Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve a number of risks and uncertainties. You can identify these statements by forward-looking words such as “may,” “might,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” or “continue,” and the negative of these terms and other comparable terminology. All statements that reflect our expectations, assumptions, or projections about the future other than statements of historical fact are forward-looking statements. These forward-looking statements, which are subject to known and unknown risks, uncertainties, and assumptions about us, may include projections of our future financial performance based on our growth strategies and anticipated trends in our business. These statements are only predictions based on our current expectations and projections about future events. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from those expressed or implied by the forward-looking statements.

We operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible to predict all risks and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Some factors that could cause actual results to differ include: the loss of our right to exclusively list and trade certain index options and futures products; economic, political and market conditions; compliance with legal and regulatory obligations; price and new products and services competition and consolidation in our industry; decreases in trading or clearing volumes, market data fees, or a shift in the mix of products traded on our exchanges; legislative or regulatory changes or changes in tax regimes; our ability to protect our systems and communication networks from security vulnerabilities and breaches; our ability to attract and retain skilled management and other personnel; increasing competition by foreign and domestic entities; our business and operational dependence on and exposure to risk from third parties; factors that impact the quality and integrity of our and other applicable indices; our ability to manage our global operations, growth, and strategic acquisitions, wind-downs, divestitures or alliances effectively; increases in the cost of the products and services we use; our ability to operate our business without violating the intellectual property rights of others and the costs associated with protecting our intellectual property rights; our ability to minimize the risks, including our credit, liquidity, market, investment, counterparty, and default risks, associated with operating our clearinghouses; our ability to accommodate trading and clearing volume and transaction traffic, including significant increases, without failure or degradation of performance of our systems; misconduct by those who use our markets or our products or for whom we clear transactions; challenges to our use of open source software code; our ability to meet our compliance obligations, including managing our business interests and our regulatory responsibilities; the loss of key customers or a significant reduction in trading or clearing volumes by key customers; separate from and not integrated with our registered national securities exchanges; damage to our reputation; the ability of our compliance and risk management methods to effectively monitor and manage our risks; restrictions imposed by our debt obligations and our ability to make payments on or refinance our debt obligations; our ability to maintain an investment grade credit rating; impairment of our goodwill, long-lived assets, investments, or intangible assets; the accuracy of our estimates and expectations; and litigation risks and other liabilities. More detailed information about factors that may affect our actual results to differ may be found in our filings with the SEC, including in our Annual Report on Form 10-K for the year ended December 31, 2025 and other filings made from time to time with the SEC. We do not undertake, and we expressly disclaim, any duty to update any forward-looking statement whether as a result of new information, future events or otherwise, except as required by law. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof.

Industry and Market Data

This presentation includes market share, financials and industry data that we obtained from industry publications and surveys, reports of governmental agencies, third-parties and internal company surveys. Industry publications and surveys generally state that the information they contain has been obtained from sources believed to be reliable, but we cannot assure you that this information is accurate or complete. We have not independently verified any of the data and financials from third-party sources nor have we ascertained the underlying economic assumptions relied upon therein. Statements as to our market position are based on the most currently available market data. While we are not aware of any misstatements regarding industry data and financials presented herein, our estimates involve risks and uncertainties and are subject to change based on various factors.

Trademarks

Trademarks: Cboe®, Cboe Global Markets®, Cboe Volatility Index®, Cboe Clear®, Cboe Datashop®, BIDS Trading®, BZX®, BYX®, EDGX®, EDGA®, and VIX® are registered trademarks and Cboe PlusSM, Cboe PredictsSM, and Cboe Data VantageSM are service marks of Cboe Global Markets, Inc. and its subsidiaries. All other trademarks and service marks are the property of their respective owners.

Non-GAAP Measures

This presentation includes certain Non-GAAP measures as defined under SEC rules, including, among others, organic net revenue, adjusted earnings per share (EPS), adjusted earnings before interest, taxes, depreciation, and amortization (EBITDA), operating EBITDA, adjusted operating EBITDA, adjusted EBITDA margin, operating EBITDA margin, adjusted operating EBITDA margin, adjusted operating expenses, and adjusted cash. Additional information, reconciliations, and definitions are included in the appendix to this presentation.

