IAMGOLD Q2 2017 Results

August 10, 2017

Empowering People,
Extraordinary Performance

| TSX: IMG | NYSE: IAG |

Management Participants

Steve Letwin **President & Chief Executive Officer**

Gordon Stothart **Executive Vice President & Chief Operating Officer**

Craig MacDougall **Senior Vice President, Exploration**

Jeff Snow **General Counsel & Senior Vice President, Business Development**

James Collie **Vice President & Corporate Controller**

Ken Chernin **Vice President, Investor Relations**

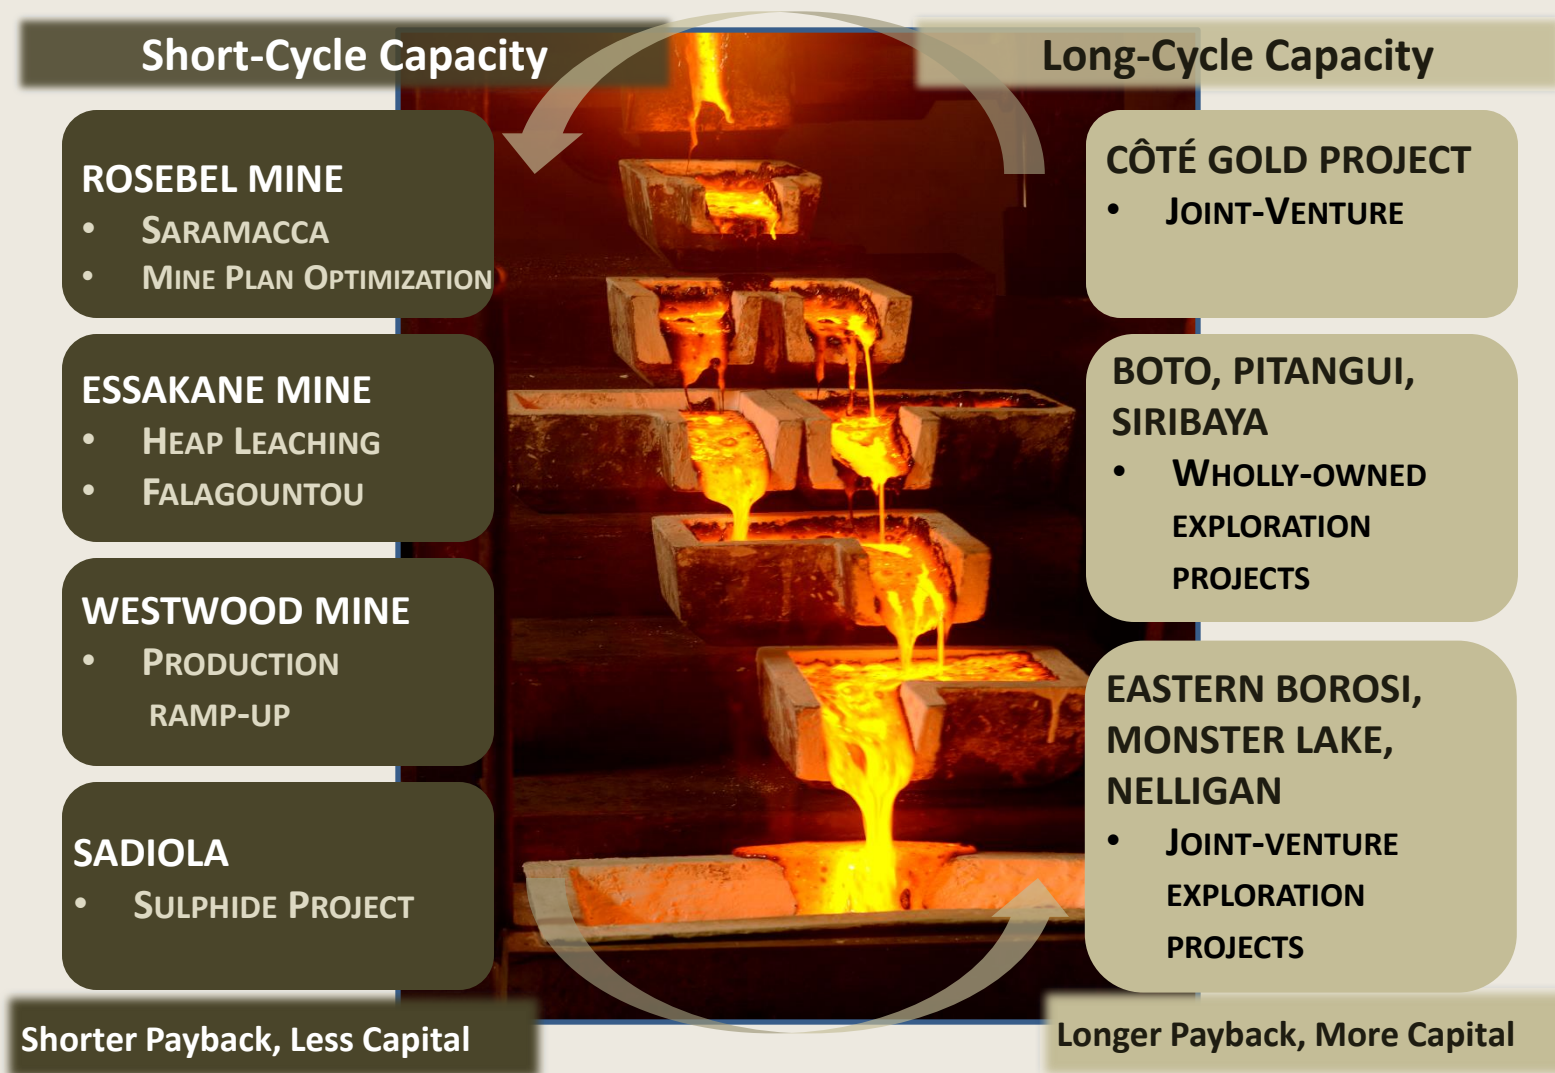

Cautionary Statement

All information included in this presentation, including any information as to the Company's future financial or operating performance, and other statements that express management's expectations or estimates of future performance, other than statements of historical fact, constitute forward looking information or forward-looking statements and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: the Company's guidance for production, cash costs, all-in sustaining costs, depreciation expense, effective tax rate, and operating margin, capital expenditures, operations outlook, cost management initiatives, development and expansion projects, exploration, the future price of gold, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing and amount of estimated future production, costs of production, permitting timelines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans relating to the future. Forward-looking statements are generally identifiable by, but are not limited to the, use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "opportunities", "intend", "plan", "possible", "suggest", "guidance", "outlook", "potential", "prospects", "seek", "targets", "strategy" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The Company cautions the reader that reliance on such forward-looking statements involve risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the