Ken Chernin Vice President, Investor Relations

Cautionary Statement

All information included in this presentation, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, other than statements of historical fact, constitute forward looking information or forward-looking statements and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: the Company's guidance for production, cash costs, all-in sustaining costs, depreciation expense, effective tax rate, and operating margin, capital expenditures, operations outlook, cost management initiatives, development and expansion projects, exploration, the future price of gold, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing and amount of estimated future production, costs of production, permitting timelines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to the, use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "opportunities", "intend", "plan", "possible", "suggest", "guidance", "outlook", "potential", "prospects", "seek", "targets", "strategy" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The Company cautions the reader that reliance on such forward-looking statements involve risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements, and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to, changes in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, and financing; mining tax regimes; ability to successfully integrate acquired assets; legislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. With respect to development projects, IAMGOLD's ability to sustain or increase its present levels of gold production is dependent in part on the success of its projects. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. Development projects have no operating history upon which to base estimates of future cash flows. The capital expenditures and time required to develop new mines or other projects are considerable, and changes in costs or construction schedules can affect project economics. Actual costs and economic returns may differ materially from IAMGOLD's estimates or IAMGOLD could fail to obtain the governmental approvals necessary for the operation of a project; in either case, the project may not proceed, either on its original timing or at all.

For a more comprehensive discussion of the risks faced by the Company, and which may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the company's estimated future results, performance or achievements expressed or implied by forward-looking information or forward-looking statements, please refer to the Company's latest Annual Information Form, filed with Canadian securities regulatory authorities at www.sedar.com, and filed under Form 40-F with the United States Securities Exchange Commission at www.sec.gov/edgar.shtml. The risks described in the Annual Information Form (filed and viewable on www.sedar.com and www.sec.gov/edgar.shtml, and available upon request from the Company) are hereby incorporated by reference into this presentation.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

IAMGOLD[®]
CORPORATION

Strategic Overview

Set Up for Long-Term Growth

*Reserve numbers included on this slide have been rounded

1. Mineral reserves have been estimated at December 31, 2017 using a gold price of \$1,200 per ounce for Essakane, Rosebel, Westwood, Sadiola, Côté Gold Project and Boto Gold Project.

2. Mineral reserves have been estimated at December 31, 2016 using a gold price of \$1,200 per ounce for Essakane, Rosebel and Westwood, and \$1,100 per ounce for Sadiola.

