

PerkinElmer OneSource® Reports Sizeable Growth through Reduced Laboratory Service Costs

Waltham, Massachusetts – PerkinElmer, Inc., a global leader focused on the health and safety of people and the environment, announced that it is celebrating the substantial sales growth of its OneSource® Laboratory Services business in Europe with the recent implementation of its 60th on-site service solution. By consolidating laboratory services under one provider, OneSource® provides customers with significant cost savings combined with improved service quality and delivery. OneSource® has enjoyed steady growth in Europe over the last ten years and increased its customer base by 30 per cent from 2007 to 2008.

OneSource® provides a comprehensive portfolio of laboratory services including corrective and preventive maintenance, qualification and calibration, laboratory relocation and asset disposition. Encompassing all major equipment manufacturers and technologies, OneSource® now covers over 50,000 analytical and life science laboratory assets across Europe from general apparatus (such as refrigerators, freezers, balances and dissolution technology) to multi-component hyphenated instrumentation (such as LC/MS/MS).

In 2008, OneSource® broadened its portfolio of regulatory compliance services with the acquisition of LabMetrix Technologies SA, and now offers one of the industry's most robust instrument qualification solutions. Combining an advanced, patented, metrology-based approach with proven processes and compliance expertise, OneSource® is helping more laboratories achieve their financial, operational and scientific goals. While strategically addressing pharmaceutical and biotechnology companies, OneSource® is now increasingly being employed in industries ranging from crop science and animal health to cosmetics, consumer health care and chemicals.

On the expansion of customer partnerships Dusty Tenney, president of Laboratory Services, PerkinElmer, comments, "We are thrilled with these latest growth opportunities. With 12 new sites implementing our OneSource® solution in 2009 already, we look forward to helping even more customers increase laboratory productivity and reduce laboratory service costs during this economic downturn. Our complete multi-vendor solutions allow scientists to concentrate on research while we focus on providing best-in-class service and quality to maintain and ensure the regulatory compliance of their equipment."
