

5 for 5

Celebrating five years
of merger milestones

Onboard Products

In Dec. 2013, American Airlines and US Airways created the largest airline in the world. And we've been busy ever since.

Take a look at some of what we've done to create a world-class customer experience over the last five years.

1 Beam us up, Scotty. **We've installed high-speed Wi-Fi on 440 domestic aircraft** and that number will grow so you can stream movies, TV shows or get some work done faster than ever.

4 And we're live. **American is the only U.S. airline to offer live TV on international flights (and it's free).** Live TV is also now on more than 100 of our domestic aircraft with more to come in 2019 so you don't miss news, sports or your favorite shows.

2 We're plugged in. **American is installing access to power at every seat across our long-term narrowbody fleet and on the majority of our regional aircraft.** That's more than 190,000 plugs and USB ports.

5 Bon appétit. In 2016, we brought back complimentary snacks in Main Cabin. And this month, **we launched new food-for-sale items from Zoës Kitchen** to give customers tastier, healthier options on board.

3 Movies, music and more, oh my. We've expanded our wireless entertainment library and **now offer more than 140 movies and 250 TV shows** on flights. Bonus: Now it's free, too.

New menu items from Zoës Kitchen launched Dec. 1, including the Gruben sandwich.