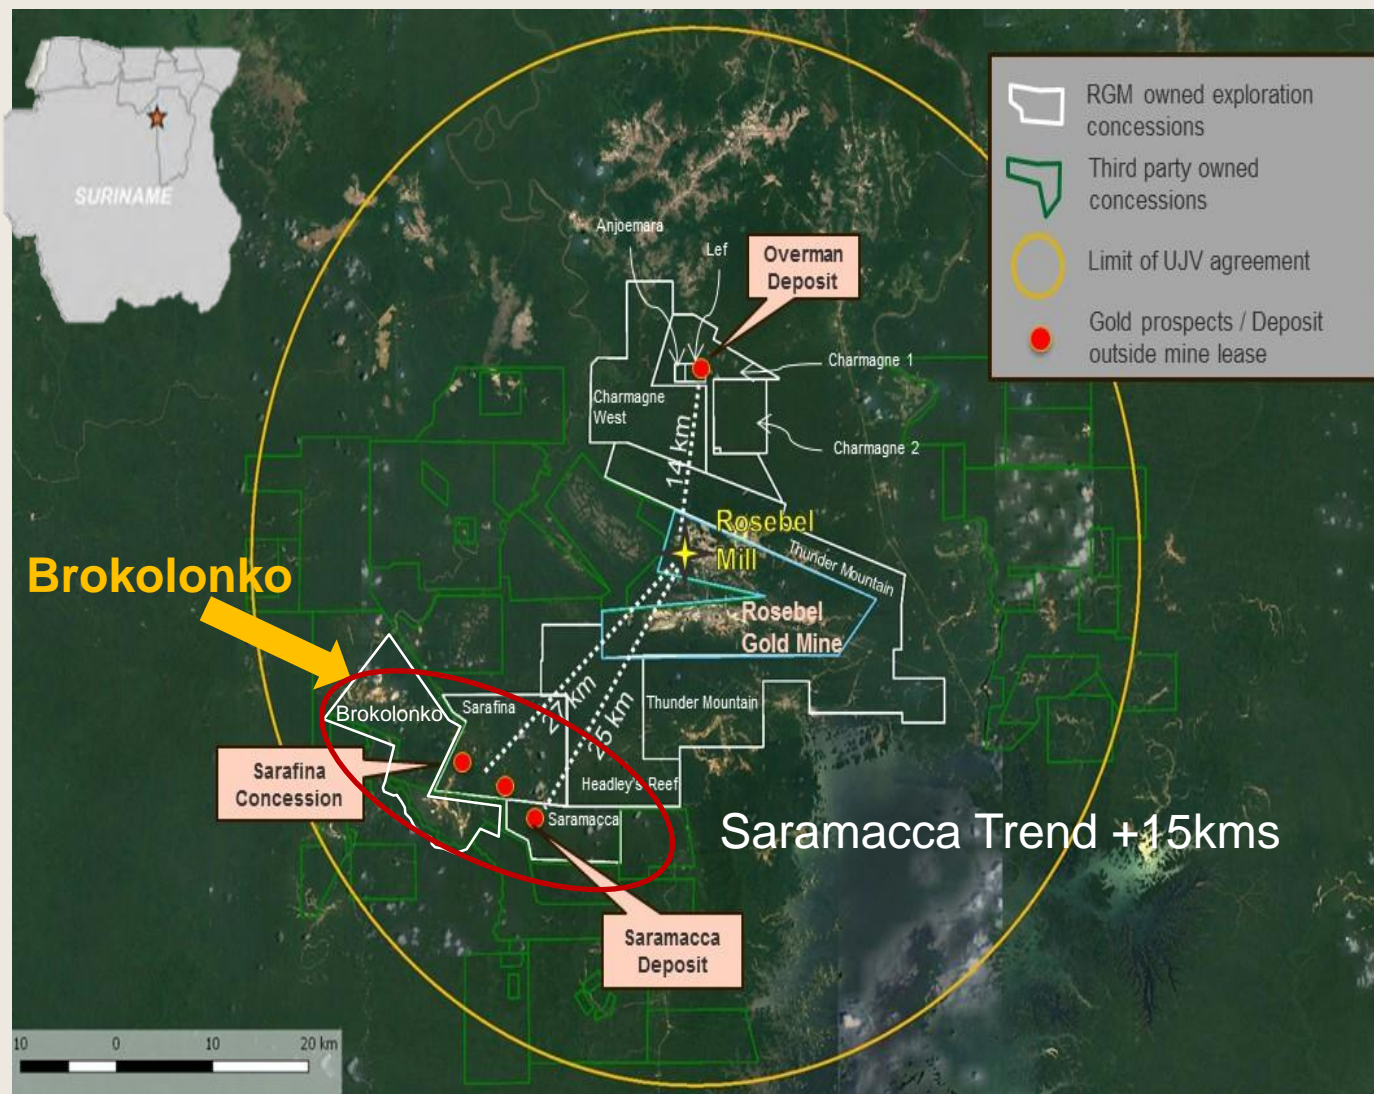

3. Refer to IAMGOLD News Release dated February 12, 2018

4. Before 2017 depletion.

Consolidating a Gold District at Rosebel

Saramacca initial reserve estimate expected H2/18

Secured exploration rights to Brokolonko in January 2018

Heap Leaching at Essakane

Expect to complete Pre-feasibility Study Q2'18

Could provide incremental production of 20% and potentially increase the life of the mine by 2-5 years.

Westwood on Track

Advancing Côté Gold Towards Development

JV with Sumitomo Metal Mining Co. Ltd.

PFS demonstrated economically viable project

5.9 million ounces in reserves¹

Expect to complete feasibility study H1/19

Potential production start 2021

¹ See IAMGOLD News Release Dated February 12, 2018; 100% Basis; 3.8M oz attributable to IAMGOLD
Project also includes 8.0 M Indicated ounces (inclusive of reserves and 1.2 M inferred ounces).

