Vectrus announces contract modifications worth \$352 million

3/29/2016

COLORADO SPRINGS, Colo., March 29, 2016 /PRNewswire/ -- Vectrus Systems Corporation, a wholly-owned subsidiary of **Vectrus**, Inc. (NYSE: VEC), has received a more than \$329 million **modification** to the U.S. Army base operations and security support services contract in **Kuwait**. The modification runs through Dec. 28, 2016. The work will be conducted in the Kuwait area of operations. **Army Contracting Command** at Rock Island, Ill., is the contracting activity.

"The Kuwait Base Operations and Security Support Services **contract** provides full spectrum base operations, training and equipping capability for service members that will generally transition to operations in the Middle East or Central Asia," said Ken **Hunzeker**, chief executive officer at Vectrus. "This contract modification allows Vectrus to continue to provide exceptional value through strong performance on the largest U.S. military footprint in the Middle East."

In addition, Vectrus Systems Corporation has been awarded a more than \$22 million modification to the previously awarded Turkey-Spain Base Maintenance Contract (**TSBMC**) to support the contingency personnel surge for Operation Inherent Resolve. Work will be performed at Incirlik Air Base, Turkey, and is expected to be complete by March 27, 2017. The Air Force Installation Contracting Agency, Kapaun Air Station, Germany, is the contracting activity.

"The \$22 million contract modification is a continuation of an August 2015, **modification** to the TSBMC worth nearly \$12 million to provide support to **Operation Inherent Resolve**," said **Hunzeker**.

"These modifications are longer in duration, with higher funding than our last modifications, which provides greater revenue and cash flow visibility, while adding to funded backlog," said Matt **Klein**, chief financial officer at Vectrus. "We considered the potential for these modifications and factored them into our 2016 guidance ranges."

About Vectrus
