

Cautionary Statement on Forward-Looking Information

All information included in this presentation, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, other than statements of historical fact, constitute forward looking information or forward-looking statements and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: the Company's quidance for production, cash costs, all-in sustaining costs, depreciation expense, effective tax rate, and operating margin, capital expenditures, operations outlook, cost management initiatives, development and expansion projects, exploration, the future price of gold, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing and amount of estimated future production, costs of production, permitting timelines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to the, use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "intend", "plan", "suggest", "guidance", "outlook", "potential", "prospects", "seek", "targets", "strategy" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The Company cautions the reader that reliance on such forward-looking statements involve risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements, and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to, changes in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, and financing; mining tax regimes; ability to successfully integrate acquired assets; legislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. With respect to development projects, IAMGOLD's ability to sustain or increase its present levels of gold production is dependent in part on the success of its projects. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. Development projects have no operating history upon which to base estimates of future cash flows. The capital expenditures and time required to develop new mines or other projects are considerable, and changes in costs or construction schedules can affect project economics. Actual costs and economic returns may differ materially from IAMGOLD's estimates or IAMGOLD could fail to obtain the governmental approvals necessary for the operation of a project; in either case, the project may not proceed, either on its original timing or at all.

For a more comprehensive discussion of the risks faced by the Company, and which may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the company's estimated future results, performance or achievements expressed or implied by forward-looking information or forward-looking statements, please refer to the Company's latest Annual Information Form, filed with Canadian securities regulatory authorities at www.secar.com, and filed under Form 40-F with the United States Securities Exchange Commission at www.secagov/edgar.shtml. The risks described in the Annual Information Form (filed and viewable on www.secagov/edgar.shtml, and available upon request from the Company) are hereby incorporated by reference into this presentation.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

 $^{^{1}\,\}mbox{Includes}$ capitalized stripping of \$20M at Rosebel and \$20M at Essakane

Key Strengths

IAMGOLD's Plan

Revisit LOMs at lower gold prices Reduce operating costs and sustaining capital Review all capital programs, including future development projects Continue to optimize performance at Essakane and Rosebel Determine optimal development plan for Westwood Preserve financial strength Continue to evaluate acquisition opportunities fitting the following criteria: Predominantly gold Producing or near-producing mine Minimum production of 100k oz./year Higher grades Lower costs Good mining jurisdiction

Debt covenant requirements:

Exclusively or in combination:

- 1) Repay existing secured debt (i.e. capital leases), debt associated with Designated Senior Debt (i.e. LC's or derivatives) or other Indebtedness (provided an equal amount is used to buy back bonds through open market purchases)
- 2) Re-invest in the business (long term assets, capital expenditures or M&A)
- 3) Return the funds to the bond holders

Details on Re-investment that qualifies for debt covenant:

- IAMGOLD must spend or commit to spend the proceeds from any asset disposition within 365 days of the sale of such disposition.
- Spending consists of re-investing into the business, including acquiring assets (M&A) or capital expenditures.
- There are two important triggers to measure:
 - Spend or the commitment to spend needs to be made within the 365 days of disposition, and
 - Actual spending must be done within 180 days after the 365 days commitment period.
- Funds not re-invested are deemed Excess Proceeds and can be retained so long as they are less than \$50M, otherwise, all Excess Proceeds must be used to repurchase bonds at par from bondholders.

Definitions:

For IMG purposes the following definitions are established to assess investments that qualify for debt covenant:

- Planned Spending: Year-To-Date (YTD)¹ actual spend as reported on the MD&A plus forecasted spending
- Actual Capital Spending¹: As reported on the MD&A on a quarterly basis
- Committed Spending:
 - Made within 365 days
 - Must be a binding agreement
 - Open Purchase Orders (POs) and signed agreement for capital items less YTD spending related to the specific POs reported as actuals
 - Principle paid and commitment on leased equipment is included
 - Must be spent within 180 days of commitment (i.e. July 2016)

