

IAMGOLD[®]

C O R P O R A T I O N

THIRD QUARTER 2024 CONFERENCE CALL

November 2024

Cautionary Statement

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

All information included or incorporated by reference in this presentation, including any information as to the Company's vision, strategy, future financial or operating performance and other statements that express management's expectations or estimates of future performance or impact, including statements in respect of the prospects and/or development of the Company's projects, other than statements of historical fact, constitutes forward-looking information or forward-looking statements within the meaning of applicable securities laws (collectively referred to herein as "forward-looking statements") and such forward-looking statements are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements are generally identifiable by the use of words such as "may", "will", "should", "would", "could", "continue", "expect", "budget", "aim", "can", "focus", "forecast", "anticipate", "estimate", "believe", "intend", "plan", "schedule", "guidance", "outlook", "potential", "seek", "targets", "cover", "strategy", "during", "ongoing", "subject to", "future", "objectives", "opportunities", "committed", "prospective", "preliminary", "likely", "progress", "strive", "sustain", "effort", "extend", "on track", "remain", "pursue", "predict", or "project" or the negative of these words or other variations on these words or comparable terminology.

For example, forward-looking statements include, but are not limited to, statements with respect to: the estimation of mineral reserves and mineral resources and the realization of such estimates; operational and financial performance including the Company's guidance for and actual results of production, ESG (including environmental) performance, costs and capital and other expenditures such as exploration and including depreciation expense and effective tax rate; the updated life-of-mine plan, ramp-up assumptions and other project metrics including operating costs in respect to the Côté Gold Mine; expected production of the Côté Gold Mine, expected benefits from the operational improvements and de-risking strategies implemented or to be implemented by the Company; mine development activities; the Company's capital allocation and liquidity; the announced intention to repurchase the Transferred Interests in the Côté Gold Mine, the composition of the Company's portfolio of assets including its operating mines, development and exploration projects; the completion of the sale of the Bambouk Assets; permitting timelines and the expected receipt of permits; inflation, including global inflation and inflationary pressures; global supply chain constraints; environmental verification, biodiversity and social development projects; plans, targets, proposals and strategies with respect to sustainability, including third party data on which the Company relies, and their implementation; commitments with respect to sustainability and the impact thereof, including the Company's "Zero Harm" vision; commitments with respect to greenhouse gas emissions and decarbonization initiatives (eg. interim target of achieving 30% absolute reduction in Scope 1 and 2 emissions by 2030); the development of the Company's Water Management Standard; commitments with respect to biodiversity; commitments related to social performance, including commitments in furtherance of Indigenous relations; the ability to secure alternative sources of consumables of comparable quality and on reasonable terms; workforce and contractor availability, labour costs and other labour impacts; the impacts of weather; the future price of gold and other commodities; foreign exchange rates and currency fluctuations; financial instruments; hedging strategies; impairment assessments and assets carrying values estimates; safety and security concerns in the jurisdictions in which the Company operates and the impact thereof on the Company's operational and financial performance and financial condition; and government regulation of mining operations (including the Competition Act in Canada and the regulations associated with the fight against climate change).

The Company cautions the reader that forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, financial, operational and other risks, uncertainties, contingencies and other factors, including those described below, which could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements and, as such, undue reliance must not be placed on them. Forward-looking statements are also based on numerous material factors and assumptions, including as described in this presentation, including with respect to: the Company's present and future business strategies; operations performance within expected ranges; anticipated future production and cash flows; local and global economic conditions and the environment in which the Company will operate in the future; the price of precious metals, other minerals and key commodities; projected mineral grades; international exchanges rates; anticipated capital and operating costs; the availability and timing of required governmental and other approvals for the construction of the Company's projects.

