

## **PerkinElmer Announces Hydrocarbon Processing Analysis Workshop Series in Gulf Coast Region Nov. 5-7, 2008**

PerkinElmer and Arnel, partners in engineered analytical solutions for hydrocarbon processing and allied industries, announce the Hydrocarbon Processing Analysis Workshop Series in the following locations:

- Houston, Texas, Wednesday, Nov. 5
- Beaumont, Texas, Thursday, Nov. 6
- Gonzales, Louisiana, Friday, Nov. 7

These informative one-day events provide an ideal opportunity to learn about and see the latest advances in turnkey hydrocarbon analyzers to increase productivity and precision.

Experts will present informative lectures on how to increase the effectiveness of the analyses performed by hydrocarbon processing laboratories. Fully-functioning analyzers, including the Model 1117 High-Speed Refinery Gas Analyzer and the Model 3023 High-Temperature Simulated Distillation Analyzer will be available to illustrate the productivity breakthroughs.