 $^{^{1}}$ Actuals spending from Jan 22^{nd} 2015

Operations Review

2015 Production and Cost Guidance¹

Rosebel (000s oz.)	290 - 300
Essakane (000s oz.)	360 - 370
Westwood (000s oz.)	60 - 75
Total owner-operated production (000s oz.)	710 - 745
Joint ventures (000s oz.)	70
Total attributable production (000s oz.)	780 - 815
Total cash costs ^{2,3} – owner-operator (\$/oz.)	\$825 - \$865
Total cash costs ^{2,3} (\$/oz.)	\$850 - \$900
All-in sustaining costs ^{2,3} – owner-operator (\$/oz.)	\$1,050 - \$1,150
All-in sustaining costs ^{2,3} (\$/oz.)	\$1,075 - \$1,175

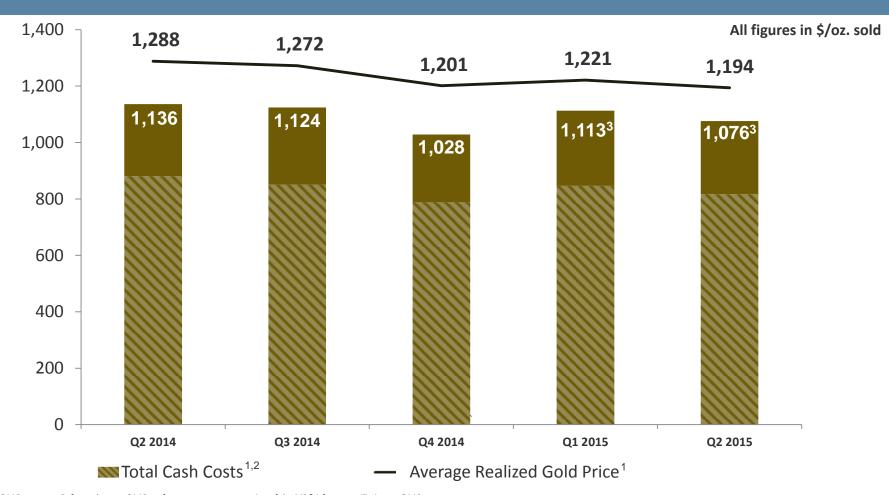

¹ The outlook is based on 2015 full year assumptions with an average realized gold price of \$1,250 per ounce, Canadian \$/USD exchange rate of 1.15, USD/€ exchange rate of 1.20 and average crude oil price of \$73/barrel.

² This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for reconciliation to GAAP.

³ Consists of Rosebel, Essakane, Westwood, Sadiola and Yatela on an attributable basis.

All-In Sustaining Costs^{1,2}

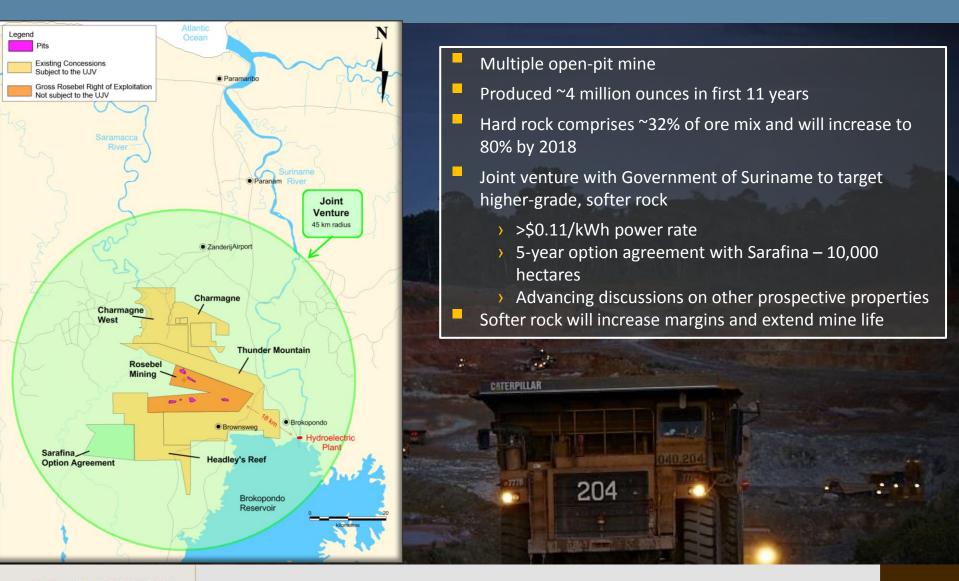

¹ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for reconciliation to GAAP

² Consists of Rosebel, Essakane, Westwood (commercial production), Mouska, Sadiola and Yatela on an attributable basis.