Risks, uncertainties, contingencies and other factors that could cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by such forward-looking statements include, without limitation: the ability of the Company to complete the repurchase of the Transferred Interest in the Côté Gold Mine; the ability of the Company to complete the sales of the remaining Bambouk Assets; the Company's business strategies and its ability to execute thereon; the ability of the Company to complete pending transactions; the development and execution of implementing strategies to meet the Company's sustainability vision and targets; security risks, including civil unrest, war or terrorism and disruptions to the Company's supply chain and transit routes as a result of such security risks, particularly in Burkina Faso and the Sahel region surrounding the Company's Essakane mine; the availability of labour and qualified contractors; the availability of key inputs for the Company's operations and disruptions in global supply chains; the volatility of the Company's securities; litigation; contests over title to properties, particularly title to undeveloped properties; mine closure and rehabilitation risks; management of certain of the Company's assets by other companies or joint venture partners; the lack of availability of insurance covering all of the risks associated with a mining company's operations; unexpected geological conditions; competition and consolidation in the mining sector; the profitability of the Company being highly dependent on the condition and results of the mining industry as a whole, and the gold mining industry in particular; changes in the global prices for gold, and commodities used in the operation of the Company's business (included, but not limited to diesel, fuel oil and electricity); legal, litigation, legislative, political or economic risks and new developments in the jurisdictions in which the Company carries on business; changes in taxes, including mining tax regimes; the failure to obtain in a timely manner from authorities key permits, authorizations or approvals necessary for transactions, exploration, development or operation, operating or technical difficulties in connection with mining or development activities, including geotechnical difficulties and major equipment failure; the inability of the Company to participate in any gold price increase above the cap in any collar transaction entered into in conjunction with certain gold sale prepayment arrangements; the availability of capital; the level of liquidity and capital resources; access to capital markets and financing; the Company's level of indebtedness; the Company's ability to satisfy covenants under its credit facilities; changes in interest rates; adverse changes in the Company's credit rating; the Company's choices in capital allocation; effectiveness of the Company's ongoing cost containment efforts; the Company's ability to execute on de-risking activities and measures to improve operations; availability of specific assets to meet contractual obligations; risks related to third-party contractors, including reduced control over aspects of the Company's operations and/or the failure and/or the effectiveness of contractors to perform; risks arising from holding derivative instruments; changes in U.S. dollar and other currency exchange rates or gold lease rates; capital and currency controls in foreign jurisdictions; assessment of carrying values for the Company's assets, including the ongoing potential for material impairment and/or write-downs of such assets; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; the fact that reserves and resources, expected metallurgical recoveries, capital and operating costs are estimates which may require revision; the presence of unfavourable content in ore deposits, including clay and coarse gold; inaccuracies in life of mine plans; failure to meet operational targets; , including but not limited to the ability of the Company to achieve ninety percent (90%) throughput at the Côté Gold Mine by year-end and the ability of the Company to achieve nameplate capacity at the Côté Gold Mine in 2025; equipment malfunctions; information systems security threats and cybersecurity; laws and regulations governing the protection of the environment (including greenhouse gas emission reduction and other decarbonization requirements and the uncertainty surrounding the interpretation of omnibus Bill C-59 and the related amendments to the Competition Act (Canada)); employee relations and labour disputes; the maintenance of tailings storage facilities and the potential for a major spill or failure of the tailings facilities due to uncontrollable events, lack of reliable infrastructure, including access to roads, bridges, power sources and water supplies; physical and regulatory risks related to climate change; unpredictable weather patterns and challenging weather conditions at mine sites; disruptions from weather related events resulting in limited or no productivity such as forest fires, flooding, heavy snowfall, poor air quality, and extreme heat or cold; attraction and retention of key employees and other qualified personnel; availability and increasing costs associated with mining inputs and labour, negotiations with respect to new, reasonable collective labour agreements and/or collective bargaining agreements may not be agreed to; the ability of contractors to timely complete projects on acceptable terms; the relationship with the communities surrounding the Company's operations and projects; indigenous rights or claims; illegal mining; the potential direct or indirect operational impacts resulting from external factors, including infectious diseases, pandemics, or other public health emergencies; and the inherent risks involved in the exploration, development and mining business generally. Please see the Company's AIF or Form 40-F available on www.sedarplus.ca or www.sec.gov/edgar for a comprehensive discussion of the risks faced by the Company and which may cause actual results, performance or achievements of the Company to be materially different from results, performance or achievements expressed or implied by forward-looking statements.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as required by applicable law.

Technical Information and Qualified Persons

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING DISCLOSURE OF MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

The mineral resource and reserve estimates contained in this presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") – CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). These standards are similar to those found in subpart 1300 of Regulation S-K, used by the United States Securities and Exchange Commission (the "SEC"). However, the definitions in NI 43-101 and the CIM Standards differ in certain respects from those under subpart 1300 of Regulation S-K. Accordingly, mineral resource and reserve information contained in this presentation may not be comparable to similar information disclosed by United States companies.

As a result of the adoption of subpart 1300 of Regulation S-K (the "SEC Modernization Rules"), which more closely align its disclosure requirements and policies for mining properties with current industry and global regulatory practices and standards, including NI 43-101 and the CIM Standards, and which became effective on February 25, 2019, the SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources." In addition, the SEC has amended definitions of "proven mineral reserves" and "probable mineral reserves" in its amended rules, with definitions that are substantially similar to those used in NI 43-101 and the CIM Standards. Issuers must begin to comply with the SEC Modernization Rules in their first fiscal year beginning on or after January 1, 2022, though Canadian issuers that report in the United States using the Multijurisdictional Disclosure System ("MJDS") may still use NI 43-101 rather than the SEC Modernization Rules when using the SEC's MJDS registration statement and annual report forms.