Key Performance Indicators

Managements focuses on a variety of key indicators to plan, measure and evaluate our business and financial performance. These performance indicators include, among others, average daily volume (ADV), average daily notional value (ADNV), trades cleared, net settlement volume, as well as Non-GAAP measures of adjusted EPS and adjusted operating EBITDA. Please refer to Item 2. Management's Discussion and Analysis of Financial Condition for additional information on operational and financial metrics and measures.

Quarterly Recap and Outlook

Net revenue¹ grew 25% Y/Y, a product of continued transaction and non-transaction growth

Derivatives +30%	◆ Cboe total options ADV up 26%, with a 32% increase in index options ADV and a 24% increase in multi-listed options ADV	Options +30%	\$732 million 2Q26 net revenue ¹ +25% y/y
Data Vantage +15%	◆ Comprehensive suite of data solutions across geographies and asset classes translated to strong revenue results	North American Equities +17%	
Cash and Spot +22%	◆ Strong industry volumes across cash equities and FX products	Europe and Asia Pacific +20%	
		Futures +2%	\$3.56 2Q26 adjusted diluted EPS ² +45% y/y
		Global FX +17%	

*Unless otherwise noted, all comparisons are second quarter 2026 compared to the same period in 2025.

¹Net revenue represents revenues less cost of revenues.

²See appendix for “Non-GAAP Information.”

Cyclical Tailwinds

- Macroeconomic and geopolitical environment
- Shifting policy positions
- Investor positioning in dynamic markets

Secular Trends

- Globalization of markets, data, and access
- Wider retail adoption of options
- Rise of shorter-dated options trading

Record Options Volumes in 2Q26

Total Index Options

- Record quarterly ADV of 6.2mn, +32% y/y

SPX

- Record quarterly ADV of 5.1mn, +40% y/y
- Record quarterly 0DTE ADV of 3.1mn, +48% y/y

Mini-SPX

- Record quarterly ADV of 195k, +80% y/y
- Record quarterly 0DTE ADV of 101k, +101% y/y

Strong Investor Engagement as SPX 0DTE Volumes Continued to Grow

- ◆ The repeal of the Pattern Day Trader rule in June has eliminated a friction point for smaller retail accounts to trade products like 0DTE more frequently
- ◆ The individual participation in 0DTE trading continues to rise, pushing 0DTE to its highest-ever share of total SPX volume

0DTE Options Value Proposition

- **Defined risk, unlimited upside:** investors are able to set their max loss upfront while keeping unlimited upside potential
- **Linear derivatives carry open-ended risk:** unbounded downside, leverage, liquidation, and funding-rate uncertainty
- **Convexity + defined risk:** the combination explains why capped-risk structures dominate 0DTE options trading today
- **More than a directional bet:** options also enable income generation, hedging, and volatility management

Characteristic	SPX 0DTE Options	Single-Stock / Traditional Futures	Perpetual Futures
Offers embedded leverage	✓	✓	✓
Convex, asymmetric payoff profile (gains can accelerate as the position moves favorably; losses decelerate)	✓	—	—
Maximum loss is capped and known upfront for the buyer at trade inception	✓	—	—
Majority of trading uses defined, capped-risk structures	✓	—	—
Buyer is not exposed to margin calls or forced liquidation risk once the position is opened	✓	—	—
No auto-deleveraging (ADL) risk	✓	✓	—
No overnight/weekend gap risk	✓	—	—
Well suited to hedging event-driven catalysts	✓	—	—
Well suited to maintaining exposure over an indefinite horizon	—	—	✓

✓ Applicable

— Not applicable / limitation

Bottom line: SPX 0DTE options offer the most favorable risk/reward tradeoff of the three structures

Case Study: Perpetual Futures vs. 0DTE Options — Linear vs. Convex Payoff

Hedging the April 21, 2026 US-Iran ceasefire expiration

Three positions entered at 10am ET, calibrated to equal notional:

- 1) A 10x short perpetual futures position,
- 2) A long at-the-money (50 delta) SPX 0DTE put, and
- 3) A long out-of-the-money (10 delta) SPX 0DTE put (funding costs on the perpetual are ignored given the short holding period)

Notional exposure: \$713,100		SPX at entry: 7,131		SPX at close: 7,064 (−0.94%)	
1) Perpetual futures (10x)		2) 0DTE put, ATM (50 delta)		3) 0DTE put, OTM (10 delta)	
Price / delta	\$7,131 / −100%	Price / delta	\$13.10 / −49%	Price / delta	\$2.23 / −11%
Initial margin	\$71,310	Total cost	\$1,310	Total cost	\$223
Leverage	10x	Implicit leverage	267x	Implicit leverage	352x
PnL on the −0.94% move	\$6,700 (9.4%)	PnL on the −0.94% move	\$5,290 (404%)	PnL on the −0.94% move	\$1,377 (617%)
If SPX had risen 0.94%	−\$6,700	If SPX had risen 0.94%	−\$1,310	If SPX had risen 0.94%	−\$223

- Given a correct directional call on the same catalyst, convexity delivered **42x** higher returns for the 50 delta put and **65x** higher returns for the 10 delta put versus the leveraged perpetual futures position, while deploying far less capital.
- Asymmetry cuts both ways: the perpetual would have lost the mirror image on a rally, while the options' downside was capped at the premium paid.

Phase 1: Mini-SPX Event Contract Offering

- Launched in June, our mini-SPX binary event contracts are regulated as securities, with vertical call spread binaries expected in the coming months
- Leverages existing brokerage connectivity and established liquidity and investor protections, supporting efficient distribution at launch

Phase 2: Company-KPI Contracts

- Expands the binary suite to company fundamentals (EPS, revenue, margins) and eventually economic and financial indicators¹
- 23 companies already mapped to KPI categories¹

Agreed Upon Sale for Cboe Canada and Cboe Australia to TMX²

Cboe announced plans in October 2025 to sell its Australian and Canadian equities businesses as part of a strategic realignment.

- ◆ The transactions are expected to bring Cboe Australia and Cboe Canada under new ownership well suited to support their next chapter
- ◆ Allows Cboe to reallocate resources and capital towards optimizing our core businesses for further growth and profitability, and pursuing opportunities in new and emerging areas

¹European Equities market share cleared represents Cboe Clear Europe's client volume cleared divided by the total volume of publicly reported European venues.

²The sales transactions are each subject to separate closing and regulatory processes.

Note: Except as specified otherwise, all commentary as of 2Q26.

Priorities Across the Data Vantage Portfolio

Data Distribution

- ◆ Delivering content, platform, and distribution globally to execute on growth opportunities
- ◆ Powered by Cboe's market-leading position in multiple asset classes around the globe

Analytics

- ◆ Comprehensive solutions for real-time, data-enabled global risk analytics
- ◆ Fueling the derivatives ecosystem with proprietary data and trade analytics

Indices

- ◆ Creation, calculation, and distribution of indices to grow the index-centric investment ecosystem
- ◆ Partnering with our index providers and leaning into the growth of derivatives-based ETFs

Global Import/Export

- ◆ Demand for data and access across international geographies
- ◆ Leveraging Cboe's global ecosystem, unified technology platform, and proven infrastructure

Over the past year we've repositioned Cboe to better allocate our time, effort, and resources more directly with the most powerful secular trends in our industry

U.S. Market & S&P 500 Dominance	Growing Role of Retail Investors	Secular Growth in Options Trading
\$75T+ U.S. equity market cap, approximately half of global equity value¹	+6% Annual growth in U.S. household financial assets for more than three decades³	7th Consecutive record year U.S. options volume is on pace for in 2026
\$20T+ Assets indexed or benchmarked to the S&P 500 globally²	+173% Growth in Options Institute class registrations, quarter-over-quarter in Q2	~71M Average daily options contracts traded through Q2, with a single-day high above 110M in the past year
+30% Annual growth in Cboe SPX options ADV since 2021	Cboe pioneered options education and continues expanding access, tools, and resources so investors can participate confidently	+20% Annual U.S. options volume growth since 2019, more than tripling volume in seven years

Leaning into Secular Trends to Expand Access: Global Trading Hours (GTH) volume set a record in the second quarter with strong growth out of Asia Pacific. SPX options have become the preferred source of liquidity for equity investors trading outside U.S. market hours.