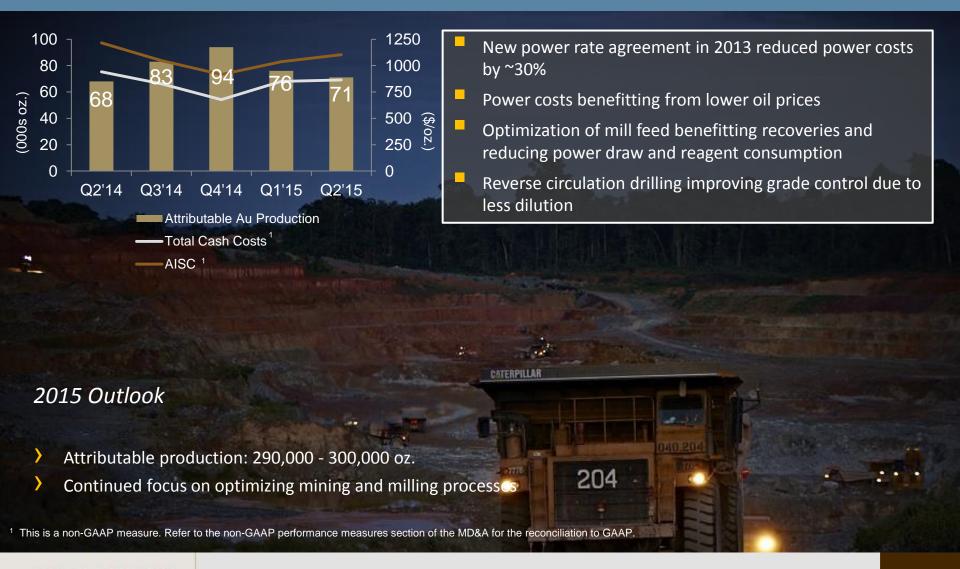

³ Includes impact from realized hedge (currency hedges) and non-hedge derivative losses (fuel contracts) of \$64/oz. in Q1/15 and \$53/oz. in Q2/15. Includes reduction of \$28 per ounce sold to normalize costs following the seismic event at Westwood

Rosebel – Suriname

Rosebel – Suriname

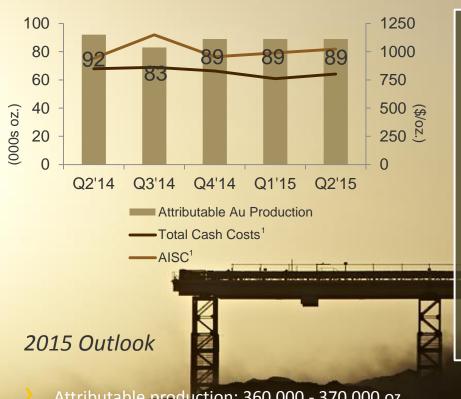

Suriname – Political Environment

- Bouterse government re-elected in historic majority in recent election
- Government highly supportive of mining industry
- We are strongly engaged with new cabinet. We were at the inauguration, visited Suriname recently and will be returning soon.