United States investors are cautioned that while the SEC now recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under the SEC Modernization Rules, investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. These terms have a great amount of uncertainty as to their economic and legal feasibility. Under Canadian regulations, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances.

Investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources", or "inferred mineral resources" that the Company reports in this presentation are or will be economically or legally mineable. Further, "inferred mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category.

The mineral reserve and mineral resource data set out in this presentation are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized.

QUALIFIED PERSON AND TECHNICAL INFORMATION

The technical and scientific information relating to exploration activities disclosed in this document was prepared under the supervision of and verified and reviewed by Marie-France Bugnon, P.Geo., Vice President, Exploration, IAMGOLD. Ms. Bugnon is a "qualified person" (a "QP") as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

Data verification involves data input and review by senior project geologists at site, scheduled weekly and monthly reporting to senior exploration management and the completion of project site visits by senior exploration management to review the status of ongoing project activities and data underlying reported results. All drilling results for exploration projects or supporting resource and reserve estimates referenced in this presentation have been previously reported in news release disclosures either by the Company or the project operator as the case may be (see referenced news releases) and have been prepared in accordance with NI 43-101. The sampling and assay data from drilling programs are monitored through the implementation of a quality assurance - quality control (QA-QC) program designed to follow industry best practice. Drill core (HQ and NQ size) samples are selected by the project geologists and sawn in half with a diamond saw at the project site. Half of the core is typically retained at the site for reference purposes. Generally, sample intervals are 1.0 to 1.5 metres in length and reverse circulation holes are sampled at 1.0 metre intervals at the drill rig. Samples are prepared and analyzed at site for the Company's producing mines and at accredited regional laboratories for the Company's exploration projects, using analysis techniques such as standard fire assay with a 50 gram charge; fire assay with gravimetric finish, or LeachWELL rapid cyanide leach with fire assay with a 50 gram charge.

Lisa Ragsdale, P.Geo (Director, Mining Geology, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral resource estimates contained herein, as at December 31, 2023. Guy Bourque, Eng. (Director, Mining, IAMGOLD Corporation), is the QP responsible for the review and approval of all mineral reserve estimates contained herein, as at December 31, 2023.

The technical information has been included herein with the consent and prior review of the above noted QPs, who have verified the data disclosed, and data underlying the information or opinions contained herein.

NON-GAAP FINANCIAL MEASURES

This presentation contains non-GAAP financial measures, including average realized gold price per ounce sold, cash costs, cash costs per ounce sold, AISC, AISC per ounce sold, net cash from operating activities before changes in working capital, mine-site free cash flow, liquidity, net cash (debt), EBITDA, adjusted EBITDA, adjusted net earnings (loss) attributable to equity holders and adjusted net earnings (loss) per share attributable to equity holders, sustaining capital expenditures, expansion capital expenditures, and project expenditures. The non-GAAP financial measures disclosures included in the Company's Q3 2024 MD&A are incorporated by reference in this presentation.

Further details on these non-GAAP financial measures are included on pages 34 to 47 of the Company's Q3 2024 MD&A filed on SEDAR at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar.

Overview

BUILDING A LEADING, MODERN CANADIAN-FOCUSED MULTI-ASSET PRODUCER

- **Côté Gold:** In production and ramping up to be one of Canada's largest mines and a model for modern mining in Canada
- **Essakane:** 6th largest gold mine in West Africa, leader in the community, averaging ~ 400,000 oz per year over last 5 years
- **Westwood:** Quebec underground success story, generating positive cashflow with a revised technical approach to underground mining
- **Exploration:** Senior-scale exploration portfolio with potential long-term growth: Côté, Gosselin, Nelligan and Chibougamau districts
- **Responsibility:** Industry leader with our Zero Harm® vision and focus on safety, firm belief that community partnerships are founded upon relationships that foster trust, transparency and mutual respect

Q3 2024 OPERATING & FINANCIAL

- Attributable **gold production of 173,000 ounces**
- Average cash cost¹ of \$1,165/oz and AISC¹ of \$1,756/oz
- Côté Gold ramp up averaged 77% of nameplate throughput over October, and record daily high of 42,096 tonnes
- Repurchase of 9.7% interest in Côté to close on Nov 30, 2024
- Liquidity¹ position of **\$959.3 million²**, including **\$553.4 million** in cash & equivalents
- Gold prepay obligation declining following Q3/24 deliveries

