Safe Harbor

Except for the historical statements contained in this presentation, the matters discussed herein are forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements, including those relating to 2024 and 2025 EPS guidance, long-term EPS and dividend growth rate objectives, future sales, future expenses, future tax rates, future operating performance, estimated base capital expenditures and financing plans, projected capital additions and forecasted annual revenue requirements with respect to rider filings, expected rate increases to customers, expectations and intentions regarding regulatory proceedings, expected pension contributions, and expected impact on our results of operations, financial condition and cash flows of interest rate changes, increased credit exposure, and legal proceeding outcomes, as well as assumptions and other statements are intended to be identified in this document by the words “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “objective,” “outlook,” “plan,” “project,” “possible,” “potential,” “should,” “will,” “would” and similar expressions. Actual results may vary materially. Forward-looking statements speak only as of the date they are made, and we expressly disclaim any obligation to update any forward-looking information. The following factors, in addition to those discussed in Xcel Energy’s Annual Report on Form 10-K for the fiscal year ended Dec. 31, 2023 and subsequent filings with the Securities and Exchange Commission, could cause actual results to differ materially from management expectations as suggested by such forward-looking information: operational safety, including our nuclear generation facilities and other utility operations; successful long-term operational planning; commodity risks associated with energy markets and production; rising energy prices and fuel costs; qualified employee workforce and third-party contractor factors; violations of our Codes of Conduct; our ability to recover costs and our subsidiaries’ ability to recover costs from customers; changes in regulation; reductions in our credit ratings and the cost of maintaining certain contractual relationships; general economic conditions, including recessionary conditions, inflation rates, monetary fluctuations, supply chain constraints and their impact on capital expenditures and/or the ability of Xcel Energy Inc. and its subsidiaries to obtain financing on favorable terms; availability or cost of capital; our customers’ and counterparties’ ability to pay their debts to us; assumptions and costs relating to funding our employee benefit plans and health care benefits; our subsidiaries’ ability to make dividend payments; tax laws; uncertainty regarding epidemics, the duration and magnitude of business restrictions including shutdowns (domestically and globally), the potential impact on the workforce, including shortages of employees or third-party contractors due to quarantine policies, vaccination requirements or government restrictions, impacts on the transportation of goods and the generalized impact on the economy; effects of geopolitical events, including war and acts of terrorism; cybersecurity threats and data security breaches; seasonal weather patterns; changes in environmental laws and regulations; climate change and other weather events; natural disaster and resource depletion, including compliance with any accompanying legislative and regulatory changes; costs of potential regulatory penalties and wildfire damages in excess of liability insurance coverage; regulatory changes and/or limitations related to the use of natural gas as an energy source; challenging labor market conditions and our ability to attract and retain a qualified workforce; and our ability to execute on our strategies or achieve expectations related to environmental, social and governance matters including as a result of evolving legal, regulatory and other standards, processes, and assumptions, the pace of scientific and technological developments, increased costs, the availability of requisite financing, and changes in carbon markets.

Balanced Investment Thesis

Regulated Utility that Consistently Delivers

- Met or exceeded earnings guidance for 19 consecutive years
- Dividend increases for 21 consecutive years
- Strong balance sheet and credit metrics

Resilient, Reliable and Affordable

- Low customer bills and declining share of customer wallet
- Full coal retirement by 2030
- 80% reduction in carbon by 2030 for electric operations
- Reducing operational risks and improving outcomes for stakeholders

Transparent Long-Term Growth Plan

- Base capital plan of $45 billion, reflecting 9.4% rate base growth
- Pipeline of incremental capital opportunities in excess of $10 billion
- Strong sales growth with further upside from data centers
- TSR of 9-11%, reflecting 6-8% EPS growth and 4-6% dividend growth

