SUPPLEMENT TO THIRD QUARTER 2026 RESULTS RELEASE

This document should be read in conjunction with GeoPark's Third Quarter 2026 Results Release, available on the Company's website.

PRODUCTION, DELIVERIES AND REALIZED OIL PRICES

Production: Average net oil and gas production in 3Q2026 was 27,973 boepd, down 1% compared to 3Q2025. Oil represented 99.6% and 96.5% of total reported production in 3Q2026 and in 3Q2025, respectively.

For further details, please refer to the 3Q2026 Operational Update published on October 15, 2026.

Deliveries: Oil and gas deliveries to GeoPark's offtakers in 3Q2026 totaled 22,476 boepd, down by 6% compared to 3Q2025.

Reference and Realized Oil Prices: Brent crude oil prices averaged $91.4/bbl during 3Q2026, and the consolidated realized oil sales price (before earn-out to ex-owners of certain blocks and hedge result) increased by 26% to $76.5/bbl in 3Q2026, compared to 3Q2025.

A breakdown of reference and net realized oil prices in relevant countries in 3Q2026 and 3Q2025 is shown in the tables below:

3Q2026 - Realized Oil Prices ($ per bbl)	**Colombia**	**Argentina**
Brent oil price (*)	91.4	96.8
Local marker differential	(6.8)	(3.5)
Commercial, transportation discounts & other	(8.1)	(16.8)
Realized oil price	76.5	76.5
Weight on oil sales mix	91%	9%

3Q2025 - Realized Oil Prices ($ per bbl)	**Colombia**	**Ecuador**
Brent oil price (*)	68.1	68.1
Local marker differential	(1.4)	(6.4)
Commercial, transportation discounts & other	(6.1)	—
Realized oil price	60.6	61.7
Weight on oil sales mix	96%	4%

(*) Corresponds to the weighted average of ICE Brent sale price.

REVENUE AND COSTS

Revenue: Consolidated revenue decreased by 7% to $116.2 million in 3Q2026, compared to $125.1 million in 3Q2025, mainly reflecting higher realized losses on commodity risk management contracts, partially offset by higher realized oil prices.

Sales of crude oil: Consolidated oil revenue increased by 27% compared to 3Q2025, reaching $152.6 million in 3Q2026, mainly due to a 26% increase in realized oil prices. Oil revenue was 100% and 96% of total revenue in 3Q2026 and 3Q2025, respectively.

The table below provides a breakdown of crude oil revenue in 3Q2026 and 3Q2025:

Oil Revenue (In millions of $)	**3Q2026**	**3Q2025**
Colombia	138.8	115.7
Argentina	13.9	—
Ecuador	—	4.7
Brazil	—	0.1
Oil Revenue	152.6	120.6

Sales of purchased crude oil: No sales of purchased crude oil were recorded in 3Q2026 and 3Q2025.

Sales of gas: No gas revenue was recorded in 3Q2026, compared to $3.0 million in 3Q2025, mainly reflecting the divestment of the Manati gas field in Brazil in December 2025.

The table below provides a breakdown of gas revenue in 3Q2026 and 3Q2025:

Gas Revenue (In millions of $)	**3Q2026**	**3Q2025**
Argentina	—	—
Brazil	—	3.0
Gas Revenue	—	3.0

Commodity Risk Management Contracts: Commodity risk management contracts, which are designated and qualify as cash flow hedges, amounted to a $36.4 million loss in 3Q2026, compared to a $1.5 million gain in 3Q2025.

In 3Q2026, GeoPark had zero-premium three-way collars covering 20,000 bopd, with purchased puts at an average price of $64.9/bbl, sold puts at $50.8/bbl and sold calls at an average price of $71.1/bbl.

Please refer to the "Commodity Risk Management Contracts" section below for a description of hedges in place.

