NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Jackson National Life Insurance Company (the "Company") are presented on the basis of accounting practices prescribed or permitted by the Michigan Department of Insurance and Financial Services.

The Department of Insurance and Financial Services recognizes statutory accounting practices prescribed or permitted by the state of Michigan for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under Michigan Insurance Law. The Department of Insurance and Financial Services has adopted the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") to the extent that the accounting practices, procedures, and reporting standards are not modified by the Michigan Insurance Code. The state of Michigan has adopted certain prescribed accounting practices that differ from those defined in NAIC SAP. Specifically, the value of the book of business arising from the acquisition of a subsidiary or through reinsurance may be recognized as an admitted asset if certain criteria are met. In NAIC SAP, goodwill may be admitted in amounts not to exceed 10% of an insurer's capital and surplus, as adjusted, and is eliminated in the event of a merger. The commissioner of insurance has the right to permit other specific practices that deviate from prescribed practices.

The Valuation of Life Insurance Policies Model Regulation ("Model 830", also known as Regulation XXX), was effective for NAIC SAP in 2000. The state of Michigan did not permit Model 830 for reserve calculations until January 1, 2002. Thus, reserves for life business issued in calendar years 2000-2001 are not valued according to Model 830 and NAIC SAP, but rather, are valued under the prior method of the Standard Valuation Law, referred to as the 'unitary' method.

Actuarial Guideline XXXV ("Actuarial Guideline 35" or the "Guideline") was adopted by the NAIC in December 1998. The purpose of Actuarial Guideline 35 is to interpret the standards for the valuation of statutory reserves for fixed index annuities. NAIC SAP requires application of Actuarial Guideline 35 for all fixed index annuities issued after December 31, 2000. Michigan law prescribes the valuation of fixed index annuities without consideration of the Guideline. As a result, the Guideline is not reflected in the Company's accounts as of December 31, 2023 and 2022.

As a result of an acquisition accounted for as a statutory purchase in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 68 and an indemnity reinsurance agreement, the Company had goodwill attributed to the value of the book of business acquired ("VOBA"). The remaining VOBA balance was fully amortized as of August 31, 2022.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the state of Michigan is shown below:

NOTES TO FINANCIAL STATEMENTS

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. These estimates and assumptions are based on management's best estimates and judgments. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors as deemed appropriate. As facts and circumstances dictate, these estimates and assumptions may be adjusted. Since future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates, including those resulting from continuing changes in the economic environment, will be reflected in the financial statements in the periods the estimates are changed.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts. Fee income is recognized as revenue when earned. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

(1) Short-term investments are stated at amortized cost.

(2) Bonds not backed by other loans are stated at amortized cost except those with an NAIC rating of "6," which are stated at the lower of amortized cost or fair value. Acquisition premiums and discounts are amortized into investment income through call or maturity dates using the interest method. The Company did not have SVO-Identified investments reported at a different measurement method from prior periods.

(3) Common stocks are stated at fair value, except as described in item (7) below.

(4) Preferred stocks are stated at cost, except those with an NAIC Securities Valuation Office ("SVO") rating of "4" through "6," which are reported at the lower of cost or fair value.

(5) Mortgage loans on real estate are stated at unpaid principal balances, net of unamortized discounts and premiums, impairments and any allowance for loan losses.

(6) Loan-backed and structured securities, hereafter collectively referred to as "loan-backed securities", are stated at amortized cost except those with an NAIC carry rating of "6," which are carried at the lower of amortized cost or fair value. The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For loan-backed securities where the collection of all contractual cash flows is not probable, the Company:

- Recognizes the accretable yield over the life of the loan-backed security as determined at the acquisition or transaction date,
- Continues to estimate cash flows expected to be collected at least quarterly, and
- Recognizes an other-than-temporary impairment loss if the loan-backed security is impaired (i.e., the fair value is less than the amortized cost basis) and if the Company does not expect to recover the entire amortized cost basis when compared to the present value of cash flows expected to be collected.

Investments are reduced to estimated fair value (discounted cash flows for loan-backed securities) for declines in value that are determined to be other-than-temporary. In determining whether an other-than-temporary impairment has occurred, the Company considers a security's forecasted cash flows as well as the severity and duration of depressed fair values.

If the Company intends to sell an impaired loan-backed security or does not have the intent and ability to retain the impaired loan-backed security for a period of time sufficient to recover the amortized cost basis, an other-than-temporary impairment has occurred. In these situations, the other-than-temporary impairment loss recognized is the difference between the amortized cost basis and fair value. For loan-backed securities, the credit portion of the recognized loss is recorded to the asset valuation reserve ("AVR") and the non-credit portion is recorded to the interest maintenance reserve ("IMR"). If the Company does not expect to recover the entire amortized cost basis when compared to the present value of cash flows expected to be collected, it cannot assert that it has the ability to recover the loan-backed security's amortized cost basis even though it has no intent to sell and has the intent and ability to retain the loan-backed security. Therefore, an other-than-temporary impairment has occurred and a realized loss is recognized for the non-interest related decline, which is calculated as the difference between the loan-backed security's amortized cost basis and the present value of cash flows expected to be collected.