Company's estimated future results, performance or achievements expressed or implied by those forward-looking statements, and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to, changes in the global prices for gold, copper, silver or certain other commodities (such as diesel and electricity); changes in U.S. dollar and other currency exchange rates, interest rates or gold lease rates; risks arising from holding derivative instruments; the level of liquidity and capital resources; access to capital markets, and financing; mining tax regimes; ability to successfully integrate acquired assets; legislative, political or economic developments in the jurisdictions in which the Company carries on business; operating or technical difficulties in connection with mining or development activities; laws and regulations governing the protection of the environment; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; adverse changes in the Company's credit rating; contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. With respect to development projects, IAMGOLD's ability to sustain or increase its present levels of gold production is dependent in part on the success of its projects. Risks and unknowns inherent in all projects include the inaccuracy of estimated reserves and resources, metallurgical recoveries, capital and operating costs of such projects, and the future prices for the relevant minerals. Development projects have no operating history upon which to base estimates of future cash flows. The capital expenditures and time required to develop new mines or other projects are considerable, and changes in costs or construction schedules can affect project economics. Actual costs and economic returns may differ materially from IAMGOLD's estimates or IAMGOLD could fail to obtain the governmental approvals necessary for the operation of a project; in either case, the project may not proceed, either on its original timing or at all.

