

STA SARA OF

Scotiabank Mining Conference December 1-2, 2015

Steve Letwin President & CEO

TSX: IMG NYSE: IAG

Cautionary Statement on Forward-Looking Information

All information included in this presentation, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, other than statements of historical fact, constitute forward looking information or forward-looking statements and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: the Company's quidance for production, cash costs, all-in sustaining costs, depreciation expense, effective tax rate, and operating margin, capital expenditures, operations outlook, cost management initiatives, development and expansion projects, exploration, the future price of gold, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing and amount of estimated future production, costs of production, permitting timelines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to the, use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "opportunities", "intend", "plan", "possible", "suggest", "guidance", "outlook", "potential", "prospects", "seek", "targets", "strategy" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The Company cautions the reader that reliance on such forward-looking statements involve risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements, and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to, changes in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, and financing; mining tax regimes; ability to successfully integrate acquired assets; leaislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. With respect to development projects, IAMGOLD's ability to sustain or increase its present levels of gold production is dependent in part on the success of its projects. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. Development projects have no operating history upon which to base estimates of future cash flows. The capital expenditures and time required to develop new mines or other projects are considerable, and changes in costs or construction schedules can affect project economics. Actual costs and economic returns may differ materially from IAMGOLD's estimates or IAMGOLD could fail to obtain the governmental approvals necessary for the operation of a project; in either case, the project may not proceed, either on its original timing or at all.

For a more comprehensive discussion of the risks faced by the Company, and which may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the company's estimated future results, performance or achievements expressed or implied by forward-looking information or forward-looking statements, please refer to the Company's latest Annual Information Form, filed with Canadian securities regulatory authorities at <u>www.secagov/edgar.shtml</u>. The risks described in the Annual Information Form (filed and viewable on <u>www.secagov/edgar.shtml</u>, and available upon request from the Company) are hereby incorporated by reference into this presentation.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

Strong Foundation Enables Adaptability and Flexibility

Near Term Strategy

- Further reduce costs by mine optimization, productivity improvements and disciplined capital spending
- Communicate revised mine plans in Q1/16, including Westwood in January
- Maintain financial strength
- Advance greenfield and brownfield exploration projects
- Continue evaluating M&A opportunities with near-term cash flow potential and attractive rates of return

Strong Financial Position

\$783M cash, cash equivalents and gold bullion

\$635M long-term debt¹ due 2020

In discussions to refinance and extend credit facility²

Net Debt/EBITDA (TTM)³ Ox

Net Cash \$148M

\$633M \$633M \$633M \$1,283A As at Sep 30, 2015 \$150M \$150M \$150M \$150M

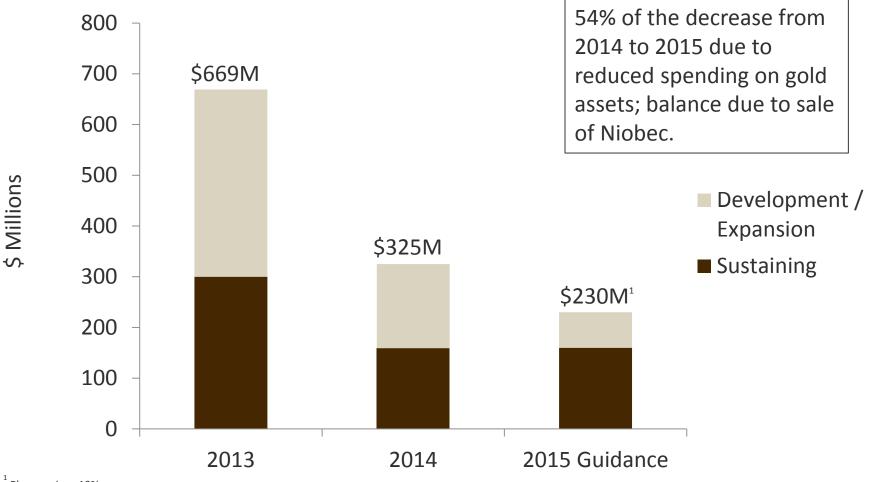

¹ \$635 million senior unsecured notes due October 2020. Purchased \$5.4 million (face value) in Q1/15 and \$9.6 million (face value) in Q3/15.

² The amount, terms and conditions could vary from those in the current agreement.

³ Covenant: Net Debt/EBITDA 3.5X.