Essakane – Burkina Faso

- Open-pit mine in 5th year of production; 10 years remaining
- April 2015 updated resource estimate at Falagountou increased indicated resources by 84% to 613,000 oz. and grade by 10% to 1.5 g/t Au
 - Expected to extend Essakane's peak production levels beyond the next 4 years
 - Commenced mining on June 2015
- Mill expansion completed in 2013 to accommodate increasing proportion of hard rock
 - Production increased 33% in 2014
- Hard rock comprises 64% of ore mix
- Attributable production: 360,000 370,000 oz.
- Higher grades and lower oil prices expected to improve cash costs
- AISC below \$1,000/oz.
- Initiatives to enhance management systems and improve maintenance performance and planning methods

1 This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP.

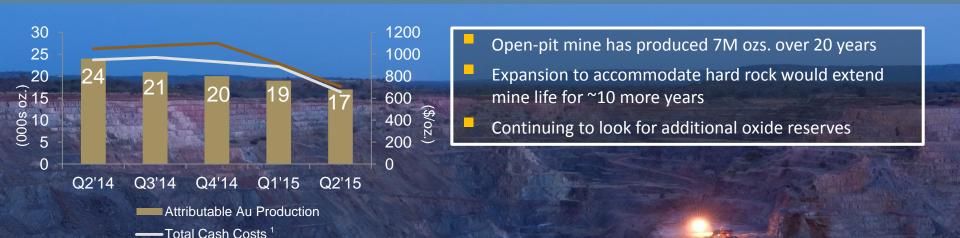

Burkina Faso – Political Environment

- Following democratic uprising in 2014 that ousted former President Compoare, Transitional Authority has been working towards elections on October 11, 2015
 - Elections may be pushed back by a coup by a branch of the military (the Presidential Guard) opposed to the exclusion of some candidates. A tentative resolution has been reached, but negotiations are ongoing.
 - Widespread opposition to the coup from international and domestic interests both civilian and military – has effectively prevented this seizure of power from consolidating.
- Operations are unaffected.
- Government strongly supports mining the election is not expected to impact that support in any way

Sadiola – Mali

AISC

2015 Outlook

- 2015 production guidance increased to 70,000 attributable ounces
- Expect mining and processing of oxides to continue well into 2016
- RC drilling program initiated to evaluate remnant oxide targets with potential to add incremental resources
- In light of present gold price environment, reassessing all capital programs, including future development projects.

 Therefore, negotiations related to potential acquisition of AngloGold Ashanti's share of Sadiola and plans for its future expansion have been suspended

1 This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP.

Mali – Political Environment

- Operating in Mali for > 20 years without any operational disruption from any political unrest or conflict.
- Located more than 2,400 km by road from the centre of conflict in the north
- Government working with regional partners to identify lasting political solution to conflict in the north

Westwood – Canada

- Commercial production July 1, 2014
- Production and unit costs impacted by localized ground fall following seismic event on May 26, 2015
- Affected area under temporary halt
- Mining in unaffected areas continues
- Assessing options to mitigate future risk
- Proceeding at a pace of underground development that is safe and that optimizes future resource development

2015 Outlook

- Production guidance revised to 60,000 75,000 oz.
- AISC expected to range between \$1,300 and \$1,400/oz.

This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for the reconciliation to GAAP. Q2'15 costs attributed to inventory reduced by \$5.4M to normalize costs. Without normalization cash costs would have been \$244 an ounce higher and AISC \$207 an ounce higher.

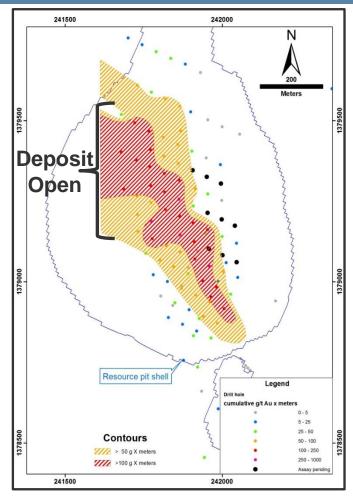

Exploration Review

Boto Gold Project (Senegal)

- Estimated indicated resource of 1.2 Moz at 1.7 g/t Au; and inferred resource of 635,000 oz at 1.8 g/t Au
- Infill drilling at Malikoundi deposit completed
- Final 2014 assay results include:
 - 40 m at 3.24 g/t Au (including 11 m at 8.15 g/t Au)
 - 9 m at 10.5 g/t Au (including 5 m at 17.55 g/t Au)
- Final 2015 assay results reported July 20, 2015 include:
 - 36 m at 3.59 g/t Au (including 7 m at 9.46 g/t Au)
 - 25 m at 4.26 g/t Au (including 8 m at 8.8 g/t Au)
- Updated resource estimate expected Q3/15
- Diamond drilling to provide geotechnical information in areas of proposed mine infrastructure
- Technical studies to determine economic viability will continue through 2016

Source: Updated Resource Estimate for Boto Gold, effective December 31, 2014.