Xcel Energy Overview

Four
Operating Companies

Eight
States

3.8 Million
Electric Customers

2.2 Million
Natural Gas Customers

$42 Billion
2023 Rate Base

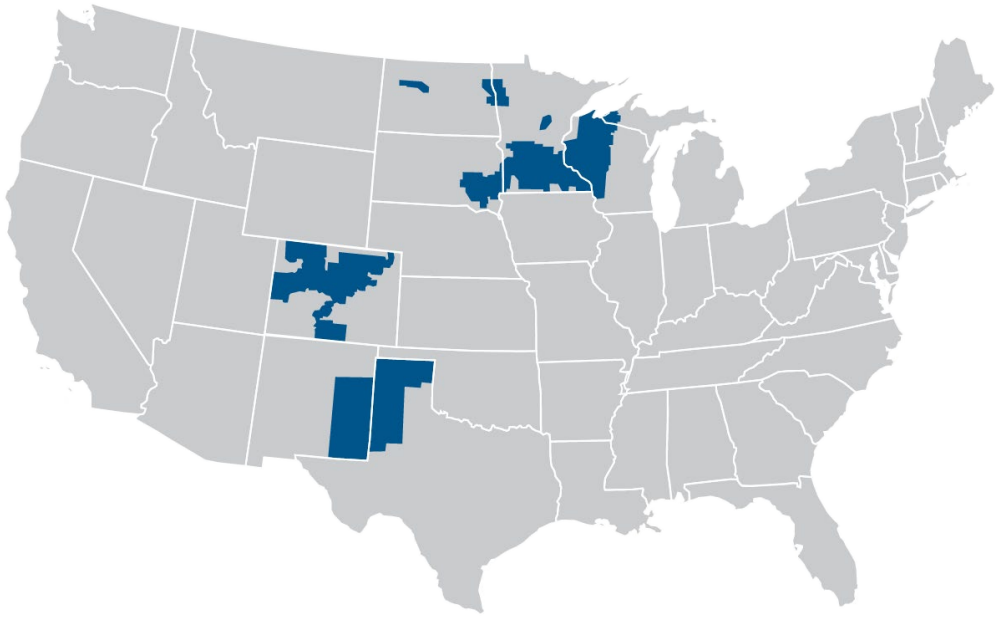

21 GW
Owned Gen. Capacity

~11,000
Employees

As of 12/31/2023

Northern States Power Minnesota (NSPM)
- 2023 Rate Base: $15.6 billion
- 2023 Ongoing EPS: $1.28
- 2025 - 2029 Base Cap Ex: $13.2 billion

Northern States Power Wisconsin (NSPW)
- 2023 Rate Base: $2.3 billion
- 2023 Ongoing EPS: $0.25
- 2025 - 2029 Base Cap Ex: $3.3 billion

Public Service Company of Colorado (PSCo)
- 2023 Rate Base: $16.9 billion
- 2023 Ongoing EPS: $1.26
- 2025 - 2029 Base Cap Ex: $22.3 billion

Southwestern Public Service (SPS)
- 2023 Rate Base: $7.1 billion
- 2023 Ongoing EPS: $0.70
- 2025 - 2029 Base Cap Ex: $6.3 billion

Strategy

VISION

We will be the **preferred** and **trusted** provider of the energy our customers need

MISSION

We provide our customers the safe, clean, reliable energy services they want and value at a competitive price

PRIORITIES

Lead the Clean Energy Transition

- Electricity: 80% carbon reduction by 2030, 100% carbon-free by 2050
- Natural gas: 25% GHG reduction by 2030, net-zero by 2050

