V2X Names Greg Lundy Vice President of Technology

2025-09-08

RESTON, Va., Sept. 8, 2025 /PRNewswire/ -- V2X, Inc. (NYSE: VVX) today announced the appointment of Greg Lundy as Vice President of Technology, effective immediately. In this role, Lundy will lead the company's innovation and technology strategy, with a focus on advancing Independent Research and Development initiatives. He will report directly to L. Roger Mason, Chief Growth Officer at V2X.

Lundy brings more than 20 years of leadership experience at the intersection of artificial intelligence, machine learning, cybersecurity, and advanced network architectures. He joins V2X from Collins Aerospace and has also held senior roles with Sony, Booz Allen Hamilton, and the U.S. Navy.

"Greg has a proven track record of driving multibillion-dollar defense and aerospace portfolios, architecting secure and autonomous systems, and leading large-scale engineering teams," said Jeremy C. Wensinger, President and Chief Executive Officer at V2X. "As a former U.S. Navy officer and mission commander with more than 2,000 combat flight hours and deep operational ISR expertise, he brings mission-critical focus and technical leadership that will strengthen our innovation strategy and support our customers' most complex challenges."

Lundy holds a bachelor's degree from the Maine Maritime Academy, a master's degree from The George Washington University, an MBA from the University of Virginia's Darden School of Business, and a doctorate in Artificial Intelligence/Machine Learning from The George Washington University.

About V2X

V2X builds innovative solutions that integrate physical and digital environments by aligning people, actions, and technology. V2X is embedded in all elements of a critical mission's lifecycle to enhance readiness, optimize resource management, and boost security. The company provides innovation spanning national security, defense, civilian,

and international markets. With a global team of approximately 16,000 professionals, V2X enables mission success by injecting AI and machine learning capabilities to meet today's toughest challenges across all operational domains.
