# Cautionary Statement

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

All information included in this presentation, including any information as to the Company's future financial or operating performance and other statements that express management's expectations or estimates of future performance, including statements in respect of the prospects and/or development of the Company's projects, other than statements of historical fact, constitutes forward-looking information or forward-looking statements within the meaning of applicable securities laws (collectively referred to herein as "forward-looking statements") and such forward-looking statements are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements are generally identifiable by the use of words such as "may", "will", "should", "continue", "expect", "budget", "aim", "can", "focus", "forecast", "anticipate", "estimate", "believe", "intend", "plan", "schedule", "guidance", "outlook", "potential", "seek", "targets", "cover", "strategy", "during", "ongoing", "subject to", "future", "objectives", "opportunities", "committed", "prospective", or "project" or the negative of these words or other variations on these words or comparable terminology. For example, forward-looking statements in this presentation include, without limitation, those under the headings "Outlook", "Quarterly Updates", "Exploration", "Liquidity and Capital Resources" and "Market Trends" and include, but are not limited to, statements with respect to: the estimation of mineral reserves and mineral resources and the realization of such estimates; operational and financial performance including the Company's guidance for and actual results of production, costs and capital and other expenditures such as exploration and including depreciation expense and effective tax rate; the expected costs and schedule to complete construction of the Côté Gold project; the updated life-of-mine plan, ramp up assumptions and other project metrics including operating costs in respect to the Côté Gold project; expected benefits from the operational improvements and de-risking strategies implemented or to be implemented by the Company; mine development activities; the Company's capital allocation; the composition of the Company's portfolio of assets including its operating mines, development and exploration projects; the completion of the sale of the Bambouk assets; permitting timelines and the expected receipt of permits; inflation and inflationary pressures; global supply chain constraints; the ability to secure alternative sources of consumables of comparable quality and on reasonable terms; workforce and contractor availability, labour costs and other labour impacts; the impacts of weather; the future price of gold and other commodities; foreign exchange rates and currency fluctuations; impairment assessments and assets carrying values estimates; safety and security concerns in the jurisdictions in which the Company operates and the impact thereof on the Company's operational and financial performance and financial condition; and government regulation of mining operations.

The Company cautions the reader that forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, financial, operational and other risks, uncertainties, contingencies and other factors, including those described below, which could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements and, as such, undue reliance must not be placed on them. Forward-looking statements are also based on numerous material factors and assumptions, including as described in this presentation, including with respect to: the Company's present and future business strategies; operations performance within expected ranges; anticipated future production and cash flows; local and global economic conditions and the environment in which the Company will operate in the future; the price of precious metals, other minerals and key commodities; projected mineral grades; international exchanges rates; anticipated capital and operating costs; the availability and timing of required governmental and other approvals for the construction of the Company's projects.

Risks, uncertainties, contingencies and other factors that could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements include, without limitation: the ability of the Company to successfully complete the construction of Côté Gold and commence commercial production from the mine; the ability of the Company to complete the sales of the remaining Bambouk assets; the Company's business strategies and its ability to execute thereon; security risks, including civil unrest, war or terrorism and disruptions to the Company's supply chain as a result of such security risks, particularly in Burkina Faso and the Sahel region surrounding the Company's Essakane mine; the ongoing impacts of COVID-19 (and its variants) on the Company and its workforce; the availability of labour and qualified contractors; the availability of key inputs for the Company's operations and disruptions in global supply chains; the volatility of the Company's securities; litigation; contests over title to properties, particularly title to undeveloped properties; mine closure and rehabilitation risks; management of certain of the Company's assets by other companies or joint venture partners; the lack of availability of insurance covering all of the risks associated with a mining company's operations; unexpected geological conditions; competition and consolidation in the mining sector; the profitability of the Company being highly dependent on the condition and results of the mining industry as a whole, and the gold mining industry in particular; changes in the global prices for gold, and commodities used in the operation of the Company's business (such as diesel and electricity); legal, litigation, legislative, political or economic risks and new developments in the jurisdictions in which the Company carries on business; changes in taxes, including mining tax regimes; the failure to obtain in a timely manner from authorities key permits, authorizations or approvals necessary for exploration, development or operation, operating or technical difficulties in connection with mining or development activities, including geotechnical difficulties and major equipment failure; the inability of the Company to participate in any gold price increase above the cap in any collar transaction entered into in conjunction with certain gold sale prepayment arrangements; the availability of capital; the level of liquidity and capital resources; access to capital markets and financing; the Company's level of indebtedness; the Company's ability to satisfy covenants under its credit facilities; changes in interest rates; adverse changes in the Company's credit rating; the Company's choices in capital allocation; effectiveness of the Company's ongoing cost containment efforts; the Company's ability to execute on de-risking activities and measures to improve operations; availability of specific assets to meet contractual obligations; risks related to third-party contractors, including reduced control over aspects of the Company's operations and/or the failure and/or the effectiveness of contractors to perform; risks arising from holding derivative instruments; changes in U.S. dollar and other currency exchange rates or gold lease rates; capital and currency controls in foreign jurisdictions; assessment of carrying values for the Company's assets, including the ongoing potential for material impairment and/or write-downs of such assets; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; the fact that reserves and resources, expected metallurgical recoveries, capital and operating costs are estimates which may require revision; the presence of unfavourable content in ore deposits, including clay and coarse gold; inaccuracies in life of mine plans; failure to meet operational targets; equipment malfunctions; information systems security threats and cybersecurity; laws and regulations governing the protection of the environment; employee relations and labour disputes; the maintenance of tailings storage facilities and the potential for a major spill or failure of the tailings facilities due to uncontrollable events, lack of reliable infrastructure, including access to roads, bridges, power sources and water supplies; physical and regulatory risks related to climate change; unpredictable weather patterns and challenging weather conditions at mine sites; disruptions from weather related events resulting in limited or no productivity such as forest fires, flooding, heavy snowfall, poor air quality, and extreme heat or cold; attraction and retention of key employees and other qualified personnel; availability and increasing costs associated with mining inputs and labour, negotiations with respect to new, reasonable collective labour agreements may not be agreed to; the ability of contractors to timely complete projects on acceptable terms; the relationship with the communities surrounding the Company's operations and projects; indigenous rights or claims; illegal mining; the potential direct or indirect operational impacts resulting from external factors, including infectious diseases, pandemics, or other public health emergencies; and the inherent risks involved in the exploration, development and mining business generally. Please see the Company's AIF or Form 40-F available on [www.sedar.com](http://www.sedar.com) or [www.sec.gov/edgar.shtml](http://www.sec.gov/edgar.shtml) for a comprehensive discussion of the risks faced by the Company and which may cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by forward-looking statements.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

# Technical Information and Qualified Persons

## CAUTIONARY NOTE TO U.S. INVESTORS REGARDING DISCLOSURE OF MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

The mineral resource and reserve estimates contained in this presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") – CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). These standards are similar to those used by the United States Securities and Exchange Commission (the "SEC") Industry Guide No. 7, as interpreted by SEC staff ("Industry Guide 7"). However, the definitions in NI 43-101 and the CIM Standards differ in certain respects from those under Industry Guide 7. Accordingly, mineral resource and reserve information contained in this presentation may not be comparable to similar information disclosed by United States companies. Under Industry Guide 7, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made.

As a result of the adoption of amendments to the SEC's disclosure rules (the "SEC Modernization Rules"), which more closely align its disclosure requirements and policies for mining properties with current industry and global regulatory practices and standards, including NI 43-101 and the CIM Standards, and which became effective on February 25, 2019, the SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources." In addition, the SEC has amended definitions of "proven mineral reserves" and "probable mineral reserves" in its amended rules, with definitions that are substantially similar to those used in NI 43-101 and the CIM Standards. Issuers must begin to comply with the SEC Modernization Rules in their first fiscal year beginning on or after January 1, 2021, though Canadian issuers that report in the United States using the Multijurisdictional Disclosure System ("MJDS") may still use NI 43-101 rather than the SEC Modernization Rules when using the SEC's MJDS registration statement and annual report forms.

United States investors are cautioned that while the SEC now recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under the SEC Modernization Rules, investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. These terms have a great amount of uncertainty as to their economic and legal feasibility. Under Canadian regulations, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances.

Investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources", or "inferred mineral resources" that the Company reports in this presentation are or will be economically or legally mineable. Further, "inferred mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category.