Enhance the Customer Experience

- Conservation, new products/services
- 1 in 5 EVs enabled by 2030

Keep Bills Low

- Average bill increases $\leq$ rate of inflation

VALUES

Connected

Committed

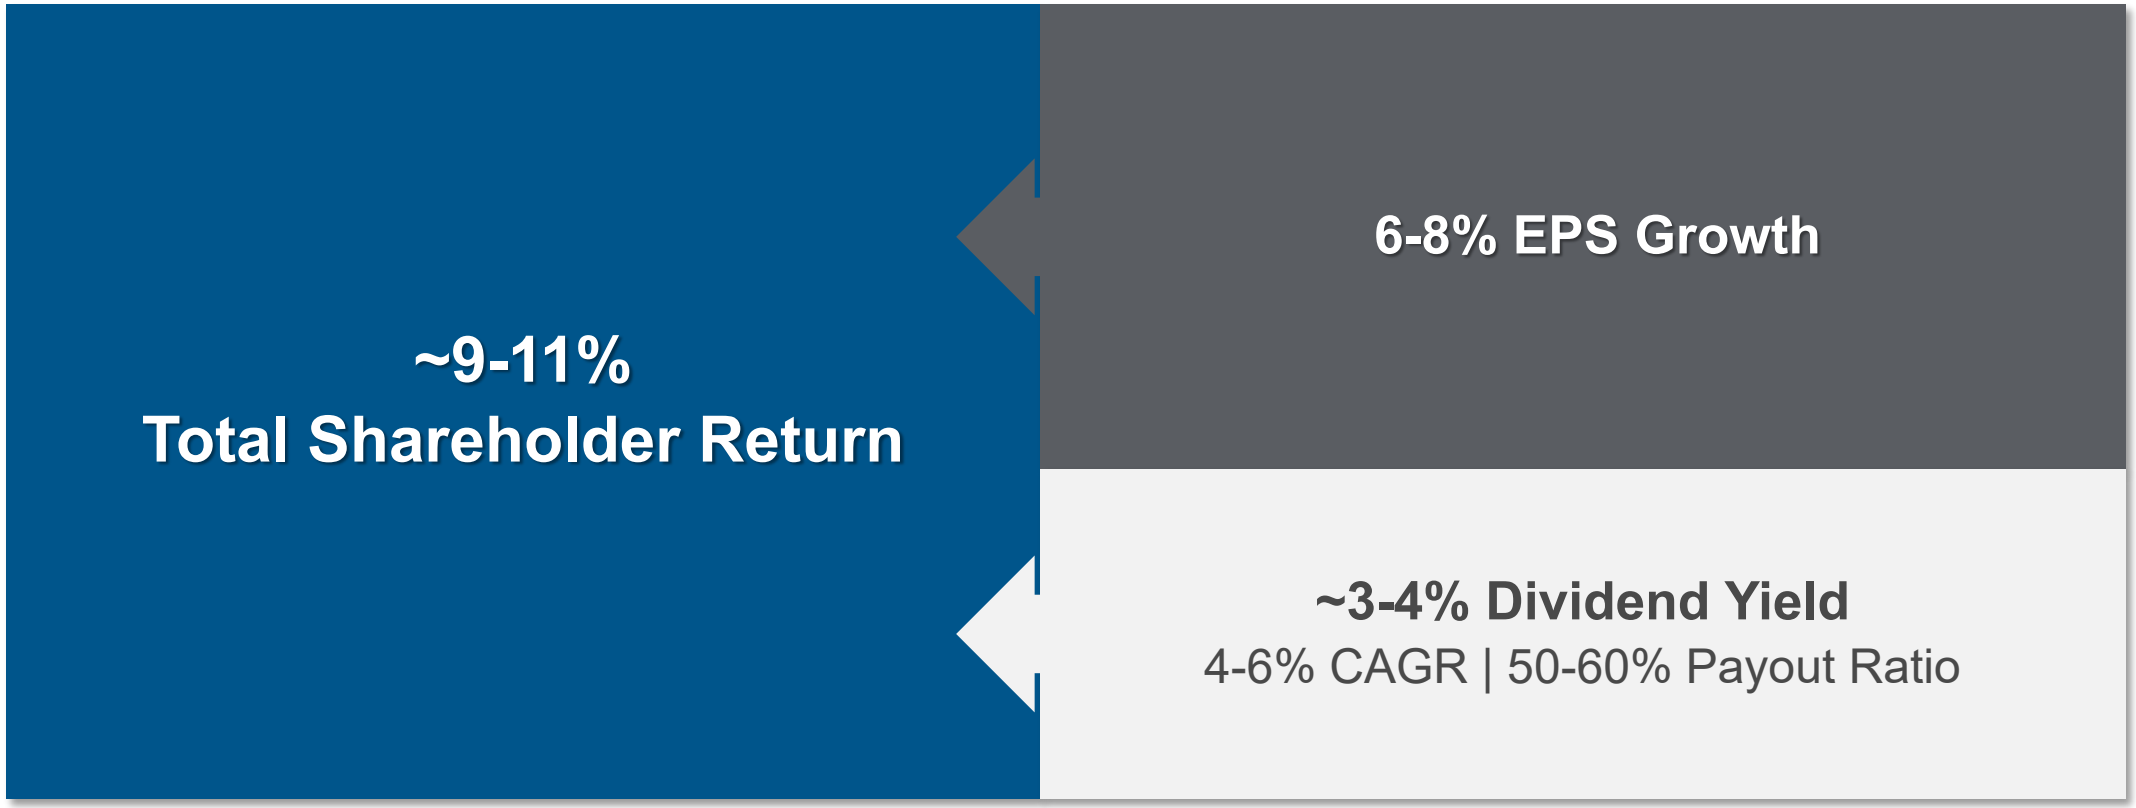

Safe

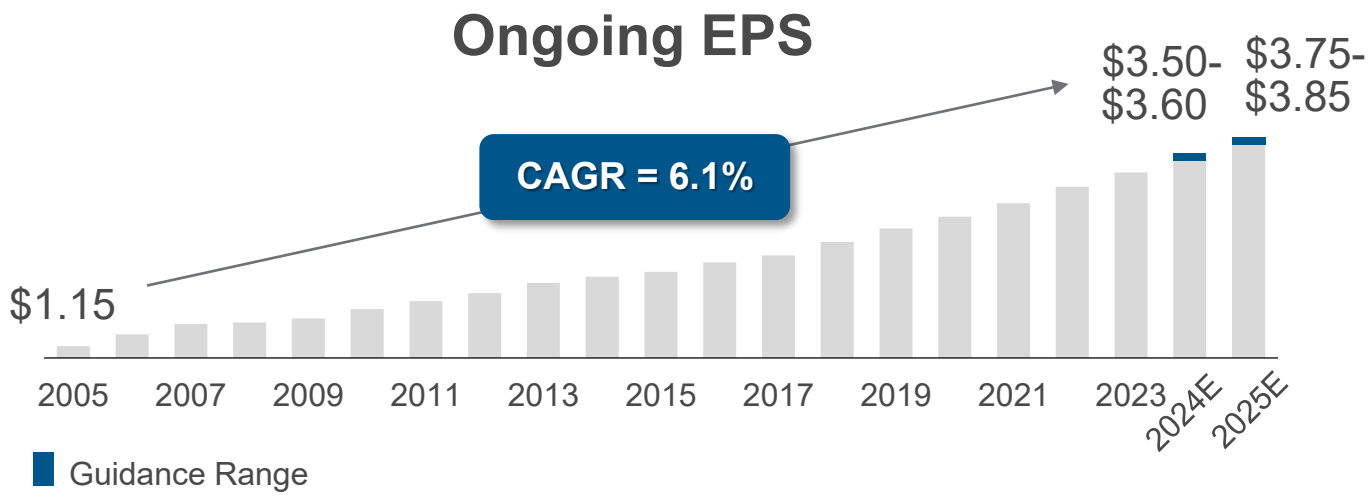