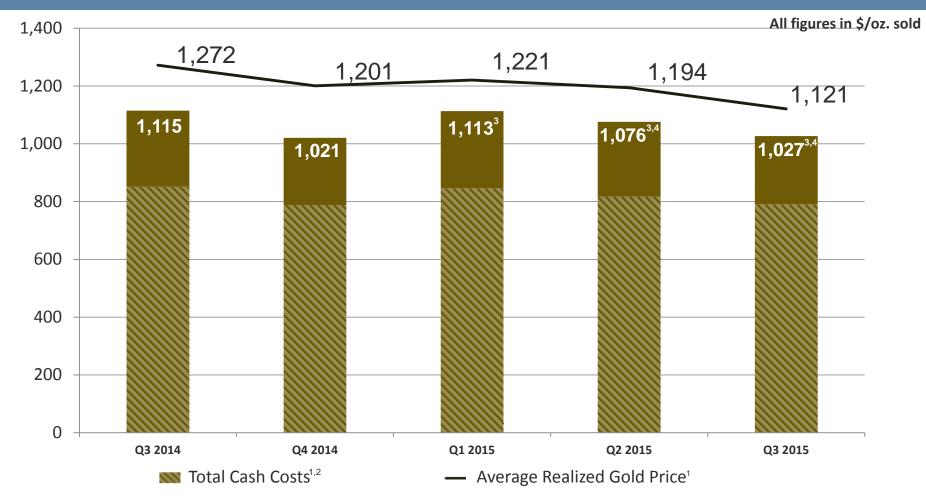

Disciplined Capital Spending

¹ Plus or minus 10%

All-In Sustaining Costs^{1,2}

1 This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for reconciliation to GAAP.

2 Consists of Rosebel, Essakane, Westwood (commercial production), Mouska, Sadiola and Yatela on an attributable basis.

3 Includes realized hedge and non-hedge derivative losses of \$64/oz in Q1/15, \$53/oz. in Q2/15 and \$73/oz in Q3/15.

4 Includes reduction of \$28/oz sold in Q2/15 and \$80/oz sold in Q3/15 to normalize costs following production interruption at Westwood.

Debt Covenant Requirements - Use of Proceeds

1.	Under the indenture governing IAMGOLD's senior unsecured notes, the proceeds of certain asset sales are to be used to reinvest, or commit to reinvest, in its business within 365 days after the date of sale. After that period, if there remains proceeds in excess of \$50 million, the full remaining proceeds are to be offered by the Company to purchase outstanding senior notes at par.
2.	Proceeds to be re-invested include \$504.1M for the sale of Niobec (January 22, 2015) and \$56.8M for the sale of Diavik (March 23, 2015).

After 365 days from the date of the asset sale, the Company expects to have re-invested or committed to re-invest the following:

- capital expenditures or asset acquisitions;
- unwinding derivative obligations;
 - retiring capital leases;
 - collateralizing letters of credit; and/or
 - other uses of the proceeds permitted under the indenture.
- 4. After the above use of proceeds, the Company does not expect to have proceeds remaining in excess of \$50 million.
- 5. Therefore, the Company does not expect to be required to purchase any of its outstanding senior notes at par in the manner described in one.

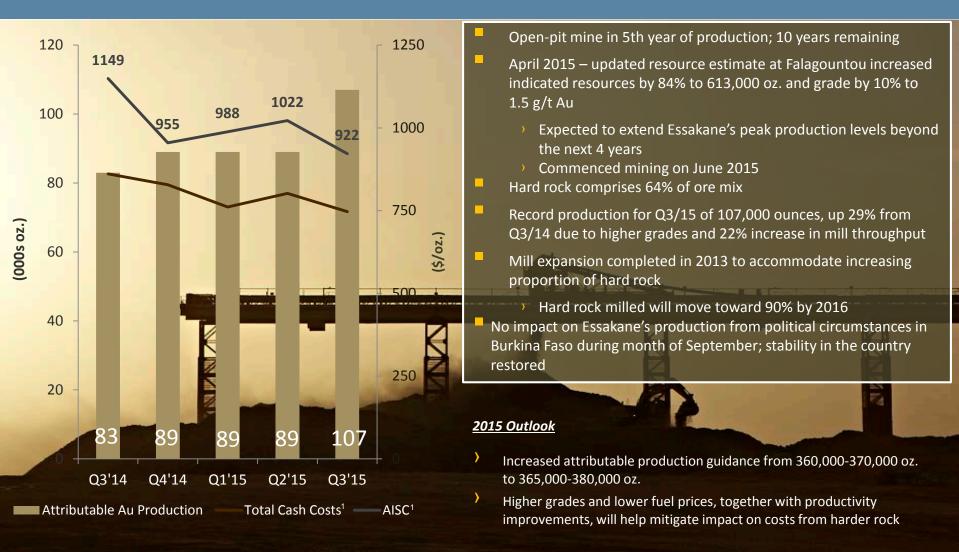

3.