LOOKING FORWARD

- Côté Gold targeting to exit 2024 at 90% throughput
- Financed to return to 70% interest in Côté³ on Nov 30, 2024
- Generate returns through free cash flow, de-lever balance sheet, deliver value to shareholders and partners
- Exploration program to unlock key districts with long-term potential near existing infrastructure
- Empower, support and collaborate with our communities beyond compliance through engagement, respect and relationship development

Q3 Operating Highlights

RESPONSIBILITY & ACCOUNTABILITY

TRIFR (total recordable injuries/200,000 hours) **of 0.46**

- Essakane was a triple zero for safety in September

Environmental focus on water and biodiversity, developing a catchment-based water stewardship framework

PRODUCTION

Gold production (attr.) of 173,000 ounces | YTD 490,000 ounces

- Essakane YTD production (attr.) of 329,000 ounces, **up 25%** over prior year period
- Westwood YTD production of 99,000 ounces, **up 52%** over prior year period
- Côté YTD production (60.3%) of 62,000 ounces

CÔTÉ GOLD

Achieved commercial production on August 1, 2024

First quarter of positive mine-site free cashflow

Ramping up to **90% of nameplate of 36,000 tpd exiting the year**

- Key improvements and optimizations put in place in September shutdown
- Record daily throughput of 42,096 tpd was achieved on October 15

Positioned to repurchase 9.7% interest on Nov 30, 2024

OPERATING COSTS (per gold ounce sold)

Cost of sales¹ of \$1,170 | \$1,103 YTD

Cash costs² of \$1,165 | \$1,099 YTD

AISC² of \$1,756 | \$1,625 YTD

OPERATING RESULTS

		Q3 2024	Q3 2023	YTD 2024	YTD 2023
Essakane (90%)	koz	100	84	329	264
Westwood (100%)	koz	32	25	99	65
Subtotal (attr.)	koz	132	109	428	329
Côté Gold (60.3%)	koz	41	—	62	—
Production (attr.)	koz	173	109	490	329
Gold sales (attr.)	koz	171	106	477	326
Average realized gold price	US\$/oz	\$2,391	\$1,937	\$2,260	\$1,934
Cash costs ² (attr.)	US\$/oz	\$1,165	\$1,400	\$1,099	\$1,288
AISC ^{2,3} (attr.)	US\$/oz	\$1,756	\$1,975	\$1,625	\$1,803
Capex ^{2,3} – sustaining	US\$M	\$84.7	\$50.4	\$197.2	\$131.7
Capex ^{2,3} – expansion	US\$M	\$0.9	\$0.4	\$3.1	\$1.6
Capex ^{2,3} – Côté expansion (60.3%)	US\$M	\$10.3	\$191.2	\$185.6	\$476.7

Guidance Maintained

	GOLD PRODUCTION (attributable ounces)		CASH COST ¹ (\$/ounce sold)	AISC ¹ (\$/ounce sold)
	YTD	GUIDANCE	● YTD cost ³ H Guidance	● YTD cost ³ H Guidance
Essakane	329,000	380,000 – 410,000		
Westwood	99,000	115,000 – 130,000		
Total	428,000	495,000 – 540,000		
Côte Gold (60.3%)	62,000	lower end of: 130,000 – 175,000	Refer to Côte Gold section	

	CAPEX ² (\$M)		COMMENTS
	YTD	GUIDANCE	
Essakane ²	\$134.4	\$175	Capitalized waste stripping continuing to progress into new ore phases and equipment replacement to improve efficiency and maintenance costs ongoing
Westwood ²	\$47.7	\$70	\$70M sustaining for underground development to open new mining fronts, equipment replacement to increase availability and/or decrease maintenance cost
Côte Gold ² (100%)	\$334.1	\$454	(Note: capex at 100%) Project capex in line with guidance. Capex related to operations in 2024 higher than LOM average due to completion of full tailings dam footprint to support LOM

1. This is a non-GAAP financial measure. Refer to the "Non-GAAP Financial Measures" section on slide #3.

2. Capital expenditures guidance $\pm 5\%$.

Financial Results

LIQUIDITY *(as at September 30, 2024)*

Cash and equivalents of \$553.4 million and total liquidity¹ of \$959.3 million

- \$83.4 million of cash and equivalents held by Côte Gold_{70%}, \$135.3 million held by Essakane
- Essakane 90% interest dividend from Burkina Faso received in Q3 of \$136.3 million, with balance of \$15.6 million received in October (\$151.9 million total)