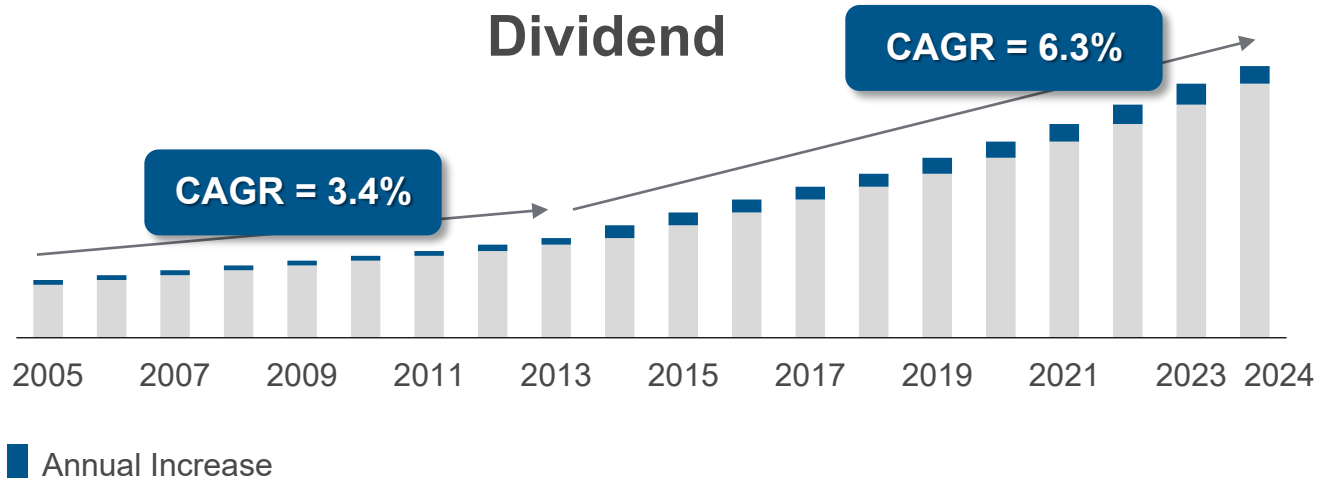

Trustworthy

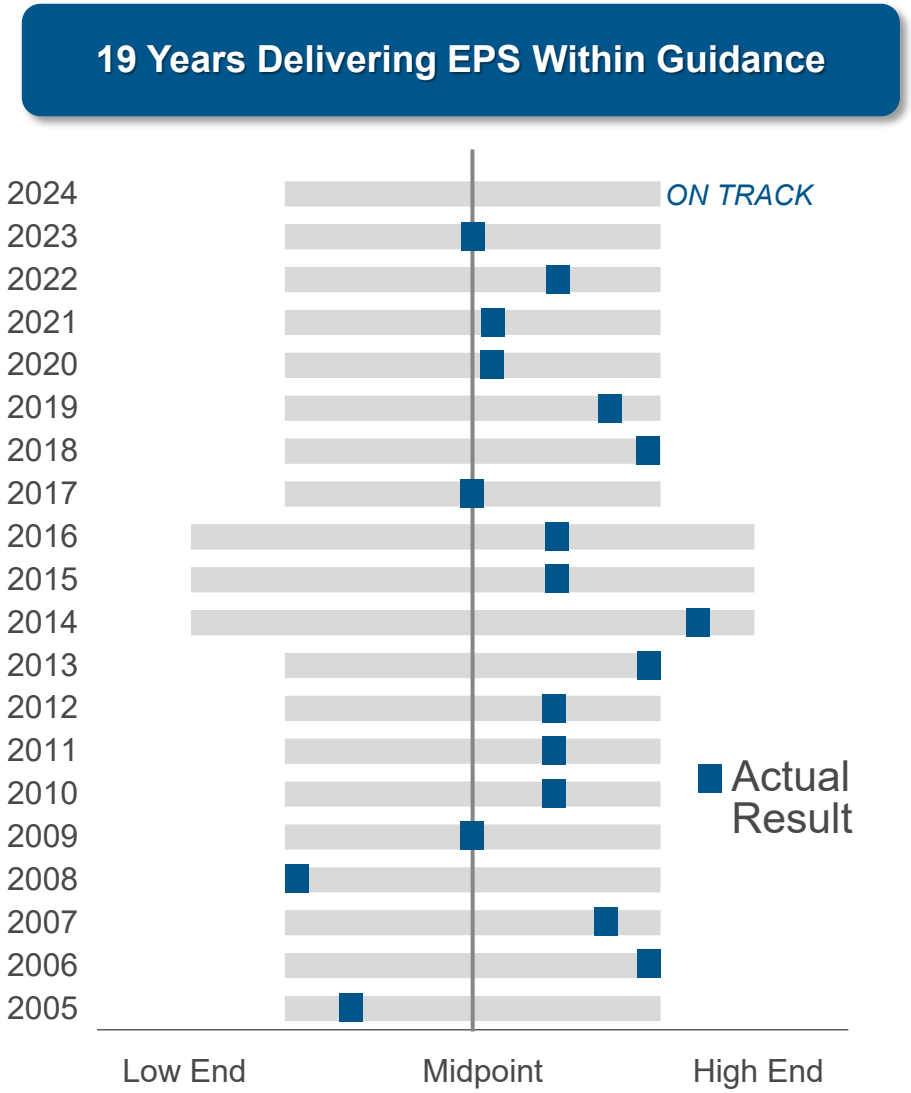

Target Shareholder Return

Proven Track Record

