

Orion S.A.

Q2 2026
Earnings Conference Call

August 6, 2026

Forward-Looking Statements

Forward-Looking Statements

This presentation contains and refers to certain forward-looking statements with respect to our financial condition, results of operations and business. These statements constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. You should not place undue reliance on forward-looking statements. Forward-looking statements are typically identified by words such as "anticipate," "assume," "assure," "believe," "confident," "could," "estimate," "expect," "intend," "may," "objectives," "outlook," "plan," "probably," "project," "seek," "target," "to be," "upside," "will" and other words of similar meaning. These forward-looking statements include, without limitation, statements about the following matters: our guidance, expectations and assumptions for the 2026 fiscal year; demand for tires; our expectations on free cash flow and inventory; and carbon black and U.S. tire imports.

All these forward-looking statements are based on estimates and assumptions that, although believed to be reasonable, are inherently uncertain. Therefore, undue reliance should not be placed upon any forward-looking statements. There are important factors that could cause actual results to differ materially from those contemplated by such forward-looking statements. These factors include, among others: negative or uncertain worldwide economic conditions and developments; the operational risks inherent in chemicals manufacturing, including but not limited to disruptions due to technical difficulties, severe weather conditions or natural disasters, pandemics, or otherwise; unanticipated impacts of our plans and strategies, including possible future decisions to discontinue or reduce production at certain facilities; our dependence on major customers and suppliers; further changes and uncertainty in the geopolitical environment or government policy, including related to tariffs, counter-tariffs and other trade barriers; disruptions in the supply and the volatility of the pricing of carbon black oil feedstock and natural gas (including due to geopolitical conflicts); our ability to compete in the industries and markets in which we operate; our ability to successfully develop new products and technologies; our ability to effectively implement our business strategies; the volatility of costs, quality and availability of raw materials and energy; our ability to realize benefits from investments, joint ventures, acquisitions or alliances; our ability to realize benefits from, and changes in plan with respect to, plant capacity expansions and capital investments such as site development projects; any information technology systems failures, network disruptions and breaches of data security, including via third-party systems or using emerging technologies such as artificial intelligence; our exposure to political or country risks inherent in doing business globally; rapidly changing geopolitical environment, conflicts, growing tension between U.S. and other countries, and/or any other escalations that may impact energy costs, raw material availability or other economic disruptions; our ability to comply with complex environmental, health and safety laws and regulations, and current and any possible future investigations and enforcement actions by governmental, supranational agencies or other organizations; environmental, social and governance matters, including regulations requiring a reduction of greenhouse gas emissions or that impose additional taxes or fees on emissions as well as increased awareness and adverse publicity about potential impacts on climate change by us; changes in regulations for carbon black as a nano-scale material; our operations as a company in the chemical sector, including the related risks of leaks, fires and toxic releases as well as other accidents; any changes in European Union regulations or similar international regulations on chemical carbon that will affect our ability to market and sell our products; any market or regulatory changes that may affect our ability to sell or otherwise benefit from co-generated energy; any litigation or legal proceedings, including product liability, environmental or asbestos related claims; our ability to protect our intellectual property rights and know-how; risks associated with our financial leverage; restrictive effects of the covenants in our debt instruments; any deterioration in our financial position or downgrade of our ratings by credit rating agencies; any disruptive changes in international and local economic conditions, dislocations in credit and capital markets and inflation or deflation; our ability to generate the funds required to service our debt and finance our operations; any fluctuations in foreign currency exchange or interest rates; the availability and efficiency of hedging for certain risks; any potential impairments or write-offs of certain assets; any required increases in our pension fund or retirement-related contributions; the adequacy of our insurance coverage; any challenges to our decisions and assumptions in assessing and complying with our tax obligations; any changes in our jurisdictional earnings mix or in the tax laws or accepted interpretations of tax laws in those jurisdictions; the ability to pay dividends on our Common stock at historical rates or at all; the difference between our stockholders' rights and rights of stockholders of a U.S. corporation; the potential difficulty in obtaining or enforcing judgments or bringing legal actions against Orion S.A. (a Luxembourg incorporated entity) in the U.S. or elsewhere outside Luxembourg; the difference between Luxembourg & European insolvency laws from U.S. insolvency laws; our relationships with our workforce, including negotiations with labor unions, strikes and work stoppages; and our ability to recruit or retain key management and personnel.