For situations where an other-than-temporary impairment is recognized, the previous amortized cost basis less the other-than temporary impairment recognized as a realized loss becomes the new amortized cost basis of the loan-backed security. The new amortized cost basis is not adjusted for subsequent recoveries in fair value. Therefore, the prospective adjustment method is used for periods subsequent to other-than-temporary impairment loss recognition.

(7) The Company carries its audited wholly owned insurance and non-insurance subsidiaries at statutory capital and surplus and U.S. generally accepted accounting principles ("GAAP") equity, respectively. The Company nonadmits $5,024,065 of the unaudited equity of five subsidiaries, with a carrying value of $5,024,065 on Schedule D, Part 2, Section 2. The Company also nonadmits $17,949,015 in unaudited equity in four limited liability subsidiaries with a combined carrying value of $17,949,015 on Schedule BA – Part 1.

NOTES TO FINANCIAL STATEMENTS

(8) The Company's carrying value for ownership interests in partnerships and limited liability companies is determined using the proportion of Jackson's investment in each fund ("NAV equivalent") as a practical expedient for fair value.

(9) Derivative instruments used for hedging purposes are stated at fair value. See Note 8 for more information on derivative instruments.

(10) The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 54, Individual and Group Accident and Health Contracts.

(11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

(12) The Company did not modify its fixed asset capitalization policy from the prior period.

(13) The Company does not have pharmaceutical rebate receivables.

D. Going Concern

There is not substantial doubt about the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Net Negative (Disallowed) Interest Maintenance Reserve ('IMR')
During August 2023, the NAIC adopted INT 23-01 effective immediately and through year-end 2025 to admit net negative (disallowed) IMR up to 10% of capital and surplus of the most recently filed financial statement, adjusted to exclude any net positive goodwill, EDP equipment and operating system software, net deferred tax assets and admitted net negative (disallowed) IMR.

The following table provides the adjusted capital and surplus as of the most recently filed statement, the amount of net negative (disallowed) IMR in aggregate and allocated between the general account, insulated separate accounts and non-insulated accounts, and the percentage of adjusted capital and surplus for which the admitted net negative (disallowed) IMR represents.

Adjusted capital and surplus of most recently filed statement	$ 3,467,949,179

	Net negative (disallowed IMR)	Negative IMR admitted	Percentage of adjusted capital and surplus
General account	252,976,820	252,976,820	7.3 %
Insulated separate account	—	—	— %
Non-insulated separate account	5,555,183	5,555,183	0.2 %
	$ 258,532,003.47	$ 258,532,003.47	7.5 %

The following table summarizes the unamortized balances in IMR from derivatives that were reported at fair value prior to the termination of the derivative:

	December 31, 2023 balance of:	
Description	Unamortized gain	Unamortized loss
Interest rate swaps	$ —	$ (332,907,163)
Currency swap	24,037	—
Swaptions	46,317,179	—
Futures	46,889,149	(52,014,593)
	$ 93,230,365	$ (384,921,756)

a. Fixed income investments generating IMR losses comply with the reporting entity's documented investment or liability management policies.

b. IMR losses for fixed income related derivatives are all in accordance with prudent and documented risk management procedures, in accordance with the Company's derivative use plans and reflect symmetry with historical treatment in which unrealized derivative gains were reversed to IMR and amortized in lieu of being recognized as realized gains upon derivative termination.

c. Any deviation to a) was either because of a temporary and transitory timing issue or related to a specific event, such as a reinsurance transaction, that mechanically made the cause of IMR losses not reflective of reinvestment activities.

Fair Value	$ 5,125,464,907	$ 604,929,074	$ 4,520,535,833
Unrealized Loss	$ 473,256,108	$ 27,287,044	$ 445,969,064

The carrying value and fair value of all loan-backed and structured securities, regardless of whether the security is in an unrealized loss position, was $6,101,356,216 and $5,673,108,516, respectively.

(5) The Company periodically reviews its debt securities and equities on a case-by-case basis to determine if any decline in fair value to below amortized cost is other-than-temporary. Factors considered in determining whether a decline is other-than-temporary include the length of time a security has been in an unrealized loss position, reasons for the decline in value, expectations for the amount and timing of a recovery in value, and the Company's intent and ability not to sell a security prior to a recovery in fair value.

Securities the Company determines are underperforming or potential problem securities are subject to regular review. To facilitate this review, securities with significant declines in value or where other objective criteria evidencing credit deterioration have been met, are included on a watch list. Among the criteria for securities to be included on a watch list are: credit deterioration that has led to a significant decline in fair value of the security; a significant covenant related to the security has been breached; or an issuer has filed or indicated a possibility of filing for bankruptcy, has missed or announced it intends to miss a scheduled interest or principal payment, or has experienced a specific material adverse change that may impair its creditworthiness.