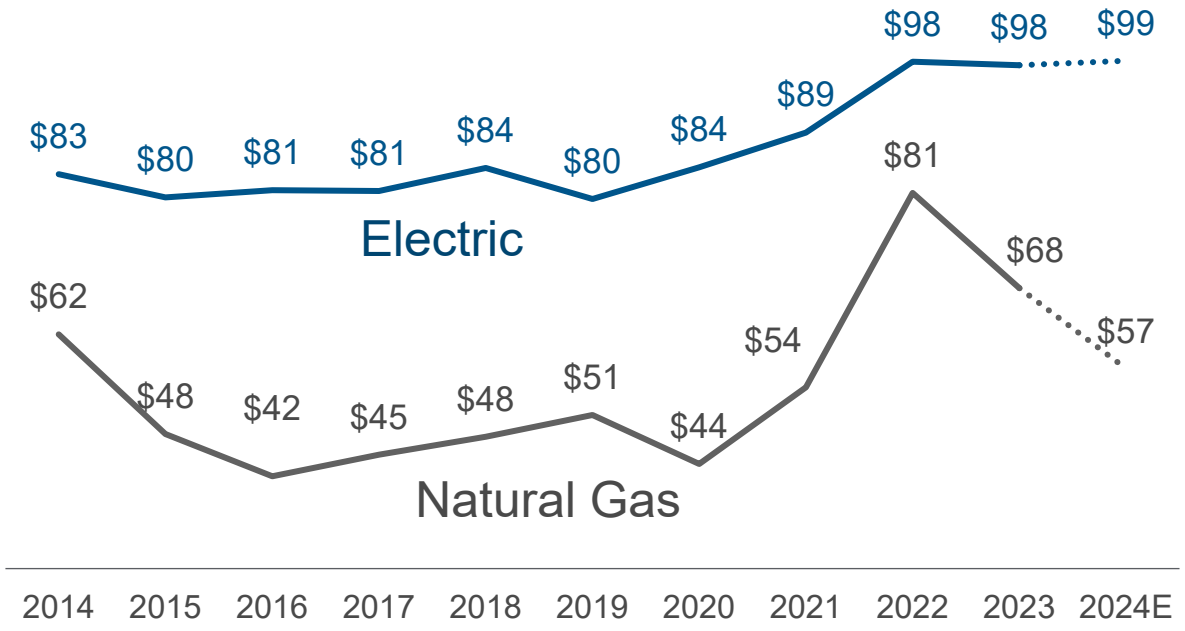

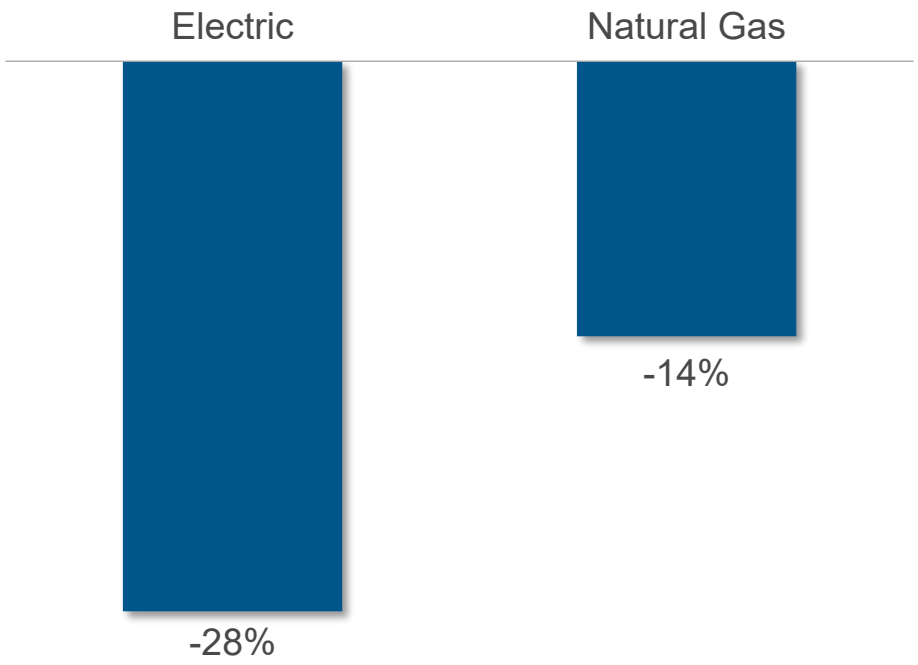

Keeping Customer Bills Low

2014-2024E Residential Electric CAGR = ~1.7%