For a more comprehensive discussion of the risks faced by the Company, and which may cause the actual financial results, performance or achievements of IAMGOLD to be materially different from the company's estimated future results, performance or achievements expressed or implied by forward-looking information or forward-looking statements, please refer to the Company's latest Annual Information Form, filed with Canadian securities regulatory authorities at www.sedar.com, and filed under Form 40-F with the United States Securities Exchange Commission at www.sec.gov/edgar.shtml. The risks described in the Annual Information Form (filed and viewable on www.sedar.com and www.sec.gov/edgar.shtml, and available upon request from the Company) are hereby incorporated by reference into this presentation.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

Balanced Business Model

Enhancing Value One Step at a Time: Rosebel

Mine Optimization

80% reserve increase
extends mine life to 2028
July 2017

Saramacca

Maiden resource estimate
September 2017

Additional Exploration

- Sarafina property
- Overman deposit

Enhancing Value One Step at a Time: Essakane

Falagountou

West – commenced mining 2015

East – updated resource estimate expected by end of 2017

Heap Leaching

Potential to add 3-5 years to mine life

Low-cost method for processing marginal and low-grade ore, including stockpiles, and justifies pushbacks of existing pit

PFS 2018

Satellite Prospects

Additional potential to extend mine life

- Gossey
- Korezena
- Tassiri
- Sokadie

Financial Review

Q2 – Strong Operational and Financial Performance*

<i>(In \$ millions, except for per share and \$/oz amounts)</i>	Q2'16	Q2'17	Variance (%)
Attributable production (000s oz)	197	223	13% 
Attributable sales (000s oz)	187	219	17% 
Cost of sales (\$/oz) ¹	805	767	(5%) 
Total cash costs (\$/oz) ²	756	735	(3%) 
AISC (\$/oz) ²	1,114	975	(12%) 
Revenue ³	233	275	18% 
Gross profit	24	36	47% 
Adjusted net earnings ^{2,4}	6	4	(27%) 
Adjusted EPS (\$/share) ^{2,4}	0.01	0.01	--
Net operating cash flow	71	89	25% 
Capital Expenditures	81	50	(38%) 

*Numbers presented in this table have been rounded.

¹ Cost of sales, excluding depreciation, as disclosed in note 29 of the Company's consolidated interim financial statements is on an attributable ounce sold basis (excluding the non-controlling interests of 10% at Essakane and 5% at Rosebel) and does not include joint ventures which are accounted for on an equity basis.

² This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for more information.

³ Revenue excludes equity accounted joint ventures

⁴ Attributable to equity holders.

Adjusted Net Earnings¹

<i>(In \$ millions, except for per share amounts)</i>	Q2'17
Net earnings attributable to equity holders	506.5
Reversal of impairment charges	(524.1)
Gain on sale of a 30% interest in the Côté Gold Project	(19.2)
Other	(0.7)
Tax adjustment	41.8
Adjusted net earnings attributable to equity holders¹	4.3
Adjusted net earnings attributable to equity holders per share (\$/share)¹	0.01

¹ This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for more information.

Outstanding Derivative Hedge Contracts¹

Q2'17 Production & Costs Summary

	Attributable Production (oz)	Cost of Sales ¹ (\$/oz sold)	Total Cash Costs ² (\$/oz produced)	AISC ² (\$/oz sold)
Essakane	101,000	\$750	\$698	\$922
Rosebel	74,000	\$752	\$722	\$923
Westwood	33,000	\$843	\$800	\$995
Sadiola	14,000	--	\$898	\$936

Total	223,000*	\$767	\$735	\$975
--------------	-----------------	--------------	--------------	--------------

*Includes 1,000 oz from Yatela, which is in closure mode.