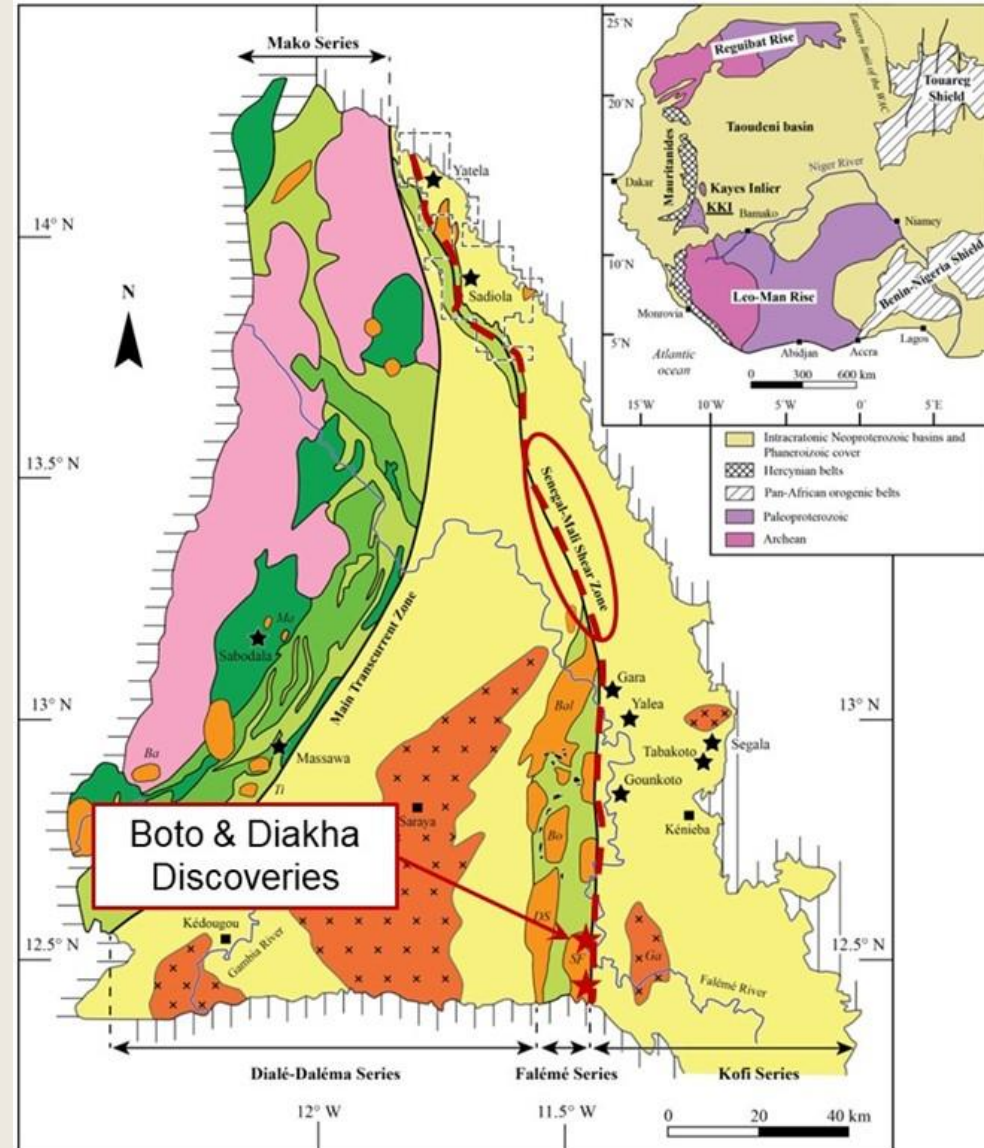

Boto Gold Project in Senegal at Feasibility Stage

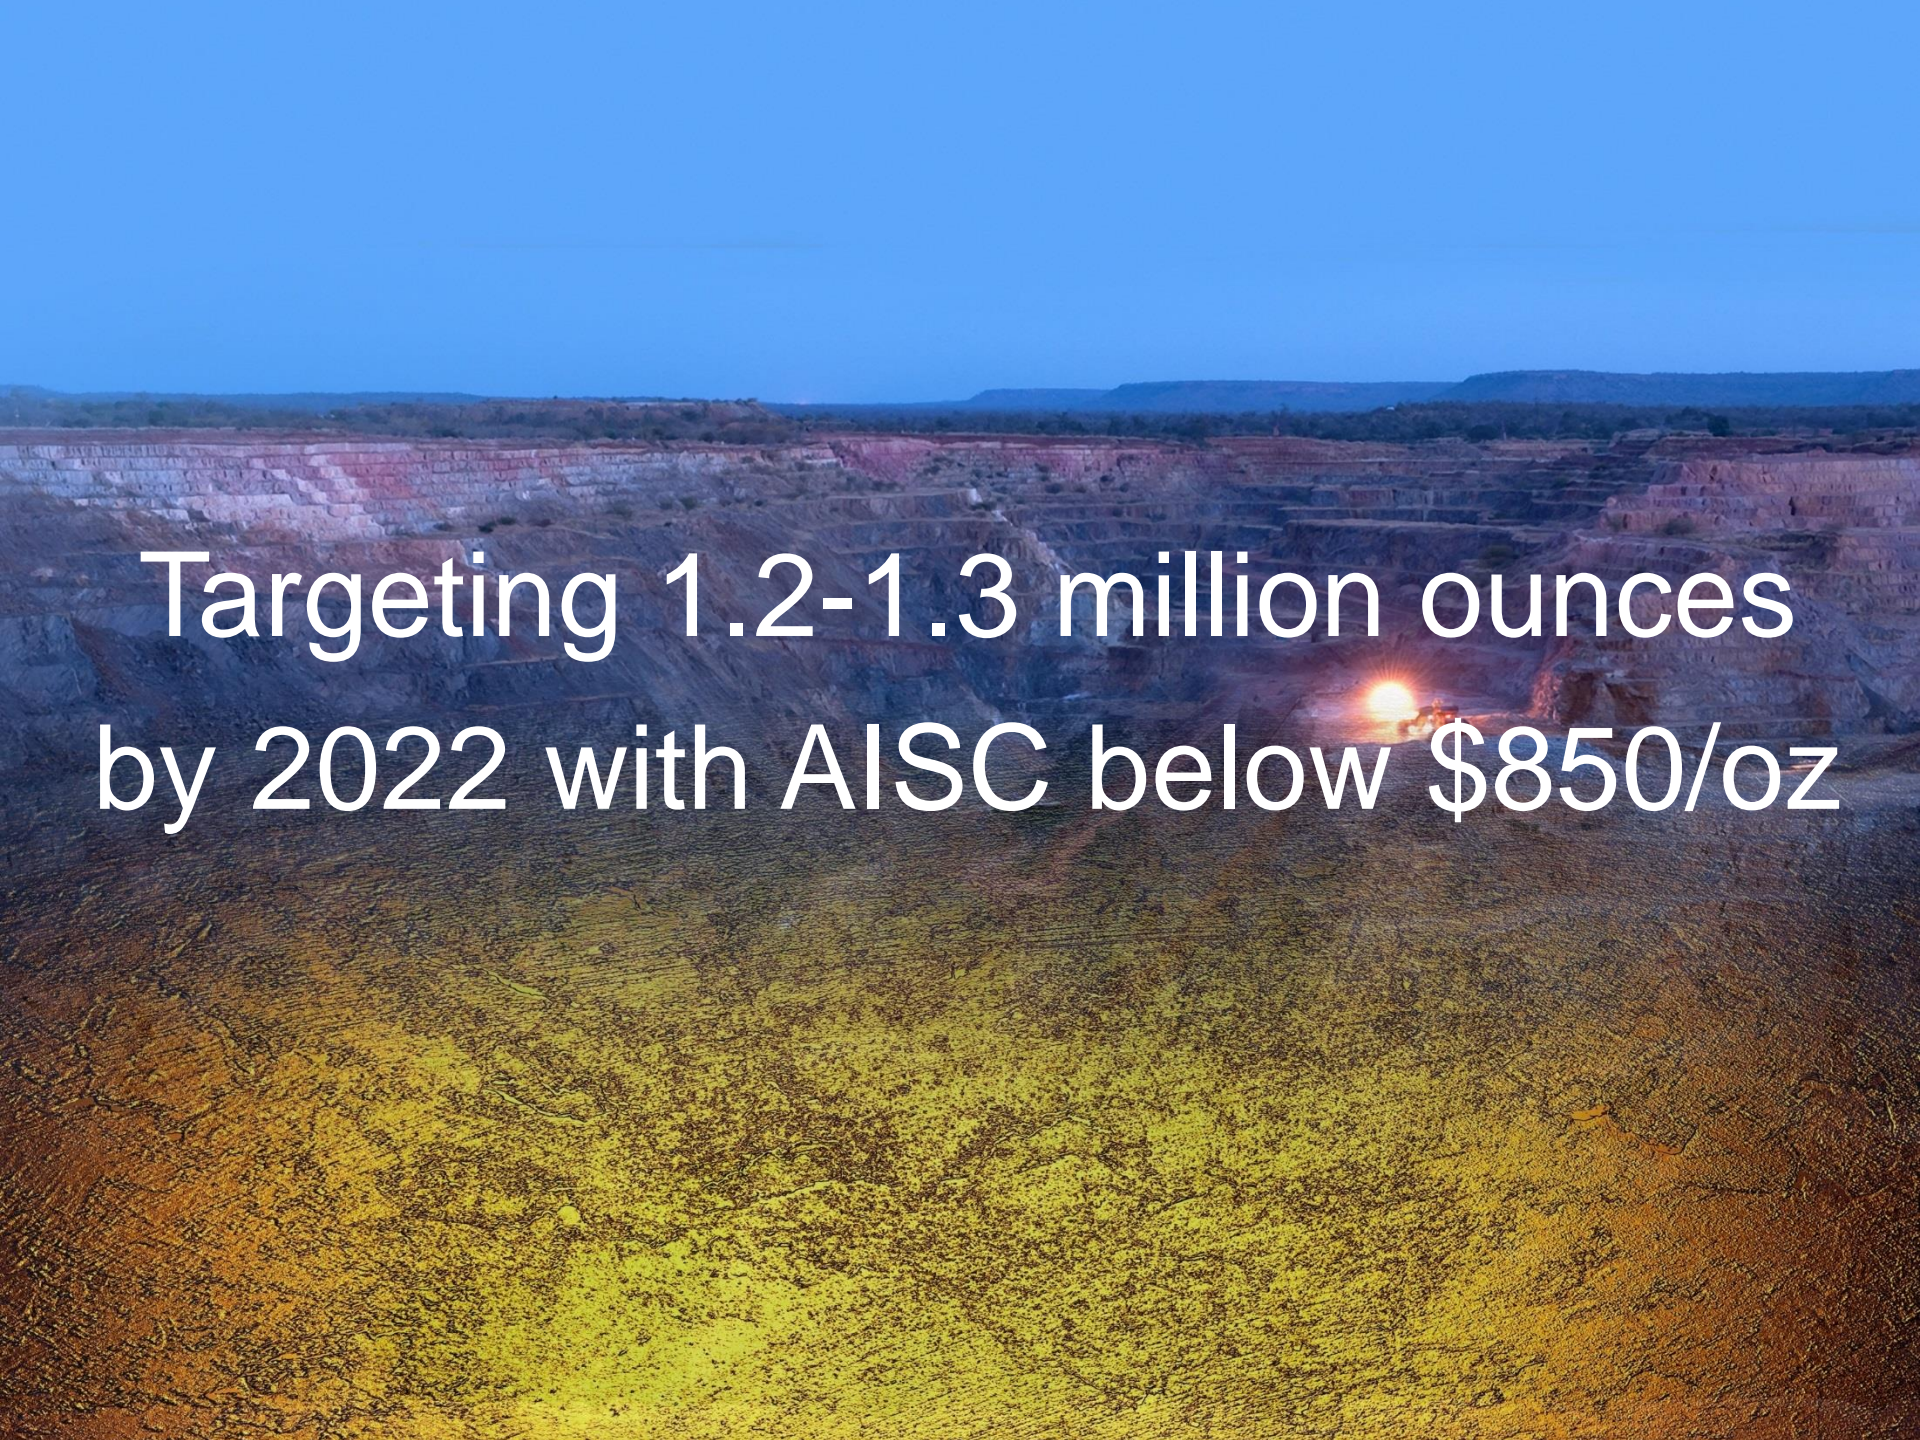

Pre-feasibility study completed

Initial reserve estimate
1.4M oz @ 1.6 g/t Au

Potential to produce nearly 100,000
ounces annually for 13.5 years

Feasibility study expected to be
completed H2/18

A wide-angle photograph of a large open-pit mine. The foreground is dominated by a vast, textured expanse of yellowish-brown earth, likely a waste rock pile or a large-scale earthmoving operation. In the middle ground, the mine's terraced levels are visible, showing various shades of brown and grey rock. A bright, circular light source, possibly a flare or a powerful lamp, is positioned in the distance, casting a strong glow. The background features a range of low, dark hills under a clear, deep blue sky.

Targeting 1.2-1.3 million ounces
by 2022 with AISC below \$850/oz

Liquidity¹

Cash and cash equivalents	\$664 M
Short-term investments	\$127 M
Available credit facility ²	\$249 M

Total Liquidity
\$1,040 M

¹ As at December 31, 2017.

² The revolving credit facility has been extended by two years to March 2022 and has been amended to include the option to add a further \$100 million to the existing fully committed \$250 million.

IAMGOLD[®]

CORPORATION

Operations

Mineral Reserves and Resources¹

Contained Gold (000s attributable oz)

As of December 31st

2017 Change 2016

	2017	Change	2016
Total proven and probable mineral reserves ¹	14,514	86%	7,798
Total measured and indicated mineral resources ^{2,3}	24,723	6%	23,331
Total inferred resources	8,793	44%	6,124

- Mineral reserves have been estimated at December 31, 2017 using a gold price of \$1,200 per ounce for Essakane, Rosebel and Westwood.
- Mineral resources have been estimated at December 31, 2017 using a gold price of \$1,500 per ounce and \$1,200 per ounce using a 6.0 g/t cut-off over a minimum width of 2 metres for Westwood.
- Sadiola reserves and resources have been estimated by our joint venture partner using \$1,200 per ounce and \$1,400 per ounce, respectively.