## QUALIFIED PERSON AND TECHNICAL INFORMATION

The technical and scientific information relating to exploration activities disclosed in this document was prepared under the supervision of and verified and reviewed by Craig MacDougall, P.Geo., Executive Vice President, Growth, IAMGOLD. Mr. MacDougall is a "qualified person" (a "QP") as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

Data verification involves data input and review by senior project geologists at site, scheduled weekly and monthly reporting to senior exploration management and the completion of project site visits by senior exploration management to review the status of ongoing project activities and data underlying reported results. All drilling results for exploration projects or supporting resource and reserve estimates referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced news releases) and have been prepared in accordance with NI 43-101. The sampling and assay data from drilling programs are monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. Drill core (HQ and NQ size) samples are selected by the project geologists and sawn in half with a diamond saw at the project site. Half of the core is typically retained at the site for reference purposes. Generally, sample intervals are 1.0 to 1.5 metres in length and reverse circulation holes are sampled at 1.0 metre intervals at the drill rig. Samples are prepared and analyzed at site for the Company's producing mines and at accredited regional laboratories for the Company's exploration projects, using analysis techniques such as standard fire assay with a 50 gram charge; fire assay with gravimetric finish, or LeachWELL rapid cyanide leach with fire assay with a 50 gram charge.

Lisa Ragsdale, P.Geo (Director, Mining Geology, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral resource estimates contained herein, as at December 31, 2022. Guy Bourque, Eng. (Director, Mining, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral reserve estimates contained herein, as at December 31, 2022.

The technical information has been included herein with the consent and prior review of the above noted QPs, who have verified the data disclosed, and data underlying the information or opinions contained herein.

## NON-GAAP FINANCIAL MEASURES

This presentation contains non-GAAP financial measures, including average realized gold price per ounce sold, cash costs, cash costs per ounce sold, AISC, AISC per ounce sold, net cash from operating activities before changes in working capital, mine-site free cash flow, liquidity, net cash (debt), EBITDA, adjusted EBITDA, adjusted net earnings (loss) attributable to equity holders and adjusted net earnings (loss) per share attributable to equity holders, sustaining capital expenditures, expansion capital expenditures, and project expenditures. The non-GAAP financial measures disclosures included in the Company's Q2 2023 MD&A are incorporated by reference in this presentation.

Further details on these non-GAAP financial measures are included on pages 31 to 37 of the Company's Q2 2023 MD&A filed on SEDAR at [www.sedar.com](http://www.sedar.com) and on EDGAR at [www.sec.gov](http://www.sec.gov).

# IAMGOLD – Building a Leading High-Margin Gold Producer

## ESTABLISHING A STRONG FOUNDATION

- **Côté Gold:** One of the largest gold mines in Canada with production expected in early 2024
- **Essakane:** 6<sup>th</sup> largest gold mine in West Africa averaging 396,000 oz per year over last 5 years
- **Westwood:** moving toward positive cashflow with a revised technical approach to mine planning
- 2023 production guidance of 410,000 – 470,000 ounces @ AISC<sup>1</sup> of \$1,625 – \$1,700 per ounce

## COMMITMENT TO ESG

- Industry leader with its Zero Harm<sup>®</sup> commitment and focus on safety
- Preparing inaugural TCFD report in 2023 outlining roadmap and GHG emission reduction targets by 2030
- A strong belief that community partnerships are founded upon relationships that foster trust, transparency and mutual respect

## FINANCIAL CAPACITY

- Liquidity position of ~\$1.2 billion<sup>2</sup>, including \$747.7 million in cash & equivalents
- IAG funding to complete Côté of \$460 – \$535 million, in partnership with Sumitomo<sup>3</sup>
- Prioritizing return to 70% interest in Côté following ramp up of production in 2024

## PIPELINE OF PROJECTS

- Proven exploration program focused on unlocking value in key districts with long-term potential near existing infrastructure
- Project pipeline with potential long-term growth: Côté, Gosselin and Chibougamau district

# Operations Overview

## CONSTRUCTION

### CÔTÉ GOLD

Ontario, Canada  
(60% IMG/40% SMM, 7.5% other<sup>3</sup>)

<b>Start-up</b>	Early 2024
<b>Mine type</b>	Open pit
<b>Estimated mine life</b>	~2041+
<b>Years 1 – 6</b> (100% basis)	<b>495,000 oz</b>
<b>Life-of-mine</b> (100% basis)	<b>365,000 oz</b> \$851/oz AISC

## PRODUCTION

### ESSAKANE

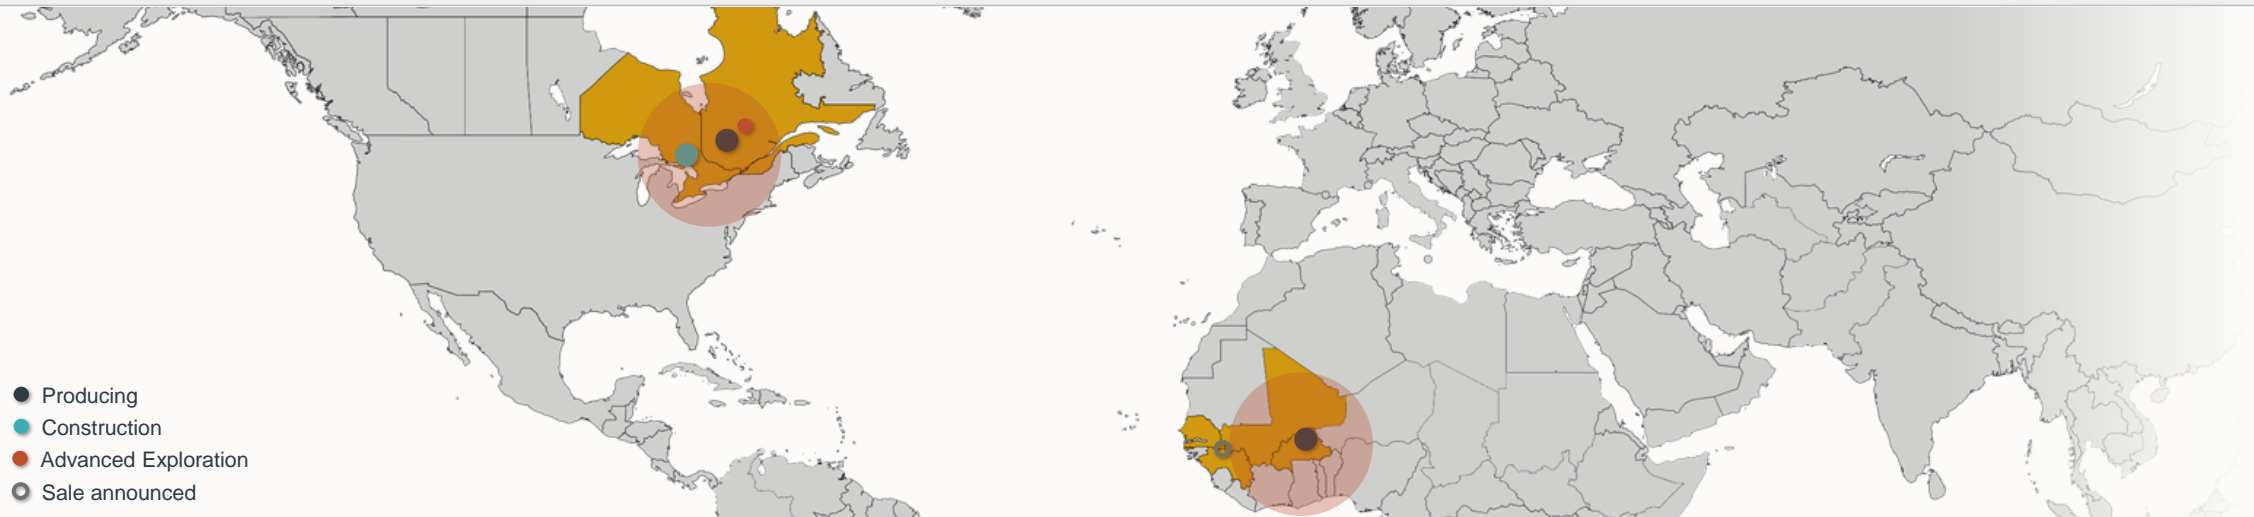

Burkina Faso, West Africa  
(90%)

<b>Start-up</b>	2010
<b>Mine type</b>	Open pit
<b>Estimated mine life</b>	~2027 <sup>1</sup>
<b>2022 Production, attr.</b>	<b>432,000 oz</b>
<b>2022 Cash costs   AISC</b>	\$899/oz   \$1,234/oz
<b>2023 Guidance., attr.</b>	<b>340,000 – 380,000 oz</b>

### WESTWOOD

Quebec, Canada  
(100%)