In performing these reviews, the Company considers the relevant facts and circumstances relating to each investment and exercises considerable judgment in determining whether a security is other-than-temporarily impaired. Assessment factors include judgments about an obligor's current and projected financial position, an issuer's current and projected ability to service and repay its debt obligations, the existence of, and realizable value of, any collateral supporting the obligations, and the macro-economic and micro-economic outlooks for specific industries and issuers. This assessment may also involve assumptions regarding underlying collateral such as prepayment rates, default and recovery rates, and third-party servicing capabilities.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

(1) For securities lending agreements, the Company requires collateral with a minimum fair value of 102% of the fair value of the loaned securities, calculated on a daily basis. Cash collateral received was invested in cash equivalents and an offsetting liability was included in Payable for Securities Lending. 8. Derivative Instruments

A. Derivatives under *SSAP No. 86-Derivatives*

(1) The Company enters into financial derivative transactions, including, but not limited to, swaps, put-swaptions, forwards, futures and options to reduce and manage business risks. These transactions manage the risk of a change in the value, yield, price, credit risk, cash flows, credit quality, or degree of exposure with respect to assets, liabilities, or future cash flows, which the Company has acquired or incurred.

Derivative instruments are held primarily for hedging purposes. The hedging program is supported by correlation analysis, cash flow matching, duration matching, and/or scenario testing.

Fair values of derivative instruments are based on quoted market prices, estimates received from independent pricing services, or valuation pricing models, and generally reflect the estimated amounts that the Company would receive or pay upon sale or termination of the contracts as of the reporting date. With respect to market risk movements on derivatives used for hedging purposes, fair value changes would be anticipated to be offset by fair value changes of the hedged items. Derivatives used in hedging activities are accounted for at fair value.

Cash requirements for derivatives activities are limited to payments on swaps and options, and margin requirements on cleared interest rate swaps and open futures contracts.

(2) Interest rate swap agreements hedge assets or liabilities and generally involve the exchange of fixed and floating payments over the life of the agreements without an exchange of the underlying principal (notional) amount. Generally, no cash is exchanged at the outset of the contract. The Company agrees with counterparties to exchange, at specified intervals, the difference between referenced rates on the notional amount. A cash payment, representing the net differential, is usually made by one counterparty to the other at each payment date.

Put-swaption contracts provide the purchaser with the right, but not the obligation, to require the writers to pay the present value of a long duration interest rate swap at future exercise dates. The Company purchases and writes put-swaption contracts with maturities up to 10 years. The Company’s put-swaption contracts hedge against movements in interest rates.

Equity index futures contracts, total return swaps, and equity index call and put options are used to hedge the Company’s obligations associated with its fixed indexed immediate and deferred annuities and guarantees provided by variable annuity products.

Interest rate futures contracts are used to hedge movements in interest rates.

Cross-currency swaps, which embody spot and forward currency swaps and additionally, in some cases, interest rate swaps and equity swaps, and forward contracts are entered into for the purpose of hedging the Company's foreign currency denominated obligations and foreign currency denominated invested assets.

Credit default swaps may be used to hedge potential changes in the credit quality of certain bonds held by the Company.

(3) Interest rate swap agreements are reported in invested assets at fair value. Changes in fair value are recorded as unrealized gains or unrealized losses. Amounts paid or received on interest rate swap agreements are reported in investment income.

Put-swaption contracts are reported in invested assets at fair value and put-swaption contracts written are reported in liabilities at fair value. Changes in fair value are recorded as unrealized gains or unrealized losses.

Interest rate futures, equity index futures contracts, total return swaps, and equity index options (including various call and put options) are reported in invested assets at fair value. Changes in fair value are recorded as unrealized gains or unrealized losses.

Cross-currency swaps are reported in invested assets at fair value. Amounts paid or received on currency swaps hedging foreign currency denominated guaranteed investment contracts are netted with amounts paid or received on the hedge-associated foreign currency denominated guaranteed investment contracts. Changes in fair value of the swaps are recorded as unrealized gains or unrealized losses.

Forward contracts are reported in invested assets at fair value. Changes in fair value are recorded as unrealized gains or unrealized losses.

Credit default swaps are reported in invested assets at fair value. Changes in fair value are recorded as unrealized gains or unrealized losses. Periodic premiums paid are reported in investment income.

N. Investment in Insurance Subsidiary, Controlled, and Affiliated Entities

The financial statements of the Company's wholly owned subsidiary, Jackson NY, are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services. The State of New York has adopted certain prescribed accounting practices that differ from those found in NAIC SAP.

(1) Reserves for fixed deferred annuities are valued under Continuous CARVM according to New York insurance law, rather than Curtate CARVM according to NAIC SAP.

