1.0 INTRODUCTION

This November 2012 Open House Summary Report (Report) is part of the commitment of the IAMGOLD Corporation (IAMGOLD) to inform and consult with local communities and stakeholders regarding the proposed Côté Gold Project (CGP). The Open House was organized by IAMGOLD to introduce IAMGOLD and members of the team, and share information about the Project. This Report presents a summary of the consultation activities and feedback associated with these sessions.

2.0 CONSULTATION PROCESS

2.1 Notification of the Open Houses

Notifications of the Open Houses were provided one week in advance to all households in the communities of Gogama, West Tree and Shining Tree as well as the Mattagami First Nation Reserve through the Gogama Local Services Board.

2.2 Description of the Open Houses

The open house was held at the Gogama Community Centre on November 8, 2012 from 7:00 p.m. to 9:00 p.m. The open house was attended by 73 local community members primarily from Gogama but also from Mattagami First Nation.

Attendees were encouraged to sign a register at the door and indicate whether they would want to be placed on a project mailing list. Participants then were encouraged to view information about IAMGOLD, the Côté Gold Project, environmental baseline activities and consultation information. This information was presented in a series of 18 poster boards. A copy of the information presented is in Appendix A.

After a majority of attendees arrived, the Secretary of the Gogama Local Services Board, Mr. Gerry Talbot introduced IAMGOLD's Manager of Corporate Social Responsibility, Aaron Steeghs, who invited attendees to view the poster boards of Project information and indicated that although the Project is in very early stages of definition, that attendees could discuss the Project with IAMGOLD/AMEC representatives present. Other members of the Project team introduced themselves to the attendees.

Members of the Project team in attendance included:

- Cheryl Naveau, IAMGOLD, First Nation Liaison and Public Relations
- Aaron Steeghs, IAMGOLD, Manager of Corporate Social Responsibility
- Bruce Peters, IAMGOLD, Superintendent of Infrastructure and Logistics
- Rob Hobbs, IAMGOLD, Environmental Assistant
- Philippe Caron, IAMGOLD, District Health, Safety and Security Superintendent
- Francine Mathieu, IAMGOLD, Camp Manager
- Albert Nelmapius, IAMGOLD, Manager of Administration
- Jean Cormier, HR/OD Consultant
- Caroline Burgess, AMEC, Associate Consultant

Comment forms were made available for each attendee. Project representatives encouraged attendees to fill out and return the comment forms following the session. Comments and questions gathered from comment form submissions and records of conversations recorded by open house staff are presented in Section 2.3.

2.3 Summary of Questions and Comments

Attendees seemed encouraged by the possibility of a mine development in the region. There was a general sentiment that employment opportunities had been decreasing steadily with the loss of the CN rail station, forestry downturn, and decrease in local MNR staff. Many indicated that the mine development would provide additional clientele for local tourism/outfitter lodge operators and restaurant. A few people mentioned that IAMGOLD is the third mining company to indicate that the project would move forward and hoped they would finally develop the property. In response IAMGOLD representatives stated that the company is a mid-tier, global mining company who has made a significant commitment by purchasing this mining property and intends to develop the property into a mine if it is feasible and permits are obtained.

It was confirmed that mining activities would provide economic stimulus through employment as well as for contractors needed temporary accommodations and other services close to the IAMGOLD site.

3.0 CONCLUSION

Overall, there was a positive interest in the Project as a socio-economic benefit to the area. From the comments received, concerns were raised with respect to:

- Water well quality and quantity;
- Visual aesthetics;
- Transportation;
- Housing;
- Employment opportunities; and
- Potential to impact wildlife, specifically species-at-risk in that area.

On the comment forms participants were also asked to evaluate the information sessions. The majority of respondents gave positive feedback about the event through the forms or in person to the Project team.

Cautionary Statement

This presentation contains forward-looking statements. All statements, other than of historical fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding expected, estimated or planned gold and niobium production, cash costs, margin expansion, capital expenditures and exploration expenditures and statements regarding the estimation of mineral resources, exploration results, potential mineralization, potential mineral resources and mineral reserves) are forward-looking statements. Forward-looking statements are generally identifiable by use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "intend", "plan" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's ability to control or predict, that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things, without limitation, failure to meet expected, estimated or planned gold and niobium production, cash costs, margin expansion, capital expenditures and exploration expenditures and failure to establish estimated mineral resources, the possibility that future exploration results will not be consistent with the Company's expectations, changes in world gold markets and other risks disclosed in IAMGOLD's most recent Form 40-F/Annual Information Form on file with the United States Securities and Exchange Commission and Canadian provincial securities regulatory authorities. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement.

