**SUPPLEMENTAL INFORMATION - CONSOLIDATED FINANCIAL STATEMENTS RECONCILIATION OF  
GAAP TO NON-GAAP FINANCIAL MEASURES**  
(Millions of dollars except per share data) (Unaudited)

We supplement the reporting of our financial information determined under U.S. generally accepted accounting principles (GAAP) with certain non-GAAP financial measures, some of which we refer to as "ongoing" measures. These measures may include earnings before interest and taxes (EBIT), EBIT margin, ongoing EBIT, ongoing EBIT margin, ongoing earnings per diluted share, adjusted effective tax rate, organic net sales, net debt leverage (Net Debt/Ongoing EBITDA), return on invested capital (ROIC) and free cash flow.

Ongoing measures exclude items that may not be indicative of, or are unrelated to, results from our ongoing operations and provide a better baseline for analyzing trends in our underlying businesses.

**Sales excluding foreign currency:** Current period net sales translated in functional currency, to U.S. dollars using the applicable prior period's exchange rate compared to the applicable prior period net sales. Management believes that sales excluding foreign currency provides stockholders with a clearer basis to assess our results over time, excluding the impact of exchange rate fluctuations.

**Organic net sales:** Sales excluding the impact of certain acquisitions or divestitures, and foreign currency. Management believes that organic net sales provides stockholders with a clearer basis to assess our results over time, excluding the impact of exchange rate fluctuations and certain acquisitions and/or divestitures.

**Ongoing EBIT margin:** Ongoing earnings before interest and taxes divided by net sales. Ongoing measures exclude items that may not be indicative of, or are unrelated to, results from our ongoing operations and provide a better baseline for analyzing trends in our underlying businesses.

**Ongoing earnings per diluted share:** Diluted net earnings per share from continuing operations, adjusted to exclude items that may not be indicative of, or are unrelated to, results from our ongoing operations. Ongoing measures provide a better baseline for analyzing trends in our underlying businesses.

**Net debt leverage:** Net debt to ongoing earnings before interest, taxes, depreciation, and amortization (EBITDA) ratio is net debt outstanding, including long-term debt, current maturities of long-term debt, and notes payable, less cash and cash equivalents, divided by ongoing EBITDA. Management believes that net debt leverage provides stockholders with a view of our ability to generate earnings sufficient to service our debt.

**Return on invested capital:** Ongoing EBIT after taxes divided by total invested capital, defined as total assets less non-interest bearing current liabilities (NIBCLS). NIBCLS is defined as current liabilities less current maturities of long-term debt and notes payable. This ROIC definition may differ from other companies' methods and therefore may not be comparable to those used by other companies. Management believes that ROIC provides stockholders with a view of capital efficiency, a key driver of stockholder value creation.

**Adjusted effective tax rate:** Effective tax rate, excluding pre-tax income and tax effect of certain unique items. Management believes that adjusted tax rate provides stockholders with a meaningful, consistent comparison of the Company's effective tax rate, excluding the pre-tax income and tax effect of certain unique items.

**Free cash flow:** Cash provided by (used in) operating activities less capital expenditures. Management believes that free cash flow provides stockholders with a relevant measure of liquidity and a useful basis for assessing the Company's ability to fund its activities and obligations.

Whirlpool does not provide a non-GAAP reconciliation for its forward-looking long-term value creation goals, such as EBIT, free cash flow conversion, ROIC and net debt leverage, as these long-term management goals are not annual guidance, and the reconciliation of these long-term measures would rely on market factors and certain other conditions and assumptions that are outside of the Company's control.

We believe that these non-GAAP measures provide meaningful information to assist investors and stockholders in understanding our financial results and assessing our prospects for future performance, and reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP financial measures, provide a more complete understanding of our business. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These ongoing financial measures should not be considered in isolation or as a substitute for reported net earnings available to Whirlpool per diluted share, net earnings, net earnings available to Whirlpool, net earnings margin, return on assets, net sales, effective GAAP tax rate and cash provided by (used in) operating activities, the most directly comparable GAAP financial measures.

We also disclose segment EBIT as an important financial metric used by the Company's Chief Operating Decision Maker to evaluate performance and allocate resources in accordance with ASC 280 - Segment Reporting.

GAAP net earnings available to Whirlpool per basic or diluted share (as applicable) and ongoing earnings per diluted share are presented net of tax, while individual adjustments in each reconciliation are presented on a pre-tax basis; the income tax impact line item aggregates the tax impact for these adjustments. The tax impact of individual line item adjustments may not foot precisely to the aggregate income tax impact amount, as each line item adjustment may include non-taxable components. Historical quarterly earnings per share amounts are presented based on a normalized tax rate adjustment to reconcile quarterly tax rates to full-year tax rate expectations. We strongly encourage investors and stockholders to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure.

#### FOURTH-QUARTER 2025 ONGOING EARNINGS BEFORE INTEREST AND TAXES AND ONGOING EARNINGS PER DILUTED SHARE

The reconciliation provided below reconciles the non-GAAP financial measures ongoing earnings before interest and taxes and ongoing earnings per diluted share, with the most directly comparable GAAP financial measures, net earnings (loss) available to Whirlpool and net earnings (loss) per diluted share available to Whirlpool, for the three months ended December 31, 2025. Net earnings (loss) margin is calculated by dividing net earnings (loss) available to Whirlpool by net sales. Ongoing EBIT margin is calculated by dividing ongoing EBIT by net sales. EBIT margin is calculated by dividing EBIT by net sales. The earnings per diluted share GAAP measure and ongoing measure are presented net of tax, while each adjustment is presented on a pre-tax basis. Our fourth-quarter GAAP tax rate was 27.3%. The aggregate income tax impact of the taxable components of each adjustment is presented in the income tax impact line item at our fourth-quarter adjusted tax rate (non-GAAP) of (29.7)%.

*\*Earnings Before Interest & Taxes (EBIT) is a non-GAAP measure. The Company does not provide a forward-looking quantitative reconciliation of EBIT to the most directly comparable GAAP financial measure, net earnings available to Whirlpool, because the net earnings available to noncontrolling interests item of such reconciliation -- which has historically represented a relatively insignificant amount of the Company's overall net earnings -- implicates the Company's projections regarding the earnings of the Company's non wholly-owned subsidiaries and joint ventures that cannot be quantified precisely or without unreasonable efforts.*