Credit Facility: \$425 million secured revolving facility in place

- Remains undrawn with \$20.1 million letters of credit issued as collateral or guarantees related to environmental indemnities and supplier payment guarantees

Financing: On May 24, 2024, completed equity financing for 72 million shares at \$4.17/sh for gross proceeds of \$300.2 million to be used for repurchase of Côte interest

REPURCHASE OF 9.7% CÔTÉ INTEREST

Formal notice given for repurchase of 9.7% transferred interest on Nov 30, 2024²

- Estimated repurchase price: \$377 million

GOLD PREPAY

Gold Prepay Agreement³: 37,500 ounces delivered in the third quarter (2/3 or 22,500 ounces with exposure to \$1,700–\$2,100/oz collar) and company received \$10 million

- Delivery of 12,500 ounces completed for October 2024 (\$3.3 million received)
- **100,000 ounces remaining** (12,500/mth) due for delivery from November 2024 to June 2025
 - Q4 2024: 22,500 ounces with \$1,700–\$2,100/oz collar exposure, remaining 15,000 ounces pre-funded
 - Q1 2025: Prefunded
 - Q2 2025: 31,250 ounces with \$2,100–\$2,925/oz collar exposure, remaining pre-funded

1. This is a non-GAAP financial measure. Refer to "Non-GAAP Financial Measures" on slide #3.

2. Refer to news release dated December 21, 2022, May 21, 2024, and September 30, 2024.

3. Refer to news releases on April 4, 2024 and December 18, 2023. 2022 Prepay Arrangements delivered monthly in 2024 have an average forward contract pre-funded price of \$1,753/oz on 50,000 oz and an outstanding collar range of \$1,700 to \$2,100/oz on 100,000 oz. The 2024 Q1 and 2024 Q2 Prepay Arrangements transitioned a total of 75,000 ounces of gold delivery obligations out of the first and second quarters of 2024 into the following year.

LONG-TERM DEBT

(\$ millions)

	Sep 30	Dec 31
	2024	2023
Credit Facility	\$ –	\$ –
5.75% senior notes*	448.3	448.0
Term Loan†	360.0	375.6
Equipment loans	2.4	7.2
Long-term debt	\$810.7	\$830.8
Leases (cont. ops)**	130.9	121.3
Long-term debt + Leases	\$941.6	\$952.1

* 5.75% senior notes mature on October 15, 2028 (Fitch: B-, Moody's: B3, S&P: B-)

** Lease balances includes Cote CAT leases at 70% and other leases at 100%

† Term loan figure is balance sheet (IFRS) value – Face value is \$400 million

Financial Results

Q3 FINANCIAL REVIEW

Gold revenues of \$438.9 million from sales of 184,000 ounces (171,000 ounces attributable) at realized average price of \$2,391/oz (\$2,498/oz excl. impact of gold prepay)

Adj. EBITDA¹ of \$221.7 million | \$565.2 million YTD

Adj. net earnings¹ of \$101.0 million or \$0.18 per share attributable to equity holders

Operating cash flow (before changes in working capital)¹ of \$161.2 million in Q3

- Excludes \$64.4 million in deferred revenue recognized in Q3 from settlement of gold prepays

Mine-site free cash flow¹ of \$120.7 million

- Essakane: \$76.6 million | Côte: \$23.3 million | Westwood: \$20.8 million

YTD CASH FLOW RECONCILIATION

Operations

Côte Gold

OPERATING HIGHLIGHTS & MILESTONES

Gold production of 68,000 oz (100%) in Q3

- Ramping up towards goal of exiting year at 90% of nameplate capacity (36,000 tpd)

Record daily throughput of 42,096 tpd subsequent to September shutdown in which key improvements were made

- In October 2024, plant averaged daily throughput of 27,600 tpd or 77% of nameplate

Repurchase of Sumitomo 9.7% interest scheduled for November 30, 2024

MINING PROGRESS

Total tonnes mined of 10.4M tonnes in Q3

- Strip ratio of 2.3:1 in Q3 with total ore mined of 3.2M tonnes
- Improvements continue in performance of drilling and blasting
- Mining activities being refined to respond to a ramp up in milling activity

Mining costs averaged \$3.77 per tonne YTD 2024

- Higher than expected rehandling associated to achieve required segregation of high grade material
- Additionally, seeing higher contractor costs to support ramp up of mine
- Productivity and utilization of loading and hauling equipment continues to improve with two CAT 6060 electric shovels and eighteen CAT 793 autonomous haul trucks in operation

Further mining productivity improvements being investigated including reducing rehandling, refined production drilling, and improving availability of loading units

