

CDPHP Partners With EPAM To Launch New Provider Portal, Providing A Faster, More Efficient Online Experience

July 20, 2018 2:00 PM EDT

New portal makes life easier for doctors

NEWTOWN, Pa., July 20, 2018 /PRNewswire/ -- EPAM Systems, Inc. (NYSE: EPAM), a leading global provider of digital platform engineering and software development services, and Capital District Physicians' Health Plan, Inc. (CDPHP®), a physician-founded health plan, today announced the launch of the plan's new provider portal. The solution, developed in partnership with EPAM, provides a faster, more efficient and personalized experience for CDPHP network physicians.

"CDPHP is transforming into a digitally-driven payor and their new provider portal will help them keep pace with the healthcare industry's continued journey into patient-centric services," said Eladio Alvarez, VP, Head of Healthcare Solutions and Business Development, EPAM. "Utilizing our digital strategy, design and software engineering expertise, EPAM partnered with CDPHP to provide a solution that enables their providers to more effectively manage patient care, claims and patient data."

As a physician-founded health plan, CDPHP leveraged its in-house expertise and its network of physicians to create a portal that would meet the evolving needs of today's providers. The portal allows healthcare providers to check the eligibility of multiple patients in one search, as well as view multiple claims and medical, pharmacy and payment policies more easily. Additionally, the portal automatically notifies providers of check-up and appointment reminders to address preventive care and ultimately improve patient outcomes.

"This is about making life easier for doctors," said CDPHP president and CEO, Dr. John D. Bennett. "As a cardiologist, I experienced first-hand the administrative burden placed on physicians. Today, I am proud to say that CDPHP is part of the solution, and we will continue to work day-in and day-out to improve efficiencies for our network physicians."

The provider portal was the first step in EPAM and CDPHP working together to digitally transform business at CDPHP.
