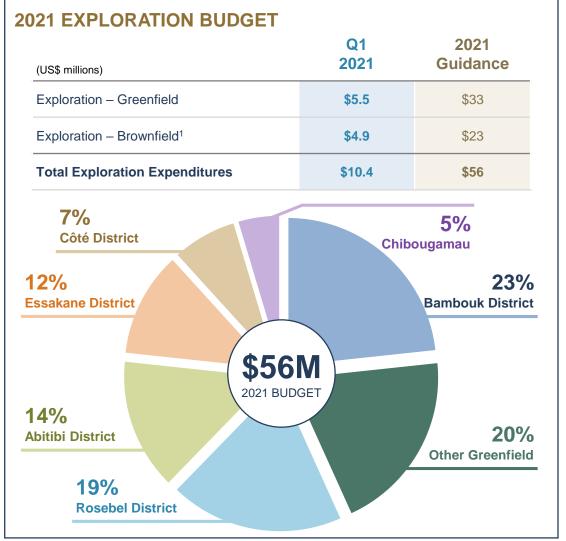

Advancing Exploration Activities in Key Districts

IAMGOLD – Positioned for Profitable Growth

Appendix

2021 Outlook¹

PRODUCTION & COST GUIDANCE

(000s oz)	2021 GU	JIDANCE ¹
Essakane (90%)	365	- 390
Rosebel (95%)	220	- 245
Westwood (100%)	45	- 65
Total Attributable Production	630	- 700
Cost of sales ² (\$/oz)	\$980	- \$1,030
Total cash costs ³ (\$/oz)	\$930	- \$980
All-in sustaining costs ³ (\$/oz)	\$1,230	- \$1,280

^{1. 2021} Guidance is based on full year assumptions with an average realized gold price of \$1,750 per ounce, USDCAD exchange rate of 1.30, EURUSD exchange rate of 1.19 and average crude oil price of \$47 per barrel.

CAPITAL EXPENDITURE GUIDANCE

(\$ millions)	Sustaining ¹	Expansion ²	Total ³
Essakane	\$60	\$90	\$150
Rosebel	\$50	\$75	\$125
Westwood	\$10	\$10	\$20
Operating	\$120	\$175	\$295
Côté Gold Project	-	\$355	\$355
Boto Gold Project	-	\$60	\$60
Total (±5%) 3,4,5	\$120	\$590	\$710

^{1.} Sustaining capital includes capitalized stripping of \$10 million for Essakane.

^{2.} Cost of sales, excluding depreciation, is on an attributable ounce sold basis (excluding the non-controlling interest of 10% at Essakane and 5% at Rosebel).

^{3.} On an attributable basis. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of IAMGOLD's most recent MD&A.

^{2.} Expansion capital includes capitalized stripping of \$65 million for Essakane and \$45 million for Rosebel.

^{3.} Includes \$13 million of capitalized exploration and evaluation expenditures.

^{4.} Capitalized borrowing costs are not included.

^{5.} In addition to the above capital expenditures, \$23 million in total principal lease payments are expected.

Reducing Input Exposure Through Hedging

	2021	2022	2023	2024
Foreign Currency ¹				
Canadian dollar contracts (millions of C\$)	234	210	185	_

Hedge ratio	40%	29%	33%	_
Commodities ^{1,3,4}				
Brent oil contracts (barrels)	441	520	428	270
Contract price range (\$/barrel of crude oil)	54 – 65	50 – 65	41 – 65	41 – 55
Hedge ratio	77%	69%	57%	37%
WTI oil contracts (barrels, 000s)	447	573	473	270
Contract price range (\$/barrel of crude oil)	31 – 62	38 – 62	36 – 60	38 – 50
Hedge ratio	89%	92%	71%	40%
Gold bullion option contracts (ounces, 000s)	145	18	24	_
Contract price range (\$/ounce)	1,600 – 3,000	1,800 – 3,000	1,700 - 2,700	_
Hedge ratio ⁵	21% – 23%	_	_	_

In Q2 2021, the Company entered into prepayment forward sale contracts at a cost of 4.44% per annum in respect of 50,000 gold ounces at an average price of \$1,753 per ounce, which will result in a total prepayment to the Company of \$80.3 million over the course of 2022 and the requirement on the part of the Company to physically deliver such ounces to the counterparties over the course of 2024. These transactions have the effect of rolling one-third of the 2019 prepayment arrangement from 2022 to 2024, with the new gold deliveries occurring after the completion of the Côté Gold Project.