Factors that could cause our actual results to differ materially from those expressed or implied in such forward-looking statements also include those factors detailed under the captions "Cautionary Statement for Purposes of the 'Safe Harbor' Provisions of the Private Securities Litigation Reform Act of 1995" and "Risk Factors" in our Annual Report in Form 10-K for the year ended December 31, 2025 and in Note Q. Commitments and Contingencies to our audited Consolidated Financial Statements and in our quarterly reports on Form 10-Q and the unaudited consolidated financial statements. It is not possible for our management to predict all risk factors and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information, other than as required by applicable law.

Q2 2026 Highlights

- **Adj EBITDA of \$58M, up 26% sequentially**
- **Led by strength in Specialty; Double-digit gains in both EMEA and Americas**
- **Excellent pricing execution**
- **Reaffirming full year EBITDA outlook; Increasing FCF outlook**

Focused on Factors We Control

Exceptional year-to-date safety performance

Plant reliability improving, third consecutive year

Expanded operational excellence programs

Maintenance capex focused on impactful projects

Improving feedstock flexibility

Working capital efforts yielding benefit:

- Structurally lower inventories, minimal service impact
- Payment terms → aligning with industry standards

Delivering on cost initiatives

Business Trends

Business exhibiting resilience, despite oil volatility and stressed supply chains

Specialty demand strength

- Robust year-over-year growth in key western geographies
- Diverse end-market participation – beyond restocking activity
- Order patterns reinforce **local for local**
- Asian demand trends eased during Q2

Markets support pricing

Strong spot Rubber demand in North America

Trade Flow, Regulatory Considerations

Europe: Anti-dumping duties effective July 8

- Duties: 24-45% on tire imports from China
- Anti-subsidization probe concludes late 2026

Tire imports to North America down modestly

Reshoring: Three new tire players intend to invest in North America

Encouraging tire technology trends

- Larger tires: more content; EVs: greater wear; All-season tires: more grip → more wear; Euro 7 durability: favors carbon black
- Driving content per tire and/or more frequent replacement cycles

Q2 2026 Orion Results

Adj EBITDA of \$58M, down 15% YoY, up 26% sequentially;
Volumes declined 1% YoY, despite Specialty volumes improving 5%

Specialty Adj EBITDA of \$39M increased 96% YoY;
Volumes improved 5%, on ~10% YoY gains in EMEA and the Americas;
Pricing actions, volume gains, mix → favorable contributors

Rubber Adj EBITDA of \$19M down 61% YoY, on 3% lower volumes;
2026 contractual pricing agreements; Pass-through timing,
inventory draw (working capital actions); EBITDA stable QoQ

Free Cash Flow of \$2M, strong improvement from Q1;
Working capital was a \$4M source of cash, despite surge in oil prices

Specialty Segment

Q2 2026 Results

- **Adj EBITDA of \$39M** improved ~\$19M (+96%) YoY, on 5% higher volumes
- Better volumes, pricing actions, improved mix → all contributed to higher YoY earnings
- Gross profit / ton increased 59% from prior-year levels; improved 32% sequentially compared to Q1'26

Additional Commentary

- Volume gains of ~10% in EMEA and Americas reflect broad-based strength in differentiated grades
- Adj EBITDA improved in all regions
- APAC demand moderated during the quarter as Chinese economy and restocking activity waned
- Limited visibility for Q4

Rubber Segment

Q2 2026 Results

- **Adj EBITDA of \$19M**, down 62% YoY; 2026 contractual price agreements, unfavorable mix, inventory draw
- Volumes declined 3% YoY, slightly higher EMEA volumes were more than offset by lower volumes in Americas, Asia
- Orion's volume decline in line with our production line rationalizations, NA tire production

Additional Commentary

- Tire production below historic norms; Imports trending down slowly
- European anti dumping duties expected to support local tire manufacturing
- Class 8 truck order strength in 2026 could portend tire maintenance spend in 2027

Cash Flow & Balance Sheet Improved

Cash Flow Highlights

- Working capital was a \$4M source of cash in Q2, despite impact of higher oil prices on inventories
- Operating cash flow was \$27M in Q2
- Capital expenditures of \$25M, down \$11M sequentially
- Free cash flow of \$2M, exceeding prior outlook

