Forward-Looking Statements

INTERNATIONAL PAPER

These slides and statements made during this presentation contain forward-looking statements. These statements reflect management's current views and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in these statements. Factors which could cause actual results to differ relate to: (i) increases in interest rates and our ability to meet our debt service obligations; (ii) industry conditions, including but not limited to changes in the cost or availability of raw materials, energy and transportation costs, competition we face, cyclicality and changes in consumer preferences, demand and pricing for its products; (iii) global economic conditions and political changes, including but not limited to the impairment of financial institutions, changes in currency exchange rates, credit availability, credit ratings issued by recognized credit rating organizations, the amount of our future pension funding obligation, changes in tax laws and pension and health care costs; (iv) unanticipated expenditures related to the cost of compliance with environmental and other governmental regulations and to actual or potential litigation; and (v) whether we experience a material disruption at one of our manufacturing facilities and risks inherent in conducting business through a joint venture. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. These and other factors that could cause or contribute to actual results differing materially from such forward looking statements are discussed in greater detail in the company's Securities and Exchange Commission filings.

Statements Relating to Non-GAAP Financial Measures

INTERNATIONAL PAPER

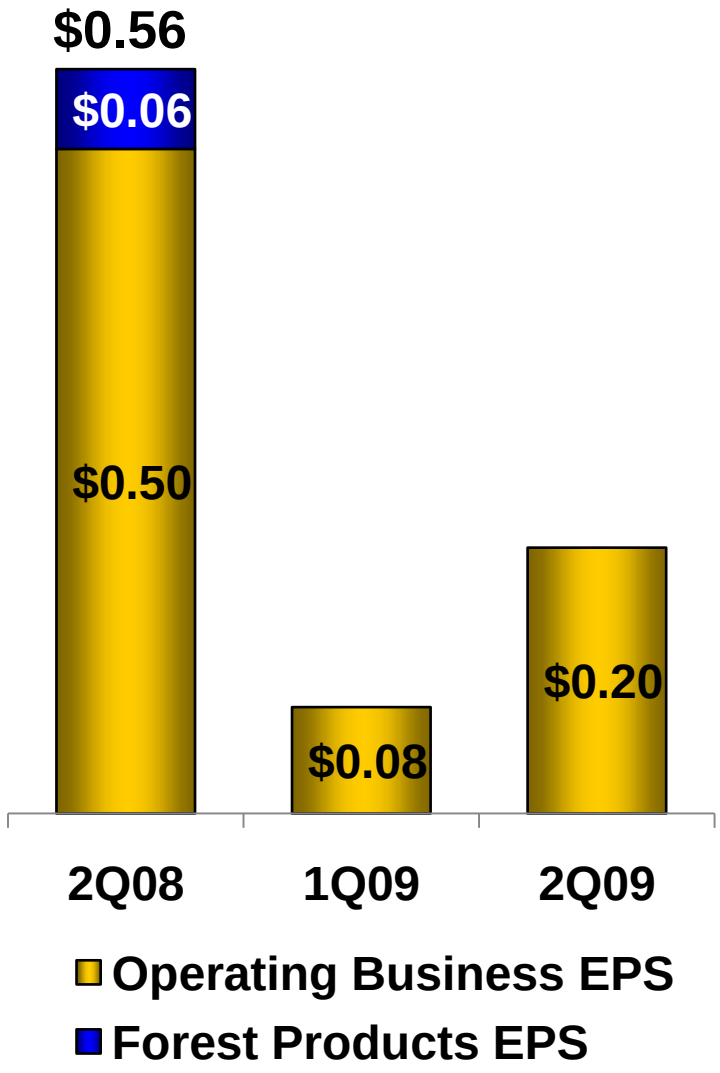

During the course of this presentation, certain non-U.S. GAAP financial information will be presented.

A reconciliation of those numbers to U.S. GAAP financial measures is available on the company's website at internationalpaper.com under Investors.