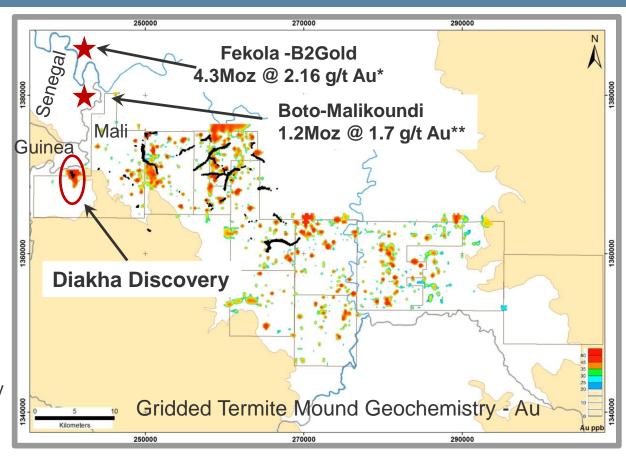

Note: CIM Definitions were followed for classification of Mineral Resources. Mineral Resources are estimated at a cut-off grade of 0.60 g/t Au. Mineral Resources are estimated using a gold price of US\$1,500 per ounce. High grade assays are capped at 15 g/t Au to 30 g/t Au depending on geological area. Bulk density varies from 1.61 g/cm³ to 2.62 g/cm³ based on weathering code. The Mineral Resource Estimate is constrained by a Whittle Pit shell. Mineral Resources are not Mineral Reserves and do not yet have demonstrated economic viability, but are deemed to have a reasonable prospect of economic extraction. Numbers may not add due to rounding. Mineral Resources are reported on a 100% ownership basis.

Siribaya (Mali) – JV with Merrex Gold

Focused on Diakha prospect - extension of trend hosting Boto Gold deposit

- Highlights from 2014 final assay results include¹:
 - > 6 m at 10.53 g/t Au
 -) 3 m at 15.01 g/t Au
- Highlights from 2015 assay results include:
 - 40 m at 2.52 g/t Au, including 9 m at 8.83 g/t Au²
 - 34 m at 11.99 g/t Au, including 18 m @ 18.10 g/t Au³
- Expect to complete infill delineation drilling and declare initial resource by end of 2015 as results warrant

^{** -} IAMGOLD News Release - February 18, 2015

¹ Reported by Merrex on February 27, 2015

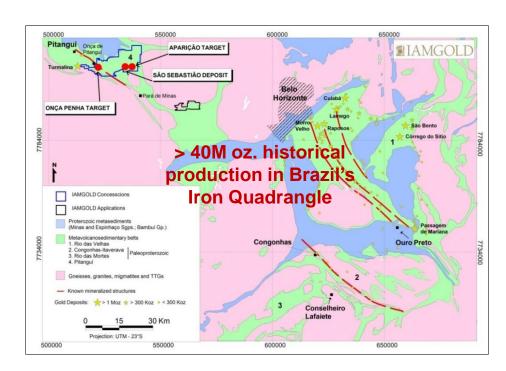

² Reported by Merrex on June 11, 2015

³ Reported by Merrex on August 5, 2015

^{* -} Source B2Gold Website

Pitangui Project (Brazil)

- Focused on upgrading resources at the São Sebastião deposit
- April 2014 maiden inferred resource estimate of 0.64 M oz at 4.88 g/t Au
- Infill drilling program completed in Q2/15
- Assay results highlights reported July 7, 2015:
 -) 11.9 m at 6.84 g/t Au, incl. 3.5 m at 17.02 g/t Au
 - > 7.6 m at 9.78 g/t Au and 4.4 m at 16.56 g/t Au
 - > 7.4 m at 8.1 g/t Au
- Once received and validated, assay results to be included in updated resource model