Production and Operating Costs: Consolidated production and operating costs increased to $57.5 million in 3Q2026 from $33.3 million in 3Q2025, mainly resulting from higher operating costs and higher royalties paid in cash.

The table below provides a breakdown of production and operating costs in 3Q2026 and 3Q2025:

Production and Operating Costs (In millions of $)	**3Q2026**	**3Q2025**
Operating costs	(51.1)	(31.4)
Royalties paid in cash	(4.1)	(1.4)
Economic rights paid in cash	(1.4)	(0.4)
Share-based payments	(0.9)	(0.1)
Production and Operating Costs	(57.5)	(33.3)

Consolidated operating costs amounted to $51.1 million in 3Q2026, compared to $31.4 million in 3Q2025.

The table below provides the operating cost on a per boe basis in 3Q2026 and 3Q2025:

Operating Costs (Per boe)[a]	**3Q2026**	**3Q2025**
Operating costs per produced boe	(20.7)	(12.5)
Operating costs per sold boe	(25.0)	(15.0)

a) Operating costs per boe included in this table include certain adjustments to the reported figures (IFRS 16 and others).

Consolidated royalties paid in cash amounted to $4.1 million in 3Q2026, compared to $1.4 million in 3Q2025, mainly resulting from the newly acquired assets in Vaca Muerta, Argentina.

Consolidated economic rights paid in cash (including high price participation, x-factor and other economic rights paid to the Colombian Government in cash) amounted to $1.4 million in 3Q2026, compared to $0.4 million in 3Q2025.

No consolidated purchased crude oil charges were recorded in 3Q2026 and 3Q2025, which corresponds to oil trading operations (purchasing and selling crude oil from third parties with the sale of purchased oil being reflected in revenue).

Selling Expenses: Consolidated selling expenses decreased to $4.2 million in 3Q2026, compared to $7.2 million in 3Q2025. The fluctuation in transportation costs is mainly attributed to deliveries at different sales points in the CPO-5 and Llanos 123 Blocks in Colombia, including the shift to export delivery locations under a new commercial arrangement with BP Products North America Inc. from August 2025 to April 2026. Sales at the wellhead incur no selling costs but yield lower revenue, while transportation expenses for sales to alternative or export delivery points are recognized as selling expenses.

Geological & Geophysical Expenses: Consolidated G&G expenses decreased to $1.5 million in 3Q2026, compared to $2.3 million in 3Q2025.

Administrative Expenses: Consolidated G&A decreased to $8.8 million in 3Q2026 compared to $9.8 million in 3Q2025.

Adjusted EBITDA: Consolidated Adjusted EBITDA[1] decreased by 36% to $45.8 million in 3Q2026 compared to 3Q2025. On a per boe basis, Adjusted EBITDA decreased to $22.2 per boe in 3Q2026 from $32.6 per boe in 3Q2025.

Adjusted EBITDA (In millions of $)	**3Q2026**	**3Q2025**
Colombia	43.7	70.9
Argentina	3.9	(1.1)
Ecuador	(0.0)	1.4
Brazil	(0.3)	1.4
Corporate	(1.5)	(1.2)
Adjusted EBITDA	45.8	71.4

The table below shows production, volumes sold and the breakdown of the most significant components of Adjusted EBITDA for 3Q2026 and 3Q2025, on a per boe basis:

Adjusted EBITDA/boe	**Colombia**		**Argentina**		**Ecuador**		**Brazil**		**Total**[e]	
	3Q2026	**3Q2025**	**3Q2026**	**3Q2025**	**3Q2026**	**3Q2025**	**3Q2026**	**3Q2025**	**3Q2026**	**3Q2025**
Production (boepd)	25,865	26,208	2,108	—	—	926	—	1,002	27,973	28,136
Inventories, RIK & Other[a]	(5,358)	(4,598)	(139)	—	—	(95)	—	374	(5,497)	(4,319)
Sales volume (boepd)	20,507	21,610	1,969	—	—	831	—	1,376	22,476	23,817