For variable annuity reserves, New York insurance law incorporates Valuation Manual-21 ("VM-21") but also includes an additional floor calculation. Jackson NY reserves are not valued solely under VM-21 according to NAIC SAP, but rather, are valued with the additional floor calculation according to New York insurance law.

For payout business, New York insurance law requires an adapted version of Valuation Manual-22 ("VM-22") for purposes of defining minimum reserve standards, thus, reserves for payout business are not valued according to VM-22 as defined by NAIC SAP, but rather, are valued per New York regulation.

NOTES TO FINANCIAL STATEMENTS

(2) The following table details the monetary effect of the prescribed practice on net income and surplus of Jackson NY and the amount of the Company's investment in Jackson NY per the Company's audited statutory equity. The risk-based capital ("RBC") of Jackson NY would not have triggered a regulatory event had it not used these prescribed practices according to New York insurance law.

(2) Guarantees

1 Nature and circumstances of guarantee and key attributes, including date and duration of agreement.	2 Liability recognition of guarantee. (Include amount recognized at inception. If no initial recognition, document exception allowed under SSAP No. 5R.)	3 Ultimate financial statement impact if action under the guarantee is required.	4 Maximum potential amount of future payments (undiscounted) the guarantor could be required to make under the guarantee. If unable to develop an estimate, this should be specifically noted.	5 Current status of payment or performance of risk of guarantee. Also provide additional discussion as warranted.
Guarantee for policyholder obligations of its wholly owned life insurance subsidiary, Jackson National Life Insurance Company of New York (Jackson New York)	Exception allowed under SSAP No. 5R, paragraph 17f.	This guarantee is not expected to result in future required payments by the Company and is not considered to result in a material contingent exposure of the Company's assets to liability because the Company and Jackson New York share the same management and Jackson New York is subject to the regulatory supervision of the state of New York.	The maximum potential amount of future payments cannot be estimated as Jackson New York continues to write new business.	

(3) The guaranty is for a wholly owned subsidiary that is still operating. As such, no liability for the guaranty has been recorded and the maximum potential amount of future payments cannot be estimated.

It is the opinion of management that the ultimate disposition of such litigation will not have a material adverse effect on the Company's financial condition or results of operations. The Company has been named in civil litigation proceedings which appear to be substantially similar to other class action litigation brought against many life insurers alleging misconduct in the sale or administration of insurance products. The Company generally accrues for legal contingencies once the contingency is deemed to be probable and estimable. Accordingly, at December 31, 2023 and 2022, the Company recorded accruals totaling nil and $130,735, respectively.

The Company has a separate service agreement with a third party administrator to provide policyholder administrative services. The agreement, subject to certain termination provisions, has ten and twelve-year terms and expire in 2030.

See Schedule DB for additional detail.

(2) See Note 8.A. for a description of the credit risk, market risk and cash requirements of these financial instruments.

(3) The Company manages the potential credit exposure for over-the-counter derivative contracts through careful evaluation of the counterparty credit standing, collateral agreements, and master netting agreements. The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial instruments; however, the Company does not anticipate nonperformance given the counterparties’ high credit ratings. The credit exposure of derivatives is represented by the fair value of contracts with a positive fair value at the reporting date. Ultimately, this exposure is reduced by any offsetting positions with, and collateral posted by, counterparties. See Schedule DB – Part D – Section 1 for the net

NOTES TO FINANCIAL STATEMENTS

counterparty credit exposure as of December 31, 2023. There were no losses as a result of derivative counterparty nonperformance during 2023.

Futures transactions are effected through regulated exchanges and positions are marked to market and settled in cash on a daily basis. As such, the Company has little exposure to counterparty credit-related losses for exchange-traded derivatives.

(4) All of the Company's over-the-counter financial derivative counterparty master agreements contain netting provisions allowing for the offset of contractual payments due from and due to counterparties. To the extent that the net market value of aggregate contracts with individual counterparties exceeds established threshold amounts, collateral posting in favor of the exposed party is required. Collateral posted must be high quality, liquid securities or cash as dictated by the agreements.

A. Transfers of Receivables Reported as Sales

No transfers as described by SSAP No. 42, Sale of Premium Receivables, have occurred during the year.

The Company has entered into securities lending agreements with agent banks, for the purpose of earning fees, whereby blocks of securities are loaned to third parties, primarily major brokerage firms. The agreements require collateral with a minimum fair value of 102 percent of the fair value of the loaned securities, calculated on a daily basis. To further minimize the credit risks related to these programs, the financial condition of the counterparties is monitored by the agent banks on a regular basis. Cash collateral received is invested by the agent banks for the benefit of the Company and is included on the balance sheet. Securities for which all or a portion of Jackson's holdings have been loaned are identified in Schedule D with the designation "LS".

(3) The Company's policy for determining and disclosing transfers between levels is to recognize transfers using beginning-of-year balances.