¹ Detail behind the gold price assumptions used to determine reserves and resources can be found in the Reserves and Resources section of the MD&A.

² Measured and indicated gold resources are inclusive of proven and probable reserves.

³ In mining operations, measured and indicated resources that are not mineral reserves are considered uneconomic at the price used for reserves estimations, but are deemed to have a reasonable prospect of economic extraction.

2017 Production & Costs Summary

	Attributable Production (oz)	Cost of Sales¹ (\$/oz sold)	Total Cash Costs² (\$/oz produced)	AISC² (\$/oz sold)
Essakane	389,000	\$785	\$738	\$957
Rosebel	302,000	\$755	\$716	\$931
Westwood	125,000	\$844	\$824	\$972
Sadiola	63,000	--	\$903	\$1,014
Total	882,000*	\$783	\$755	\$1,003

*Includes 3,000 oz from Yatela, which is in closure mode.

¹ Cost of sales, excluding depreciation, as disclosed in note 37 of the Company's consolidated annual financial statements is on an attributable ounce sold basis (excluding the non-controlling interests of 10% at Essakane and 5% at Rosebel), and does not include Joint Ventures which are accounted for on an equity basis.

² This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for more information.

Essakane – Burkina Faso (90%)

2017 Highlights

- Attributable production up 3% due to higher throughput
- Mill throughput and recoveries higher despite 86% hard rock
- Mill continues to perform above nameplate capacity
- AISC was 2% lower due to lower sustaining CAPEX partially offset by higher cost of sales

Focused on Performance Optimization

- **Improve recoveries**
 - Oxygen plant expected to be in operation by end of 2018
 - Geometallurgical study to be completed by end of Q1'18
- **Reduce energy costs**
 - Completion of 15 MWp solar power plant expected end of Q1'18
- **Heap Leach Project**
 - Pre-feasibility Study expected to be completed by Q2'18
 - May be ready to begin placing ore at the end of 2019, contingent on positive PFS.