The United States Securities and Exchange Commission (the "SEC") permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "mineral resources", that the SEC guidelines strictly prohibit us from including in our filings with the SEC. U.S. investors are urged to consider closely the disclosure in the IAMGOLD Annual Report on Form 40-F. A copy of the 2010 Form 40-F is available to shareholders, free of charge, upon written request addressed to the Investor Relations Department.

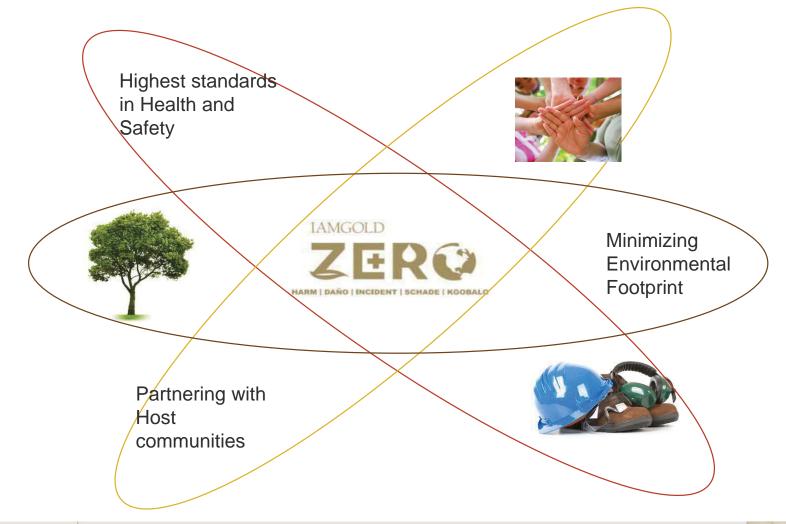

Total Resources includes all categories of resources unless indicated otherwise.

All currency numbers are in US\$ unless otherwise stated.

Who is IAMGOLD Corporation? Conduct Governed by Zero Harm Framework

Highest standards of corporate social responsibility

IAMGOLD's Global Mining Operations

IAMGOLD's Social Partnerships

IAMGOLD's approach to community investment is to develop partnerships with local, regional and national stakeholders, recognizing the need for local insight, sustainability, transparency and quality.

Across Quebec, Ontario, Burkina Faso, and Suriname, IAMGOLD maintained 50 partnerships with government and civil society organizations. Canadian partners include: Relay for Life, Canadian Cancer Society, CIDA, Plan Canada, Right to Play, and United Way.

Canadian Société Cancer canadienne Society du cancer

Economic Contributions where we operate

Economic contribution

IAMGOLD's most significant economic contributions are delivered as taxes, royalties, in-country purchasing and employee compensation (payroll including income taxes). Globally these contributions totaled \$939 million.

Côté Gold Project: Overview

- Previously owned by Trelawney; purchased by IAMGOLD in June 2012.
- Located in Chester Township, 25 km southwest of Gogama, 130 km south of Timmins and 170 km north of Sudbury.
- Prospecting/exploration in this area since 1900.
- Mine site would include the open pit, mill, mine rock piles, tailings storage facility, camp and office buildings.
- Currently preparing a Pre-feasibility Study. It is <u>estimated</u> that the open pit gold mine could:
 - > Operate for 15 years
 - Produce 400,000 500,000 ounces annually
 - Process 50,000 55,000 tons per day

Côté Gold Project: Well Established Infrastructure

ENERGY

- > 5 km to 115 kV power line
- > 75 km to 500 kV transmission line

ROAD

) Close to Hwy 144, 130 km to Timmins, 170 km to Sudbury

RAIL

- > 25 km to CN Rail siding in Gogama
- 70 km to CP Rail crossing >

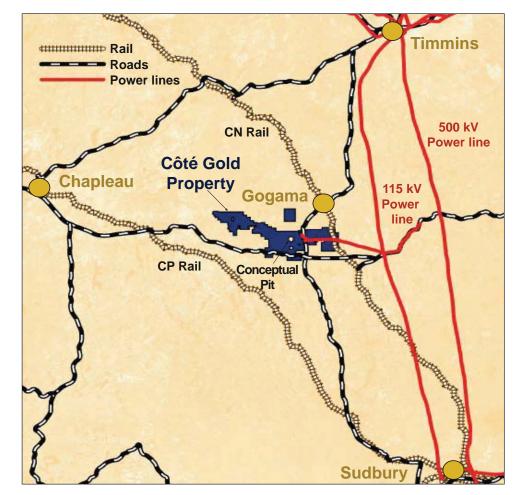

VENDORS & SUPPLIERS

> Located in the heart of one of Canada's premier mining camps

WATER

Ample supply to develop and operate a mine

CORPORATION

Côté Gold – Indicated Resource Increases 274% with Updated Mineral Resource Estimate