<b>Start-up</b>	2014
<b>Mine type</b>	Underground / Satellite OP
<b>Estimated mine life</b>	~2033+ <sup>2</sup>
<b>2022 Production, attr.</b>	<b>67,000 oz</b>
<b>2022 Cash costs   AISC</b>	\$2,068/oz   \$2,568/oz
<b>2023 Guidance., attr.</b>	<b>70,000 – 90,000 oz</b>

# Responsibility & Accountability

## ENVIRONMENTAL

- **Preparing inaugural TCFD report in 2023** outlining roadmap and GHG emission reduction targets
- **Targeting net positive biodiversity** at all operations
- Adherence and reporting to the **TSM Water Stewardship Protocol**

## GOVERNANCE & DIVERSITY

- **Board diversity with women representing ~44%** of directors; average tenure of < 2 years
- Established **guidelines on board diversity and renewal** in line with best practices
- **Sponsor of the Artemis Project**, which aims to promote female business owners and entrepreneurs in the mining sector

## SOCIAL/ECONOMIC DEVELOPMENT

- Essakane: **contributed \$9.5 million in 2022** to the Mining Fund for Local Development;
- Burkina: Phase II of the Triangle d'Eau Project was approved to **upgrade water infrastructure to bring potable water to an estimated additional 75,000 people**
- Côte Gold: implementation of socio-economic management and monitoring activities in collaboration with local partners

## ACKNOWLEDGEMENTS

- Ranked **AA in the MSCI<sup>2</sup> ESG Ratings** assessment, placing IAMGOLD among the **top 15%** of precious metals companies
- Ranked **5<sup>th</sup> out of 52 sector peers** by Moody's ESG Solutions
- Named by Corporate Knights to Canada's list of **2022 Best 50 Corporate Citizens**, placing 37<sup>th</sup> out of 332 firms

**IAMGOLD**

For more information, see our 2021 Sustainability report at <https://www.iamgold.com>

1. DART frequency rates (days away, restricted, transferred duty) per 200,000 hours worked. 2. In metric tonnes of CO<sub>2</sub>.

## HEALTH & SAFETY

IAMGOLD

Since 2007

**ZERO**

HARM | DAÑO | INCIDENT | SCHADE | KGOBALO

# Q2 2023 Highlights

## PRODUCTION

**Gold production** (*attr., cont. ops.*) of **107,000 ounces in Q2 | 220,000 ounces YTD**

- Essakane resumed mining and milling at full capacity with operations moving into a new phase of the pit
- Westwood saw higher grades from underground helping to mitigate operational impacts from poor air quality from wildfire smoke in the region

**Production guidance of 410,000 – 470,000 ounces reaffirmed**

## OPERATING COSTS

Cost of sales<sup>1</sup> of \$1,376/oz sold | \$1,277/oz sold YTD

**Cash costs<sup>2</sup> of \$1,372/oz sold | \$1,234/oz sold YTD**

**AISC<sup>2</sup> of \$1,912/oz sold | \$1,719/oz sold YTD**

**Costs expected to come in at the top end of the guided ranges: \$1,125 – \$1,175/oz sold for cash costs<sup>2</sup> and \$1,625 – \$1,700/oz for AISC<sup>2</sup>**

## RESPONSIBILITY & ACCOUNTABILITY

**DARTFR** (*days away, restricted, transferred duty*) of **0.39 YTD** trending downwards

**TRIFR** (*total recordable injuries*) of **0.68 YTD** trending downwards

**Roadmap for GHG emission reductions at each site being developed** towards a corporate roadmap, accompanying targets and the publication of the **first TCFD report by Q4 2023**

**Ranked AA in the MSCI ESG Ratings** assessment, placing IAMGOLD among the top 15% of precious metals companies

## OPERATING RESULTS

		Q2 2023	Q2 2022	YTD 2023	2023 GUIDANCE
Essakane (90%)	koz	88	107	180	340 – 380

1. Attributable ounces and capital expenditures account for IAMGOLD ownership interests at Essakane and Westwood of 90% and 100%, respectively.  
2. This is a non-GAAP financial measure. Refer to the "Non-GAAP Financial Measures" section on slide #3.  
3. Capital expenditures guidance ±5% at Essakane and Westwood.

# Financial Results

## LIQUIDITY *(as at June 30, 2023)*

### Cash and equivalents of \$747.7 million + total liquidity<sup>1</sup> of \$1.2 billion

- \$170.1 million of cash and equivalents held by Essakane, \$91.3 million held by Côté Gold
- Credit Facility: remains undrawn with **\$452.5 million available** subject to Net Debt to EBITDA and Interest Coverage covenants

**Gold Prepay Agreement<sup>2</sup>:** 150,000 ounces due for delivery in 2024

**\$400M Term Loan** announced on May 16, 2023

- 5 years, SOFR + 8.25%, call provisions of: 104% after year 2, 101% after year 3, 100% thereafter
- Improves balance sheet strength and flexibility**, allowing for credit facility to be available to support working capital and in case of unforeseen changes in operating or macroeconomic environment

## CASH FLOW

## FINANCIAL HIGHLIGHTS – *continuing operations*

(In \$ millions, unless otherwise stated)	Q2 2023	YTD 2023

# Côte Gold: Progress @ June 30, 2023

## PROJECT COMPLETION OF 85.7% AT END OF Q2 2023

- **Health and safety:** Total project hours of 11.5 million hours with a project TRIFR of 0.68.
- **Labour and workforce:** >1,900 workers on site in June achieving peak camp capacity.
- **Earthworks:** Overburden stripping substantially complete. Earthworks activities focus on the tailings management facility ("TMF") with Phase 1 completed in June.
- **Crushing circuit:** Primary crusher steel assembly restarted in June with installation of the overhead crane. HPGR crusher rolls and gear drives installed. Preparation for the cone crusher also commenced.
- **Processing plant:** Primary crusher structure advancing. HPGR rolls and gear drives installed. Installation of ball mill liners and ball mill motors progressing well.
- **Power:** Connection to the overhead power line has been completed with electrification of site ongoing.
- **Mining:** 7 autonomous haul trucks operating at the end of Q2, with a total of 14 now commissioned. Stockpile currently at approximately 2.0M tonnes ore. Commissioning of first electric shovel ongoing.