Operations Review

Essakane – Burkina Faso

¹ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP.

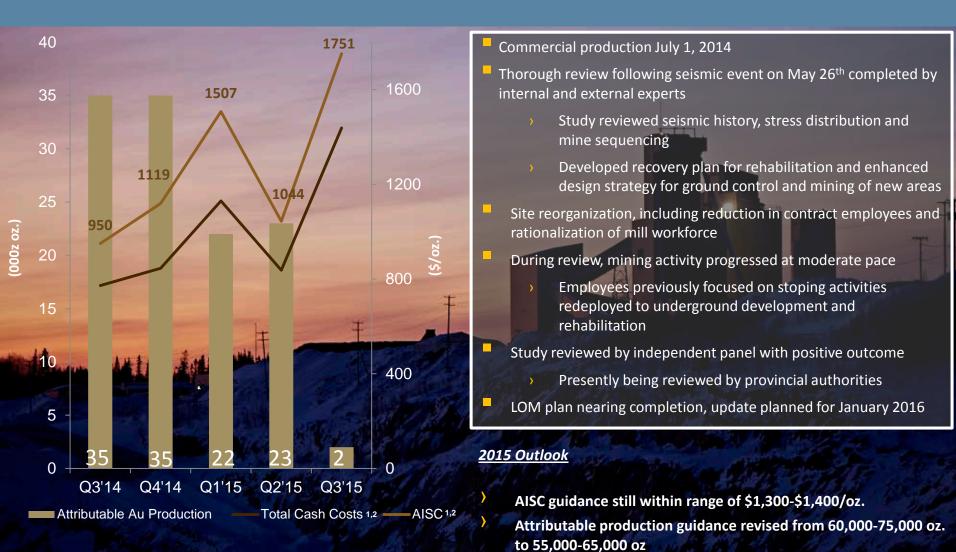

Rosebel – Suriname

¹ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP.

Westwood – Canada

1 This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP. 2 Q2'15 and Q3'15 cash costs and AISC reflect \$5.4M and \$15M inventory adjustment, respectively, to normalize costs.

Sadiola – Mali

Open-pit mine has produced 7M oz. over 20 years

- Decline in cash costs for 2015 due to lower fuel and consumable prices and favourable FX rates
- RC drilling program testing oxide targets; encouraging results

Potential to continue mining and milling into 2018

2015 Outlook

- 2015 attributable production guidance increased to 70,000 oz.
- Continue to update feasibility study
- Continue to work with our JV partner, AngloGold Ashanti, on options to extend mine life

¹ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP

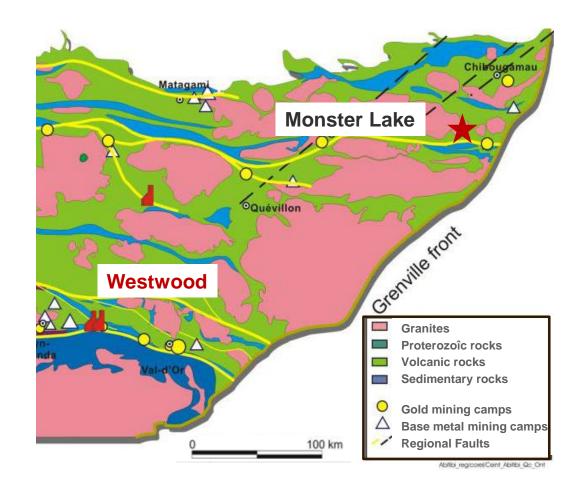

Exploration Review

Monster Lake (Quebec) – JV with TomaGold

- October 30, 2015 Amended earn-in option agreement with TomaGold
 - Acquired 50% interest in exchange for C\$3.2M cash payment
 - Option to increase interest to 75% with further C\$10M in exploration expenditures by 2021
- June 25, 2015 Highlights from 2015 winter drilling results include:
 -) 1.5 m at 18.80 g/t Au
 - 10.7 m at 3.64 g/t Au
- Completed summer field program in Q3/15; results will prioritize future drilling targets
- 4,000 metre drill program targeting the Megane-325 zone underway