Purchased crude oil[d]	—	—	—	—	—	—	—	—	—	—
Selling & other expenses	(2.0)	(3.3)	(2.6)	—	—	(8.0)	—	—	(2.0)	(3.3)
Operating Netback/boe	**25.8**	**40.0**	**33.1**	**—**	**—**	**24.1**	**—**	**14.0**	**26.5**	**38.0**
G&A, G&G & other									(4.3)	(5.4)
Adjusted EBITDA/boe									**22.2**	**32.6**

a) RIK (Royalties in Kind) & Other: Includes royalties and other economic rights paid in kind in Colombia for approximately 4,898 bopd and 4,612 bopd in 3Q2026 and 3Q2025, respectively. No royalties were paid in kind in Argentina or Ecuador. Production in Ecuador is reported before the Government's production share.

b) Conversion rate of $mcf/$boe=1/6.

c) Operating costs per boe included in this table include certain adjustments to the reported figures (IFRS 16 and others).

d) Reported in the Corporate business segment.

e) Includes amounts recorded in the Corporate business segment.

Operating costs of sold volumes in Colombia are affected by the mix of royalties and economic rights paid in kind versus paid in cash. Operating cost per sold boe is calculated as total operating costs (including the cost to produce barrels that are used to pay royalties and economic rights in kind) divided by barrels delivered to GeoPark's offtakers (after royalties and economic rights paid in kind).

Depreciation: Consolidated depreciation charges amounted to $29.5 million in 3Q2026, compared to $28.7 million in 3Q2025.

1 For reconciliations, see "Reconciliation of Adjusted EBITDA to Profit Before Income Tax" table below.

Write-off of unsuccessful exploration efforts: No write-off of unsuccessful exploration efforts recorded in 3Q2026, compared to $7.5 million in 3Q2025.

Other Income (Expenses): Consolidated other expenses amounted to $3.0 million in 3Q2026, compared to $3.9 million expenses in 3Q2025.

CONSOLIDATED NON-OPERATING RESULTS AND PROFIT

Financial Expenses: Net financial expenses amounted to $16.9 million in 3Q2026, compared to $11.0 million in 3Q2025.

Foreign Exchange: Net foreign exchange recorded a $0.5 million loss in 3Q2026, compared to $1.5 million loss foreign exchange in 3Q2025.

Income Tax: Income taxes totaled $12.4 million gain in 3Q2026, compared to $4.0 million loss in 3Q2025, mainly resulting by a deferred income tax benefit of $12.0 million in Argentina. This benefit was mainly attributable to inflation adjustments to the tax bases of property, plant and equipment and fluctuations in the Argentine peso against the US dollar.

Net Profit/Loss: Net profit amounted to $6.6 million in 3Q2026, compared to $15.9 million in 3Q2025.

BALANCE SHEET

Cash and Cash Equivalents: Cash and cash equivalents totaled $253.4 million as of September 30, 2026, compared to $100.3 million as of December 31, 2025.

This net increase is explained by the following:

Cash and Cash Equivalents (In millions of $)	**9M2026**
Cash flows used in operating activities	174.7
Cash flows from investing activities	(164.5)
Cash flows from financing activities	142.9
Currency Translation	(0.1)
Net increase in cash & cash equivalents	153.0

Cash flows from operating activities of $174.7 million included income tax payments of $6.6 million[2], among others.

Cash flows from investing activities included capital expenditures of $72.2 million.

Cash flows from financing activities mainly included $107.0 million from the issuance of shares to Grupo Gilinski and $93.0 million from new local debt in Colombia and Argentina, partially offset by $47.7 million related to interest payments and $4.9 million related to cash dividend payments.

[2] Includes current income tax payments and $15.1 million of withholding taxes from clients (included within the "Change in working capital" line item of the Statement of Cash Flow).