## REMAINING FUNDING REQUIREMENT FOR IAG:

**\$425–\$475M**  
remaining funding for IAG @60.3%<sup>1</sup>

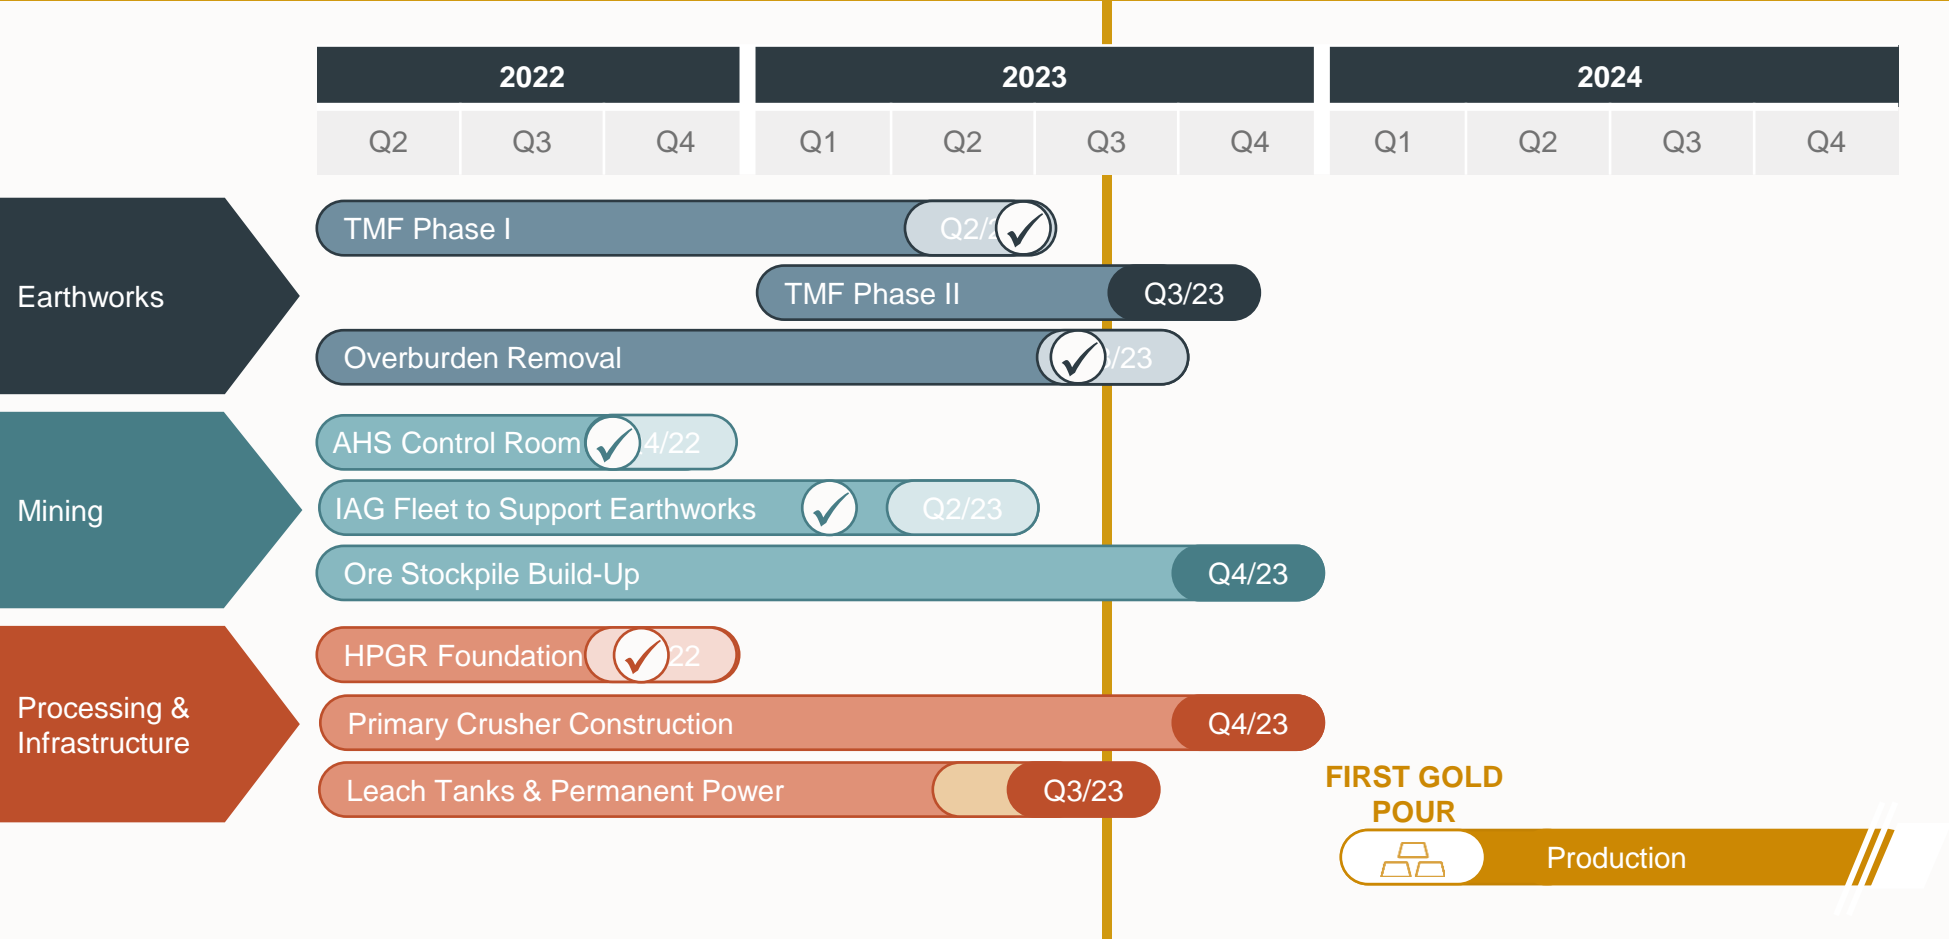

- Remaining costs to incur to complete<sup>1</sup>: \$665 – \$735M (@100%) | \$465 - \$515M (@ 70%)
- **\$2.23B of the planned \$2.965B** of project expenditures have been incurred as of June 30, 2023
- Funding adjusted from incurred cost to complete for: JV Funding and Amending Agreement<sup>2</sup> with Sumitomo, and changes in working capital, leases, and adjustments to the cash balance in the UJV

1. Assumes USDCAD rate of 1.32  
2. Refer to news release dated December 19, 2022

# Côte Gold: Upcoming Milestones

# Côte Gold: Gosselin

**15,500 m drilling campaign in 2023** to expand Gosselin mineralization ongoing with 12,900 m complete in H1 2023

- Assay results in 2022 intersected mineralization to the south of and below the current resource boundary of the model<sup>1</sup>

Remains **open along strike** to the northeast and has **only been drilled to half the depth of Côte**

**Gosselin discovery cost \$1.62/oz – from discovery to delineation**

**Technical studies planned** to advance metallurgical testing, conduct mining and infrastructure studies to review alternatives for potential inclusion of Gosselin deposit into a future Côte LOM plan

**Côte Gold Life of Mine Plan based on 7.2 million ounces of Mineral Reserves in Côte deposit**

## CÔTÉ GOLD PROJECT – MINERAL RESERVES & RESOURCES (2022)<sup>2,3,4</sup>

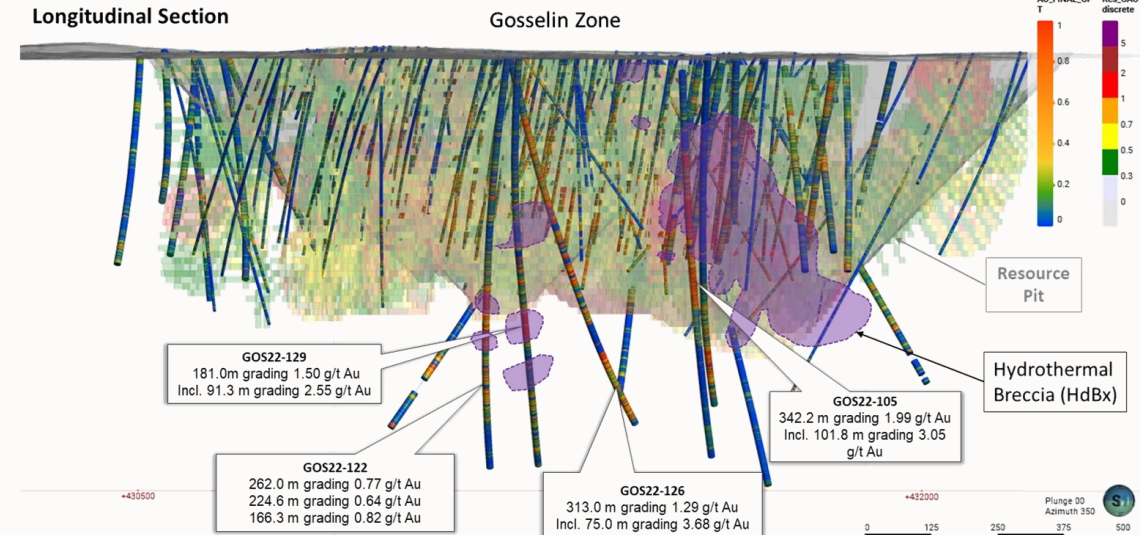

Classification	Tonnes (millions)	Grade (g/t Au)	Contained (Moz Au)	Attributable Contained (Moz Au)
<b>Côte Gold Deposit</b>				
P&P Reserves	233.3	1.0	7.17	4.65
M&I Resources <sup>4</sup>	365.9	0.9	10.21	6.61
Inferred	189.1	0.6	3.81	2.47
<b>Gosselin Deposit</b>

P&P Reserves	233.3	1.0	7.17	4.65
M&I Resources <sup>4</sup>	490.4	0.9	13.56	8.78
Inferred	262.0	0.7	5.52	3.58

### CÔTÉ & GOSSELIN LONGITUDINAL SECTION

- Refer to news release dated February 2, 2023
- Refer to IAMGOLD news release date August 3, 2022.
- Mineral resources are estimated at a cut-off grade of 0.3 g/t Au. Mineral reserves are estimated at a cut-off grade of 0.35 g/t Au
- M&I resources inclusive of mineral reserves.