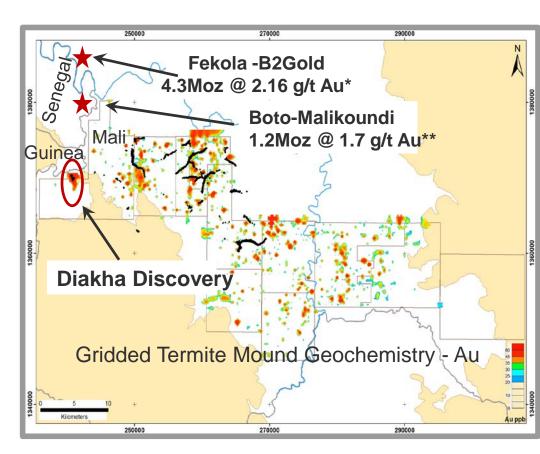

High-grade Megane-325 zone extends at depth; new gold bearing structures identified

Siribaya (Mali) – JV with Merrex Gold

- Focused on Diakha prospect extension of trend hosting Boto Gold deposit
- Highlights from infill delineation drilling completed in H1/15 include:
 - 34 m at 11.99 g/t Au, including 18 m at 18.10
 g/t Au¹
 - 40 m at 2.52 g/t Au, including
 9 m at 8.83 g/t Au²
 - 43-101 compliant mineral resource estimate on track for year end
 - Preliminary metallurgical testing has commenced; gold recoveries being evaluated
 - November 10, 2015 announced increase in share ownership of Merrex to 25%

¹ Reported by Merrex on August 5, 2015. ² Reported by Merrex on June 11, 2015.

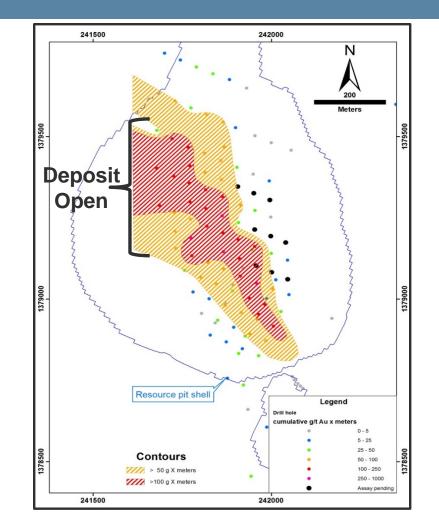

Multiple zones of gold mineralization over wide areas with similar characteristics to Boto

* - Source B2Gold Website

** - IAMGOLD News Release - February 18, 2015

Boto Gold Project (Senegal)

- Estimated indicated resource of 1.2 M oz at 1.7 g/t Au and inferred resource of 0.64 M oz at 1.8 g/t Au
- Infill drilling at Malikoundi deposit completed Q2/15
- July 20, 2015 Final 2015 assay results reported include:
 - > 36 m at 3.59 g/t Au, including 7 m at 9.46 g/t Au
 - > 25 m at 4.26 g/t Au, including 8 m at 8.80 g/t Au
- Updated resource estimate expected by year end
 - Validating and incorporating drilling results into revised resource model and finalizing pit parameters
 - Metallurgical testing on-going
- Technical and environmental studies to support economic evaluation will continue through 2016

Source: Updated Resource Estimate for Boto Gold, effective December 31, 2014.

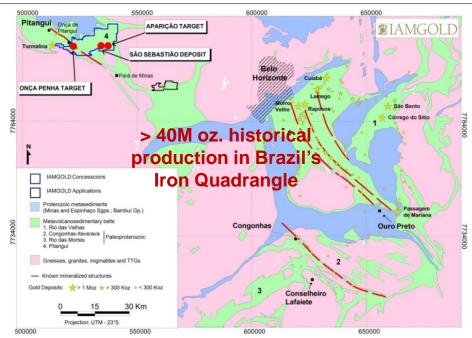

Note: CIM Definitions were followed for classification of Mineral Resources. Mineral Resources are estimated at a cut-off grade of 0.60 g/t Au. Mineral Resources are estimated using a gold price of US\$1,500 per ounce . High grade assays are capped at 15 g/t Au to 30 g/t Au depending on geological area. Bulk density varies from 1.61 g/cm³ to 2.62 g/cm³ based on weathering code. The Mineral Resource Estimate is constrained by a Whittle Pit shell. Mineral Resources are not Mineral Reserves and do not yet have demonstrated economic viability, but are deemed to have a reasonable prospect of economic extraction. Numbers may not add due to rounding. Mineral Resources are reported on a 100% ownership basis.

