Forward-Looking Statements

Certain statements in these slides and made during this presentation may be considered forward-looking statements. These statements reflect management's current views and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in these statements. Factors which could cause actual results to differ include but are not limited to: (i) the level of our indebtedness and increases in interest rates; (ii) industry conditions, including but not limited to changes in the cost or availability of raw materials, energy and transportation costs, competition we face, cyclicality and changes in consumer preferences, demand and pricing for our products; (iii) global economic conditions and political changes, including but not limited to the impairment of financial institutions, changes in currency exchange rates, credit ratings issued by recognized credit rating organizations, the amount of our future pension funding obligation, changes in tax laws and pension and health care costs; (iv) unanticipated expenditures related to the cost of compliance with existing and new environmental and other governmental regulations and to actual or potential litigation; (v) whether we experience a material disruption at one of our manufacturing facilities and risks inherent in conducting business through a joint venture; (vi) the failure to realize synergies and cost savings from the Temple-Inland Inc. (“Temple-Inland”) transaction or delay in realization thereof; and (vii) our ability to achieve the benefits we expect from all other strategic acquisitions, divestitures and restructurings. These and other factors that could cause or contribute to actual results differing materially from such forward looking statements are discussed in greater detail in our Securities and Exchange Commission filings. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

Statements Relating to Non-GAAP Financial Measures

During the course of this presentation, certain non-U.S. GAAP financial information will be presented.