(4) Bonds and Equity Securities

The fair values for bonds and equity securities are determined by management using information available from independent pricing services, broker-dealer quotes, or internally derived estimates. Priority is given to publicly available prices from independent sources, when available. Securities for which the independent pricing service does not provide a quotation are either submitted to independent broker-dealers for prices or priced internally. Typical inputs used by these three pricing methods include, but are not limited to, reported trades, benchmark yields, credit spreads, liquidity premiums, and/or estimated cash flows based on default and prepayment assumptions.

As a result of typical trading volumes and the lack of specific quoted market prices for most bonds, independent pricing services will normally derive the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available market observable information as outlined above. If there are no recently reported trades, the independent pricing services and brokers may use matrix or pricing model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at relevant market rates. Certain securities are priced using broker-dealer quotes, which may utilize proprietary inputs and models. Additionally, the majority of these quotes are non-binding and are classified as Level 3.

Included in the pricing of asset-backed and structured securities are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment assumptions believed to be relevant for the underlying collateral. Actual prepayment experience may vary from these estimates.

Internally derived estimates may be used to develop a fair value for securities for which the Company is unable to obtain either a reliable price from an independent pricing service or a suitable broker-dealer quote. These estimates may incorporate Level 2 and Level 3 inputs and are generally derived using expected future cash flows, discounted at market interest rates available from market sources based on the credit quality and duration of the instrument to determine fair value. For securities that may not be reliably priced using these internally developed pricing models, a fair value may be estimated using indicative market prices. These prices are indicative of an exit price, but the assumptions used to establish the fair value may not be observable or corroborated by market observable information and, therefore, are considered to be Level 3 inputs.

The Company performs a monthly analysis on the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals. Examples of procedures performed include, but are not limited to, initial and on-going review of third party pricing service methodologies, review of pricing statistics and trends, back testing recent trades and monitoring of trading volumes. In addition, the Company considers whether prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models, which are developed based on spreads and, when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon the available market data, the price received from the third party may be adjusted accordingly.

For those securities that were internally valued at December 31, 2023 and 2022, an internally developed model was used to determine the fair value. The pricing model used by the Company utilizes current spread levels of similarly rated securities to determine the market discount rate for the security. Furthermore, appropriate risk premiums for illiquidity and non-performance are incorporated in the discount rate. Cash flows, as estimated by the Company using issuer-specific default statistics and prepayment assumptions, are discounted to determine an estimated fair value.

On an ongoing basis, the Company reviews the independent pricing services' valuation methodologies and related inputs, and evaluates the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy distribution based upon trading activity and the observability of market inputs. Based on the results of this evaluation, each price is classified into Level 1, 2, or 3. Most prices provided by independent pricing services are classified into Level 2 due to their use of market observable inputs.

NOTES TO FINANCIAL STATEMENTS

Other Invested Assets
Other invest assets include investments in limited partnerships and real estate. In most cases, fair value for limited partnerships is determined by using the proportion of Jackson's investment in each fund (NAV equivalent) as a practical expedient for fair value. No material adjustments to these amounts were deemed necessary at December 31, 2023. As a result of using the net asset value per share practical expedient, these investments are not classified in the fair value hierarchy.

In cases when the Company expects to sell the limited partnership, the estimated sales price is used to determine the fair value. These limited partnerships are classified as Level 2 in the fair value hierarchy.

In cases when a limited partnership's financial statements are unavailable and a NAV equivalent is not available or practical, an internally developed model was used to determine fair value for that fund. These investments are classified as Level 3 in the fair value hierarchy.

Derivative Instruments
Fair value of derivative instruments reflects the estimated amounts, net of payment accruals, which the Company would receive or pay upon sale or termination of the contracts at the reporting date. Derivatives priced using valuation models incorporate inputs that are predominantly observable in the market. Inputs used to value derivatives include, but are not limited to, interest rate swap curves, credit spreads, interest rates, counterparty credit risk, equity volatility and equity index levels.

Derivative instruments classified as Level 1 include futures, which are traded on active exchanges.

Derivative instruments classified as Level 2 include interest rate swaps, cross currency swaps, credit default swaps, put swaptions and equity index call and put options. These derivative valuations are determined using pricing models with inputs that are observable in the market or can be derived principally from, or corroborated by, observable market data.

Derivative instruments classified as Level 3 include interest rate contingent options that are valued by third-party pricing services utilizing significant unobservable inputs.

Fair Values of Separate Account Assets and Liabilities
For the insulated separate account, separate account liabilities are carried at the fair value of the separate account assets, which are comprised of investments in mutual funds that transact regularly, but do not trade in active markets as they are not publicly available, and, are categorized as Level 2. For the non-insulated separate account, fair values for registered index-linked annuities are determined using projected future cash flows discounted at current market interest rates and are allocated between the separate and general accounts in accordance to admitted reserves.