(100% basis, unless otherwise stated)		Q1 2024	Q2 2024	Q3 2024	YTD 2024

Côte Gold

PROCESSING RAMP UP

Mill throughput of 1.6M tonnes at head grade of 1.41 g/t and 93% recoveries

- Milling and leaching circuits have demonstrated capability to operate at, or above design capacity, availability improvements ongoing
- Recoveries responding well to increased tonnages, in line with plan

Annual shutdown in September completed without incident

- Systematic replacement of liners and identified areas of high wear with abrasive resistant material complete
- Replacement of screening with alternate types responding well
- Availability improvements from solutions positions plant well for remainder of the year

Wet side of the plant, including grinding, CIP, etc. has performed exceptionally well, demonstrating capability to operate at higher than design throughput

Dry side of the plant, particularly initial primary/secondary crushing circuit, is the focus

- Added mobile parallel crushing and feeding circuit to support filling of the coarse ore dome to allow for additional capacity and strategic redundancy
- Continue to work on balancing and sizing adjustments to improve screening performance, and improved dust management and operating practices
- HPGR has responded well to ore feed
 - Rolls responding well. First rolls replacement expected August 2025
- Current total power usage has come in below estimates (~8 MW) despite high ore hardness/abrasiveness

PLANT THROUGHPUT & MILESTONES

Côte Gold

GUIDANCE

On track to achieve goal of 90% throughput rate exiting 2024

2024 PRODUCTION (100%)
expected at lower end of
220,000 – 290,000 oz

CASH COSTS^{1,2} @ YEAR END
\$700 – \$800/oz
AISC^{1,2} @ YEAR END
\$1,100 – \$1,200/oz

Capital expenditures³ on track

- On 100% basis, \$334.1M spent YTD with a total expected expenditure of \$454M
- Capital expenditures related to operations in 2024 are expected to be higher than the LOM average as the mine completes construction of the full tailings dam footprint

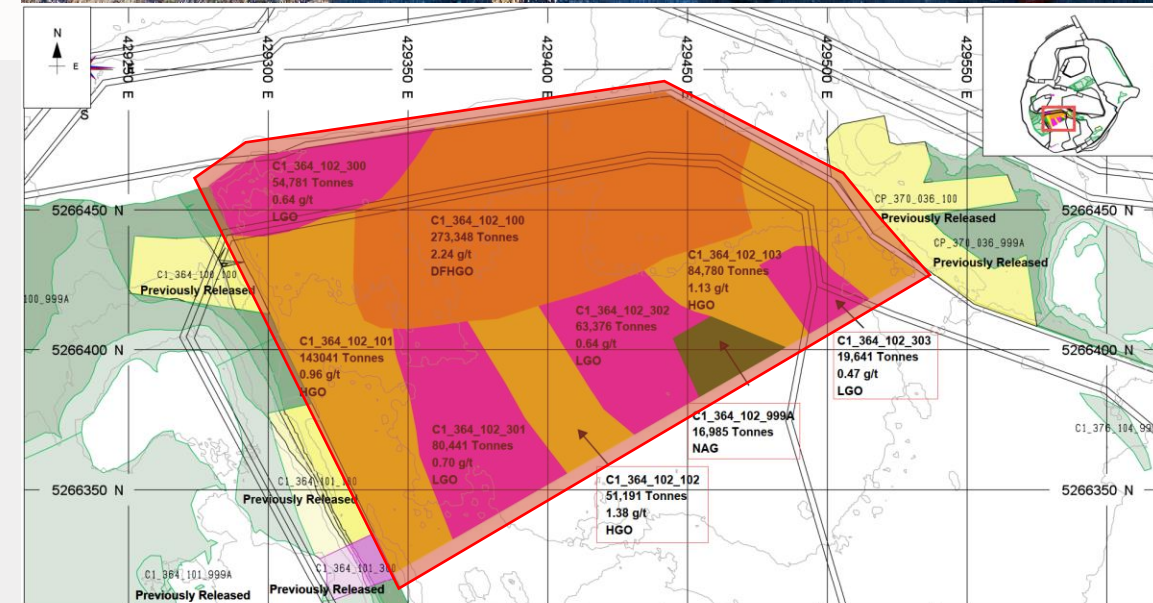

ADDITIONAL OPPORTUNITIES

Target low-hanging bottlenecks to increase plant throughput

- Additional secondary cone crusher ordered with installation expected in H2 2025
- Several components of the plant have designed for 1,800+ tph (42,000 tpd) including electrical circuit, chutes, pumps and pump boxes

Analysis ongoing for potential of using a bulk mining approach in multi ore bin areas of the pit with a focus on minimizing rehandling

