

SECOND QUARTER 2024 CONFERENCE CALL

August 2024

Cautionary Statement

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

All information included or incorporated by reference in this news release, including any information as to the Company's future financial or operating performance and other statements that express management's expectations or estimates of future performance, including statements in respect of the prospects and/or development of the Company's projects, other than statements of historical fact, constitutes forward-looking information or forward-looking statements within the meaning of applicable securities laws (collectively referred to herein as "forward-looking statements") and such forward-looking statements are based on expectations, estimates and projections as of the date of this news release. Forward-looking statements are generally identifiable by the use of words such as "may", "will", "should", "could", "conline", "expect", "budget", "aim", "forecast", "anticipate", "estimate", "believe", "intend", "plan", "schedule", "guidance", "outlook", "potential", "seek", "targets", "cover", "strategy", "during", "ongoing", "subject to", "future", "objectives", "opportunities", "committed", "prospective", or "project" or the negative of these words or other variations on these words or comparable terminology.

For example, forward-looking statements in this news release include, without limitation, those under the headings "About IAMGOLD", "Highlights", "Outlook", "Environmental, Social and Governance", "Quarterly Updates", "Financial Condition" and "Quarterly Financial Review" and include, but are not limited to, statements with respect to: the estimation of mineral reserves and mineral reserves and the realization of such estimates; operational and financial performance including the Company's guidance for and actual results of production, costs and capital and other expenditures such as exploration and including depreciation expense and effective tax rate; the expected costs and schedule to complete construction and commissioning of the Côté Gold Mine; the updated life-of-mine plan, ramp-up assumptions and other project metrics including operating costs in respect to the Côté Gold Mine; expected production of the Côté Gold Mine, expected benefits from the operational improvements and de-risking strategies implemented or to be implemented by the Company's portfolio of assets including its operating mines, development and evelopment activities; the Company's portfolio of assets including its operating mines, development and exploration projects; the composition of the sale of the Bambouk Assets; portfolio of assets including its operating mines, development projects; the composition projects; the additionary pressures; global supply chain constraints; environmental verification, biodiversity and social development projects; the ability to secure alternative sources of comparable quality and on reasonable terms; workforce and contractor availability, labour costs and other labour impacts; the impact of weather; the future price of gold and other commodities; foreign exchange rates and currency fluctuations; financial instruments; hedging strategies; impairment assessments and assets carrying values estimates; safety and security concerns in the jurisdictions in which the Company operational and financial performance

The Company cautions the reader that forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, financial, operational and other risks, uncertainties, contingencies and other factors, including those described below, which could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements and, as such, undue reliance must not be placed on them. Forward-looking statements are also based on numerous material factors and assumptions, including with respect to: the Company's present and future business strategies; operations performance within expected ranges; anticipated future production and global economic conditions and the environment in which the future; the price of precious metals, other minerals and key commodities; projected mineral grades; international exchanges rates; anticipated capital and operating costs; the availability and timing of required governmental and other approvals for the construction of the Company's projects.

