

NEWS RELEASE

V2X to Showcase Advanced Technology Mission Solutions at AUSA Annual Meeting 2026

2026-10-06

RESTON, Va., Oct. 6, 2026 /PRNewswire/ -- V2X, Inc. (NYSE: VVX) will showcase its advanced technology solutions designed to enhance protection, readiness, security, and battlefield connectivity at the 2026 Association of the United States Army (AUSA) Annual Meeting. At Booth 2003 in Exhibit Hall A, V2X will feature its Tempest Sentinel Counter-Unmanned Aerial System (C-UAS), AI-powered predictive aircraft readiness capabilities, integrated electronic security solutions, and Gateway Mission Router (GMR) technology supporting Army air-to-ground operations.

Throughout AUSA, V2X will demonstrate mission-focused solutions designed to address evolving operational requirements and strengthen warfighter readiness:

1. **Tempest Sentinel Counter-UAS System** – V2X will showcase Tempest Sentinel, a rugged, rapidly deployable combat system designed to protect bases, critical infrastructure, and high-value assets from emerging unmanned aerial threats. Available as a towable or static emplaced system, Tempest Sentinel combines quad weapon launchers with proven C-UAS capabilities to detect, engage, and defeat Class 2 and 3 UAS day or night and in adverse weather conditions.
2. **Cold Steel Predictive Analytics and Workflow Optimization** – Project Cold Steel is an AI-powered aircraft readiness platform that brings together maintenance, supply, and real-time flight line data to increase fleet availability and reduce downtime. Cold Steel uses AI to identify emerging maintenance issues, predict potential failures, optimize resources, and provide actionable readiness insights.

3. **Advantor Integrated Security Solutions** – Advantor Systems, a V2X company, will highlight integrated electronic security solutions that protect personnel, facilities, classified information, critical infrastructure, and other high-value assets. Advantor integrates intrusion detection, access control, video surveillance, and command-and-control technologies into a unified security environment that improves detection, assessment, and response.

4. **Army Air-to-Ground Operations – Gateway Mission Router** – V2X will demonstrate its GMR 1000 and GMR 5000, ruggedized and cyber-hardened solutions that integrate information and assured communications across multiple domains to enhance real-time situational awareness. Platform-independent and adaptable across aviation and ground vehicles, the GMR creates a more connected operational environment for warfighters operating in complex battlespaces.

Attendees can experience these technologies and meet with V2X leaders at Booth 2003 in Exhibit Hall A. V2X will demonstrate how the company combines operational expertise with advanced technology to rapidly deliver mission-ready solutions that address emerging threats and strengthen warfighter readiness.

About V2X

V2X builds innovative solutions that integrate physical and digital environments by aligning people, actions, and technology. V2X is embedded in all elements of a critical mission's lifecycle to enhance readiness, optimize resource management, and boost security. The company provides innovation spanning national security, defense, civilian, and international markets. With a global team of approximately 16,000 professionals, V2X enables mission success by injecting AI and machine learning capabilities to meet today's toughest challenges across all operational domains.