Maintaining 2017 production & cost guidance of 845,000-885,000 oz attributable production; AISC of \$1,000-\$1,080

¹ Cost of sales, excluding depreciation, as disclosed in note 29 of the Company's consolidated interim financial statements is on an attributable ounce sold basis (excluding the non-controlling interests of 10% at Essakane and 5% at Rosebel), and does not include Joint Ventures which are accounted for on an equity basis.

² This is a non-GAAP measure. Refer to the non-GAAP performance measures section of the MD&A for more information.

Essakane – Burkina Faso (90%)

Q2 Highlights

- Attributable production up 13%
- 24% increase in throughput despite 85% hard rock content with mill currently performing 30% above nameplate capacity
- Lower grades due to mine sequencing
- AISC down 15% due to lower sustaining CAPEX and higher sales

Focused on Performance Optimization

- **Improve recoveries**
 - Commissioned intensive leach reactor
 - Geometallurgical study expanded; to be completed by end of '17
 - Oxygen plant currently in engineering stage; to be commissioned by end of '18
- **Improving mining efficiency**
 - Commissioning of two production drills and a new loader
- **Reduce energy costs**
 - Commenced construction of 15 MW solar plant, to be completed by end of '17

Q2'17 Actuals

Attributable gold production	101,000
TCC ¹	\$698
AISC ¹	\$922
Head grade (g/t)	1.11

2017 Guidance

Attributable gold production	370,000 to 380,000
LOM	2023+

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

**Expect Prefeasibility Study for
heap leaching to be completed
Q2'18**

Rosebel – Suriname (95%)

Q2 Highlights

- Attributable production and throughput flat while hard rock increased from 36% to 42%
- Mining activity up 20% due to mine sequencing and less rainfall than expected
- AISC down 12% due to lower cost of sales and sustaining CAPEX

Continued Effort to Improve Cost Profile

- On-going productivity improvements
- Better equipment reliability
- Operational enhancements
- Stabilization of mill feed to maintain mill throughput
- Potential to reduce further with Saramacca

Q2'17 Actuals

Attributable gold production	74,000
TCC ¹	\$722
AISC ¹	\$923
Head grade (g/t)	0.80

2017 Guidance

Attributable gold production	295,000 to 305,000
LOM (Excludes Saramacca)	2028

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

**R&R update, including 80% increase
in attributable reserves to 3.5M
ounces; extending mine life to 2028***

**Saramacca – Targeting initial
resource estimate by September '17**

*See News Release dated July 26, 2017

Westwood – Quebec (100%)

Q2 Highlights

- Attributable production doubled from previous year
- Lower unit costs due to higher production
- Normalization of costs discontinued
- 5 km of underground development completed; 11km YTD
- Head grade lower than grade mined due to marginal ore stockpiles processed to exploit mill capacity
- Excluding marginal ore stockpiles, head grade mined was 35% higher than reported or 8.6 g/t Au

Ramp-up on Track

- Completed 25km of underground development in 2016
- Targeting 17 km of lateral development and 3 km of vertical development in 2017
- Expect to be operating at commercial levels in 2017 from 2 mining blocks, including the zone where remedial work was completed last year
- Unit costs expected to decline as production increases

Q2'17 Actuals

Attributable gold production	33,000
TCC ¹	\$800
AISC ¹	\$995
Head grade (g/t)	6.37

2017 Guidance

Attributable gold production	115,000 to 125,000
LOM	2033+

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.

**On track for ramp-up to full
production by 2019**

Sadiola – Mali (41%)

Q2 Highlights

- Attributable production down 22%
- Decline in production due to 24% drop in grade

SSP

- Aligned with partner AGA to move Sulphide Project forward
- Discussions with Malian government continue
- Decision to move forward contingent upon Malian government renewing construction and operating permits; power agreement and fiscal terms
- A review of the current life-of-mine plan is being undertaken

Q2'17 Actuals

Attributable gold production	14,000
TCC ¹	\$898
AISC ¹	\$936
Head grade (g/t)	0.91

2017 Guidance

Attributable gold production	65,000 to 75,000 ³
LOM (Oxides only)	2019
LOM (with SSP)	2028

1. This is a non-GAAP measure. Refer to the non-GAAP performance measures section of this MD&A.
2. Includes nominal amount from Yatela which is in closure mode.

