Avantor® Releases 2024 Science for Goodness Sustainability Report

6/18/2024

Achieves 2025 Greenhouse Gas Emission reduction goals two years ahead of schedule

RADNOR, Pa., June 18, 2024 /PRNewswire/ -- Avantor, Inc. (NYSE: AVTR), a leading global provider of mission-critical products and services to customers in the life sciences and advanced technologies industries, released its 2024 Sustainability Report today. The report highlights the meaningful progress Avantor made in 2023 against four Science for Goodness sustainability pillars: People & Culture, Innovation & Environment, Community Engagement, and Governance & Integrity.

"Our Science for Goodness platform is integral to our business strategy and to the value that we provide to our stakeholders," said Michael Stubblefield, President and CEO of Avantor. "We are pleased with the progress we have made and remain committed to creating a better, healthier world."

Highlights from **Avantor's 2024 Sustainability Report** include:

People & Culture: Avantor earned a top score on the Human Rights Campaign's 2023 Corporate Equality Index, a national benchmarking survey and report measuring corporate policies and practices related to LGBTQ+ workplace equality. As part of our efforts to promote inclusion and respect in the workplace, one-quarter of associates participated in Associate-Centric Teams (ACTs) which provide our associates with opportunities to elevate their voices and deepen their understanding of others' experiences and perspectives.

Innovation & Environment: Avantor achieved its 2025 emissions reduction target two years ahead of schedule, reducing operational greenhouse gas emissions by 16.7 percent from 2019 to 2023. Having achieved this critical milestone, we have now set new targets for 2030 to reduce Scope 1 and 2 emissions by 50 percent from a

2020 baseline and reduce Scope 3 emissions by 25 percent from a 2020 baseline.

Community Engagement: In 2023, the Avantor Foundation awarded more than \$1.2 million in grants to provide healthcare services and STEM education opportunities to underserved communities where Avantor has a presence. We also empowered our associates to support organizations worldwide that bring our mission to life, and in 2023, they contributed nearly 10,000 volunteer hours.

Governance & Integrity: Avantor launched our Responsible Supplier Program in 2023, aiming to improve supplier performance across four priority areas: climate change, human rights, resource circularity and nature conservation. Building on our strong supplier relationships, some of which have been in place for more than 20 years, Avantor enrolled more than 340 suppliers, representing 45 percent of our supplier spend, into the program in 2023.
