

EPAM shares its cloud experience at EMC World 2011 in Las Vegas

May 9, 2011 9:35 AM ET

Newtown, PA — May 9, 2011 — EPAM Systems, Inc., a leading [software engineering and IT services](#) provider with development centers across Central and Eastern Europe (CEE), will be presenting at "Cloud Meets Big Data" – The EMC World 2011 conference, being held May 9th–13th at the Venetian in Las Vegas, NV.

EPAM will be speaking on the opportunities that [EMC Atmos](#) can offer firms looking to implement solutions for Enterprise Mobility Application Data Storage and Ultra-high-volume data collection and archiving utilizing [EMC's Documentum xDB XML database](#).

EPAM Systems is an EMC Partner since 2009. The company utilizes EMC's Cloud storage platform Atmos as the underlying infrastructure for specific client's deployments as well as for EPAM internal needs. In addition, EPAM offers multiple solutions around EMC Documentum Content Management platform, including:

- "XML Accelerator" for performance improvement for large file management"Documentum Cloud Accelerator" for hosted and Multi-tenancy services
- Next generation XML services via xDB
- Upgrades to 6.5.x and legacy archiving/sun-setting via Documentum

"The opportunities offered by Cloud-based storage are starting to gain visibility in the market," says Eli Feldman, VP Cloud Services for EPAM. "Based on EPAM's actual deployment of Atmos, we see some significant business and operational efficiencies that can be gained from leveraging this platform within the enterprise. It's clear that cloud based deployments can deliver many material near-term benefits, and we're excited to be adding this to the suite of capabilities we can bring to our clients."
