

PerkinElmer to Unveil New Products at Analytica 2010

WALTHAM, Mass., Jan 18, 2010 (BUSINESS WIRE) --PerkinElmer, Inc., a global leader focused on the health and safety of people and the environment, is introducing an extensive portfolio of chromatography and spectroscopy products at Analytica 2010 -Hall A2, stand 401. Product highlights will include the new Flexar™ HPLC/UHPLC platform and Chromera® Chromatography Data System (CDS), the Spectrum™ 10 spectroscopy software platform, and PerkinElmer's exclusive Differential Scanning Calorimetry Raman (DSC-Raman) spectroscopy hyphenated system.

The new Flexar liquid chromatography platform provides a broad line of HPLC solutions for numerous applications and can be used to facilitate method transfer from, for example, pharmaceutical research to production. Consuming up to 90% less solvents and incorporating extended detection options, the Flexar™ FX-15 UHPLC can significantly improve instrument uptime and streamline analytical laboratory productivity. Chromera CDS offers powerful functionality specifically designed for UHPLC testing.

Also on show will be PerkinElmer's exclusive DSC-Raman spectroscopy hyphenated system for pharmaceutical and polymer analyses. This system effectively combines the strengths of the DSC 8500 for thermal analysis with the RamanStation™ 400 spectrometer to enable greater insights into polymer crystallisations, drug-carrier interactions, curing and polymorphic changes. This exciting hyphenated technique provides researchers the capability to observe material changes as they occur, rather than rely upon evolved gas measurement as with other techniques.

The new Spectrum™ 10 spectroscopy software platform for PerkinElmer FT-IR spectrometers increases operation efficiency, with wide-ranging capability for industrial and academic FT-IR laboratories. The software supports all Spectrum™ One, Spectrum™ 65, 100, 100N and Spectrum™ 400 non-ES FT-IR systems, including Optica and FAME Analysers.

PerkinElmer service personnel will also be on hand to discuss how OneSource® Laboratory Services can reduce laboratory equipment maintenance costs, optimize operations and enhance compliance across a range of regulated environments.

For further information on PerkinElmer, please visit Hall A2, stand 401 at Analytica 2010, or www.perkinelmer.com.

About PerkinElmer, Inc.

PerkinElmer, Inc. is a global leader focused on improving the health and safety of people and the environment. The Company reported revenue of approximately \$2 billion in 2008, has around 8,500 employees serving customers in more than 150 countries, and is a component of the S&P 500 Index. Additional information is available through www.perkinelmer.com or 1-877-PKI-NYSE.