Results confirm continuity of mineralization with frequent high grades over wide areas; deposit open at depth

Pitangui Project (Brazil)

- April 2014 maiden inferred resource estimate of 0.64 M oz at 4.88 g/t Au
- Assay results highlights reported July 7, 2015:
 - 11.9 m at 6.84 g/t Au, including 3.5 m at 17.02 g/t Au
 - > 7.6 m at 9.78 g/t Au and 4.4 m at 16.56 g/t Au
 - > 7.4 m at 8.12 g/t Au
- Resource delineation drilling program to upgrade the resource within the core area of the São Sebastião deposit completed
- Assay results being incorporated into an updated resource model
- Drilling commenced to test electromagnetic (Em) anomalies previously identified on property
 - Similar to Em anomaly at São Sebastião deposit

Source: Updated Resource Estimate for Pitangui, effective January 9,2014. Note: CIM Definitions were followed for classification of Mineral Resources. Mineral Resources are estimated at a cut-off grade of 3.0 g/t Au. Mineral Resources are estimated using a gold price of US\$1,500 per ounce . High grade assays are capped at 10g/t Au to 15 g/t Au depending on geological area. Bulk density, as determined from 2,570 measurements, varies from 3.06 g/cm³ to 3.24 g/cm³ based on geologic area. Mineral Resources are not Mineral Reserves and do not yet have demonstrated economic viability, but are deemed to have a reasonable prospect of economic extraction. Numbers may not add due to rounding. Mineral Resources are reported on a 100% ownership basis.

>

Results confirm continuity of targeted zones and intersection of thicker intervals of high-grade mineralization

Eastern Borosi (Nicaragua) – JV with Calibre Mining

- Drilling program in 2015 focused on further testing discoveries from 2014 as well as exploring additional vein systems
- Q3/15 received final assay results from diamond drilling in Q2/15
- May 6, 2015 Blag vein system drilling¹:
 - > Included highest grade silver intercepts reported to date
 - 10.7 m at 3.08 g/t Au and 381.3 g/t Ag, including
 2.6 m at 9.01 g/t Au and 949.1 g/t Ag
 - Defined a continuous high-grade gold and silver shoot within the vein system
- July 2015 Blag vein system drilling highlights include²:
 - 5.4 m at 2.99 g/t Au and 31.6 g/t Ag
 - > 4.7 m at 7.84 g/t Au and 6.0 g/t Ag
 - > 19.2 m at 1.11 g/t Au and 223.4 g/t Ag
- Compiling results to determine future drilling priorities

¹ Reported by Calibre Mining May 6, 2015. ² Reported by Calibre Mining July 20, 2015.

Drilling confirms multiple Au-Ag vein systems

Appendices

2015 Capital Expenditure Outlook¹

(\$ millions)	Sustaining	Development/ Expansion (Non-sustaining)	Total
Rosebel	65	10	75
Essakane	55	5	60
Westwood	20	60	80
Total gold segments	140	75	215
Côté Gold	-	5	5
Total consolidated	140	80	220
Joint ventures	5	5	10
Total (±10%)	145	85	230

¹ Does not include capitalized borrowing costs.

2015 Production and Cost Guidance

	Previous ¹	<u>Revised</u> ²
Rosebel (000s oz.)	290 - 300	290 - 300
Essakane (000s oz.)	360 - 370	365 - 380
Westwood (000s oz.)	60 - 75	55 - 65
Total owner-operated production (000s oz.)	710 - 745	710 - 745
Joint ventures (000s oz.)	70	70
Total attributable production (000s oz.)	780 - 815	780 - 815
Total cash costs ^{3,4} – owner-operator (\$/oz.)	\$825 - \$865	\$825 - \$865
Total cash costs ^{3,4} (\$/oz.)	\$850 - \$900	\$825 - \$865
All-in sustaining costs ^{3,4} – owner-operator (\$/oz.)	\$1,050 - \$1,150	\$1,050 - \$1,150
All-in sustaining costs ^{3,4} (\$/oz.)	\$1,075 - \$1,175	\$1,050 - \$1,150

¹ The Previous outlook is based on 2015 full year assumptions with an average realized gold price of \$1,250 per ounce, Canadian \$/USD exchange rate of 1.15, USD/€ exchange rate of 1.20 and average crude oil price of \$73/barrel.

