The Vertex Company Wins Prime Position On Us Air Force Rapid Development Contract

3/29/2022

INDIANAPOLIS, Ind. (March 29, 2022) – The Vertex Company was awarded a seat on the U.S. Air Force’s Eglin Wide Agile Acquisition Contract, known as EWAAC. The contract allows Vertex to compete for task orders that use expertise in digital engineering, agile processes and open system architectures to accelerate the deployment of armaments on military platforms.

“The Vertex Company partners closely with the military to rapidly develop and deliver tactical systems” said Ed Boyington, President and CEO at The Vertex Company. “We have a rare combination of resources – multi-disciplinary engineering, a software factory, prototyping, test, production and sustainment – that position us to help the military modernize existing aircraft and other platforms with new capabilities and weapons.”

EWAAC is a multiple awardee, indefinite delivery/indefinite quantity contract valued up to \$46 billion. The contract enables new technology demonstrations, software development and manufacturing to develop new armaments and weapons on platforms across the Department of Defense.

The contract has a 10-year award period ending in August 2031.

ABOUT THE VERTEX COMPANY

The Vertex Company provides vertically integrated turnkey lifecycle support from concept definition, to engineering and manufacturing, through end-of-life support of complex systems. Our offerings include all levels of aviation maintenance, worldwide contractor logistics support, systems engineering and integration, specialized onsite

mission execution, high consequence training programs, and integrated supply-chain solutions. With over 200 locations worldwide, the Mississippi-based company offers integrated solutions for defense and commercial customers. Over our 50-year history, we have perfected the balance of cost, schedule, and performance to offer high-quality solutions that consistently exceed customer requirements.