- October 4th resource estimate reports 274% increase in indicated resource.
- Percentage of resource in indicated category increases to 44% from 14% in previous estimate.
- Attributed to aggressive in-fill and step-out drilling since previous estimate.
- Updated resource estimate based on a total of 208 holes (110,722 metres).
- Mineralization defined over a strike length of 1,300 m, widths between 100 m–300 m and to a depth of 900 m.
- Deposit open along strike and at depth.
- Drilling continues with intent of converting more inferred resources to indicated for year-end R&R statement.

Mineral Resource Estimate Effective October 4, 2012

	Tonnes (millions)	Grade (g/t)	Contained Ounces (million ozs)
Indicated			
0.25g/t Au cut-off	136	0.82	3.61
0.30g/t Au cut-off	131	0.84	3.56
0.40g/t Au cut-off	116	0.91	3.39
0.50g/t Au cut-off	97	1.00	3.12
Inferred			
0.25g/t Au cut-off	172	0.85	4.73
0.30g/t Au cut-off	165	0.88	4.66
0.40g/t Au cut-off	144	0.96	4.43
0.50g/t Au cut-off	122	1.05	4.12

Source: Updated Resource Estimate for Côté Gold, effective October 4, 2012. NI 43-101 Technical Report to be filed on SEDAR on or before October 24, 2012.

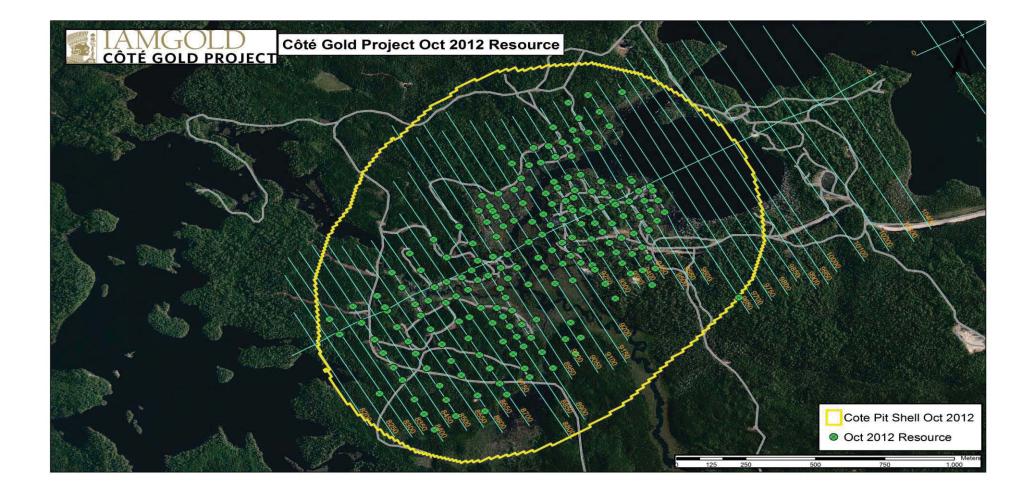

Note: CIM Definition Standards were followed for Mineral Resources. Mineral resource stated on a 100% basis at the 0.3g/t Au cut-off grade assuming a gold price of \$1600 and process recovery of 93.5%. Mineral Resources are constrained within a conceptual pit generated using reasonable assumptions for economic and technical parameters. High assays are capped at 20 g/t Au. Bulk density ranges from 2.71 t/m³ to 2.79 t/m³ depending on rock type. Mineral Resources are not Mineral Reserves and do not yet have demonstrated economic viability. Numbers may not add due to rounding. The estimate includes all validated drill results as at August 1, 2012.

Pre-feasibility study commenced Q4 2012

Côté Gold Project - Drilling Included in 2012 RPA Resource Estimate

Côté Gold Project: Local Partnerships and Employment

- Exploration Agreement with local First Nations.
- Employs 50 people at the Cote Gold Project site; half of whom live in Gogama and surrounding communities.
- Local contracts in place for services such as: hauling, clearing brush, making roads, pipe fusing, making core boxes, and carpenters.