### GOSSELIN 2022 DRILL PROGRAM HIGHLIGHTS<sup>1</sup>

# Essakane Gold Mine, Burkina Faso

# Essakane

## Q2 2023 OPERATIONAL REVIEW

**Attributable production of 88,000 ounces in Q2 | 180,000 ounces YTD**

**Cash costs<sup>1</sup> of \$1,273/oz | \$1,122/oz YTD** – increase due to higher strip ratio as the mine enters new phases, increases to the landed cost of fuel and fuel substitution due to the impact of the security situation on the supply chain, and higher labour costs due to the appreciation in the local currency

**AISC<sup>1</sup> of \$1,587/oz | \$1,377/oz YTD**

**Ore mined of 2.7M tonnes & mill throughput of 3.1M tonnes** – mining fleet and plant utilization return to full capacity

**Head grades of 1.11 g/t** in line with expectations as mining moves into Phase 5 of the pit and contribution of lower grade material from stockpiles

**Mill recoveries of 89%** due to higher concentrations of graphitic carbon and sulfur in new mining horizon

**Security situation** in Burkina Faso and region continues at elevated risk levels applying pressure to in-country supply chain and operations

## 2023 OUTLOOK

**Gold production (attr.) of 340,000 – 380,000 ounces** maintained

**Grades expected to remain flat over the course of the year** with modest improvements as mining activities progress into Phase 5 of the pit

**Capital expenditures guidance of \$155 million maintained**, with increased volumes of capitalized waste in the second half of the year to provide access to mining areas in support of the 2024 and 2025 production plan, assuming no significant disruptions in the supply chain resulting from the security situation

(100% basis, unless otherwise stated)

# Westwood Complex, Canada

# Westwood Complex

## Q2 2023 OPERATIONAL REVIEW

**Gold production of 19,000 ounces** – Limited impact due to wildfire smoke in the region

**Underground mining of 56,000 tonnes** with head grades of 7.32 g/t

- Highest underground grades since Q1 2018 due to contribution from rehabilitation of accessways and underground stopes

**Open pit mining contributed 156,000 tonnes** at 1.19 g/t

**Mill throughput of 251,000 tonnes** at blended head grade of 2.53 g/t

**Operating costs include \$2.4M** incurred from Fayolle development costs and remain highly sensitive to mine output – unit costs expected to decline as underground production ramps up

- Increase in level of ground support required for development and rehabilitation, though productivity rates also higher than planned

## 2023 OUTLOOK

**Gold production of 70,000 – 90,000 ounces**, with increasing proportion of ore from underground

- Includes contribution from satellite Fayolle deposit primarily in H2 2023

**Sustaining capital guidance increased to \$80 million** in support of increased underground development and rehabilitation work, ongoing renewal of the mobile fleet and fixed equipment, repairs to the Westwood mill, and other capital projects.

(100% basis, unless otherwise stated)		Q2 2023	Q2 2022	YTD 2023
Underground lateral development	metres	1,381	1,207	2,875

Cash costs <sup>1</sup>	\$/oz	\$1,896	\$2,427	\$1,761
All-in sustaining costs <sup>1</sup>	\$/oz	\$2,903	\$3,147	\$2,689

# Westwood Complex

## HISTORY

### Westwood began production in 2013

- Highest production years to date in 2017 and 2018 with production of 125,000 oz and 129,000 oz, respectively
- In 2020, underground was put on care & maintenance following a seismic event following a COVID-19 shutdown earlier in the year
- Production resumed through processing of stockpile material and Grand Duc satellite open pit ore

## UNDERGROUND DEVELOPMENT & REHABILITATION

### Underground lateral development of 2,875 m YTD 2023

- Securing safe access to multiple ore faces at different levels in the mine, increasing operational flexibility to allow simultaneous exploitation of multiple stope sequences in line with the 2023/2024 production plan

**A focus on rehabilitation and ground support** over the last 18 months has allowed for increased development rates and access to previously closed stopes

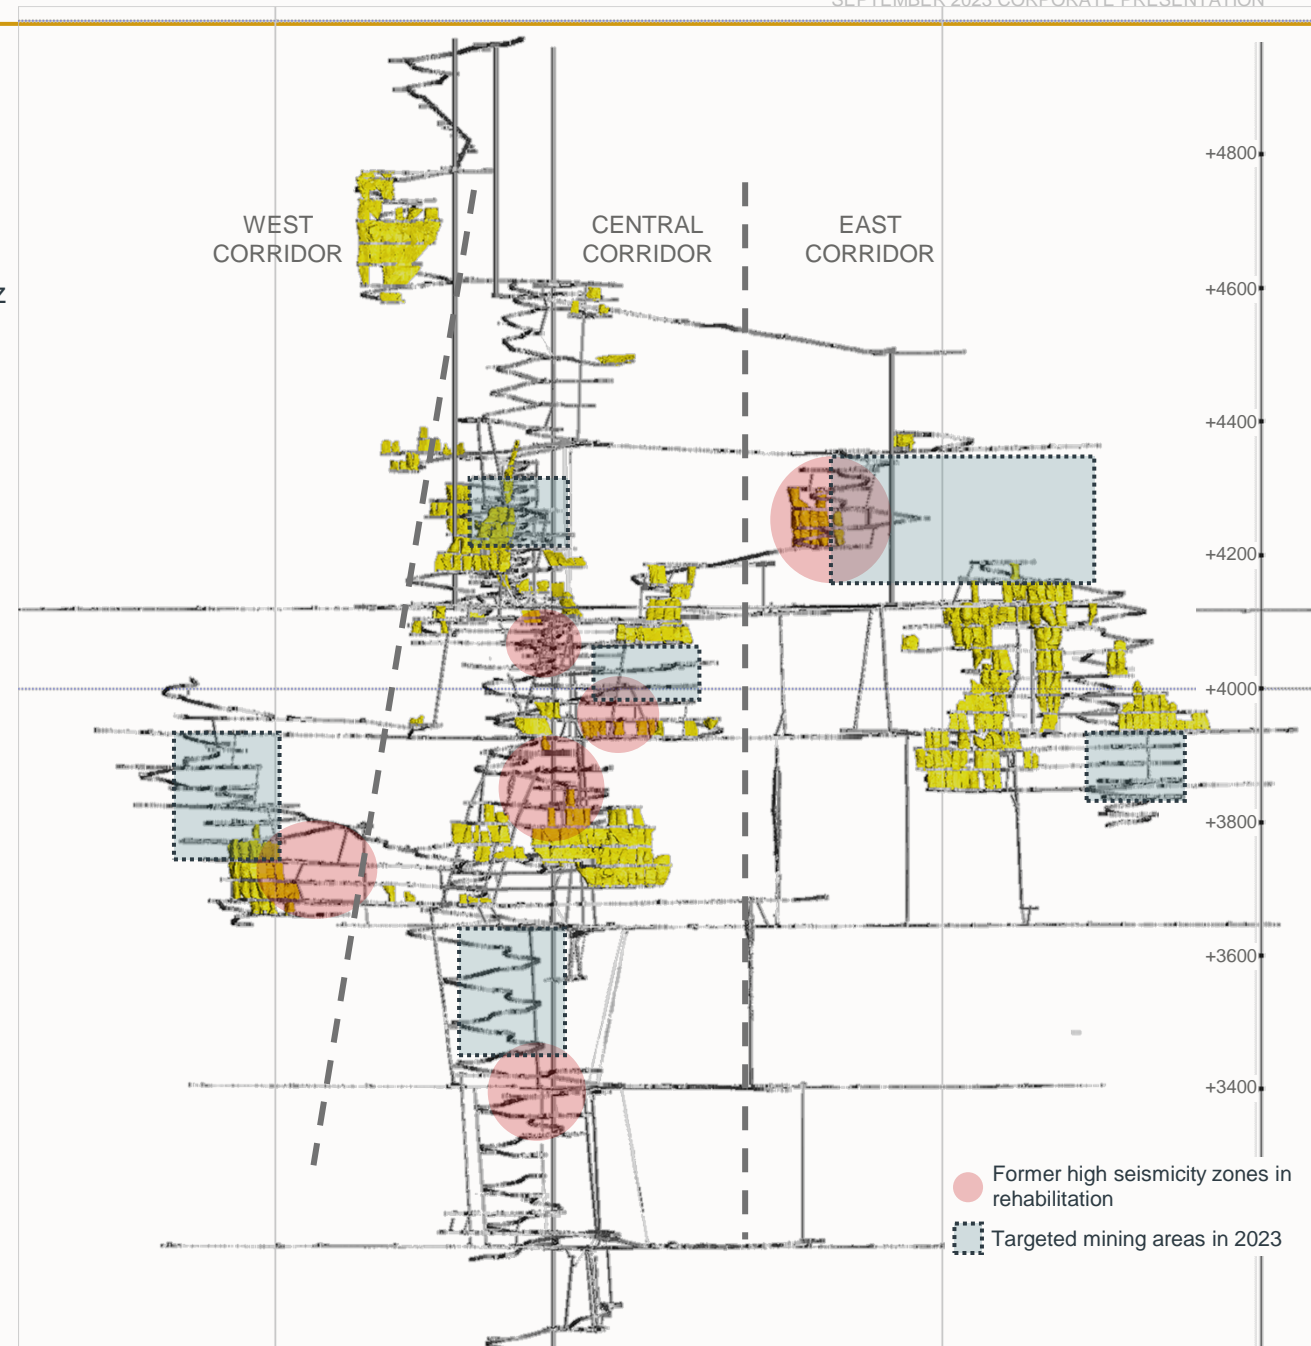

- Potential for reserve increase as access to previously closed stopes allow for re-upgrading of resources to reserves

