

The EPAM Cloud Pipeline Released in the Microsoft Azure Marketplace

March 5, 2020 3:02 PM EST

Industry-leading life sciences solution works with Microsoft Azure to accelerate drug discovery research for life sciences and healthcare customers

NEWTOWN, Pa., March 5, 2020 /PRNewswire/ -- EPAM Systems, Inc. (NYSE: EPAM), a leading global provider of digital platform engineering and software development solutions, today announced that the EPAM Cloud Pipeline, an industry-leading life sciences solution designed to accelerate drug discovery clinical research, is now released in the [Microsoft Azure Marketplace](#).

The EPAM [Cloud Pipeline](#) enables scientists to build and run customized scripts and workflows required to support genomics analysis, modeling and simulation, as well as machine learning. The solution is available as a direct integration between cloud and on-premise solutions. It wraps Azure computing and storage resources into a single service, providing an easy and scalable approach required to accomplish a wide range of scientific tasks. Additionally, the EPAM Cloud Pipeline can be integrated with Microsoft Genomics to provide on-demand performance, security and scalability to genomic computation.

"Healthcare providers, pharma and biotech companies often look for cloud solutions to optimize clinical research. The EPAM Cloud Pipeline's intuitive interface helps scientists manage the constantly changing demands in analytics and modeling without requiring specialized IT skills—saving the clinicians' valuable time and lowering the cost of life-saving research," said Greg Killian, Head of Life Sciences Business Unit, EPAM. "[Healthcare and life sciences researchers](#), whose studies (and daily tasks) require significant computational power and storage capacity, will benefit from the EPAM Cloud Pipeline's increased scalability, security and performance leveraging the power of the Azure cloud computing service."

An open source, web-based cloud platform, the EPAM [Cloud Pipeline](#) enables healthcare and life sciences organizations to accelerate drug discovery research. EPAM customers can now take advantage of the scalability, reliability and agility of Azure's public cloud for streamlined deployment and cost-effective management.

"Microsoft Azure Marketplace lets customers worldwide discover, try, and deploy software solutions that are certified and optimized to run on Azure," said Sajan Parihar, Senior Director, Microsoft Azure Platform at Microsoft Corp. "Azure Marketplace helps solutions like the EPAM Cloud Pipeline reach more healthcare and life sciences customers and markets."

The Azure Marketplace is an online market for buying and selling cloud solutions certified to run on Azure. The Azure Marketplace helps connect companies seeking innovative, cloud-based solutions with partners who have developed solutions that are ready to use.