2017 Actuals

Attributable gold production (oz)	389,000
TCC ¹	\$738
AISC ¹	\$957
Head grade (g/t)	1.07

2018 Guidance

Attributable gold production	380,000 to 395,000
LOM (Excludes Heap Leach)	2025

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

Heap Leach Project provides potential 20% production increase and 2-5 year LOM extension

Rosebel – Suriname (95%)

2017 Highlights

- Attributable production up 2% due to higher throughput and grades
- Mill throughput increased despite hard rock increasing from 33% to 46%; reflecting major mill improvements in '16 and ongoing improvements
- AISC down 6% mainly due to lower sustaining CAPEX

Focused on Performance Optimization

- Improving SAG performance and reducing power consumption
- Operational enhancements, such as pit dewatering to increase tire life and higher hauling fleet payloads to increase mining capacity
- Expect Saramacca's higher grades and softer rock to further reduce unit costs

Saramacca Progressing Well

- ESIA expected to be complete for H1'18
- Preliminary engineering work on mine design and infrastructure elements. Working towards initial production in H2'19
- New mine designs and integrated scheduling with Rosebel resources expected by end of 2018

Brokolonko

- Secured exploration rights to Brokolonko, on same trend as Saramacca

2017 Actuals

Attributable gold production (oz)	302,000
TCC ¹	\$716
AISC ¹	\$931
Head grade (g/t)	0.83

2018 Guidance

Attributable gold production	295,000 to 310,000
LOM (Excludes Saramacca)	2028

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

R&R update, including 69% increase in attributable reserves to 3.3Moz*

Saramacca initial resource estimate (1.0M oz indicated and .5M oz inferred)**

*See News Release dated January 12, 2018

** See News Release dated September 5, 2017

Westwood – Quebec (100%)

2017 Highlights

- Attributable production up 92% from previous year
- Normal production levels reached at the start of Q2'17
- Completed 18.1km of development
- Head grade lower than ore grade mined underground due to marginal ore stockpiles processed to exploit mill capacity
- Excluding marginal ore stockpiles, ore grade mined underground was 18% higher than the mill head grade of 6.61 g/t
- Successful resource conversion with 12% increase in reserves

Ramp-up Continues

- Since the start of 2016, the mine has completed 43km of underground development
- While delivering on 2018 production and cost targets, the mine plans to achieve 12km of underground development
- Unit costs expected to decline as production increases

2017 Actuals

Attributable gold production (oz)	125,000
TCC ¹	\$824
AISC ¹	\$972
Head grade (g/t)	6.61

2018 Guidance

Attributable gold production	125,000 to 135,000
LOM	2033+

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

Westwood continues underground development and ramp up to full production by 2020

Sadiola – Mali (41%)

2017 Highlights

- Attributable production down 10%
- Total cash costs and AISC down 7% and 3%, respectively, due to greater drawdowns of marginal ore stockpiles

Sadiola Sulphide Project

- Aligned with partner AGA in commitment to Sulphide Project
- Discussions with Malian government continue, have not reached resolution on terms critical to moving forward
- Although committed to the Project, should an agreement not be reached the operation will enter a restricted exploitation phase to be transitioned to care and maintenance once stockpiles depleted.

2017 Actuals

Attributable gold production (oz)	63,000
TCC ¹	\$903
AISC ¹	\$1,014
Head grade (g/t)	0.98

2018 Guidance

Attributable gold production	50,000 to 60,000 ²
LOM (Oxides only)	2019
LOM (with SSP)	2028

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

2. Includes nominal amount from Yatela which is in closure mode.

2018 Production and Cost Guidance

Full Year Attributable Guidance	2018¹
Essakane (000s oz)	380 – 395
Rosebel (000s oz)	295 – 310
Westwood (000s oz)	125 – 135
Total owner-operated production (000s oz)	800 – 840
Joint Ventures (000s oz)	50 – 60
Total attributable production (000s oz)	850 – 900
Cost of sales² (\$/oz)	\$765 – \$815
Total cash costs³ – owner-operator (\$/oz)	\$750 – \$800
Total cash costs^{3,4} (\$/oz)	\$750 – \$800
All-in sustaining costs³ – owner-operator (\$/oz)	\$990 – \$1,070
All-in sustaining costs^{3,4} (\$/oz)	\$990 – \$1,070

1 The outlook is based on fourth quarter 2017 assumptions with an average realized gold price of \$1,250 per ounce, Canadian \$/U.S. \$ exchange rate of 1.26, U.S. \$/€ exchange rate of 1.18 and average crude oil price of \$54 per barrel.

2 Cost of sales, excluding depreciation, is on an attributable ounce sold basis (excluding the non-controlling interest of 10% at Essakane and 5% at Rosebel) and does not include Joint Ventures which are accounted for on an equity basis.

3 This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for more information.

4 Consists of Essakane, Rosebel, Westwood and the Joint Ventures on an attributable basis.

2018 Capex Outlook

\$ millions	Sustaining¹	Non-Sustaining (Development/ Expansion)	Total⁴
Essakane	\$75	\$75	\$150
Rosebel	\$45	\$85	\$130
Westwood	\$20	\$45	\$65
Owner-operator	\$140	\$205	\$345
Corporate and Development Projects ²	–	\$15	\$15
Total owner-operator	\$140	\$220	\$360
Sadiola (Joint Venture) ³	–	\$5	\$5
Total⁴	\$140	\$225	\$365 (±5%)

1. Sustaining capital includes capitalized stripping of \$40 million for Essakane and \$5 million for Rosebel.

2. Includes attributable CAPEX for the Côte Gold Project (70%).

3. Attributable CAPEX of 41%. Expansionary capital expenditures exclude the construction costs for the Sadiola Sulphide project.

