### **§ 44475.2: Disclosure Information Related to the Company’s Emissions Reduction and Carbon Neutral Goals and Progress**

In 2024, we publicly reported our greenhouse gas (“GHG”) emissions through our inaugural Impact Report. We have set the following near-term, science-aligned GHG emissions reduction target:

- Net zero by 2025 for scope 1, 2, and limited scope 3 (related to our cloud computing and data centers)

Additional details and a description of our progress toward these goals can be found in our Impact Report, available [here](#). We work with an independent third-party professional services company to calculate our emissions data via the World Resources Institute’s GHG Protocol.

As of December 20, 2024, we do not utilize third-party assurance for our emissions data or independent verification of our emissions-related claims.