## REVISED TECHNICAL APPROACH

### Comprehensive stress modelling and new seismic monitoring and algorithms

**Updated structural model** with inclusion of additional 5,000 m of geotechnical drilling since 2021, with total Geotech drilling now exceeding 35,000 m capturing east-west structures

**Revised mining method to incorporate pyramid stope sequencing** versus primary/secondary retreat

# Exploration Projects

# Chibougamau: Emerging District

## NELLIGAN (75% JV INTEREST)

- Located 60 kilometres southwest of Chibougamau, Québec
- Exercised option to increase undivided interest to 75% (from 51%) in December 2019
- Updated resource estimate<sup>1</sup>(on 100% basis):

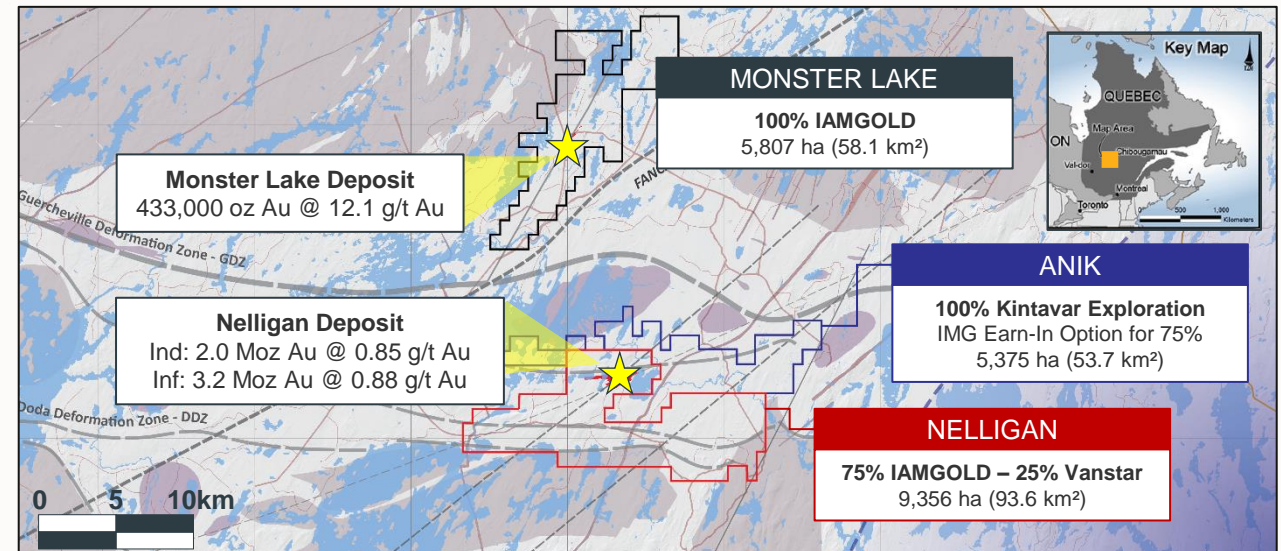

Category	Cut-off Grade (g/t Au)	Tonnage (Mt)	Grade (g/t Au)	Contained Au (koz Au)
Indicated	0.35	72.2	0.85	1,970
Inferred	0.35	114.1	0.88	3,238

- 10,000 m drill program planned for 2023
- Awarded **2019 AEMQ Discovery of the Year**

## MONSTER LAKE (100% INTEREST)

- 15 kilometres north of Nelligan
- Consolidated 100% ownership in 2020
- Hosts an inferred resource of 1.1 million tonnes grading 12.1 g/t for 433,000 oz<sup>2</sup>
- 2020 drilling highlights<sup>3</sup>:
  - 3.8 metres @ 16.9 g/t Au
  - 2.8 metres @ 5.63 g/t Au
  - 12.3 metres @ 2.09 g/t Au

## Nelligan 2022 Resource Pit Shell

# IAMGOLD

# Appendix

# Côte Gold: Q2 2023 Progress Report

## ACTIVITIES UPDATE

- **Project Completion:** 85.7%
- **Health and safety:** Total project hours of 11.5 million hours with a project TRIFR of 0.68.
- **Labour and workforce:** >1,900 workers on site in June achieving peak camp capacity.
- **Earthworks:** Earthworks activities advanced with a focus on the tailings management facility ("TMF"). East Starter Dam Phase 1 was completed in June. Water accumulation in the TMF has started in order to have sufficient water for plant startup. Phase 2 dam raising has begun.
- **Crushing circuit:** Primary crusher steel assembly restarted in June with installation of the overhead crane and continuing the overall primary crusher structure. HPGR crusher rolls and reducing gear drives installed. Preparation for the cone crusher also commenced. Construction of the Triodetic coarse ore dome structure made significant progress and will be completed in early Q3.
- **Processing plant:** Installation of ball mill liners began in June and ball mill motors are on site and preparations for installation commenced. Piping to the compressors and water filtration equipment is completed. Leach tank construction is ongoing with final completion and installation of agitators expected later than planned. Construction sequence has been adjusted to prioritize critical tanks for commissioning to mitigate potential delays on the overall schedule
- **Power:** The overhead power line has been completed. Commissioning of the main electrical substation has started and the connection to the provincial hydro grid and the substation is on track for the third quarter 2023.
- **Mining preparation:** Autonomous hauling continued to ramp up with up to 7 trucks operating with a total of 14 now commissioned. Owner mining progressing with 1.1M tonnes mined in Q2 2023. Stockpile currently at approximately 2.0M tonnes ore. Commissioning of first electric shovel ongoing.
- **Supply chain:** The majority of equipment has been delivered with the remaining delivery progressing on schedule.
- **Permitting:** Key permits have been received. Remaining non-critical path permitting activities well advanced and expected to be received during the remainder of the project construction.

# Côté Gold: Expenditures & Cost to Complete

## Q2 PROJECT EXPENDITURES

Incurring project expenditures of **\$270.1 million** (@ 100%) | **\$189.1 million** (@70%) in Q2 at average USDCAD exchange rate of 1.35

- JV Funding and Amending Agreement does not meet the requirements under IFRS to recognize the dilution of IAG's interest in the Côté UJV as a sale – so IAG continues to account for 70% of the assets and liabilities of the joint venture – with repurchase option liability on the balance sheet representing the value of the 9.7% diluted interest

## REMAINING COST TO COMPLETE

Remaining costs to incur to complete<sup>1</sup>: **\$665 – \$735 million** (@ 100%) | **\$465 - \$515 million** (@ 70%)

## FUNDING REQUIREMENT FOR IAG

Remaining funding requirement for IAMGOLD (@ 60.3%) of approximately **\$425 – \$475 million**

- Adjusted from incurred cost to complete for: JV Funding and Amending Agreement<sup>2</sup> with Sumitomo, and changes in working capital, leases, and adjustments to the cash balance in the UJV

### CÔTÉ 2023 INCURRED EXPENDITURES & COST TO COMPLETE GUIDANCE

	(\$M)	(\$M)
<b>@ Dec 31, 2022 – Cost to complete (70%)</b>	<b>\$800 - \$875</b>	
Q1 incurred project expenditures		(\$158.6)
<b>@ Mar 31, 2023 – Cost to complete (70%)</b>	<b>\$625 - \$700</b>	
Q2 incurred project expenditures		(\$189.1)
<b>@ June 30, 2023 – Cost to complete (70%)</b>	<b>\$465 - \$515</b>	
Adjust for: SMM agreement, working capital, leases, and cash balance in UJV		
<b>Funding requirement for IAG (@60.3%)</b>	<b>\$425 - \$475</b>	

1. Assumes USDCAD rate of 1.32

2. Refer to news release dated December 19, 2022

3. Project capital spend incurred as of June 30, 2023 are presented at an actual USDCAD rate of 1.31, estimated remaining project costs presented at 1.32 USDCAD and exclude contingency and escalation