¹2026 guidance includes the anticipated impacts from discontinuing U.S. and European Corporate Listings, CEDX, and Cboe's Japanese equities business, as well as the planned cost reductions in U.S. and European ETP Listings businesses and several of Cboe's smaller Risk and Market Analytics businesses, as announced in 2025 and early 2026, as well as anticipated realignment costs.

²Specific quantifications of the amounts that would be required to reconcile the company's organic and inorganic growth guidance, adjusted operating expenses guidance, and the effective tax rate on adjusted earnings guidance are not available. Acquisitions are considered organic after 12 months of closing. The company believes that there is uncertainty and unpredictability with respect to certain of its GAAP measures, primarily related to acquisition-related revenues and costs that would be required to reconcile to GAAP revenues less cost of revenues, and GAAP operating expenses, which preclude the company from providing accurate guidance on certain forward-looking GAAP to non-GAAP reconciliations. The company believes that providing estimates of the amounts that would be required to reconcile the range of the company's organic growth, adjusted operating expenses, and the effective tax rate on adjusted earnings would imply a degree of precision that would be confusing or misleading to investors for the reasons identified above. 2026 guidance includes the anticipated business-as-usual financial contribution from Cboe Canada, which Cboe announced divestiture plans for in October 2025. 2026 guidance will be updated as further actions are announced. Given an expected third quarter sale completion for Cboe Australia, 2026 adjusted operating expense guidance is being reduced by \$11 million, and the total organic net revenue growth guidance and Data Vantage organic net revenue growth guidance excludes the 2025 and 2026 impact of Cboe Australia in its organic guidance calculation.

³See appendix for "Non-GAAP Information."

⁴The amortization of acquired intangible assets was \$70 million for 2025 and is expected to be \$59 million for 2026. See appendix for "Non-GAAP Information."

Preserving balance sheet flexibility remains a priority

- ◆ Capital allocation priorities include:
 - ◆ Consistent dividend payments and growth
 - ◆ Investing in the growth of our business
 - ◆ Opportunistic share repurchases
 - ◆ Inorganic opportunities to facilitate growth strategy
- ◆ Returned \$108.3 million in capital through repurchases and dividends in 2Q26
- ◆ As of June 30, 2026, the Company had \$536.8 million of availability remaining under its existing share repurchase authorizations

Advancing Our Strategy Through Continuous Execution¹

KEY WORKSTREAMS FOR EVENT CONTRACTS

- 1

Regulation: Filed with the SEC in July to list company-KPI event contracts as securities, drawing on Cboe's 50+ year regulatory track record.
- 2

Clearing: Filed an application for temporary registration with the SEC as a Covered Clearing Agency, with full registration targeted at the end of an 18-month period, subject to regulatory approval. On the CFTC side, became subject to Subpart C of CFTC Regulations effective June 16. Together, our SEC temporary registration application and Subpart C compliance support our treatment as a qualifying central counterparty (QCCP) under the U.S. bank capital rules.
- 3

Broker Dealer Partners: Operating an intermediated model that partners with, rather than competes against, retail brokerages. Cboe Predicts will continue to add major brokerage partners to broaden retail access.

¹Initiatives are subject to regulatory approval, and the timeline is subject to revision

(1) This amount represents the amortization of acquired intangible assets related to the Company's acquisitions, which is included in depreciation and amortization on the condensed consolidated statements of income.