Financial Debt: Total financial debt net of issuance cost was $640.0 million, corresponding to the 2030 Notes and the 2027 Notes, and a local debt in Colombia. Short-term financial debt was $199.2 million as of September 30, 2026, and corresponds to the 2027 Notes, the short-term local debts in Colombia and Argentina, and accrued interest.

Financial Debt (In millions of $)	**September 30, 2026**	**December 31, 2025**
2030 Notes	444.2	454.3
2027 Notes	95.5	96.2
Other local debts	100.3	3.0
Financial debt	640.0	553.5

FINANCIAL RATIOS[3]

(In millions of $)

Period-end	**Financial Debt**	**Cash and Cash Equivalents**	**Net Debt (*)**	**Net Debt/LTM Adj. EBITDA**	**LTM Interest Coverage**
3Q2025	570.4	197.0	373.4	1.2x	6.8x
4Q2025	553.5	100.3	453.2	1.6x	5.6x
1Q2026	608.0	274.9	333.1	1.3x	5.2x
2Q2026	634.0	316.3	317.8	1.2x	6.4x
3Q2026	640.0	253.4	386.6	1.6x	5.7x

Covenants in the 2027 Notes: The 2027 Notes include debt incurrence covenants that, among others, require that the Net Debt to Adjusted EBITDA ratio should not exceed 3.25 times and the Adjusted EBITDA to Interest ratio should exceed 2.5 times for GeoPark to incur new debt.

Covenants in the 2030 Notes: The 2030 Notes include debt incurrence covenants that, among others, require that the Net Debt to Adjusted EBITDA ratio should not exceed 3.5 times and the Adjusted EBITDA to Interest ratio should exceed 2.5 times for GeoPark to incur new debt.

COMMODITY RISK MANAGEMENT CONTRACTS

The table below summarizes commodity risk management contracts in place as of September 30, 2026:

Period	**Type**	**Reference**	**Volume (bopd)**	**Contract Terms (Average $ per bbl)**			
				Sold Put	**Purchased Put**	**Sold Call**	**Fixed Price**
4Q2026	Zero cost 3-way	Brent	19,000	50.3	64.6	70.9	N/A
4Q2026	Zero cost collar	Brent	6,000	N/A	85.0	105.5	N/A
1Q2027	Zero cost 3-way	Brent	18,000	51.5	65.0	71.2	N/A
1Q2027	Zero cost collar	Brent	3,500	N/A	75.0	91.3	N/A
2Q2027	Zero cost 3-way	Brent	21,000	50.6	67.9	77.3	N/A
3Q2027	Zero cost 3-way	Brent	18,500	50.0	72.7	82.6	N/A

[3] Based on trailing last twelve-month financial results ("LTM").

3Q2027	Zero cost collar	Brent	4,500	N/A	73.3	81.9	N/A

GLOSSARY

2027 Notes	5.500% Senior Notes due 2027
2030 Notes	8.750% Senior Notes due 2030
Adjusted EBITDA	Adjusted EBITDA is defined as profit for the period before net finance costs, income tax, depreciation, amortization, the effect of IFRS 16, certain non-cash items such as impairments and write-offs of unsuccessful efforts, accrual of share-based payments, unrealized results on commodity risk management contracts and other non-recurring events
Adjusted EBITDA per boe	Adjusted EBITDA divided by total boe deliveries
Operating Netback per boe	Revenue, less production and operating costs (net of depreciation charges and accrual of stock options and stock awards, the effect of IFRS 16), selling expenses, and realized results on commodity risk management contracts, divided by total boe deliveries. Operating Netback is equivalent to Adjusted EBITDA net of cash expenses included in Administrative, Geological and Geophysical and Other operating costs
bbl	Barrel
boe	Barrels of oil equivalent
boepd	Barrels of oil equivalent per day
bopd	Barrels of oil per day
G&A	Administrative expenses
G&G	Geological & geophysical expenses
LTM	Last twelve months
mcfpd	Thousand cubic feet per day
Net Debt	Current and non-current borrowings less cash and cash equivalents
WI	Working interest

Percentage figures included in this press release and its supplementary information have not in all cases been calculated on the basis of such rounded figures, but on the basis of such amounts prior to rounding. In addition, certain other amounts that appear in this press release and its supplementary information may not sum due to rounding.