² The Revised outlook is based on 2015 fourth quarter assumptions with an average realized gold price of \$1,200 per ounce, Canadian \$/U.S.\$ exchange rate of 1.25, U.S.\$/€ exchange rate of 1.10 and average crude oil price of \$55/barrel. This considers the consensus forecasted crude oil price and the Company's hedging programs.

³This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for reconciliation to GAAP.

⁴ Consists of Rosebel, Essakane, Westwood, Sadiola and Yatela on an attributable basis.

Capitalization

Position (as at September 30, 2015)	M\$
Cash and cash equivalents	633
Bullion (at market)	151
LTD - senior unsecured notes	635
Shareholder's Equity (incl. non-controlling interests)	2,620
Total Capitalization	3,255
Net Cash	149

Credit Metrics		
EBITDA (TTM)	\$240M	
Net Debt/EBITDA (TTM) ¹	Ox	
Total Debt/EBITDA (TTM)	2.65x	
Interest coverage	5.0x	
Total Debt/Equity	24.2%	
Total Debt/Capitalization	19.5%	

¹ Covenant: Net Debt/EBITDA 3.5X

Taxes & Royalties

	Africa		Americas	
	Burkina Faso	Mali	Canada	Suriname
Corp. Tax Rate	17.50%	30%	36% includes Quebec mining duty taxes which are deductible for mining tax purposes	36%
	Statutory corporate income tax rate of 27.5% less 10% per Mining Agreement			
	3%- Au price <\$1000/oz	6%		6.5% (Au price >\$425/oz)
Royalty Rate	4%- Au price \$1000-\$1300/oz		Mouska 2.2%	(2.25% in-kind of production)
	5%- Au price >\$1300/oz			p ,
Other Taxes	18% Non-refundable VAT on Light Fuel Oil	VAT w/ majority fully refundable	GST/HST/QST	VAT w/ majority fully refundable
	6.25% on interest and dividends	Various exemptions apply to interest, dividends, and services		
Non-Resident withholding tax	10% on services rendered by non-residents (mining activities)		N/A	N/A
	20% on services rendered by non-residents (non-mining activities)	rendered by non-residents		

Summary of Outstanding Derivative (Hedge) Contracts¹

Contracts	2015	2016	2017	2018
Foreign currency				
Canadian dollar contracts (M of C\$)	30.0	90.0	-	-
Contract rate range (C\$/\$)	1.12 - 1.17	1.12 - 1.29	-	-
Hedge ratio ²	38%	30%	_	_
Euro contracts (M of €)	9.0	18.0	-	-
Contract rate range (\$/€)	1.21 – 1.26	1.08 - 1.15	-	-
Hedge ratio ²	14%	7%	-	-
Commodities				
Crude oil contracts (barrels)	285,000	1,101,000	786,000	-
Contract price range (\$/barrel of crude oil)	75 – 95	68 – 95	71 – 95	-
Hedge ratio ²	79%	74%	53%	-

IAMGOLD Hedging Strategy

- Proactive strategy to mitigate risk from fluctuating exchange rates and oil prices in volatile markets
- ✓ Hedges a portion of exposure to FX resulting from operating and CAPEX requirements.
- Hedges a portion of anticipated fuel consumption. A portion of exposure remains unhedged so there is opportunity to benefit from further price declines. Zero cost collars lock in a ceiling and floor price.
- 2015 outlook based on average crude oil price of \$73/barrel. This reflects a weighted average of multiple fuel contracts ranging between \$75 and \$95 per barrel for 79% of anticipated fuel purchases and the consensus forecast price for WTI, for which we could purchase the unhedged portion of our anticipated fuel purchases in the open market.

¹ Further information found on page 19 of IAMGOLD Corporation's Q3'15 MD&A – September 30, 2015

² Hedge ratio is calculated by dividing the amount (in foreign currency or commodity units) of outstanding derivative contracts by total foreign exchange and commodity exposures.