Risks, uncertainties, contingencies and other factors that could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements include, without limitation: the ability of the Company to successfully complete the commissioning of Côté Gold and commence commercial production from the mine: the ability of the Company to complete the repurchase of the Transferred Interest in the Côté Gold Mine: the ability of the Company to complete the sales of the remaining Bambouk Assets; the Company's business strategies and its ability to execute thereon; the ability of the Company to complete pending transactions; security risks, including civil unrest, war or terrorism and disruptions to the Company's supply chain and transit routes as a result of such security risks, particularly in Burkina Faso and the Sahel region surrounding the Company's Essakane mine; the availability of labour and qualified contractors; the availability of key inputs for the Company's operations and disruptions in global supply chains; the volatility of the Company's securities; litigation; contests over title to properties, particularly title to undeveloped properties; mine closure and rehabilitation risks; management of certain of the Company's assets by other companies or joint venture partners; the lack of availability of insurance covering all of the risks associated with a mining company's operations; unexpected geological conditions; competition and consolidation in the mining industry as a whole, and the gold mining industry in particular; changes in the global prices for gold, and commodities used in the operation of the Company's business (included, but not limited to diesel, fuel oil and electricity); legal, litigation, legislative, political or economic risks and new developments in the jurisdictions in which the Company carries on business; changes in taxes, including mining tax regimes; the failure to obtain in a timely manner from authorities key permits, authorizations, exploration, development or operation, operating or technical difficulties in connection with mining or development activities, including geotechnical difficulties and major equipment failure; the inability of the Company to participate in any gold price increase above the cap in any gold availability of capital; the level of liquidity and capital resources; access to capital markets and financing; the Company's level of indebtedness; the Company's redit rating; the Company's choices in capital allocation; effectiveness of the Company's ongoing cost containment efforts; the Company's ability to execute on de-risking activities and measures to improve operations; availability of specific assets to meet contractual obligations; risks related to third-party contractors, including reduced control over aspects of the Company's operations and/or the effectiveness of contractors to perform; risks arising from holding derivative instruments; changes in U.S. dollar and other currency exchange rates or gold lease rates; capital and currency controls in foreign jurisdictions; assessment of carrying values for the Company's assets, including the ongoing potential for material impairment and/or write-downs of such assets; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; the fact that reserves and resources, expected metallurgical recoveries, capital and operating costs are estimates which may require revision; the presence of unfavourable content in ore deposits, including clay and coarse gold; inaccuracies in life of mine plans; failure to meet operational targets; equipment malfunctions; information systems security threats and cybersecurity; laws and regulations governing the protection of the environment; employee relations and labour disputes; the maintenance of tailings storage facilities and the potential for a major spill or failure of the tailings facilities due to uncontrollable events, lack of reliable infrastructure, including access to roads, bridges, power sources and water supplies; physical and regulatory risks related to climate change; unpredictable weather patterns and challenging weather conditions at mine sites; disruptions from weather related events resulting in limited or no productivity such as forest fires, flooding, heavy snowfall, poor air quality, and extreme heat or cold; attraction and retention of key employees and other qualified personnel; availability and increasing costs associated with mining inputs and labour, negotiations with respect to new, reasonable collective labour agreements and/or collective bargaining agreements may not be agreed to; the ability of contractors to timely complete projects on acceptable terms; the relationship with the communities surrounding the Company's operations and projects; indigenous rights or claims; illegal mining; the potential direct or indirect operational impacts resulting from external factors, including infectious diseases, pandemics, or other public health emergencies; and the inherent risks involved in the exploration, development and mining business generally. Please see the Company's AIF or Form 40-F available on www.sec.gov/edgar for a comprehensive discussion of the risks faced by the Company and which may cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by forward-looking statements.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

Technical Information and Qualified Persons

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING DISCLOSURE OF MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

The mineral resource and reserve estimates contained in this news release have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") – CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). These standards are similar to those found in subpart 1300 of Regulation S-K, used by the United States Securities and Exchange Commission (the "SEC"). However, the definitions in NI 43-101 and the CIM Standards differ in certain respects from those under subpart 1300 of Regulation S-K. Accordingly, mineral resource and reserve information contained in this news release may not be comparable to similar information disclosed by United States companies.

As a result of the adoption of subpart 1300 of Regulation S-K (the "SEC Modernization Rules"), which more closely align its disclosure requirements and policies for mining properties with current industry and global regulatory practices and standards, including NI 43-101 and the CIM Standards, and which became effective on February 25, 2019, the SEC now recognizes estimates of "measured mineral resources" and "inferred mineral resources." In addition, the SEC has amended definitions of "proven mineral reserves" and "probable mineral reserves" in its amended rules, with definitions that are substantially similar to those used in NI 43-101 and the CIM Standards. Issuers must begin to comply with the SEC Modernization Rules in their first fiscal year beginning on or after January 1, 2022, though Canadian issuers that report in the United States using the Multijurisdictional Disclosure System ("MJDS") may still use NI 43-101 rather than the SEC Modernization statement and annual report forms.

United States investors are cautioned that while the SEC now recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under the SEC Modernization Rules, investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances.

Investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category.

The mineral reserve and mineral resource data set out in this news release are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized.

QUALIFIED PERSON AND TECHNICAL INFORMATION

The technical and scientific information relating to exploration activities disclosed in this document was prepared under the supervision of and verified and reviewed by Marie-France Bugnon, P.Geo., Vice President, Exploration, IAMGOLD. Ms. Bugnon is a "qualified person" (a "QP") as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

Data verification involves data input and review by senior project geologists at site, scheduled weekly and monthly reporting to senior exploration management and the completion of project site visits by senior exploration management to review the status of ongoing project activities and data underlying reported results. All drilling results for exploration projects or supporting resource and reserve estimates referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced news releases) and have been prepared in accordance with NI 43-101. The sampling and assay data from drilling programs are monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. Drill core (HQ and NQ size) samples are selected by the project geologists at site, scheduled weekly and monthly reporting to senior exploration projects or supporting resource and reserve estimates referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced in this presentation have been previously reported in news release disclosures either by the Company or the project sorted in this presentation have been previously reported in news release disclosures either by the Company or the project sorted in this presentation have been previously reported in news release disclosures either by the Company or t

Lisa Ragsdale, P.Geo (Director, Mining Geology, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral resource estimates contained herein, as at December 31, 2023. Guy Bourque, Eng. (Director, Mining, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral reserve estimates contained herein, as at December 31, 2023.

