Forward-Looking Statements

INTERNATIONAL PAPER

These slides contain forward-looking statements. These statements reflect management's current views and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in these statements. Factors that could cause actual results to differ relate to: (i) the execution of sale transactions currently under contract and the realization of anticipated sales proceeds thereunder, including the ability to successfully consummate the transactions without a material purchase price adjustment, the successful fulfillment (or waiver) of all conditions set forth in the sale agreements, the successful closing of the transactions within the estimated timeframes, and the ability to monetize the non-cash portion of the sale proceeds; (ii) the ability of the Company to accomplish the transformation plan, including the ability to realize anticipated profit improvement from the plan and the ability to successfully negotiate satisfactory sale terms for assets that are being evaluated for sale but are not currently under contract; and (iii) the effect of economic and industry conditions on the Company generally, and on the market price of the Company's stock, including unanticipated events (in type, scope or magnitude) that would have a material adverse impact upon the Company's liquidity or results of operations. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. These and other factors that could cause or contribute to actual results differing materially from such forward looking statements are discussed in greater detail in the Company's Securities and Exchange Commission filings.
