## FACT SHEET

### Q2 2025

This Fact Sheet includes non-GAAP measures as discussed in Footnote #1.  
(in millions except percentages, headcount, share and per share data)

	2024					2025	
	Q1	Q2	Q3	Q4	Full Year	Q1	Q2

#### Footnotes:

(1) During EPAM Systems, Inc.'s earnings calls, in our earnings releases and investor decks, management supplements results reported in accordance with United States generally accepted accounting principles, referred to as GAAP, with non-GAAP measures. Management believes these measures help illustrate underlying trends in EPAM's business and uses the measures to establish budgets and operational goals, communicate internally and externally, for managing EPAM's business and evaluating its performance. Management also believes these measures help investors compare EPAM's operating performance with its results in prior periods. EPAM anticipates that it will continue to report both GAAP and certain non-GAAP financial measures in its financial results, including non-GAAP results that exclude stock-based compensation expenses, acquisition-related costs including amortization of acquired intangible assets, impairment of assets, expenses associated with EPAM's humanitarian commitment to its professionals in Ukraine, costs associated with the geographic repositioning of EPAM employees based outside of Ukraine impacted by the war and geopolitical instability in the region, employee separation costs incurred in connection with restructuring programs including the Company's exit from Russia, certain other one-time charges and benefits, changes in fair value of contingent consideration, foreign exchange gains and losses, excess tax benefits and tax shortfalls related to stock-based compensation, and the related effect on income taxes of the pre-tax adjustments. Management also compares revenues on an "constant currency basis" and an "organic constant currency basis," which are also non-GAAP financial measures. These measures exclude foreign currency exchange rate fluctuations by translating the current period revenues into U.S. dollars at the weighted average exchange rates of the prior period of comparison. In addition, revenues on an "organic constant currency basis" excludes the effect of acquisitions by removing revenues from an acquired company in the twelve months after completing an acquisition and reflects the decision to exit from Russia by removing revenues from clients located in Russia in both the current period and prior period of comparison. Because EPAM's reported non-GAAP financial measures are not calculated in accordance with GAAP, these measures are not comparable to GAAP and may not be comparable to similarly described non-GAAP measures reported by other companies within EPAM's industry. Consequently, EPAM's non-GAAP financial measures should not be evaluated in isolation or supplant comparable GAAP measures, but rather, should be considered together with the information in EPAM's consolidated financial statements, which are prepared in accordance with GAAP. EPAM's earnings releases, available on our website and furnished to the SEC, include reconciliations of results between non-GAAP measures and the comparable GAAP measures.

(2) We report organic revenue growth on a constant currency basis which excludes the effect of acquisitions by removing revenues from an acquired company in the twelve months after completing an acquisition and the effect of foreign currency exchange rate fluctuations by translating current period revenues into U.S. dollars at the weighted average exchange rates of the prior period of comparison. For periods presented here, "organic constant currency" also excludes the impact of EPAM's exit from Russia where applicable.

(3) Days Sales Outstanding is calculated by dividing the amount of Trade receivables and contract assets, net as of the end of the period by total revenues during the last three months in the period, and multiplying the result by the number of calendar days in the last three months in the period. For the quarter ended December 31, 2024, we have prepared the calculation excluding NEORIS, acquired on November 1, 2024, and First Derivative, acquired on December 2, 2024, due to the distortive impact that including a partial period of revenues would have on the calculation. We did not adjust the calculation herein for any other acquisitions as these did not have a significant distortive impact on Days Sales Outstanding in the respective periods of acquisition.

(4) Free cash flows is calculated as cash flows from operating activities as presented in the statement of cash flows under GAAP, less capital expenditures.

(5) Adjusted net income conversion is calculated by dividing free cash flows by non-GAAP net income.