4. Capitalized borrowing costs are not included.

Côté Gold – Ontario (70%)

Key accomplishments since IAMGOLD acquisition

- Conversion of nearly 6Moz from resources to reserves
- Positive decisions on Federal and Provincial Environmental Assessments
- Completed Pre-feasibility Study and initiated Feasibility Study
- Completed transaction with Sumitomo Metal Mining
- Commencement of delineation drill program in Q3'17 to upgrade inferred resources to indicated and to evaluate grade variation

Joint Venture with Sumitomo Metal Mining¹

- Sale of 30% interest in Côté Gold Project to SMM for \$195M
- SMM is well funded with extensive technical expertise
- Common interest in developing Côté and pursuing future opportunities
- Oversight Committee established with proportionate representation
- IMG to be the operator

Pre-Feasibility Results Demonstrate Economically Viable Project²

- 17 year mine life
- LOM average annual attributable production 207,000
- LOM average cash costs \$605/oz; AISC \$689/oz
- P&P attributable reserves of 3.8M oz
- After-tax NAV \$703M (5% discount rate) with 14% IRR; at \$1250/oz gold price
- Feasibility Study expected to be complete by H1'19; subject to acceptable results and favourable development environment, commercial production expected to begin 2021

Expect to complete
Feasibility Study and
make investment
decision by H1'19

IAMGOLD
PURE GOLD MINERALS

Exploration

Boto Gold Project

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Probable Reserves ¹	26,841	1.64	1,415
Measured & Indicated ^{1,2}	37,408	1.60	1,922
Inferred ¹	10,981	1.66	594

Pre-feasibility Study Highlights:

- Mine life of 13.5 years with mill throughput of 2.0Mtpa
- LOM average annual production of nearly 100koz, with higher production in early years
- LOM direct cash costs of \$707/oz and AISC of \$829/oz
- After-tax IRR of 13.3% (@\$1,275/oz) and NPV@6% of \$104 million
- Initial CAPEX of \$249 million
- Potential to increase returns through optimization of project design including a 25% higher mill throughput
- Feasibility Study ongoing, with completion expected in H2'18

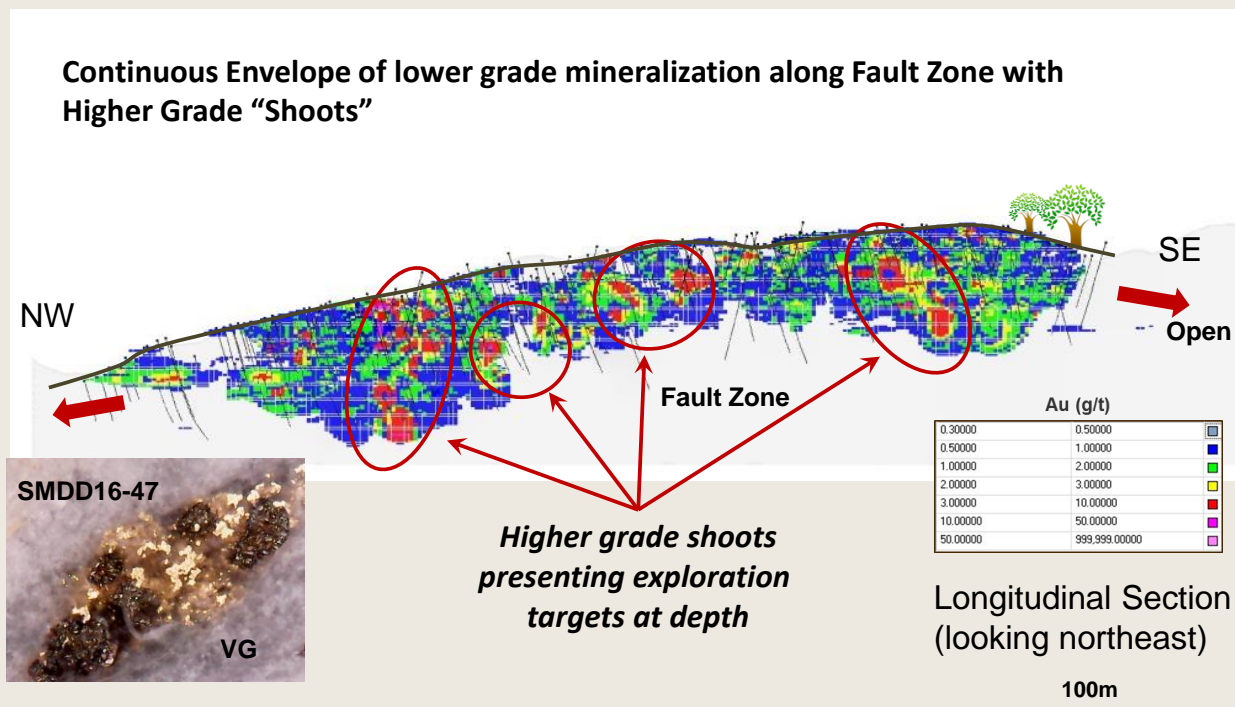

¹ See IAMGOLD news release dated February 12, 2018

² Inclusive of reserves

Saramacca – Exploration Update

- Potential to grow resource as deposit open at depth and along strike in both directions
- Drilling focused on increasing confidence in resource and expanding deposit
- Completed nearly 30km of diamond and reverse circulation drilling in H2'17. Highlights include:
 - 3.47 g/t Au over 39.0m
 - 4.50 g/t Au over 34.5m
- Initial reserve estimate expected H2'18

100% Basis ¹	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ²	14,444	2.20	1,022
Inferred	13,632	1.18	518