This press release and its supplementary information contain certain oil and gas metrics, including information per share, operating netback, reserve life index and others, which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies. Such metrics have been included herein to provide readers with additional measures to evaluate the Company's performance; however, such measures are not reliable indicators of the future performance of the Company and future performance may not compare to the performance in previous periods.

CAUTIONARY STATEMENTS RELEVANT TO FORWARD-LOOKING INFORMATION

This press release and its supplementary information contain statements that constitute forward-looking statements. Many of the forward-looking statements contained in this press release can be identified by the use of forward-looking words such as "anticipate," "believe," "could," "expect," "should," "plan," "intend," "will," "estimate" and "potential," among others.

Forward-looking statements that appear in a number of places in this press release include, but are not limited to, statements regarding the intent, belief or current expectations, regarding various matters, including expected production, investment program, drilling operations, returns-based growth and sustainable value creation. Forward-looking statements are based on management's beliefs and assumptions, and on information currently available to the management. Such statements are subject to risks and uncertainties, and actual results may differ materially from those expressed or implied in the forward-looking statements due to various factors.

Forward-looking statements speak only as of the date they are made, and the Company does not undertake any obligation to update them in light of new information or future developments or to release publicly any revisions to these statements in order to reflect later events or circumstances, or to reflect the occurrence of unanticipated events. For a discussion of the risks facing the Company which could affect whether these forward-looking statements are realized, see filings with the U.S. Securities and Exchange Commission (SEC).

Oil and gas production figures included in this press release and its supplementary information are stated before the effect of royalties paid in kind, consumption and losses. Annual production per day is obtained by dividing total production by 365 days.

Non-GAAP Measures: The Company believes Adjusted EBITDA and operating netback per boe, which are each non-GAAP measures, are useful because they allow the Company to more effectively evaluate its operating performance and compare the results of its operations from period to period without regard to its financing methods or capital structure. The Company's calculation of Adjusted EBITDA and operating netback per boe may not be comparable to other similarly titled measures of other companies.

Adjusted EBITDA: The Company defines Adjusted EBITDA as profit for the period before net finance costs, income tax, depreciation, amortization and certain non-cash items such as impairments and write-offs of unsuccessful exploration and evaluation assets, accrual of stock options and stock awards, unrealized results on commodity risk management contracts and other non-recurring events. Adjusted EBITDA is not a measure of profit or cash flow as determined by IFRS. The Company excludes the items listed above from profit for the period in arriving at Adjusted EBITDA because these amounts can vary substantially from company to company within our industry depending upon accounting methods and book values of assets, capital structures and the method by which the assets were acquired. Adjusted EBITDA should not be considered as an alternative to, or more meaningful than, profit for the period or cash flow from operating activities as determined in accordance with IFRS or as an indicator of our operating performance or liquidity. Certain items excluded from Adjusted EBITDA are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure and significant and/or recurring write-offs, as well as the historic costs of depreciable assets, none of which are components of Adjusted EBITDA. For a reconciliation of Adjusted EBITDA to the IFRS financial measure of profit, see the accompanying financial tables and the supplementary information.

Operating Netback per boe: Operating netback per boe should not be considered as an alternative to, or more meaningful than, profit for the period or cash flow from operating activities as determined in accordance with IFRS or as an indicator of the Company's operating performance or liquidity. Certain items excluded from operating netback per boe are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure and significant and/or recurring write-offs, as well as the historic costs of depreciable assets, none of which are components of operating netback per boe. The Company's calculation of operating netback per boe may not be comparable to other similarly titled measures of other companies