- Offers potential advantages including:
 - Reduces rehandling and stockpiling associated costs
 - Improved pit sequencing with simplified in-pit water management
 - Reduced number of stockpiles reduces risk of improper categorization and segregation

Côté Gold: Growth

Current diamond drill program of 35,000 m with 32,500 m completed YTD

- Assay results to date outlined extensions of the Gosselin Zone outside resource pit shell. Key extensions have been intersected south and west of the Gosselin West Breccia, and at depth between the Côté and Gosselin West Breccia.
- Targeting potential connecting extensions of breccias between Côté and Gosselin pits and testing continuity at depth beneath mineralized envelope

Gosselin remains **open along strike** and at depth

Côté Gold mine plan² based on 7.6 million ounces in Mineral Reserves

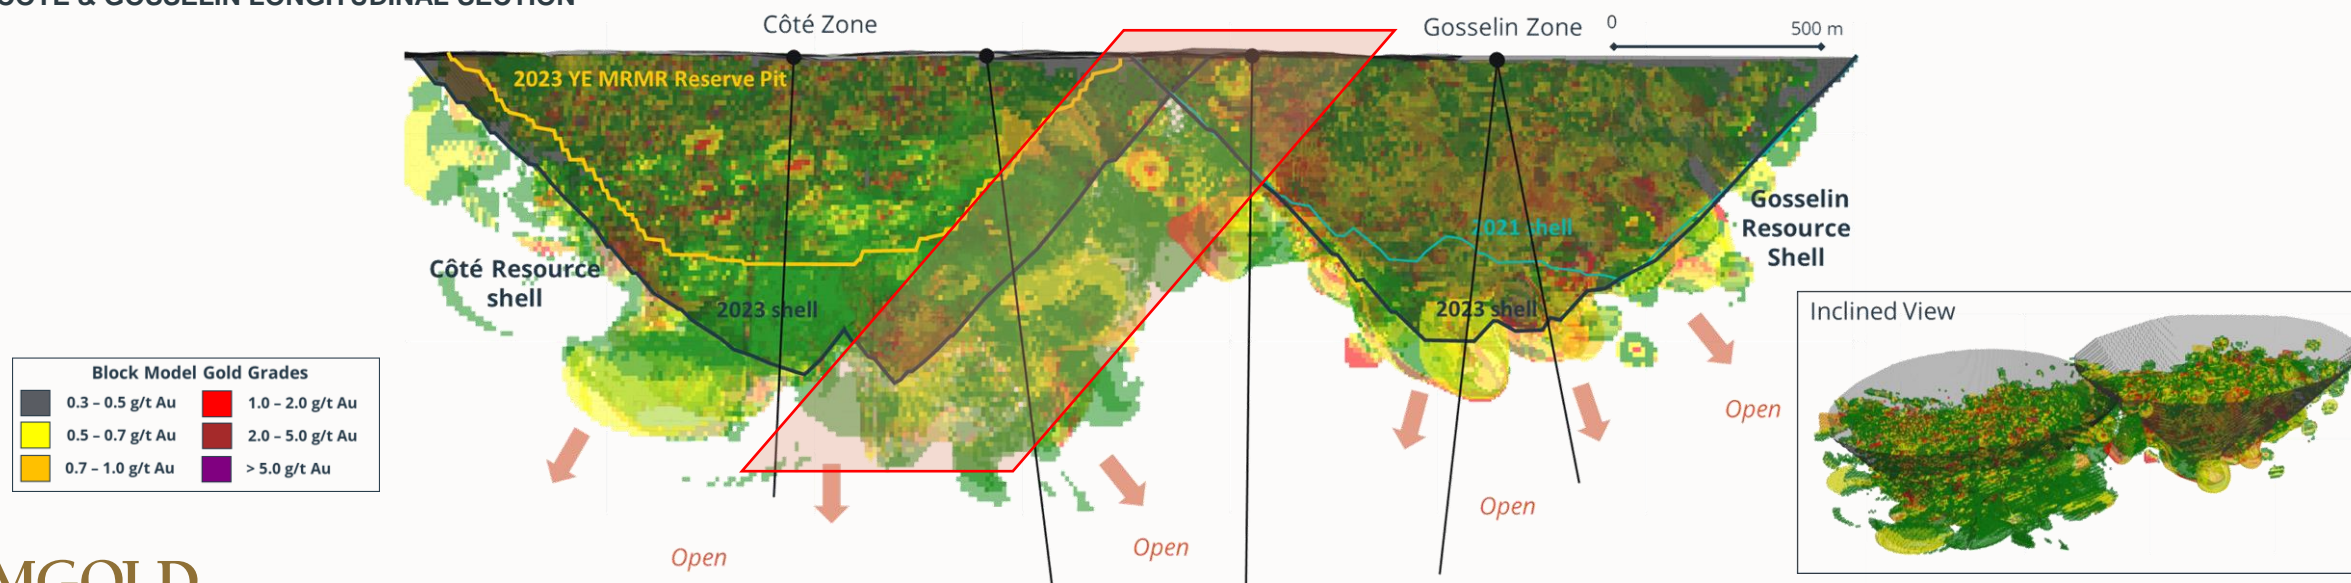

Total global Côté Gold **Measured & Indicated Resources estimated at 16.5 million ounces** and Inferred Mineral Resources estimated at **4.2 million ounces**

Technical studies planned to conduct mining and infrastructure studies to review alternatives for potential inclusion of **Côté NE and Gosselin zones** into a future Côté Gold Mine LOM plan

Westwood Complex

Q3 2024 OPERATIONAL REVIEW

Gold production of 32,000 ounces in Q3 | 99,000 ounces YTD

- Well positioned to achieve the upper end guidance of 115,000 – 130,000 ounces

Underground mining of 84,000 tonnes in Q3 with head grades of 9.09 g/t

- Eight underground mining zones active in the quarter

Open pit mining contributed 131,000 tonnes with head grades of 1.43 g/t

- Decrease in supplementary open pit ore as mining finished at Fayolle in H1 2024

Mill throughput of 289,000 tonnes at blended head grade of 3.67 g/t

Cash costs¹ of \$1,157/oz and AISC¹ of \$1,617/oz

Sustaining capital of \$11.8 million includes \$7.4 million for underground development; \$3.2 million for mill, mobile equipment and other capital projects; and \$1.2 million for capitalized waste stripping

POSITIVE CASH FLOW

Mine site free cash flow of \$20.8 million in Q3 | \$53.1 million YTD as improvements at Westwood take hold during strong gold price environment

2024 OUTLOOK

Essakane

Q3 2024 OPERATIONAL REVIEW

Attributable production of 100,000 ounces in Q3 | 329,000 ounces YTD

- Well positioned to achieve the upper end guidance of 380,000 – 410,000 ounces

Total tonnes mined in Q3 of 12.2M tonnes with higher amounts of waste mined in line with the mine plan