Côté Gold Project: Current Activities on Site

Drilling

- > Continuing to define the resource
- Drill program is winding down from a peak of 13 drills and projected to continue into the winter with a limited number of drills

Environmental Baseline Work

- > Aquatics /Terrestrial Baseline Studies
- > Water Diversion and Compensation
- > Geo Chemistry Waste Rock and Tailings
- > Surface and Ground Water Monitoring
- > Hydrology Monitoring Program
- Archaeological (Phase 2 and 3 field studies completed for this year but will expand next year as the project evolves.)
- Socio-economics
- > Aboriginal traditional knowledge and land use

Côté Gold Project: Future Activities

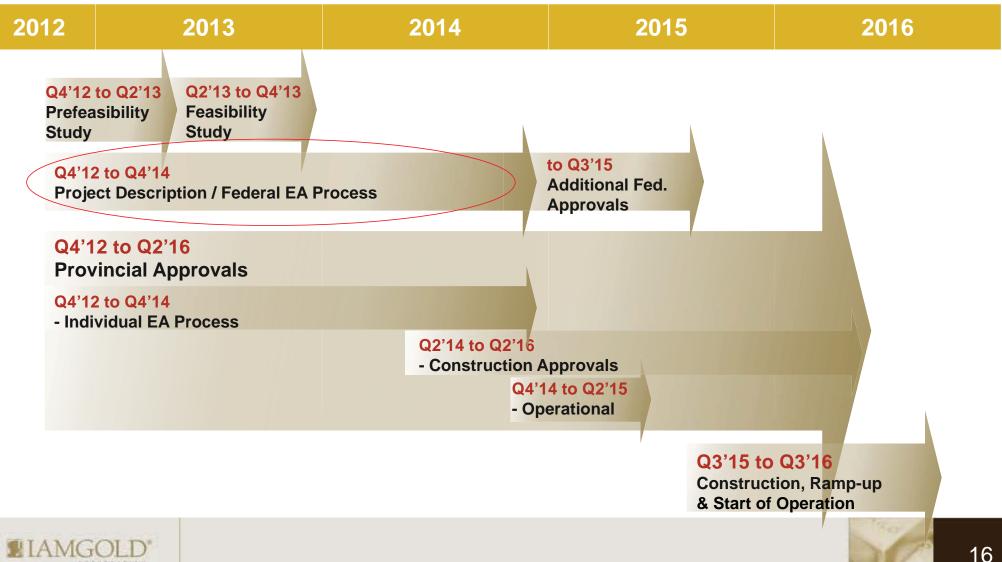

Starting Environmental Assessments

- Preparing a Project Description for federal government agencies
- May require federal environmental assessment under CEAA 2012 >
- May require provincial environmental assessment for a 230 kV power line >
- Many things still in consideration including: >
 - Location of facilities
 - Size of pit (boundaries)
 - Location of tailings storage facility
 - Water management options
 - > Size of workforce
 - Power requirements/options
- Continued Exploration Drilling over the winter 2012/2013
- Early consultation with regional communities, Aboriginal people and stakeholders

Côté Gold Project: Preliminary Planning and Approvals Schedule

CORPORATION

Côté Gold Project: Consultation

Stakeholders and Governments

First Nation and Métis groups (as identified by Federal and Provincial governments)

Gogama and other regional communities (Sudbury, Timmins)

COMPLETED COMMENT FORMS

COMMENT FORM

Côté Gold Project - Gogama Community Open House November 8, 2012

Your comments on the proposed Côté Gold Project are important to us and will be used in the planning (including environmental assessments) and development of this Project.

1. Do you have any comments, concerns interests or suggestions related to the Côté Gold Project?

2. Do you have any questions about the Côté Gold Project that you need answered?

3. What is the best way to involve you or your community/organization in the Côté Gold Project?

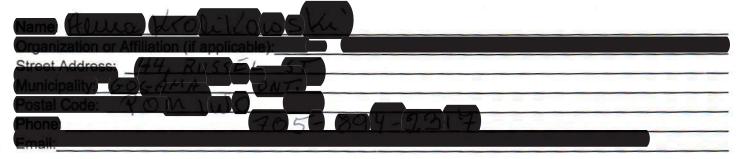

19

4. How would you rate the following about this Open House (circle number)?