Côté Gold Well-Positioned to Advance Towards Development

Key accomplishments since IAMGOLD acquisition

- Conversion of nearly 6Moz from resources to reserves
- Positive decisions on both Federal and Provincial Environmental Assessments received
- Completed prefeasibility study and initiated Feasibility study
- Completed transaction with Sumitomo Metal Mining

Joint Venture with Sumitomo Metal Mining¹

- Completed sale of 30% interest in Côté Gold Project to SMM for \$195M
- SMM is well funded with extensive technical expertise
- Common interest in developing Côté and pursuing future opportunities
- Oversight Committee established with proportionate representation
- IMG to be the operator

Pre-Feasibility Results Demonstrate Economically Viable Project²

- 17 year mine life
- LOM average annual attributable production 207,000
- LOM average cash costs \$605/oz; AISC \$689/oz
- P&P attributable reserves of 3.8M oz
- After-tax NAV \$703M (5% discount rate) with 14% IRR; at \$1250/oz gold price

Expect to complete
Feasibility study
H2'18

¹ Refer to IAMGOLD news release dated June 20, 2017

² Refer to IAMGOLD news release dated June 5, 2017

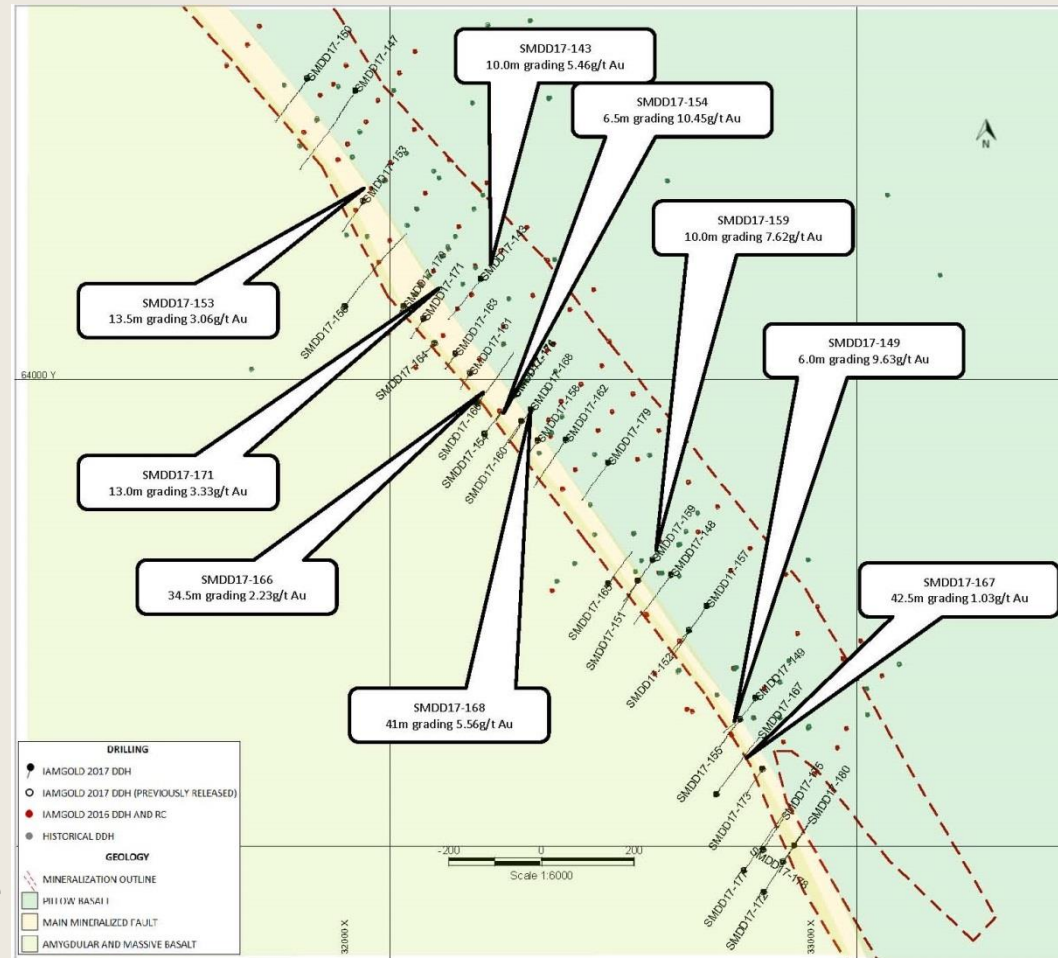

Exploration

Saramacca – 2017 Delineation Campaign

- 2017 infill drilling program complete; initial resource estimate expected September '17
- Results from 180 diamond drill holes received, totaling 34 km of drilling completed in 12 months;

Highlights include*:

- 76.6 m grading 7.7 g/t Au
 - 41.0 m grading 5.6 g/t Au
 - 43.5 m grading 12.3 g/t Au
 - 60.5 m grading 40.9 g/t Au
Including: 19.5 m grading 75.9 g/t Au
 - 20.0 m grading 4.3 g/t Au
and 19.5 m grading 9.7 g/t Au
 - 16.7 m grading 9.9 g/t Au
- Drilling to date has confirmed numerous high-grade intersections over wide intervals, including soft oxide intersections close to surface structures

*See IAMGOLD news releases dated March 29, May 15 and June 16, 2017.

Boto

- Location:

Senegal
- Ownership:

100%
- Highlights:

- Exploration continues along known mineralized trends with potential for additional resources
 - 3,600 metres of drilling completed in Q2
 - Assay results from remaining 22 diamond drill holes reported in Q2*
 - Updated resource estimate expected by end of '17
 - Technical and environmental studies to advance the economic evaluation of the project on-going

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ¹	27,670	1.8	1,563
Inferred ¹	2,922	1.3	125

* See IAMGOLD news release dated May 31, 2017

Pitangui

- Location:

Brazil
- Ownership:

100%
- Highlights:

- 2,000 metres of diamond drilling completed in Q2
 - 2017 drill program focused on expanding current resource and testing a newly permitted area up plunge of the São Sebastião deposit
 - Technical and environmental studies to advance the economic evaluation of the project on-going
 - Updated resource estimate expected end of '17

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ¹	--	--	--
Inferred ¹	4,252	5.0	679

¹ See mineral reserve and resource estimates with associated notes in appendix

Diakha-Siribaya

- Location:

Mali
- Ownership:

100%
- Highlights:

 - 12,700 metres of diamond and RC drilling completed in Q2
 - Focused on increasing confidence of the Diakha resource, extending deposit north and southward along strike
 - Updated resource estimate expected in ‘17

	Tonnes (000)	Grade (g/t)	Contained Ounces (000 Au)
Measured & Indicated ^{1,2}	2,102	1.9	129
Inferred ^{1,2}	19,816	1.7	1,092

Eastern Borosi

- Location:

Nicaragua
- Ownership:

Option Agreement with Calibre Mining
- Highlights:

 - 3,500 metres of diamond drilling completed in Q2
 - 2017 drill program focused on resource potential of Guapinol, Riscos de Oro and East Dome veins
 - If results merit, will be used to complete an initial resource estimate by end of ‘17
 - First stage earn-in commitments satisfied; vested initial 51% interest and exercised right to enter in the second option to earn up to a 70% interest