# Sumitomo Agreement: Funding with an Option to Repurchase

The financing provided by SMM demonstrates strong validation of Côté from our partner

Both partners aligned & intend to return to a 70% | 30% ownership interest

# Côte Gold: Project Costs

## REMAINING SPEND TO COMPLETE

as of May 1, 2022	as of October 1, 2022
<b>43-101</b> Costs to complete attributable to IAMGOLD	<b>IAMGOLD</b> Remaining spend to complete attributable to IAMGOLD
<b>\$1,335 million</b>	<b>\$1,000 – \$1,100 million</b>

## SUPERTREND PROJECT REVIEW

Cost increase and schedule extension announced on August 3, 2022. Increases attributed to categories noted below and include the estimated impacts and related delays due to COVID-19, labour action in Ontario and inflation:

## 43-101 PROJECT COST UPDATE<sup>1</sup>

(as of May 1, 2022)

PROJECT COSTS	@ 100% (US\$ million) <sup>1</sup>

Earthworks	575
Process	519
Infrastructure	162
Indirects and EPCM	533
Mining	274
Owner's Costs	294
Contingency	185
Escalation	80
Revised Project Budget (100% Basis)	2,965
Less Early Works Sunk Cost	-75
Subtotal excluding Sunk	2,890
Less incurred to April 30, 2022	-982
<b>Costs Going Forward</b>	<b>1,908</b>
<b>Costs attributable to IAMGOLD (70%)</b>	<b>1,335</b>

# Côte Gold: Mining

## OVERVIEW

### Open-pit drill, blast, load and haul averaging 60 Mtpa over LOM

- Drill/Blast: Autonomous Epiroc PV-231 blasthole drills
- Load: CAT 6060 electric/hydraulic shovels & CAT 994K high lift front-end loaders
- Haul: Autonomous CAT 793F diesel trucks

## UPDATED ASSUMPTIONS IN 2022 TECHNICAL REPORT

### Target higher grade zone early in LOM with updated pit sequencing

- Revised Phase 1 Pit design and re-phasing of Phases 2-4
- Steeper ramp gradient in Phase 1 (10% vs. 8% previously) allows for an additional bench at bottom of Phase 1 pit

### Reduced waste mined and stockpile re-handling

- Adjusted pit boundaries to optimize waste mined during construction period

### Lowered ramp-up and utilization expectations for:

- Owner mining, truck and shovel equipment to account for autonomous commissioning, initial site conditions and operator skill level
- Expanded shift schedules, labour rates and headcounts

## DE-RISKING & OPERATIONS READINESS

### 48,000m of grade control RC drilling planned for 2022 at 10m x 10m drill density

- Covers 78% of 2023 ex-pit tonnes
- Five-year RC drill program will define quantity, density & depth

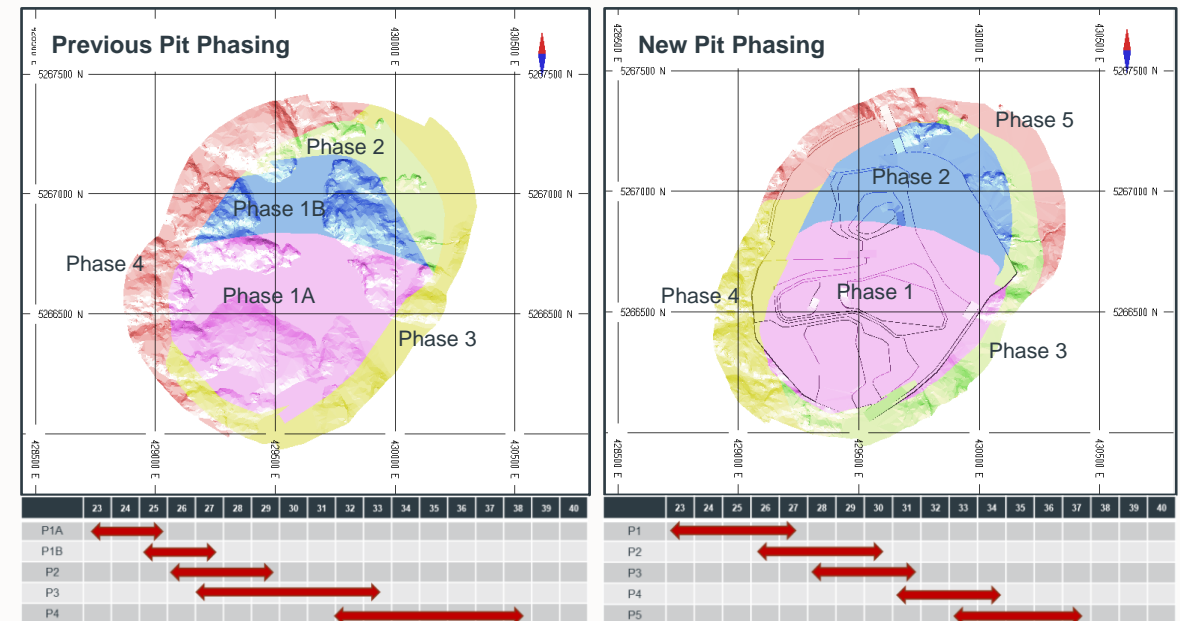

### Autonomous operations incorporated into mine design and focus on early operations readiness

- Critical infrastructure for first phase of autonomous operation in place

## MATERIAL MOVEMENT

## UPDATED PIT PHASING IN 2022 TECHNICAL REPORT

# Côte Gold: Processing

## OVERVIEW

### 37,200 tpd Crush/HPGR/Grind/Leach/CIP Processing Plant

- Average recoveries of 91.8%, recovery by gravity of 23%
- HPGR and grinding target final product size of  $P_{80}$  100  $\mu$ m
- Class A customer with Hydro One

## UPDATED ASSUMPTIONS IN 2022 TECHNICAL REPORT

**Mill operating time** (utilization) **revised to 92.6%** from 94% on updated modelling of circuit configuration

- Early ramp-up per design to approximately 70% utilization

**Ramp-up period to steady state increased to 20 months** (previously 10 months)

- Increased frequency of inspections, shutdowns, maintenance and learning

**Spare capacity in plant design:** target throughput of 37,200 tpd, while many systems (electrical, conveyors, chutes, pumps, piping, etc) designed for 42,000 tpd

- Mill designed for 75<sup>th</sup> percentile ore hardness

## DE-RISKING & OPERATIONS READINESS

**Production forecast includes additional downtime assumptions** in early years for HPGR shut down maintenance activities

- HPGR maintenance and roll resurfacing supported by Weir facility in Sudbury
- Weir engineers at site for installation, commissioning and training

**Key spares being procured** (extra set of rolls already purchased) and will be housed at site or in Sudbury

**Côte team have visited other Weir HPGR sites to leverage learnings**

- Over 350 HPGR units installed globally (92 by Weir)

THROUGHPUT & GRADE

# Côte Gold: Operating Costs

## OPERATING COSTS

**Mining costs (gross) of \$2.62/t material mined**

**Mining costs (net, excluding CWS) of \$6.20/t processed ore**

- Net mining costs excludes CWS expenditures transferred to sustaining capital based on World Gold Council guidelines
- A total of 193 Mt of mined material is classified as sustaining CWS over the LOM
- Increased 15% from 2021 Technical Report due to: increased headcount, extended ramp up assumptions, and updated cost models

**Process operating costs of \$7.97/t processed ore**

- Increased 8% from 2021 Technical Report due to: higher maintenance cost assumptions during ramp up and for shutdowns and increase in TMF operations and monitoring

### COST BREAKDOWN

**G&A costs of \$3.31/t process ore**

- Increased 14% from 2021 Technical Report due to: increased headcount over the LOM, increased camp rates/costs, and continuation of site services post construction with associated increases in owner's costs

## OPERATING & UNIT COSTS

	LOM	\$/tonne	\$/tonne	\$/oz
	\$M	material	processed	sold
Mining (gross costs incl. CWS) <sup>1</sup>		\$2.62		
Mining (net cost excl. CWS) <sup>2</sup>	\$1,445		\$6.20	\$220
Processing	\$1,856		\$7.97	\$282
G&A	\$772		\$3.31	\$117
<b>Subtotal</b>	<b>\$4,073</b>		<b>\$17.48</b>	<b>\$619</b>
Royalties + Offsite costs	\$485		\$2.08	\$74
<b>Total cash costs</b>	<b>\$4,558</b>		<b>\$19.56</b>	<b>\$693</b>
Sustaining Capital	\$518		\$2.22	\$79
Capitalized waste stripping (CWS)	\$462		\$1.98	\$70
Asset retirement obligation	\$83		\$0.35	\$13
<b>AISC</b>	<b>\$5,620</b>		<b>\$24.12</b>	<b>\$854</b>