Head grades of 1.26 g/t higher than prior year period but down Q/Q in line with mine plan as mining activities prioritize waste stripping in support of 2025 mine plan

Mill throughput of 3.1M tonnes

Average recoveries of 88% lower than prior year period on continued impact of higher graphitic and sulfur content from ore deeper in the pit

Cash costs¹ of \$1,223/oz

AISC¹ of \$1,730/oz

Security situation in Burkina Faso and immediate region continues to apply pressure to in-country supply chain and operations with reduced impact in 2024

1 Figures may not add due to rounding.

2 2023 Mineral Resources estimated as of December 31, 2023, using a gold price of \$1,700 per ounce for Essakane, Côté Gold, Gosselin, Nelligan and Gossey; and have been estimated in accordance with NI 43-101.

3 Westwood Mineral Resources have been estimated as of December 31, 2023 using a 6.30g/t Au cut-off grade over a minimum width of 2.4 metres, using a \$1,600/oz gold price and have been estimated in accordance with NI 43-101. The Grand Duc Mineral Resources and Reserves estimate is included in the Westwood Mineral Resources and Reserves estimates. The Grand Duc Mineral Resources have been estimated as of December 31, 2023 using a gold price of \$1,700/oz and have been estimated in accordance with NI 43-101.

4 Monster Lake Mineral Resources have been estimated as of December 31, 2023 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101.

5 Diakha-Siribaya Mineral Resources have been estimated as of December 31, 2023 using a \$1,500/oz gold price and have been estimated in accordance with NI 43-101. On December 20, 2022, IAMGOLD announced that it had entered into definitive agreements to sell the Company's interests in Diakha-Siribaya. This sale is expected to close in 2024.

6 Nelligan 2022 Mineral Resource estimate announced on January 12, 2023 was amended prior to filing of the Technical Report on February 23, 2023. The changes resulted to a 21,000 ounce increase in estimated Indicated Mineral Resources and 362,000 ounce increase to Inferred Mineral Resources due to amendments made to the mining cost applied to waste material and to the percentage of payable metal applied relative to the Mineral Resource Estimate reported on January 12, 2023.

7 Subsequent to the end of the year, on February 13, 2024, IAMGOLD completed the acquisition of Vanstar Resources, increasing the ownership of Nelligan to 100%.