¹ On a 100% Basis

² See mineral reserve and resource estimates with associated notes in appendix

Monster Lake

- Location:** Quebec
- Ownership:** 50:50 JV with TomaGold, with option to earn up to a 75% interest
- Highlights:**
- Over 2,000 metres of drilling completed in Q2
 - Results* from 2017 winter drilling program include:
 - › 3.1 metres grading 121.7 g/t Au and 5 metres grading 80.3 g/t Au
 - Initial resource estimate expected in '17
 - Focused on better defining and extending the high-grade 325-Megane Zone
 - Results from new zones showing continuity of high grades similar to the 325-Megane zone

*See IAMGOLD news releases dated May 11, 2017 and July 6, 2017

Nelligan

- Location:** Quebec
- Ownership:** Earn-in option with Vanstar Mining; IAMGOLD can earn up to an initial 50% interest
- Highlights:**
- Located 15km south of Monster Lake
 - Drilling focused on new zone immediately north of known zones; currently over 1km long and open along strike
 - 7,700 metres of drilling completed YTD to follow up on previous results and further explore newly discovered mineralized zone

IAMGOLD Reserves up 69% from December 2016*

*Reserve numbers included on this slide have been rounded

1. Reserves for all sites except Sadiola have been estimated in accordance with NI43-101; Reserves for Sadiola have been estimated in accordance with JORC code

2. 2016 Year End Reserves for all sites except Sadiola are estimated using a gold price of \$US 1,200/oz, Sadiola uses a gold price of \$US 1,100/oz;

3. 2017 Reserves for Côte Gold are estimated using an economic model assuming a gold price of \$US 1,250/oz and based on a mine design originally done using a gold price of \$US 1,200/oz

4. 2017 Reserves for Rosebel are estimated using a gold price of \$1,200 an ounce.

5. 2017 Reserves for all other entities other than Côte Gold and Rosebel are assumed unchanged from the 2016 Year End Reserves excluding depletion or additions

6. Refer to IAMGOLD News Releases dated Feb. 22, 2017, June 5, 2017 and July 26, 2017

IAMGOLD
ROSEBEL GOLD MINES N.V.

HOCHWEISS

Appendix

2017 Capex Outlook

\$millions	Sustaining	Non-Sustaining	Total ³
Essakane	\$85	\$5	\$90
Rosebel	\$65	\$5	\$70
Westwood	\$20	\$45	\$65
Owner-operator	\$170	\$55	\$225
Corporate and Development Projects	—	\$10	\$10
Total owner-operator	\$170	\$65	\$235
Sadiola (Joint Venture) ¹	\$5	\$10	\$15
Total²	\$175	\$75	\$250 (±5%)

1. Expansionary capital expenditures exclude the construction costs for the Sadiola sulphide project.

2. Capitalized borrowing costs are not included.

3. Includes \$20 million of capitalized exploration expenditures.

Loma Larga – Optionality via Strategic Investment

Project Overview

- IAMGOLD owns ~36% of INV Metals (TSX:INV)
- PFS has robust economics with after-tax IRR of 26.3%, NPV@5% of US\$300.9M, payback of 2.7 years
- Underground mine, straight forward project, ramp into deposit, long hole stoping and drift and fill mining
- Probable Mineral Reserves of 1.86 M oz of contained Au at 4.98 g/t, 10.5 M oz contained Ag at 28.0 g/t, 73.6 M lb contained Cu at 0.29%
- Indicated Mineral Resources of 2.55 M oz of contained Au at 4.42 g/t, 16.3 M oz contained Ag at 28.3 g/t, 104 M lb contained Cu at 0.26%
- Inferred Mineral Resources of 0.54 M oz of contained Au at 2.29 g/t, 5.7 M oz contained Ag at 24.1 g/t, 21 M lb contained Cu at 0.13%
- Targeting production for 2020
- Considerable exploration potential
- Proven board, management and technical team
- On February 16, 2017 INV Metals announced a C\$27.6 million bought deal financing, including C\$3.6 million over-allotment option, for advancing development of the project and for general corporate purposes