(5) For derivative assets and liabilities, see paragraphs 1 and 2 for fair value and reconciliation disclosures on a net basis.

B. The Company provides additional fair value information in Note 5.

NOTES TO FINANCIAL STATEMENTS

D. At December 31, 2023 and 2022, the Company had no financial instruments for which it was not practicable to estimate fair value.

E. The Company did not have investments measured using the NAV practical expedient where, if sold, were probable of being sold at amounts different from NAV per share.

21. Other Items

A. Unusual or Infrequent Items

The Company did not have any unusual or infrequent items during the year.

B. Troubled Debt Restructuring

The Company did not restructure its debt during the year.

C. Other Disclosures

On May 29, 2019, the Michigan Department of Insurance and Financial Services revoked the status of a reinsurer as an accredited reinsurer in Michigan. As of December 31, 2022 a liability for reinsurance in unauthorized companies of $33,126,116 was established for the ceded reserve. In July 2023, the reinsurer was ordered into liquidation. During the fourth quarter of 2023, the liability for reinsurance in authorized companies was recognized as a loss, with no impact to capital and surplus.

At December 31, 2023 and 2022, the Company included $230,056,181 and $512,825,849, respectively, of miscellaneous group annuity reserves initially established by John Hancock Life Insurance Company (U.S.A) and John Hancock Life Insurance Company of New York on closed blocks of group payout annuities, which the Company assumes. The additional reserves are in excess of those required under minimum statutory standards.

Jackson is a party to an Uncommitted Money Market Line Credit Agreement dated April 6, 2023 among Jackson, Jackson Financial, and Société Générale. This agreement is an uncommitted short-term cash advance facility that provides an additional form of liquidity to Jackson and to Jackson Financial. The aggregate borrowing capacity under the agreement is $500,000,000 and each cash advance request must be at least $100,000. The interest rate is set by the lender at the time of the borrowing and is fixed for the duration of the advance. Jackson and Jackson Financial are jointly and severally liable to repay any advance under the agreement, which must be repaid prior to the last day of the quarter in which the advance was drawn.

Collateral Upgrade Transaction
During the first quarter of 2024, Jackson executed certain paired repurchase and reverse repurchase transactions ("Collateral Upgrade" transactions) totaling $1.5 billion pursuant to master repurchase agreements with participating bank counterparties. Under these transactions, the Company lends securities (e.g., corporate debt securities or other securities agreed upon between the parties) to one or more bank counterparties in exchange for cash (repurchase agreement) and exchange that cash for an equal value of U.S. Treasury securities (reverse repurchase agreement) to provide as a collateral as part of our hedging program. The transactions are paired as two legs of a Collateral Upgrade trade.

Cybersecurity Event
As previously disclosed in our statement for the quarter ended June 30, 2023, Jackson determined that Jackson's information at one of our third-party vendors, Pension Benefit Information, LLC ("PBI"), was impacted by a cybersecurity breach involving Progress Software Corporation's MOVEit Transfer software. The PBI service helps Jackson to identify possible beneficiaries for death benefits. According to PBI, an unknown actor exploited a MOVEit software flaw to access PBI's systems and download certain data. Our assessment indicated that personally identifiable information relating to approximately 850,000 of Jackson's customers was obtained by that unknown actor from PBI's systems. PBI informed Jackson that it rectified the MOVEit vulnerability.

Separately, Jackson experienced unauthorized access to two servers as a result of the MOVEit flaw; however, the scope and nature of the data accessed on those servers was significantly less than the PBI impact. Our assessment was that a subset of information relating to certain partner organizations and individuals, including certain customers of Jackson, was obtained from the two affected servers.

At this time, we do not believe the incident or related litigation will have a material adverse effect on the business, operations, or financial results of the Company.

The Company does not have any other items that require disclosure.

D. Business Interruption Insurance Recoveries

The Company does not have business interruption insurance recoveries that require disclosure.

E. State Transferable or Non-transferable Tax Credits

The Company does not have any state transferable or non-transferable tax credits that require disclosure.

NOTES TO FINANCIAL STATEMENTS

F. Subprime Mortgage Related Risk Exposure

(1) The Company defines exposure to subprime mortgage related risk as investments in securities collateralized by mortgage loans in which the borrower has a FICO score of 660 or lower.

The Company mitigates subprime risk exposure by placing limits on the aggregate amount of these investments as well as the amount of subprime investments in subordinated tranches. Approximately 95% of the current holdings of subprime collateralized mortgage-backed securities are in the senior tranches, with collateral consisting of primarily fixed-rate and first-lien mortgages.