The technical information has been included herein with the consent and prior review of the above noted QPs, who have verified the data disclosed, and data underlying the information or opinions contained herein.

NON-GAAP FINANCIAL MEASURES

This presentation contains non-GAAP financial measures, including average realized gold price per ounce sold, cash costs, cash costs per ounce sold, net cash from operating activities before changes in working capital, mine-site free cash flow, liquidity, net cash (debt), EBITDA, adjusted EBITDA, adjusted net earnings (loss) attributable to equity holders, sustaining capital expenditures, expansion capital expenditures, and project expenditures. The non-GAAP financial measures disclosures included in the Company's Q2 2024 MD&A are incorporated by reference in this presentation.

Further details on these non-GAAP financial measures are included on pages 33 to 47 of the Company's Q2 2024 MD&A filed on SEDAR at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar.

Overview

BUILDING A LEADING, MODERN CANADIAN-FOCUSED MULTI-ASSET PRODUCER

- Côté Gold: In production and ramping up to be one of Canada's largest mines and a model for modern mining in Canada
- Essakane: 6th largest gold mine in West Africa, leader in the community, averaging ~ 400,000 oz per year over last 5 years
- Westwood: Quebec underground success story, generating positive cashflow with a revised technical approach to underground mining
- Exploration: Senior-scale exploration portfolio with potential long-term growth: Côté, Gosselin, Nelligan and Chibougamau districts
- Responsibility: Industry leader with our Zero Harm® vision and focus on safety, firm belief that community partnerships are founded upon relationships that foster trust, transparency and mutual respect

Q2 2024 OPERATING & FINANCIAL

- Attributable gold production of 166,000 ounces
- Average cash cost¹ of \$1,071/oz and AISC^{1,2} of \$1,617/oz
- Côté Gold first quarter of operations, commercial production on August 2, 2024
- Increased guidance at Essakane & Westwood to 495,000 to 540,000 ounces
- Liquidity¹ position of **\$915.7 million**³, including **\$511.4 million** in cash & equivalents³

LOOKING FORWARD

- Target goal for Côté Gold to exit 2024 at 90% throughput
- Financed to return to 70% interest in Côté⁴
- Generate returns through free cash flow, de-lever balance sheet, deliver value to shareholders and partners
- Exploration program to unlock key districts with long-term potential near existing infrastructure
- Empower, support and collaborate with our communities beyond compliance through engagement, respect and relationship development

Q2 Highlights

CÔTÉ GOLD

First quarter of operations achieved commercial production on August 2, 2024

Ramping up to 90% of nameplate exiting the year

Positioned to repurchase 9.7% interest on Nov 30, 2024

PRODUCTION

Gold production (attr.) of 166,000 ounces | YTD 317,000 ounces

- Essakane produced (attr.) 111,000, up 26% over prior year period
- Westwood production of 35,000 ounces, up 84% over prior year period
- Côté production (60.3%) of 20,000 ounces

OPERATING COSTS (per gold ounce sold)

Cost of sales¹ of \$1,076

Cash costs² of \$1,071 | \$1,062 YTD

AISC² (excluding Côté) of \$1,617 | \$1,553 YTD

RESPONSIBILITY & ACCOUNTABILITY

TRIFR (total recordable injuries/200,000 hours) of 0.60

Essakane surpassed a record health and safety achievement of **5 million hours** worked without any recordable safety incidents

OPERATING RESULTS

		Q2 2024	Q2 2023	YTD 2024	YTD 2023
Essakane (90%)	koz	111	88	229	180

^{2.} Capital expenditures guidance ±5%.

