Nucor Introduces New Hot-Rolled Coil Spot Pricing

4/4/2024

CHARLOTTE, N.C., April 4, 2024 /PRNewswire/ -- Nucor Corporation (NYSE: NUE) announced today that it is introducing a weekly Nucor Consumer Spot Price (CSP) to provide its customers with consistent and transparent communications regarding the Company's hot-rolled coil spot pricing. Nucor will issue the first CSP on Monday, April 8, 2024.

"We are constantly looking for better ways to serve our customers, not only with quality products and services, but also with timely information that will help them make informed decisions for their businesses. The CSP will give our customers relevant and current information about Nucor's sheet business in a rapidly changing marketplace, which we believe will reduce their reliance on speculation and reduce risk," said Rex Query, Executive Vice President of Sheet Products for Nucor Corporation.

The CSP will be released every Monday, communicating Nucor's hot-rolled spot price for the week to Nucor customers. It will remain in effect until the next weekly publication. Nucor CSP pricing will be derived from both quantitative and qualitative data. Lead times for all spot orders will be offered between three and five weeks to assist customers with their planning.

"Over the last six decades, Nucor has continued to differentiate itself by innovating and finding new ways to provide solutions to our valued customers," said Query. "The CSP is yet another tool that will help our customers succeed over the long term and strengthen our status as one of America's most diversified and efficient industrial manufacturers."

About Nucor

Nucor and its affiliates are manufacturers of steel and steel products, with operating facilities in the United States, Canada and Mexico. Products produced include: carbon and alloy steel -- in bars, beams, sheet and plate; hollow

structural section tubing; electrical conduit; steel racking; steel piling; steel joists and joist girders; steel deck; fabricated concrete reinforcing steel; cold finished steel; precision castings; steel fasteners; metal building systems; insulated metal panels; overhead doors; steel grating; wire and wire mesh; and utility structures. Nucor, through The David J. Joseph Company and its affiliates, also brokers ferrous and nonferrous metals, pig iron and hot briquetted iron/direct reduced iron; supplies ferro-alloys; and processes ferrous and nonferrous scrap. Nucor is North America's largest recycler.

Forward-Looking Statements

Certain statements contained in this news release are "forward-looking statements" that involve risks and uncertainties which we expect will or may occur in the future and may impact our business, financial condition and results of operations. The words "anticipate," "believe," "expect," "intend," "project," "may," "will," "should," "could" and similar expressions are intended to identify those forward-looking statements. These forward-looking statements reflect the Company's best judgment based on current information, and, although we base these statements on circumstances that we believe to be reasonable when made, there can be no assurance that future events will not affect the accuracy of such forward-looking information. As such, the forward-looking statements are not guarantees of future performance, and actual results may vary materially from the projected results and expectations discussed in this news release. Factors that might cause the Company's actual results to differ materially from those anticipated in forward-looking statements include, but are not limited to: (1) competitive pressure on sales and pricing, including pressure from imports and substitute materials; (2) U.S. and foreign trade policies affecting steel imports or exports; (3) the sensitivity of the results of our operations to general market conditions, and in particular, prevailing market steel prices and changes in the supply and cost of raw materials, including pig iron, iron ore and scrap steel; (4) the availability and cost of electricity and natural gas, which could negatively affect our cost of steel production or result in a delay or cancellation of existing or future drilling within our natural gas drilling programs; (5) critical equipment failures and business interruptions; (6) market demand for steel products, which, in the case of many of our products, is driven by the level of nonresidential construction activity in the United States; (7) impairment in the recorded value of inventory, equity investments, fixed assets, goodwill or other long-lived assets; (8) uncertainties and volatility surrounding the global economy, including excess world capacity for steel production, inflation and interest rate changes; (9) fluctuations in currency conversion rates; (10) significant changes in laws or government regulations affecting environmental compliance, including legislation and regulations that result in greater regulation of greenhouse gas emissions that could increase our energy costs, capital expenditures and operating costs or cause one or more of our permits to be revoked or make it more difficult to obtain permit modifications; (11) the cyclical nature of the steel industry; (12) capital investments and their impact on our performance; (13) our safety performance; (14) our ability to integrate businesses we acquire; and (15) the impact of the COVID-19 pandemic, any variants of the virus, and any other similar pandemic or public health situation. These and other factors are discussed in Nucor's regulatory filings with the United States Securities and Exchange Commission, including those in "Item 1A. Risk Factors" of Nucor's Annual Report on Form 10-K for the

year ended December 31, 2023. The forward-looking statements contained in this news release speak only as of this date, and Nucor does not assume any obligation to update them, except as may be required by applicable law.