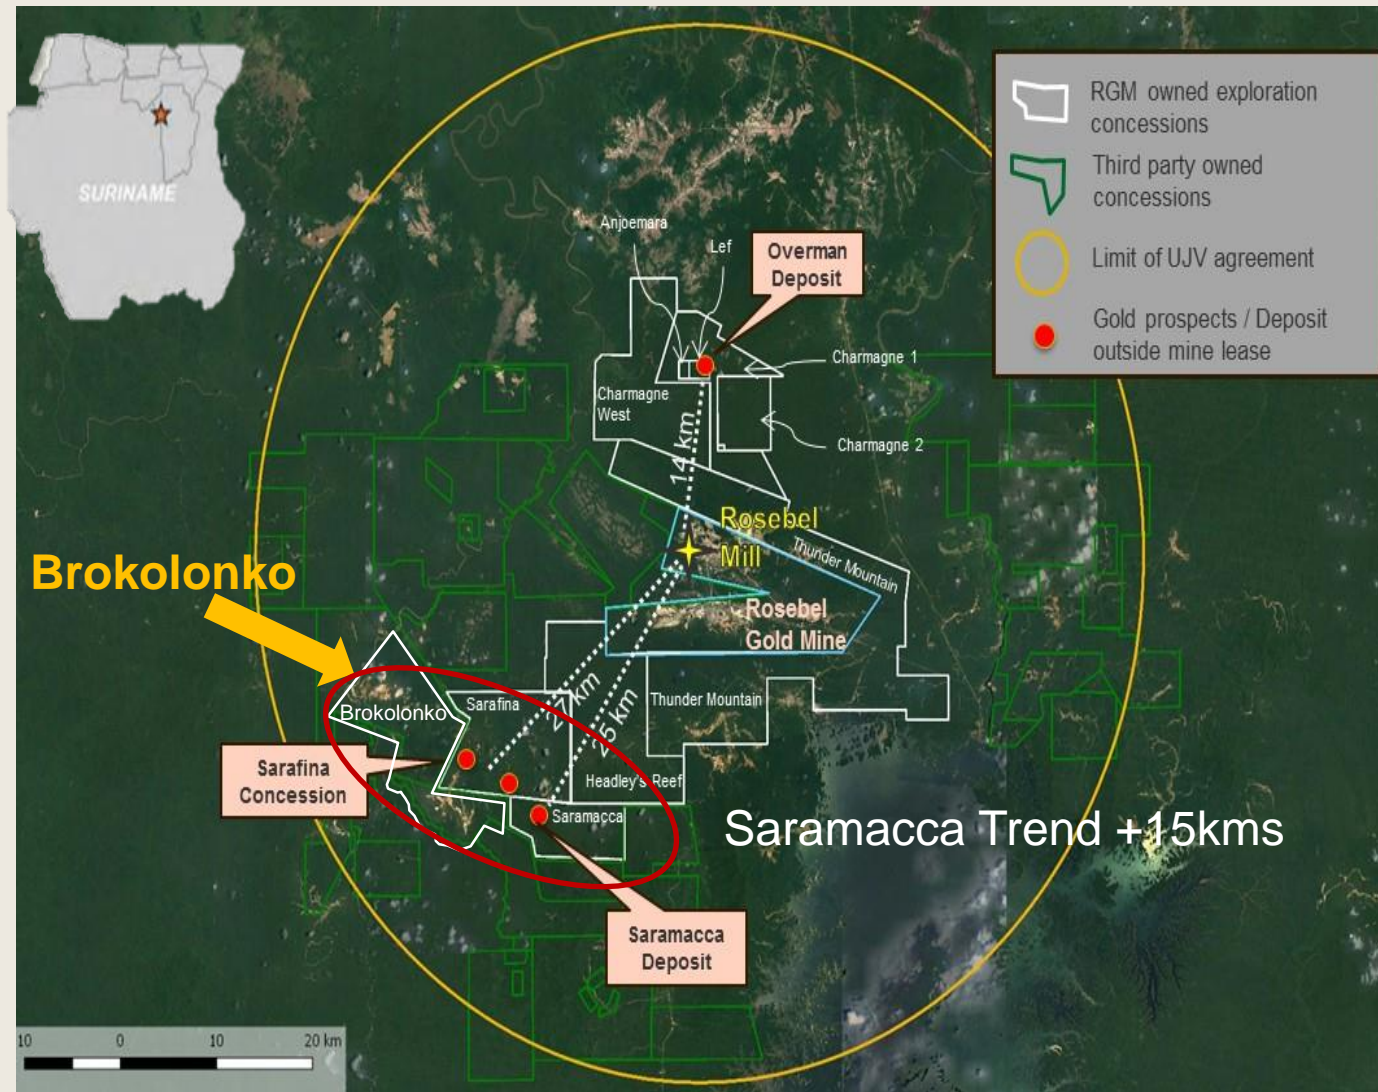

¹ See IAMGOLD news release dated February 12, 2018

² Inclusive of reserves

Consolidating a Gold District

- Secured exploration rights to Brokolonko in January 2018
- VTEM survey covering 15km long corridor between Saramacca and Brokolonko to commence Q1'18
- Drill program to commence later in 2018, to confirm historical gold anomalies

Pitangui

Location: Brazil

Ownership: 100%

- Highlights:**
- Completed 9,600 metres of diamond drilling in 2017 to evaluate up-plunge extension of São Sebastião deposit
 - Drilling program resulted in a 21% increase in inferred resource
 - Continuing to test priority targets associated with favourable iron formations

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ^{1,2}	--	--	--
Inferred ¹	5,365	4.7	819

Eastern Borosi

Location: Nicaragua

Ownership: Option Agreement with Calibre Mining, with option to earn up to a 70% interest

- Highlights:**
- 9,800 metres of diamond drilling completed in 2017
 - Drilling program focused on resource potential of Guapinol, Riscos de Oro and East Dome veins
 - Targeting initial resource estimate in 2018

¹ See IAMGOLD news release dated February 12, 2018

² Inclusive of reserves

Diakha-Siribaya

Location: Mali

Ownership: 100%

- Highlights:**
- Consolidated 100% ownership in the project
 - Located approximately 10km south along strike from the Boto Gold Project in Senegal
 - 19,500 metres of diamond and RC drilling completed. Results included 6.79 g/t Au, including 26.0m and 20.52 g/t Au over 8.0m, and 11.06 g/t Au over 18.0m, including 32.45 g/t Au over 6.0m
 - Extension of mineralization north and south of current resource pit shell
 - Focus on refining the deposit model and target an updated resource estimate by end of 2018

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ^{1,2}	2,102	1.9	129
Inferred ¹	19,816	1.7	1,092

¹ See IAMGOLD news release dated February 12, 2018

² Inclusive of reserves

Monster Lake

- Location:** Quebec
- Ownership:** 50:50 JV with TomaGold, with option to earn up to a 75% interest
- Highlights:**
- Focused on better defining and extending the high-grade 325-Megane Zone and evaluating newly discovered parallel zones
 - Over 12,500 metres of drilling completed in 2017
 - Acquired ~20% equity interest in TomaGold Q3'17
 - Targeting maiden resource estimate by end of 2018