^{5.} Gold hedge ratio based upon 2021 production guidance range of 630-700koz.

^{1.} The Company executed currency and fuel hedges due to favourable market conditions relative to internal planning rates.

^{2.} The Company executed Canadian dollar collar options, which consist of Canadian dollar call and put options within the given range in 2021 through 2023. The Company will recognize a gain from the difference between a lower market price and the Canadian dollar call strike price. The Company will incur a loss from the difference between a higher market price and the Canadian dollar put strike price.

^{3.} The Company executed Brent and WTI collar options, which consist of Brent and WTI put and call options with strike prices within the given range in 2021 through 2024. The Company will incur a loss from the difference between a higher market price and the put strike price. The Company will recognize a gain from the difference between a higher market price and the call strike price.

^{4.} The Company executed gold collar options, which consist of gold put and call options with strike prices within the given range in 2021 and 2023. The Company will incur a loss from the difference between a higher market price and the call strike price. The Company will recognize a gain from the difference between a lower market price and the put strike price. Gold hedges in 2022 do not include the 150,000 ounces which the Company has committed to deliver to its counterparties under the 2019 prepayment arrangement. The 2019 prepayment arrangement established hedge prices of \$1,300 - \$1,500/oz and was funded at \$1,300/oz.

2020 Attributable Reserves & Resources

R&R REFLECTS SALE OF SADIOLA, WESTWOOD UPDATE IN MID-2020, AND MINE DEPLETION

As at December 31, 2020 (000s ounces)	2020	% ▲	2019
Proven and Probable Mineral Reserves ¹	13,937	(17%)	16,706
Measured and Indicated Mineral Resources ^{2,3}	23,910	(12%)	27,164
Inferred Resources	11,268	(6%)	11,965

- Sadiola reserves and resources have been estimated by our joint venture partner using \$1,200 per ounce and \$1,400 per ounce, respectively and are included in 2019 figures. 2020 figures exclude Sadiola, following completion of its sale⁴.
- Mineral Reserves have been estimated at December 31, 2020, using a gold price of \$1,200 per ounce for Essakane, Rosebel, Saramacca,
 Westwood, and the Boto Gold Project, and a gold price of \$1,350 per ounce for the Grand Duc satellite pit at Westwood.
- Mineral resources have been estimated at December 31, 2020 using a gold price of \$1,500 per ounce for Essakane, Rosebel, and resource-stage projects and \$1,200 per ounce for Westwood.

⁴ See IAMGOLD news release dated December 30, 2020.

¹ Detail behind the gold price assumptions used to determine reserves and resources can be found in the Reserves and Resources section of IAMGOLD's MD&A.

² Measured and indicated gold resources are inclusive of reserves.

³ In mining operations, measured and indicated resources that are not mineral reserves are considered uneconomic at the price used for reserves estimations, but are deemed to have a reasonable prospect of economic extraction.

Notes to the Gold Mineral Resources Statement

- 1 In mining operations, Measured Mineral Resources and Indicated Mineral Resources that are not Mineral Reserves are considered uneconomic at the price used for Mineral Reserve estimations but are deemed to have a reasonable prospect of economic extraction.
- 2 Although "measured resources", "indicated resources" and "inferred resources" are categories of mineralization that are recognized and required to be disclosed under Canadian regulations, SEC Industry Guide 7 does not recognize them. Disclosure of contained ounces is permitted under Canadian regulations; however, SEC Industry Guide 7 generally permits resources to be reported only as in place tonnage and grade. See "Cautionary Note to U.S. Investors Regarding Disclosure of Mineral Reserve and Mineral Resource Estimates".
- 3 Rosebel, Saramacca, Essakane, Côté Gold, Boto Gold, Nelligan, Gossey, Monster Lake, and Diakha-Siribaya and Pitangui Mineral Resources have been estimated as of December 31, 2020 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101.
- 4 Westwood Mineral Resources have been estimated as of December 31, 2020 using a 5.5 g/t gold cut-off over a minimum width of 2.4 metres and have been estimated in accordance with NI 43-101. The Grand Duc Mineral Resource estimate is included in the Westwood Mineral Resources. Grand Duc Mineral Resources have been estimated using a 0.39 g/t Au cut-off grade and a gold price of \$1,500/oz
- 5 Due to rounding, numbers presented throughout this document may not add up precisely to the totals.