Balance Sheet & Leverage

- Net debt at quarter end of \$961M, down modestly on sequential basis
- Net Debt-to-Adj. EBITDA ratio of 4.4x
- Comfortably below Credit Agreement leverage ratios
- Liquidity of \$178M

Revised Outlook & Sensitivities

2026 Guidance at Q2 2026 Earnings Call

- **Adjusted EBITDA:**
2026: \$170 - \$210M *Unchanged*
- **Free Cash (Out)Flow:**
2026: (\$10) - \$20M *Prior: (\$25) – (\$50)M
Increased: \$42.5M*
- **Capital Expenditures:**
~\$90M *Unchanged*

Sensitivities

- Impact of \$10/bbl change in average feedstock cost:
 - Changes EBITDA by \$7 - \$10M, over 12-month period
 - Changes Net Working Capital by \$25 - \$30M, over 3-4 months
- FX: 1% Change in EUR/USD amounts to ~\$2M EBITDA impact, over full year

Concluding Remarks

Durable and resilient business model

Volatile backdrop creates opportunity for Orion

Local for local favors Orion

Reliability & dependability valued by partners

Laser focused on earnings & free cash flow

Non-GAAP Financial Measures

Non-GAAP Financial Measures

We present certain financial measures that are not prepared in accordance with GAAP or the accounting standards of any other jurisdiction and may not be comparable to other similarly titled measures of other companies. For a reconciliation of these non-GAAP financial measures to their nearest comparable GAAP measures, see Appendix slides above.

These non-GAAP measures include, but are not limited to Adjusted Net Income, EBITDA, Adjusted EBITDA, Adjusted Diluted EPS, Free Cash Flow, Net Debt and Working Capital.

We define Adjusted Net Income as Net income, stock-based compensation, and non-recurring items (such as, restructuring expenses, legal settlement gain, etc.). We define EBITDA as earnings before interest, taxes, depreciation and amortization. We define Adjusted EBITDA as Income from operations before depreciation and amortization, stock-based compensation, and non-recurring items plus Earnings in affiliated companies, net of tax. We define Adjusted Diluted EPS as Adjusted Net Income divided by Diluted Weighted-average shares outstanding. We define Free Cash Flow as Net cash provided by operating activities plus net cash used in investing activities. We define Net debt as Total gross debt less Cash and cash equivalents. We define Working capital as Inventories, net plus Accounts receivable, net minus Accounts payable.

Our operations are managed by senior executives who report to our Chief Executive Officer ("CEO"), the chief operating decision maker ("CODM"). Adjusted EBITDA is used by our CODM to evaluate our operating performance and to make decisions regarding allocation of capital, because it excludes the effects of items that have less bearing on the performance of our underlying core business. We use this measure, together with other measures of performance under GAAP, to compare the relative performance of operations in planning, budgeting and reviewing our business. We believe our non-GAAP measures are useful measures of financial performance in addition to Net income, Income from operations, and other profitability measures under GAAP, because they facilitate operating performance comparisons from period to period. By eliminating potential differences in results of operations between periods caused by factors such as depreciation and amortization, historic cost and age of assets, financing and capital structures and taxation positions or regimes, we believe that Adjusted EBITDA provides a useful additional basis for evaluating and comparing the current performance of the underlying operations.

In addition, we believe these non-GAAP measures aid investors by providing additional insight into our operational performance and help clarify trends affecting our business.

However, other companies and analysts may calculate non-GAAP financial measures differently, so making comparisons among companies on this basis should be done carefully. Non-GAAP measures are not performance measures under GAAP and should not be considered in isolation or construed as substitutes for Net sales, Net income, Income from operations, Gross profit and other GAAP measures as an indicator of our operations in accordance with GAAP.

With respect to Adjusted EBITDA, Adjusted Diluted EPS and Free Cash Flow guidance for 2026, we are not able to reconcile the forward-looking non-GAAP financial measures to the closest corresponding GAAP measure without unreasonable efforts because we are unable to predict the ultimate outcome of certain significant items. These items include, but are not limited to, legal settlements, tax and regulatory reserve changes, restructuring costs and financing related impacts.