*See IAMGOLD news release dated November 1, 2017

Nelligan

- Location:** Quebec
- Ownership:** Earn-in option with Vanstar Mining; IAMGOLD can earn up to an initial 50% interest
- Highlights:**
- Located 15km south of Monster Lake
 - 7,700 metres of drilling completed in 2017 to follow up on previous results and further explore newly discovered mineralized zone
 - 12,000 metre drilling program planned for 2018
 - Targeting maiden resource estimate by end of 2018

Significant Growth Catalysts

- ✓ Preliminary reserve estimate for Saramacca expected in H2'18, targeting production start H2'19
- ✓ Further exploration at Brokolonko to confirm mineralization and advance to resource stage
- ✓ Consolidation of additional concessions at Rosebel
- ✓ Completion of Essakane Heap Leach Pre-Feasibility Study expected Q2'18
- ✓ Westwood ramp-up to full production expected by 2020
- ✓ Completion of Feasibility Study for Côte Gold expected by H1'19; production start potentially 2021
- ✓ Completion of Boto Gold Feasibility Study expected H2'18
- ✓ Targeting initial resource estimates for Monster Lake, Nelligan, and Eastern Borosi in 2018

IAMGOLD[®]

CORPORATION

IAMGOLD
PURE GOLD MINER S.V.

BOONWEAR

Appendix

Loma Larga – Optionality via Strategic Investment

Project Overview

- IAMGOLD owns ~36% of INV Metals (TSX:INV)
- PFS has robust economics with after-tax IRR of 26.3%, NPV@5% of US\$300.9M, payback of 2.7 years
- Underground mine, straight forward project, ramp into deposit, long hole stoping and drift and fill mining
- Probable Mineral Reserves of 1.86 M oz of contained Au at 4.98 g/t, 10.5 M oz contained Ag at 28.0 g/t, 73.6 M lb contained Cu at 0.29%
- Indicated Mineral Resources of 2.55 M oz of contained Au at 4.42 g/t, 16.3 M oz contained Ag at 28.3 g/t, 104 M lb contained Cu at 0.26%
- Inferred Mineral Resources of 0.54 M oz of contained Au at 2.29 g/t, 5.7 M oz contained Ag at 24.1 g/t, 21 M lb contained Cu at 0.13%
- Targeting production for 2020
- Considerable exploration potential
- Proven board, management and technical team
- On February 16, 2017 INV Metals announced a C\$27.6 million bought deal financing, including C\$3.6 million over-allotment option, for advancing development of the project and for general corporate purposes

See INV news release dated July 14, 2016

PFS Highlights*

Mine Life	~11 years
Nameplate Capacity	3,000 tpd
Annual Average Gold Production	150,000 oz
Gold Grade	4.98 g/t
Gold Production	1.68 million oz
Gold Recovery	90%
Adjusted Operating Costs	\$510/oz sold
All-in Sustaining Costs	\$577/oz sold
All-in Costs	\$778/oz sold
Initial Capital	\$286M
Sustaining Capital and Closure Costs	\$94M

Ecuador – Strong Commitment to Mining

- Loma Larga and INV Metals have strong support from Ecuadorian government and local communities
- The creation of Ministry of Mines in 2015 was a significant commitment to mining with positive changes to mining tax laws
- Significant investment in roads, airports, ports, hydroelectric power

*See slide on technical information and qualified person/quality control notes.

Technical Information and Qualified Person/Quality Control Notes

The mineral resource estimates contained in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”). The “Qualified Person” responsible for the supervision of the preparation and review of all resource and reserve estimates for IAMGOLD is Lise Chenard, Eng., Director, Mining Geology. Lise has worked in the mining industry for more than 30 years, mainly in operations, project development and consulting. She joined IAMGOLD in April 2013 and acquired her knowledge of the Company’s operations and projects through site visits, information reviews and ongoing communication and oversight of mine site technical service teams or consultants responsible for resource and reserve modeling and estimation. She is considered a “Qualified Person” for the purposes of NI 43-101 with respect to the mineralization being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has verified the data disclosed, and data underlying the information or opinions contained herein.

The technical information for Sadiola contained in this presentation has been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”). The “Qualified Person” responsible for the supervision of the preparation and review of all technical information for IAMGOLD is Philippe Gauthier, BSc. Mechanical Engineering and MAsc Mechanical Engineering, the Director Development Projects for IAMGOLD. Philippe has worked as mechanical engineer for 28 years, mainly in mining and project development. He joined IAMGOLD in 2008 and acquired his knowledge of Sadiola through his work on the Infrastructure and Plant Engineering for an internal feasibility report in 2010, his work to update the documentation and engineering subsequent to that report and his most recent site visit on August 28, 2015. He is considered a “Qualified Person” for the purposes of NI 43-101 with respect to the technical information being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has read and verified the data disclosed, and data underlying the information or opinions contained herein.

Drilling results in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects. The sampling of, and assay data from, drill core is monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. The “Qualified Person” responsible for the supervision of the preparation, verification, and review of these results is Craig MacDougall, P.Geo., Senior Vice President, Exploration for IAMGOLD. Mr. MacDougall is a Qualified Person as defined by National Instrument 43-101.

Loma Larga - PEA footnote:

Qualified Persons and NI 43-101 Disclosure The technical information in this presentation has been prepared by independent Qualified Persons employed by Roscoe Postle Associates Inc. (“RPA”), including Katharine Masun, P.Geo. (Mineral Resources), Jason Cox, P.Eng. (Mineral Reserves and economics), and Kathleen Altman, Ph.D., P.E. (metallurgy and processing). By virtue of education and relevant experience, the aforementioned are “Qualified Persons” for the purpose of NI 43-101.

For readers to fully understand the information in this presentation, they should read the Technical Report in its entirety, including all qualifications, assumptions and exclusions that relate to the information set out in the Technical Report which qualifies the technical information contained in the Technical Report. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Report describes the Mineral Resource and Mineral Reserve estimation methodologies and the assumptions used, and to which those estimates are subject. INV Metals’ AIF includes details of certain risk factors that could materially affect the potential development of the Mineral Resources and Mineral Reserves and should be considered carefully. A discussion of these and other factors is contained in “Risk Factors” and elsewhere in the Company’s AIF, which was filed on SEDAR on March 1, 2016.