Financial Results

LIQUIDITY (as at June 30, 2024)

Cash and equivalents of \$511.4 million and total liquidity¹ of \$915.7 million

- \$55.9 million of cash and equivalents held by Côté Gold_{70%}, \$188.2 million held by Essakane
- Essakane declared dividend of \$180.0 million, with net portion of \$151.9 million to be received by IAMGOLD by end of 2024

Credit Facility: \$425 million secured revolving facility in place

 \$21.7 million letters of credit issued as collateral or guarantees related to environmental indemnities and supplier payment guarantees

Financing: On May 24, 2024, completed equity financing for 72 million shares at \$4.17/sh for gross proceeds of \$300.2 million

REPURCHASE OF 9.7% CÔTÉ INTEREST

Liquidity in place for repurchase of 9.7% transferred interest on Nov 30, 2024²

- IAMGOLD will resume holding 70% interest
- Estimated repurchase price as of June 30, 2024: \$378.5 million

GOLD PREPAY

Gold Prepay Agreement³: 150,000 ounces due for delivery from July 2024 to June 2025

 In Dec 2023 & Apr 2024, the Company entered into gold sale prepay arrangements which effectively transitioned cash impact of prior gold delivery obligations (2022 Prepay Arrangements) out of Q1 + Q2 2024 into Q1 + Q2 2025.

■ Cash ■ Available Credit Facility

Essakane

Q2 2024 OPERATIONAL REVIEW

Attributable production of 111,000 ounces in Q2 | 229,000 ounces YTD

Total tonnes mined in Q2 of 11.0M tonnes with higher amounts of waste mined in line with the mine plan

Head grades of 1.46 g/t on continued positive grade reconciliation as mining moves through deeper benches of Phase 5

 Grades expected to return to decrease over the year as per the mine plan as mining activities transition into the next phases of the pit

Mill throughput of 3.0M tonnes

Average recoveries of 88% impacted slightly on higher graphitic and sulfur content

Cash costs¹ of \$1,081/oz

 Costs benefited from higher production volumes but remain elevated for landed cost of fuel and other key consumables, including explosives, cyanide, lime and grinding media

AISC¹ of \$1,481/oz

Security situation in Burkina Faso and immediate region continues to apply pressure to in-country supply chain and operations with reduced impact in first half 2024

Q2 2024 OPERATIONAL REVIEW

Gold production of 35,000 ounces in Q2 | 67,000 ounces YTD

Highest quarterly production since restart in June 2020

Underground mining of 89,000 tonnes in Q2 with head grades of 9.22 g/t

Record underground ore volumes and head grades since restart

Open pit mining contributed 128,000 tonnes with head grades of 1.60 g/t

 Mining complete at Fayolle open pit to be replaced with lower grade material from Grand Duc in the second half of the year

Mill throughput of 302,000 tonnes at blended head grade of 3.92 g/t

Cash costs¹ of \$1,131/oz and AISC¹ of \$1,663/oz on higher production and sales

Sustaining capital of \$16.8 million includes \$8.6 million for underground development and \$4.2 million for mill and mobile equipment

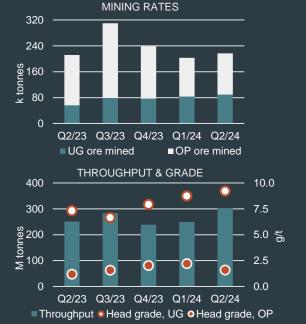

Mine site free cash flow of \$21.8 million as improvements at Westwood take hold during strong gold price environment

Côté Gold

OPERATIONS

Gold production of 34,000 ounces (100%) in Q2

 Gold sold lower than ounces produced due to the initial buildup of in-circuit inventory during commissioning and ramp-up

Total tonnes mined of 10.5M tonnes in Q2

- Mining productivity improvements from refined operating practices, including double-side loading with two CAT 6060 hydraulic shovels in operation
- Mining costs averaged \$3.92 per tonne in Q2 due to higher contractor costs incurred to improve blasting patterns, increase the inventory of blasted material, and additional drill maintenance to improve fleet availability

Mill throughput of 0.8M tonnes at head grade of 1.39 g/t and 90% recoveries

- Milling and leaching circuits have operated at design capacity, availability improvements ongoing
- · Gravity circuits were successfully commissioned in the quarter

Cash costs¹ of \$836/oz

NEXT STEPS

Continue initiatives to improve availability

- Systematic replacement of liners and identified areas of high wear with abrasive resistant material, balancing and sizing adjustments to improve screening performance, and improved dust management and operating practices
- Plant maintenance in September will allow for systematic installation of key solutions to improve long-term availability