## PRODUCTION & COSTS

# Essakane Gold Mine, Burkina Faso

# Essakane – Overview

OWNERSHIP: 90% IAMGOLD; 10% Government of Burkina Faso

## Mine type

Open Pit

## Start-up

2010

## Mine life

~2027<sup>1</sup>

## 2022 Performance<sup>2</sup>

**432,000 oz**  
(<sup>22</sup> guidance 410 – 430 koz)

## 2023 Guidance<sup>2,3</sup>

**340,000 – 380,000 oz**

## 2022 Capital costs<sup>2,3</sup>

**\$150M sustaining**  
**\$5M expansion**

## RECORD PRODUCTION IN 2022

- Produced **432,000 ounces** (*attr.*) in 2022
- Record production in Q3 of 129,000 oz (115,000 oz attributable) on rising head grades and mill improvements

## OUTLOOK

- Estimated annual production between 340,000 – 380,000 ounces in 2023

## OPERATIONAL IMPROVEMENTS

- ✓ 2013/14: Hard rock plant expansion from 5.4 to 10.8 Mtpa completed
- ✓ 2021: Expanded nameplate hard rock capacity from 10.8 to 11.7 Mtpa

## COMMUNITY RELATIONS

- ✓ Renewed 3 year CLA agreement in July 2021 to June 2024
- Proposal to advance Phase II of the Triangle d'Eau Project submitted – decision expected in 2022
- The security situation in Burkina Faso has further deteriorated in 2022 impacting the in-land supply chain resulting in delivery delays of supplies. IAMGOLD continues to take proactive measures to ensure the safety and security of in-country personnel

INDICATED<sup>1</sup>

1.2Moz  
INFERRED<sup>1</sup>

- <1 km south of Karita across the border of western Mali
- 8 contiguous exploration permits covering 596.5 km<sup>2</sup>
- Hosts an indicated resource of 18.0 Mt grading 1.28 g/t inferred resource of 23.2 Mt grading 1.58 g/t<sup>5</sup>
- Targeting an updated resource estimate in H1 2022

# Hedge Portfolio: Foreign Currency and Oil Derivatives

(as at June 30, 2023)

	2023	2024
<b>Foreign Currency<sup>1</sup></b>		
Canadian dollar contracts <sup>2</sup> (millions of C\$)	310	163
Rate range (USDCAD)	1.30 – 1.46	1.30 – 1.32
Hedge ratio <sup>3</sup>	42%	21%
<b>Commodities<sup>4</sup></b>		
Brent oil contracts (barrels, 000s)	214	270
Contract price range (\$/barrel of crude oil)	41 – 65	41 – 55
Hedge ratio <sup>3</sup>	57%	36%
WTI oil contracts (barrels, 000s)	219	270
Contract price range (\$/barrel of crude oil)	36 – 60	38 – 50
Hedge ratio <sup>3,4</sup>	220%	168%

Notes:

- 2023 Canadian dollar hedges exclude Canadian dollars on hand which functions as a natural hedge for the Company's 2023 Canadian dollar expenditures.
- The Company previously executed Canadian dollar collar options, which consist of Canadian dollar call and put options within the given range in 2023 through 2024. The Company will recognize a gain from the difference between a lower market price and the Canadian dollar call strike price. The Company will incur a loss from the difference between a higher market price and the Canadian dollar put strike price. 2023 includes the TARF and forwards with an extension feature discussed below. The Company estimates the timing of future knockouts on the TARF occurring based on analyst consensus estimates for foreign exchange rates.
- The Company calculates hedge ratios based on future estimates of operating and capital expenditures (such as its Canadian dollar operating and capital expenditures at Westwood and its corporate office, and Canadian dollar capital expenditures at Côté Gold during the construction period, future estimated uses of commodities and future estimated production. Outstanding derivative contracts are allocated based on a specified allocation methodology. Approximately 56% of the 2023 Canadian dollar exposure at Côté has been hedged.
- The Company previously executed Brent and WTI collar options, which consist of Brent and WTI put and call options with strike prices within the given range in 2023 through 2024. The Company will incur a loss from the difference between a lower market price and the put strike price. The Company will recognize a gain from the difference between a higher market price and the call strike price. Previous Rosebel WTI hedges have been applied to Côté in 2023 and 2024. Includes hedged exposure for WTI at Côté Gold in 2023 and 2024, with a hedge ratio of 220% and 168%, respectively. The hedge ratio is more than 100% due to the legacy Rosebel hedges and hedge accounting is not applied for these hedges.

# Gold Prepayment – Illustrative Impact

## PREPAYMENT ARRANGEMENT STRUCTURE

- Cash proceeds received up front in return for obligation to deliver ounces at a later date
- Settlement is in the form of physical gold deliveries from any of the Company's gold mines in equal monthly installments
- The prepaid amount is treated as deferred revenue that is amortized and recognized upon delivery

## TRANSACTION ASSUMPTIONS

- Illustrative annual gold production of 600,000 ounces
- **2019 prepay:** 150,000 ounces to be delivered in 2022, with a gold collar range of \$1,300/oz – \$1,500/oz<sup>1</sup>
  - Prepayment amount of \$170 million in 2019 based upon \$1,300/oz gold price, net of transaction costs
- **2022 prepay (1):** 100,000 ounces to be delivered in 2024, with a gold collar range of \$1,700/oz – \$2,100/oz<sup>2</sup>, funded at \$1,700/oz
- **2022 prepay (2):** 50,000 ounces to be delivered in 2024, funded at \$1,753/oz<sup>3</sup>
  - Total prepayment amount of \$236 million in 2022 for (1) and (2), net of transaction costs

## GOLD PREPAY RECOGNITION

	unit	2019	2022	2024
Production	Illustrative gold price	US\$/oz	\$1,300	\$1,800
	Production – unaffected gold	koz	600	450
	Production – gold prepay	koz	–	150
	<b>Total gold production</b>	<b>koz</b>	<b>600</b>	<b>600</b>
Revenue	Revenue recognized – unaffected gold	US\$M	\$780	\$810
	Prepay revenue – floor price	US\$M	–	\$195
	Prepay revenue – incremental <sup>1,2</sup>	US\$M	–	\$30
	<b>Total revenue recognized</b>	<b>US\$M</b>	<b>\$780</b>	<b>\$1,035</b>
	Realized gold price	US\$/oz	\$1,300	\$1,725
Cash Flow	OCF – prepay cash received	US\$M	+\$170	+\$236
	OCF – net impact on delivery	US\$M	–	(\$195)
	<b>Net effect on timing of cash flow</b>	<b>US\$M</b>	<b>+\$170</b>	<b>+\$41</b>

For notes accompanying Gold Mineral Resources, please refer to the following slide.

# Notes to the Gold Mineral Resources Statement

- 1 In mining operations, Measured Mineral Resources and Indicated Mineral Resources that are not Mineral Reserves are considered uneconomic at the price used for Mineral Reserve estimations but are deemed to have a reasonable prospect of economic extraction.
- 2 Although “measured resources”, “indicated resources” and “inferred resources” are categories of mineralization that are recognized and required to be disclosed under Canadian regulations, SEC Industry Guide 7 does not recognize them. Disclosure of contained ounces is permitted under Canadian regulations; however, SEC Industry Guide 7 generally permits resources to be reported only as in place tonnage and grade. See “Cautionary Note to U.S. Investors Regarding Disclosure of Mineral Reserve and Mineral Resource Estimates”.
- 2 Rosebel, Saramacca, Essakane, Côté Gold, Gosselin, Boto Gold, Nelligan, Gossey, Monster Lake, Diakha-Siribaya and Pitangui Mineral Resources have been estimated as of December 31, 2022 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101.
- 3 Westwood mineral resources have been estimated as of December 31, 2022 using a 6.2g/t (OK) and 7.4g/t (MIK) Au cut-off grade over a minimum width of 2.6 metres, using a \$1500/oz gold price. The Grand Duc Mineral Resource estimate and the Fayolle Mineral Resource estimate are included in the Westwood Mineral Resources. The Grand Duc Mineral Resources and the Fayolle Mineral Resources have been estimated using a gold price of \$1,500/oz and have been estimated in accordance with NI 43-101.
- 4 Due to rounding, numbers presented throughout this document may not add up precisely to the totals.
- 5 Rosebel and Saramacca sold to Zijin Mining as of February 1st, 2023.