(2) This amount represents certain business/strategic realignment costs related to announced realignment initiatives. For the three months ended March 31, 2026, the costs included \$1.6 million in compensation and benefits, \$1.8 million in technology support services, \$1.5 million in professional fees and outside services, and \$0.2 million in other expenses, respectively, on the condensed consolidated statements of income. For the three months ended March 31, 2025, the costs included \$0.3 million in compensation and benefits on the condensed consolidated statements of income. For the three months ended June 30, 2026, the costs included \$21.7 million in compensation and benefits, \$2.5 million in professional fees and outside services, and \$0.1 million in technology support services, partially offset by a reversal of \$0.6 million in other expenses, on the condensed consolidated statements of income. For the three months ended June 30, 2025, the costs included \$17.1 million in impairment of assets and \$0.2 million in compensation and benefits on the condensed consolidated statements of income.

(3) This amount represents the CEO sign-on long-term equity awards granted in 2025 with a grant date value of \$6.0 million (comprised of a mixture of time and performance-based awards) that are subject to a 3-year cliff vesting requirement associated with the hiring of Craig Donohue as Chief Executive Officer, which is included in compensation and benefits on the condensed consolidated statements of income. This amount does not include the CEO's annual long-term equity incentive awards that were prorated for 2025.

(4) This amount represents net gains and losses associated with the Company's minority investments in Abaxx Singapore Pte, American Financial Exchange, LLC, and Eris Innovations Holdings, LLC, as well as PYTH token intangible assets, which are included in earnings (loss) on investments, net on the condensed consolidated statements of income.

(5) These amounts represent the tax impact related to the resolution of uncertain tax positions for the three months ended March 31, 2026 and the three months ended June 30, 2026.

(6) The Company sponsors deferred compensation plans held in a trust. The expenses or income related to the deferred compensation plans are included in compensation and benefits (\$0.4 million and \$12.4 million in expense for the three months ended March 31, 2026 and 2025, respectively, and \$4.6 million and \$3.1 million in expense for the three months ended June 30, 2026 and 2025, respectively) and are directly offset by deferred compensation income and expenses included in earnings (loss) on investments, net, and dividends included in other income (expense), net on the condensed consolidated statements of income. The deferred compensation plans' expenses are not excluded from adjusted operating expenses and do not have an impact on income before income taxes.

(7) Adjusted operating margin represents adjusted operating income divided by revenues less cost of revenues.

EBITDA Reconciliations

EBITDA (earnings before interest, income taxes, depreciation and amortization) and Adjusted EBITDA are widely used non-GAAP financial measures of operating performance. These metrics are presented as supplemental information that the company believes are useful to investors to evaluate the company's results because they exclude certain items that are not directly related to the company's core operating performance. Operating EBITDA is calculated by adding back to operating income depreciation and amortization. Adjusted Operating EBITDA is calculated by adding back to Operating EBITDA relevant adjustments. Operating EBITDA margin represents Operating EBITDA divided by revenues less cost of revenues. Adjusted Operating EBITDA margin represents Adjusted Operating EBITDA divided by revenues less cost of revenues. EBITDA is calculated by adding back to net income interest (income) expense, net, income tax expense, and depreciation and amortization. Adjusted EBITDA is calculated by adding back to EBITDA relevant adjustments. Relevant adjustments are detailed in the reconciliations that follow. Operating EBITDA, Adjusted Operating EBITDA, EBITDA, and Adjusted EBITDA should not be considered as substitutes either for net income, as an indicator of the company's operating performance, or for cash flow as a measure of the company's liquidity. In addition, because Operating EBITDA, Operating EBITDA margin, Adjusted Operating EBITDA, Adjusted Operating EBITDA margin, EBITDA, and Adjusted EBITDA may not be calculated identically by all companies, the presentation here may not be comparable to other similarly titled measures of other companies.

Adjusted Cash

Adjusted cash is a non-GAAP measure and represents cash and cash equivalents, including cash and cash equivalents within assets held for sale, plus financial investments, minus deferred compensation plan assets and cash collected for Section 31 fees. We have presented adjusted cash because we consider it an important supplemental measure of our liquidity and believe that it is frequently used by analysts, investors, and other interested parties in the evaluation of companies.