Source: Updated Resource Estimate for Pitangui, effective January 9,2014. Note: CIM Definitions were followed for classification of Mineral Resources. Mineral Resources are estimated at a cut-off grade of 3.0 g/t Au. Mineral Resources are estimated using a gold price of US\$1,500 per ounce. High grade assays are capped at 10g/t Au to 15 g/t Au depending on geological area. Bulk density, as determined from 2,570 measurements, varies from 3.06 g/cm³ to 3.24 g/cm³ based on geologic area. Mineral Resources are not Mineral Reserves and do not yet have demonstrated economic viability, but are deemed to have a reasonable prospect of economic extraction. Numbers may not add due to rounding. Mineral Resources are reported on a 100% ownership basis.

Eastern Borosi (Nicaragua) - JV with Calibre Mining

- 176km² land package with 2 gold and silver deposits and series of exploration targets
- Drilling program in 2015 focused on further testing discoveries from 2014 as well as exploring additional vein systems
- May 6, 2015 Blag vein system drilling highlights include¹:
 - 10.7 m @ 3.08 g/t Au and 381.3 g/t Ag, including2.6 m @ 9.01 g/t Au and 949.1 g/t Ag
 - Highest grade silver intercepts reported to date
 - Defined a continuous high-grade gold and silver shoot within the vein system
- June 11, 2015 Guapinol and Vancouver vein system drilling highlights include ²:
 - 1.4 m @ 98.72 g/t Au and 49.1 g/t Ag. Guapinol
 - 7.1 m @ 6.26 g/t Au and 41.4 g/t Ag, including 2.4 m @ 17.93 g/t Au and 118.6 g/t Ag Vancouver
- 2015 drilling program completed; results to be assessed to guide future drilling program

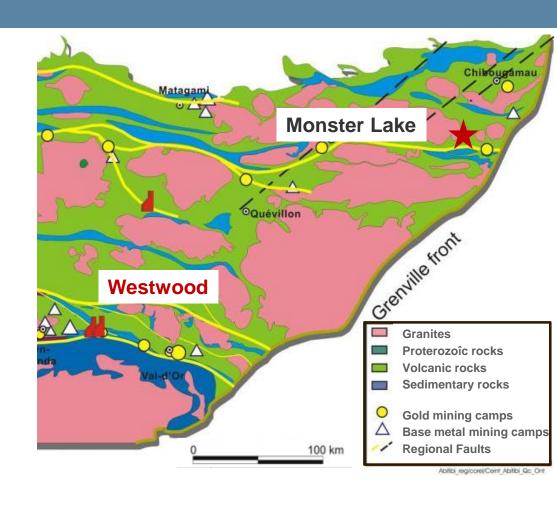

² Reported by Calibre Mining June 11, 2015

¹ Reported by Calibre Mining May 6, 2015

Monster Lake (Quebec) – JV with TomaGold

- Located in prolific Abitibi Greenstone belt
- High-grade intervals (25 to 30+ g/t Au) from previous drilling
- Highlights from 2014 final drilling results include:
 - 9.18 m at 46.33 g/t Au
 - 3.42 m at 18.68 g/t Au
 - 7.1 m at 6.74 g/t Au
- June 25, 2015 Highlights from 2015 winter drilling results include:
 - > 1.5 m at 18.8 g/t Au
 -) 10.7 m at 3.64 g/t Au
- Identifying and prioritizing targets for future drilling

Investment Highlights

- Strong balance sheet allowing for financial flexibility
- Operations diversified across three continents
- Focused on cost reduction, mine plan optimization, capital discipline and cash preservation
- **Excellent CSR reputation**
- **✓** Promising exploration pipeline