See INV news release dated July 14, 2016

PFS Highlights*

Mine Life	~11 years
Nameplate Capacity	3,000 tpd
Annual Average Gold Production	150,000 oz
Gold Grade	4.98 g/t
Gold Production	1.68 million oz
Gold Recovery	90%
Adjusted Operating Costs	\$510/oz sold
All-in Sustaining Costs	\$577/oz sold
All-in Costs	\$778/oz sold
Initial Capital	\$286M
Sustaining Capital and Closure Costs	\$94M

Ecuador – Strong Commitment to Mining

- Loma Larga and INV Metals have strong support from Ecuadorian government and local communities
- The creation of Ministry of Mines in 2015 was a significant commitment to mining with positive changes to mining tax laws
- Significant investment in roads, airports, ports, hydroelectric power

*See page 27 for more information

Technical Information and Qualified Person/Quality Control Notes

The mineral resource estimates contained in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The "Qualified Person" responsible for the supervision of the preparation and review of all resource and reserve estimates for IAMGOLD is Lise Chenard, Eng., Director, Mining Geology. Lise has worked in the mining industry for more than 30 years, mainly in operations, project development and consulting. She joined IAMGOLD in April 2013 and acquired her knowledge of the Company's operations and projects through site visits, information reviews and ongoing communication and oversight of mine site technical service teams or consultants responsible for resource and reserve modeling and estimation. She is considered a "Qualified Person" for the purposes of NI 43-101 with respect to the mineralization being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has verified the data disclosed, and data underlying the information or opinions contained herein.

The technical information for Sadiola contained in this presentation has been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The "Qualified Person" responsible for the supervision of the preparation and review of all technical information for IAMGOLD is Philippe Gauthier, BSc. Mechanical Engineering and MSc Mechanical Engineering, the Director Development Projects for IAMGOLD. Philippe has worked as mechanical engineer for 28 years, mainly in mining and project development. He joined IAMGOLD in 2008 and acquired his knowledge of Sadiola through his work on the Infrastructure and Plant Engineering for an internal feasibility report in 2010, his work to update the documentation and engineering subsequent to that report and his most recent site visit on August 28, 2015. He is considered a "Qualified Person" for the purposes of NI 43-101 with respect to the technical information being reported on. The technical information has been included herein with the consent and prior review of the above noted Qualified Person. The Qualified person has read and verified the data disclosed, and data underlying the information or opinions contained herein.

Drilling results in this presentation have been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects. The sampling of, and assay data from, drill core is monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. The "Qualified Person" responsible for the supervision of the preparation, verification, and review of these results is Craig MacDougall, P.Geo., Senior Vice President, Exploration for IAMGOLD. Mr. MacDougall is a Qualified Person as defined by National Instrument 43-101.

Loma Larga, Slide 26, PEA footnote:

Qualified Persons and NI 43-101 Disclosure The technical information in this presentation has been prepared by independent Qualified Persons employed by Roscoe Postle Associates Inc. ("RPA"), including Katharine Masun, P.Geo. (Mineral Resources), Jason Cox, P.Eng. (Mineral Reserves and economics), and Kathleen Altman, Ph.D., P.E. (metallurgy and processing). By virtue of education and relevant experience, the aforementioned are "Qualified Persons" for the purpose of NI 43-101.

For readers to fully understand the information in this presentation, they should read the Technical Report in its entirety, including all qualifications, assumptions and exclusions that relate to the information set out in the Technical Report which qualifies the technical information contained in the Technical Report. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Report describes the Mineral Resource and Mineral Reserve estimation methodologies and the assumptions used, and to which those estimates are subject. INV Metals' AIF includes details of certain risk factors that could materially affect the potential development of the Mineral Resources and Mineral Reserves and should be considered carefully. A discussion of these and other factors is contained in "Risk Factors" and elsewhere in the Company's AIF, which was filed on SEDAR on March 1, 2016.
