

## PerkinElmer Engages Industry Leaders on Global Water Safety and Supply

NEW ORLEANS – PerkinElmer Life and Analytical Sciences, a global leader in application-focused measurement and analysis solutions, today hosted a Water Consortium with key industry thought leaders in recognition of New Orleans hosting PITTCON® for the first time after Hurricane Katrina. This consortium focused on discussing the issues, challenges and importance of protecting water today and in the future. This event is part of PerkinElmer's EcoAnalytix™ revolutionary problem-solving initiative that addresses the global imperatives of food and consumer product safety, water quality and sustainable energy development to create a healthy and safe environment. It encompasses comprehensive application-focused solutions with innovative thought leadership and public outreach programs to bring insights from top scientists and government agencies directly to customers.

Keynote speakers included Bill Bertera, Executive Director of the Water Environment Federation (WEF), Jim Clark, Vice President, Black & Veatch Corporation and Dr. Richard Begley, President, Analytical Sciences, PerkinElmer, Inc.

“We believe that holding forums such as the 2008 Water Consortium are critical to enable the exchange of insights from a range of stakeholders to help create a healthy and safe environment,” said Begley. “We look forward to continuing the dialogue with industry thought leaders from around the world to ensure that we keep the conversation going about how to ensure the quantity and quality of the global ecosystem's most important resources.”

“Safe, available water cannot be taken for granted,” said Bertera. “Insights gained from forums such as this are invaluable to WEF as we work toward technical and public policy solutions to support our mission of preserving and enhancing the global water environment.”

PerkinElmer's partnership with WEF and the International Water Association's (IWA) World Water Monitoring Day™ (WWMD) is among the strategic partnerships PerkinElmer is forming as part of its EcoAnalytix™ initiative.

Clark, who directed the Assessment of Reconstruction Costs and Debt Management for Wastewater Utilities Affected by Hurricane Katrina for WEF in 2005-2006, noted, “Catastrophes such as Hurricane Katrina put a spotlight on the global water crisis. It's up to us as an industry to ensure improvements to infrastructure and processes are put in place across the globe to mitigate the effects of the crises of tomorrow that may impact the availability and/or the quality of the water supply.”

### Factors Affecting Future Performance

This press release contains “forward-looking” statements within the meaning of the Private Securities Litigation Reform Act of 1995, including, but not limited to, statements relating to estimates and projections of future earnings per share, cash flow, revenue growth and other financial results, developments relating to our customers and end-markets, and plans concerning business development opportunities. Words such as “believes,” “intends,” “anticipates,” “plans,” “expects,” “projects,” “forecasts,” “will” and similar expressions, and references to guidance, are intended to identify forward-looking statements. Such statements are based on management's current assumptions and expectations and no assurances can be given that our assumptions or expectations will prove to be correct. A number of important risk factors could cause actual results to differ materially from the results described, implied or projected in any forward-looking statements. These factors include, without limitation: (1) our failure to introduce new products in a timely manner; (2) our ability to execute acquisitions and license technologies, or to successfully integrate acquired businesses and licensed technologies into our existing business or to make them profitable; (3) our failure to protect adequately our intellectual property; (4) the loss of any of our licenses or licensed rights; (5) our ability to compete effectively; (6) fluctuation in our quarterly operating results and our ability to adjust our operations to address unexpected changes; (7) our ability to produce an adequate quantity of products to meet our customers' demands; (8) our failure to maintain compliance with applicable government regulations; (9) regulatory changes; (10) our failure to comply with health care industry regulations; (11) economic, political and other risks associated with foreign operations; (12) our ability to retain key personnel; (13) restrictions in our credit agreements; (14) our ability to realize the full value of our intangible assets; and (15) other factors which we describe under the caption “Risk Factors” in our most recent annual report on Form 10-K and in our most recent quarterly report on Form 10-Q and in our other filings with the Securities and Exchange Commission. We disclaim any intention or obligation to update any forward-looking statements as a result of developments occurring after the date of this press release. PerkinElmer, Inc. is a global technology leader driving growth and

innovation in Health Sciences and Photonics markets to improve the quality of life. The Company reported revenues of \$1.8 billion in 2007, has 9,100 employees serving customers in more than 125 countries, and is a component of the S&P 500 Index.