(2) The following table summarizes the Company's direct exposure through investments in subprime mortgage loans at December 31, 2023:

		Book/Adjusted Carrying Value (excluding interest)	Fair Value	Value of Land and Buildings	Other-Than-Temporary Impairment Losses Recognized	Default Rate

d.	Total (a+b+c)	108,609,354	95,413,065	188,534,980	—	XXX

Residential mortgage-backed securities	$ 6,490,810	$ 4,692,337	$ 8,875,309	$ 125,699

(4) The Company has no underwriting exposure to subprime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

G. Retained Assets

(1) The liability for retained asset accounts is reported in the financial statements as supplemental contracts without life contingencies within Exhibit 7. Depending on the type of business, interest rates paid to retained asset account holders during the year for accounts administered on behalf of Jackson were either 0.5% or 1%. For accounts that didn't meet minimum balance requirements, rates were 0.0% or 0.5%. The rates for each account type remained constant for the entire year. There are no service or maintenance fees charged on the retained asset accounts; however, minimal fees are charged for NSF checks, stop payment orders, etc. In certain states in which we conduct business, retained asset accounts are the default method of settling insurance claims.

2) The following chart summarizes, by the number of months outstanding, the number and balance of retained asset accounts in force:

H. Insurance-Linked Securities (ILS) Contracts

The Company does not have insurance-linked securities contracts.

I. The amount that could be realized on life insurance where the reporting entity is owner and beneficiary or has otherwise obtained rights to control the policy.

The Company does not have any policies where it is the owner and beneficiary or has the right to control the policy.

22. Events Subsequent

During the first quarter of 2024, Jackson entered into a reinsurance transaction discussed below in Note 23 E,F with Brooke Life Reinsurance Company (“Brooke Re”), a newly created wholly owned subsidiary of Brooke Life. Jackson and Brooke Re are both direct subsidiaries of Brooke Life Insurance Company (“Brooke Life”). Brooke Re was capitalized with assets contributed from Brooke Life of approximately $1.9 billion, originating from Jackson as a return of capital of approximately $1.95 billion to Brooke Life in January 2024. Of the $1.9 billion contributed to Brooke Re, approximately $1.2 billion was paid to Jackson into unassigned surplus by Brooke Re as a ceding commission in connection with the execution of the reinsurance transaction. Brooke Re is a Michigan captive insurer regulated by the Michigan Department of Insurance and Financial Services created in 2024 for the express purpose of serving as the counterparty to the reinsurance transaction discussed below in Note 23 E,F.

During February 2024, the Company received regulatory approval to accrue and pay the surplus note interest payment of $10,187,500 due on March 15, 2024. See Note 13 K for discussion of the surplus note.

The Company is not aware of any other events occurring subsequent to the balance sheet date which require disclosure to keep the financial statements from being misleading or that may have a material effect on the financial condition of the Company.

The Company does not issue health insurance, and therefore, does not have risk sharing provisions of the Affordable Care Act reflected in special surplus.

23. Reinsurance

A. Ceded Reinsurance Report

Section 1 - General Interrogatories

(1) None of the reinsurers, listed in Schedule S as non-affiliated, are owned in excess of 10% or controlled, either directly or indirectly, by the Company or by any representative, officer, trustee, or director of the Company.

(2) None of the policies issued by the Company have been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such Companies) which is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or an insured or any other person not primarily engaged in the insurance business.

Section 2 - Ceded Reinsurance Report - Part A

(1) The Company does not have reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits.

(2) The Company does not have reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts that, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies.

NOTES TO FINANCIAL STATEMENTS

Section 3 - Ceded Reinsurance Report - Part B

(1) The estimated amount of the aggregate reduction in surplus (for agreements other than those under which the reinsurer may unilaterally cancel for reasons other than for nonpayment of premium or other similar credits that are reflected in Section 2 above) from termination of all reinsurance agreements, by either party, as of the date of this statement, is $109,498,173.

(2) On June 18, 2020, Jackson announced that it had entered into a funds withheld coinsurance agreement with Athene Life Re Ltd. effective June 1, 2020 to fully reinsure $26,722,725,194 of in-force book of fixed and fixed index annuity liabilities in exchange for a $1,231,133,274 ceding commission, subject to a post-closing adjustment. The $1,016,252,014 ceding commission, net of tax, was reported direct to surplus and will be amortized into income over the life of the business. In September 2021, the post closing settlement resulted in ceded premium of $6,275,611 and a $28,535,680 decrease in ceding commission.

B. Uncollectible Reinsurance

The Company did not write off reinsurance balances due from reinsurers.

C. Commutation of Ceded Reinsurance

The Company did not commute reinsurance during the period covered by this annual statement.

D. Certified Reinsurer Rating Downgraded or Status Subject to Revocation

The Company does not cede reinsurance transactions to a certified reinsurer whose rating was downgraded or whose status is subject to revocation.