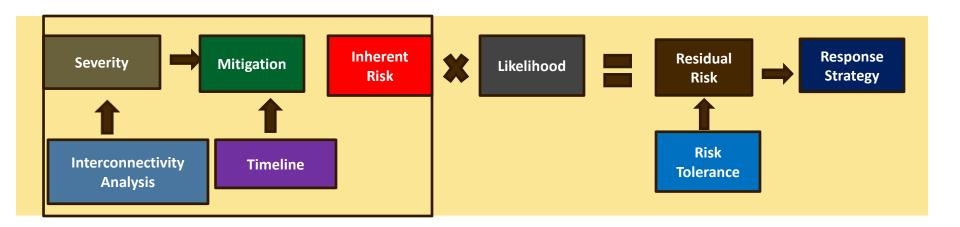

Appendices

ERM – Risk Assessment Process

- Step 1: For each risk, Executive Leadership Team assessed risk impact
- Step 2: Reviewed mitigating measures and monitoring actions in place
- **Step 3**: Assessed likelihood of occurrence to determine residual risk
- **Step 4**: Established risk owners, identified improvement opportunities and implementation action timeline

Note: It is important to clearly separate the analysis of the severity of the risk exposure from the likelihood of occurrence. The severity of risks will first be assessed in order of impact without regard to possible occurrence, thus capturing material risks before probability discounting

ERM – Risk Universe

Organization

- Leadership
- Talent / succession
- Compensation
- Governance

Strategic

- Cost containment / reduction
- Capital allocation
- Pipeline shrinkage

- Resource nationalism
- Competition for properties and talent
- Shareholder activism
- Exposure to pandemic: Ebola

