The only common equity securities that are publicly traded are common shares of Xcel Energy Inc. The diluted earnings and EPS of each subsidiary discussed here do not represent a direct legal interest in the assets and liabilities allocated to such subsidiary but rather represent a direct interest in our assets and liabilities as a whole. Ongoing diluted EPS for Xcel Energy and by subsidiary is a financial measure not recognized under GAAP. Ongoing diluted EPS is calculated by dividing the net income or loss attributable to the controlling interest of each subsidiary, adjusted for certain items, by the weighted average fully diluted Xcel Energy Inc. common shares outstanding for the period. We use this non-GAAP financial measure to evaluate and provide details of Xcel Energy's core earnings and underlying performance. We believe this measurement is useful to investors in facilitating period over period comparisons and evaluating or projecting financial results. This non-GAAP financial measure should not be considered as an alternative to measures calculated and reported in accordance with GAAP.

Xcel Energy Inc. | 2024 Ongoing Earnings Guidance Assumptions

As of August 1, 2024

Xcel Energy 2024 Earnings Guidance — Xcel Energy's 2024 ongoing earnings guidance is a range of \$3.50 to \$3.60 per share.^(a)

Key assumptions as compared with 2023 actual levels unless noted:

- Constructive outcomes in all pending rate case and regulatory proceedings.
- Normal weather patterns for the remainder of the year.
- Weather-normalized retail electric sales are projected to increase 1%.
- Weather-normalized retail firm natural gas sales are projected to be flat.
- Capital rider revenue is projected to increase \$60 million to \$70 million (net of PTCs).
- O&M expenses are projected to increase 1% to 2%.
- Depreciation expense is projected to increase approximately \$305 million to \$315 million.
- Property taxes are projected to be flat. This change is largely earnings neutral and is offset in revenue due to property tax trackers.
- Interest expense (net of AFUDC debt) is projected to increase \$140 million to \$150 million, net of interest income.
- AFUDC equity is projected to increase \$65 million to \$75 million.
- ETR is projected to be ~(6%) to (8%). The assumption change is largely due to an increase in the PTC rate, which is offset in revenue and is largely earnings neutral. The negative ETR is largely offset by PTCs flowing back to customers in capital riders and fuel mechanisms and is largely earnings neutral. The projected ETR does not reflect the potential impact of nuclear PTCs, which are also expected to flow back to customers.

⁽a) Ongoing earnings is calculated using net income and adjusting for certain nonrecurring or infrequent items that are, in management's view, not reflective of ongoing operations. Ongoing earnings could differ from those prepared in accordance with GAAP for unplanned and/or unknown adjustments. As Xcel Energy is unable to quantify the financial impacts of any additional adjustments that may occur for the year, we are unable to provide a quantitative reconciliation of the guidance for ongoing EPS to corresponding GAAP EPS.

Xcel Energy Inc. | Operating Company EPS Contributions

The only common equity securities that are publicly traded are common shares of Xcel Energy Inc. The diluted earnings and EPS of each subsidiary discussed here do not represent a direct legal interest in the assets and liabilities allocated to such subsidiary but rather represent a direct interest in our assets and liabilities as a whole. Ongoing diluted EPS for Xcel Energy and by subsidiary is a financial measure not recognized under GAAP. Ongoing diluted EPS is calculated by dividing the net income or loss attributable to the controlling interest of each subsidiary, adjusted for certain items, by the weighted average fully diluted Xcel Energy Inc. common shares outstanding for the period. We use this non-GAAP financial measure to evaluate and provide details of Xcel Energy's core earnings and underlying performance. We believe this measurement is useful to investors in facilitating period over period comparisons and evaluating or projecting financial results. This non-GAAP financial measure should not be considered as an alternative to measures calculated and reported in accordance with GAAP.

NSPM is an Xcel Energy operating company that conducts business in Minnesota, North Dakota and South Dakota. The company has electric operations in all three states that include the generation, purchase, transmission, distribution and sale of electricity. NSPM also purchases, transports, distributes and sells natural gas to retail customers and transports customer-owned natural gas in Minnesota and North Dakota.

NSPM's electric production and transmission system is managed as an integrated system with that of NSPW, jointly referred to as the NSP System.

Generally, NSPM's contribution to earnings ranges from 35% to 45% of Xcel Energy's consolidated earnings.

Northern States Power Company – Wisconsin (NSPW)

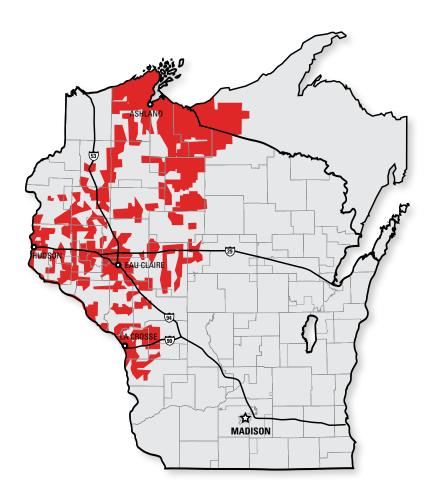

NSPW is an Xcel Energy operating company that conducts business in Wisconsin and Michigan. In both states, the company generates, transmits, distributes and sells electricity in addition to purchasing, transporting, distributing and selling natural gas to retail customers and transporting customer-owned natural gas.

NSPW's electric production and transmission system is managed as an integrated system with that of NSPM, jointly referred to as the NSP System.

Generally, NSPW's contribution to earnings ranges from 5% to 10% of Xcel Energy's consolidated earnings.