E., F. Reinsurance of Variable Annuity Contracts with an Affiliated Captive Reinsurer

During the first quarter of 2024, Jackson entered into a 100% coinsurance funds withheld reinsurance transaction with Brooke Re, a Michigan captive insurer regulated by the Michigan Department of Insurance and Financial Services created in the first quarter of 2024 for the express purpose of serving as the counterparty to this new reinsurance transaction. All economics of the reinsurance transaction are effective as of January 1, 2024. The reinsurance transaction provides for the cession from Jackson to Brooke Re of liabilities associated with certain guaranteed benefits under our variable annuity contracts and similar products of Jackson, both in-force on the effective date of the reinsurance agreement and written in the future (i.e., on a "flow" basis) as well as related future fees, claims and other benefits, and maintenance expenses in exchange for a ceding commission for the in-force business. Brooke Re paid a ceding commission of approximately $1.2 billion to Jackson in connection with the execution of the reinsurance transaction. Jackson retains the variable annuity base contract, the annuity contract administration of the ceded business, and responsibility for investment management of the assets in the funds withheld account supporting the ceded liabilities. The reinsurance transaction allows us to mitigate the impact of the cash surrender value floor on Jackson's total adjusted capital, statutory required capital, and risk-based capital ratio, as well as to allow for more efficient economic hedging of the underlying risks of Jackson's business. This outcome will serve the interests of policyholders by protecting statutory capital through avoidance of non-economic hedging costs. Overall, this allows us to optimize our hedging, stabilize capital generation, and produce more predictable financial results going forward.

G. Ceding Entities That Utilize Captive Reinsurers to Assume Reserves Subject to XXX/AXXX Captive Framework

(1) The Company does not have captive reinsurers for which a risk-based capital shortfall exists for the reporting period.

(2) The Company does not have captive reinsurers for which a non-zero Primary Security Shortfall exists for the reporting period.

H. Reinsurance Credit

The Company's Guaranteed Minimum Income Benefits on Variable Annuities (GMIBs) are reinsured with Chubb Tempest Life Reinsurance LTD. GMIB reinsured benefits are subject to aggregate annual claim limits. Deductibles also apply on reinsurance of GMIB business issued since March 1, 2005. At December 31, 2023, the Company recorded a $1,146,443 reserve credit in consideration of the GMIB cession that is fully collateralized through a combination of letters of credit and a reinsurance trust. The reserve credit considers the treaty's risk limiting factors.

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company is not a party to retrospectively rated contracts or contracts subject to redetermination. In addition, the Company does not issue health insurance, and therefore, does not have premium subject to the risk sharing provisions of the Affordable Care Act.

25. Change in Incurred Losses and Loss Adjustment Expenses

The Company does not have incurred losses or loss adjustment expenses that require disclosure.

26. Intercompany Pooling Arrangements

The Company does not have structured settlements that require disclosure.

28. Health Care Receivables

The Company does not have health care receivables that require disclosure.

29. Participating Policies

For the year ended 2023, the Company's participating policies represented less than 1% of total inforce. The Company accounts for its policyholder dividends based upon recent experience factors. In 2023, the Company paid dividends in the amount of $8,527,033 to policyholders and incurred $73,406 of additional contract benefits related to certain participating policies.

30. Premium Deficiency Reserves

The Company does not have accident and health or property/casualty premium deficiency reserves.

31. Reserves for Life Contracts and Annuity Contracts

(1) The Company waives deduction of deferred fractional premiums upon death of the insured and returns premiums paid and due beyond the date of death. A reserve is held where a surrender value is promised in excess of the minimum required basic reserves. The excess required value has been established as a reserve in Exhibit 5, Miscellaneous Reserves Section.

(2) For policies issued on substandard lives, either the gross premiums are calculated on a rated age basis, or an extra premium is charged in addition to the standard premium at the true issue age. Mean reserves are calculated as the regular mean reserve for the plan at the rated age, the regular mean reserve for the plan at the true issue age plus one-half (1/2) of the extra premium charged, or a substandard reserve based on the appropriate multiple of the standard.

(3) As of December 31, 2023, the Company had $11,063,659,116 of insurance in force for which the gross premiums are less than the net premiums according to the standard valuation set by the state of Michigan. Reserves to cover the above insurance totaled the gross amount of $174,953,125 at year-end and are reported in Exhibit 5, Life Insurance and Annuities section.

(4) The Tabular Interest (Page 7, Line 4), the Tabular Less Actual Reserve Released (Page 7, Line 5), and the Tabular Cost (Page 7, Line 9) have been determined by formula as described in the instructions for Page 7, except that for some Universal Life and Single Premium Whole Life policies, the figures have been determined from the basic data for the calculation of policy reserves.

(5) Tabular Interest on funds not involving life contingencies (Exhibit 7, Line 3) has been determined from the basic data for the calculation of policy reserves.

(6) The Company has Universal Life products with secondary guarantees, issued on and after July 1, 2005. At December 31, 2023, the Company calculated reserves on these policies using minimum gross premiums determined by applying the set of charges and credits that produces the lowest premiums, regardless of the imposition of constraints, contingencies, or conditions that would otherwise limit the application of those credits and charges.