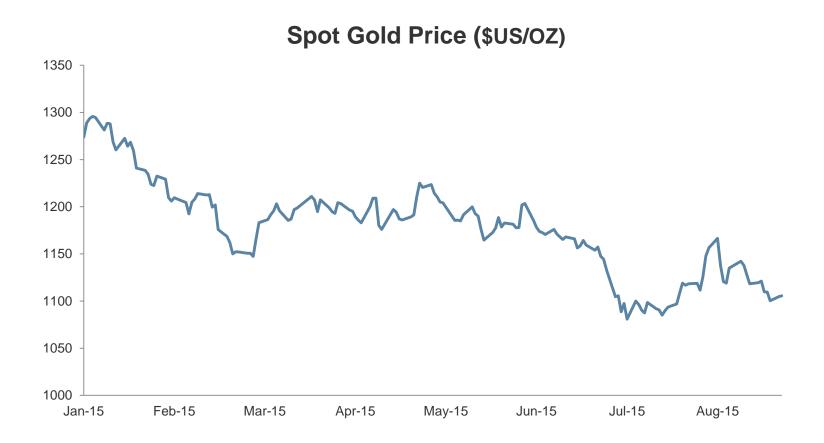

ERM – Site Risks Corporate Oversight

2014 Key site risks	Corporate level mitigations
Cost containment / reduction	Sustainability of costs reduction initiatives, Number of agreements in place with key suppliers, realized margin. Expansion of savings initiatives to include Diagnostics and Engagements with 3rd Party Consulting Firm on productivity & cost. Alternative Power studies. Monthly review of cost savings initiatives
Liquidity	Monitoring liquidity, Free cash flow monitoring, Actual cash position vs forecast, Peer performance indicator for capital structure (Debt to EBITDA and Debt to Equity), Operating Working Capital reduction initiative, Enhanced Liquidity Planning between corporate and sites, Capital Leasing initiatives
CommodityGold pricesNiobium prices	Directives for scenario planning at sites for reduced gold price scenarios, regular strategic review, enhanced LOM Planning Process & Rigor including LOM reviews at Technical Services and Executive level, medium term liquidity planning, costs savings initiatives, strategic initiatives to acquire lower cost production assets, Executive involvement in Niobium Marketing Committee.
Country / Political risk	Follow up of Issues as part of regular reporting, Direct involvement in major issues, Corporate Security Intelligence Contact Network, Global Review Committee participation in industry organizations with specific lobbying mandates
Technical	Regular Visits, Tech Services., Review of Consultant Reports, mandate to sites to improve the skills of the technical services teams at sites, Operations Executive Team review of site organizational design and talent pools. Corporate Audit Consolidation initiative
Reserves and resources	Corp. Director Mine Geology, R&R Subcommittee, 3rd Party Audits, Annual Review & Report, Quarterly reports, Life Of Mine comparison with budget and forecast. Reconciliation Audits at sites with action plans to improve practices
Mine Development	Regular Reporting & Review, Tech Services Audits, LOM Planning process enhancement
Environment & Sustainability	Corp. Director Environment, Corp. Policy, Internal & External Audit, HSS Subcommittee, ISO 14000 Cert., Toward Sustainable Mining Program., Monthly Results Review, Participation in Mine Safety Round Table, Corporate Audit Consolidation initiative
Health & Safety	Corporate Director H&S, Corp. Policy, Internal & External Audit, HSS Subcommittee, OHSA 18000 Cert., Monthly Results Review of Significant Incident Report (SIR), Corporate Audit Consolidation initiative
Regulatory	Global Review Committee (GRC) participation in industry organizations with specific lobbying mandates (Mining Association of Canada, Chambers of Mines, Quebec Mining Lobby), monitoring of regulatory developments by sites and corporate, meetings with regulatory authorities during corporate visits and/or targeted meetings in response to specific developments
Security	West African Manager Security reporting to Executive Leadership Team
Supply chain	Corp review of supply chain initiatives and Global Purchasing group. Operating Working Capital reduction initiative
Leadership	Operation Executive Team review of site organizational design and talent pools

Commodities				
Crude oil contracts (barrels)	570,000	1,101,000	786,000	-
Contract price range (\$/barrel of crude oil)	75 – 95	68 – 95	71 – 95	-
Hedge ratio ²	81%	74%	51%	-

IAMGOLD Hedging Strategy

- ✓ Proactive strategy to mitigate risk from fluctuating exchange rates and oil prices in volatile markets
- ✓ Hedges a portion of exposure to FX resulting from operating and CAPEX requirements.
- Hedges a portion of anticipated fuel consumption. A portion of exposure remains unhedged so there is opportunity to benefit from further price declines. Zero cost collars lock in a ceiling and floor price.
- ✓ 2015 outlook based on average crude oil price of \$73/barrel. This reflects a weighted average of multiple fuel contracts ranging between \$75 and \$95 per barrel for 81% of anticipated fuel purchases and the consensus forecast price for WTI, for which we could purchase the unhedged portion of our anticipated fuel purchases in the open market.

¹ Further information found on page 19 of IAMGOLD Corporation's Q2'15 MD&A – June 30, 2015

² Hedge ratio is calculated by dividing the amount (in foreign currency or commodity units) of outstanding derivative contracts by total foreign exchange and commodity exposures.

Covenants:

Cash proceeds from the sale of assets must be applied by Jan 2016 on growing the business. This can be done via capital expenditures and acquisitions. Timeline can be extended by 180 days of firm capital commitments. A \$50M "excess proceeds" basket is allowed. Any funds not applied as required must be used to repurchase Notes at par value.

Largest Bond Holders:

(Based on recent reports) include: BlueMountain Capital, Brigade Capital, CI Investments, Golden Tree, Lord Abbett, UniCredit SPA

2014 Reserves and Resources¹

As of December 31, 2014	2014
Gold (000s attributable oz. contained)	
Total proven and probable mineral reserves	8,608
Total measured and indicated mineral resources ^{2,3}	21,412
Total inferred resources	7,018

- Gold reserves have been estimated at our owned and operated mines at \$1,300.
- Resources for our owned and operated mines have been estimated at \$1,500 per ounce.

Detail behind the gold price assumptions used to determine reserves and resources can be found in the Reserves and Resources section of the MD&A.

Measured and indicated gold resources are inclusive of proven and probable reserves.

³ In mining operations, measured and indicated resources that are not mineral reserves are considered uneconomic at the price used for reserves estimations, but are deemed to have a reasonable prospect of economic extraction.
