Forward-Looking Statements

INTERNATIONAL PAPER

These slides and statements made during this presentation contain forward-looking statements. These statements reflect management's current views and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in these statements. Factors which could cause actual results to differ relate to: (i) industry conditions, including changes in the cost or availability of raw materials and energy, changes in transportation costs, competition, changes in the Company's product mix and demand and pricing for the Company's products; (ii) market and economic factors, including changes in international conditions, specifically in Brazil, Russia, Poland and China, changes in currency exchange rates, changes in credit ratings issued by nationally recognized statistical rating organizations, pension and healthcare costs and natural disasters, such as hurricanes; (iii) the Company's ability to realize anticipated profit improvement from its transformation plan and the ability to invest proceeds with attractive financial returns and (iv) unanticipated expenditures related to the cost of compliance with environmental and other governmental regulations and the uncertainty of the costs and other effects of potential litigation. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. These and other factors that could cause or contribute to actual results differing materially from such forward looking statements are discussed in greater detail in the Company's Securities and Exchange Commission filings.