Côté Gold: 2024 Outlook

RECENT HIGHLIGHTS AS CÔTÉ RAMPS TO NAMEPLATE

Commercial production announced on August 2, 2024

Approximately four months after first gold (March 31, 2024)

Processed over 620,000 tonnes in July with production of 25,900 ounces (100%)

Record daily throughput rate of 36,000 tpd on August 1, 2024

GUIDANCE

On track to achieve goal of 90% throughput rate exiting 2024

2024 PRODUCTION (100%) expected at lower end of

220,000 - 290,000 oz

CASH COSTS¹ @ YEAR END

\$700 - \$800/oz

AISC1 @ YEAR END

\$1,100 - \$1,200/oz

2024 CAPITAL EXPENDITURES

Côté capital expenditures related to operations in 2024 are expected to be higher than the life-of-mine average due to construction of the full tailings dam footprint to support the LOM

	YTD 2024	Updated Guidance ²	Prior Guidance ²
Construction capital to first gold	\$151.7M	✓ \$152M ✓	\$152M
Construction capital post first gold	\$30.7M	\$67M	\$67M
Capitalized waste stripping	\$29.0M	\$60M 1	\$50M
Capitalized opex (commissioning & ramp up)	\$51.5M	\$60M 1	\$40M

Côté & Gosselin

Current diamond drill program of 35,000 m with 22,900 m completed YTD

- Targeting potential connecting extensions of breccias between Côté and Gosselin pits and testing continuity at depth beneath mineralized envelope
- 2021 maiden resource: 54,775 m drill data, YE2023 updated resource: 35,000 m drill data

Gosselin remains open along strike and at depth

Technical studies planned to advance metallurgical testing, conduct mining and infrastructure studies to review alternatives for potential inclusion of Gosselin into a future Côté Gold Mine LOM plan

Côté Gold mine plan² based on 7.6 million ounces in Mineral Reserves

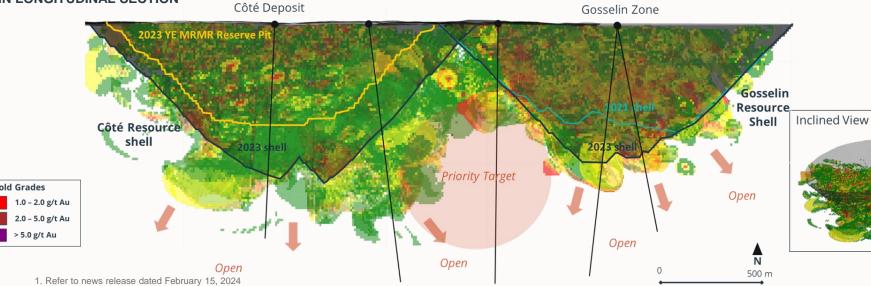

Total global Côté Gold Measured & Indicated Resources estimated at 16.5 million ounces and Inferred Mineral Resources estimated at 4.2 million ounces

^{2 2023} Mineral Resources estimated as of December 31, 2023, using a gold price of \$1,700 per ounce for Essakane, Côté Gold, Gosselin, Nelligan and Gossey; and have been estimated in accordance with NI 43-101.

Westwood Mineral Resources have been estimated as of December 31, 2023 using a 6.30g/t Au cut-off grade over a minimum width of 2.4 metres, using a \$1,600/oz gold price and have been estimated in accordance with NI 43-101. The Grand Duc Mineral Resources and Reserves estimate is included in the Westwood Mineral Resources and Reserves estimated as of December 31, 2023 using a gold price of \$1,700/oz and have been estimated in accordance with NI 43-101.

⁴ Monster Lake Mineral Resources have been estimated as of December 31, 2023 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101.

⁵ Diakha-Siribaya Mineral Resources have been estimated as of December 31, 2023 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101. On December 20, 2022, IAMGOLD announced that it had entered into definitive agreements to sell the Company's interests in Diahka-Siribaya. This sale is expected to close in 2024.

Nelligan 2022 Mineral Resource estimate announced on January 12, 2023 was amended prior to filing of the Technical Report on February 23, 2023. The changes resulted to a 21,000 ounce increase in estimated Indicated Mineral Resources and 362,000 ounce increase to Inferred Mineral Resources. due to amendments made to the mining cost applied to waste material and to the percentage of payable metal applied relative to the Mineral Resource Estimate reported on January 12, 2023.

⁷ Subsequent to the end of the year, on February 13. 2024, IAMGOLD completed the acquisition of Vanstar Resources, increasing the ownership of Nelligan to 100%.