2014-2024E Natural Gas CAGR = ~(0.8%)

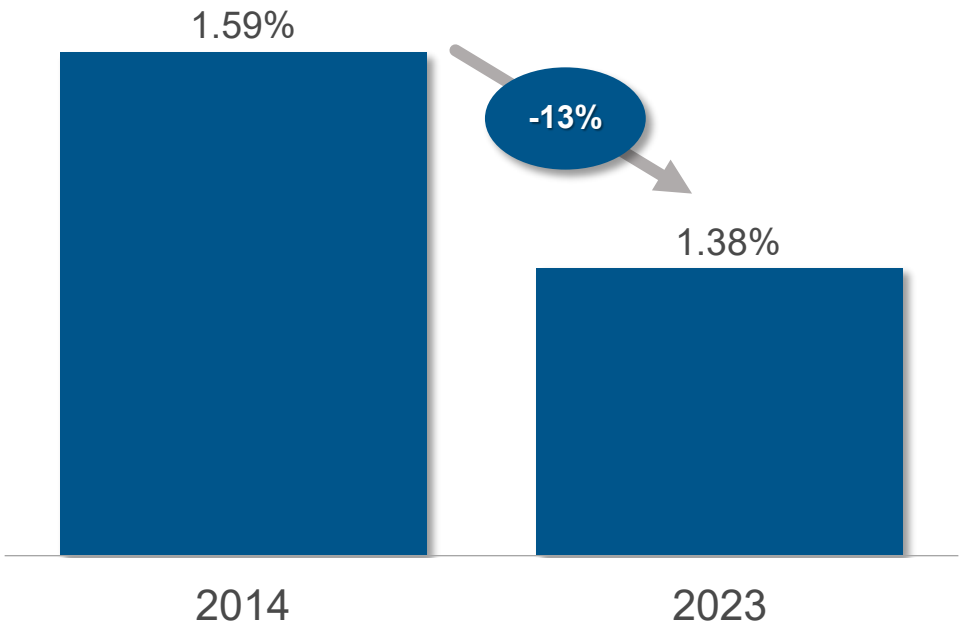

Average Xcel Energy Residential Bill to National Average

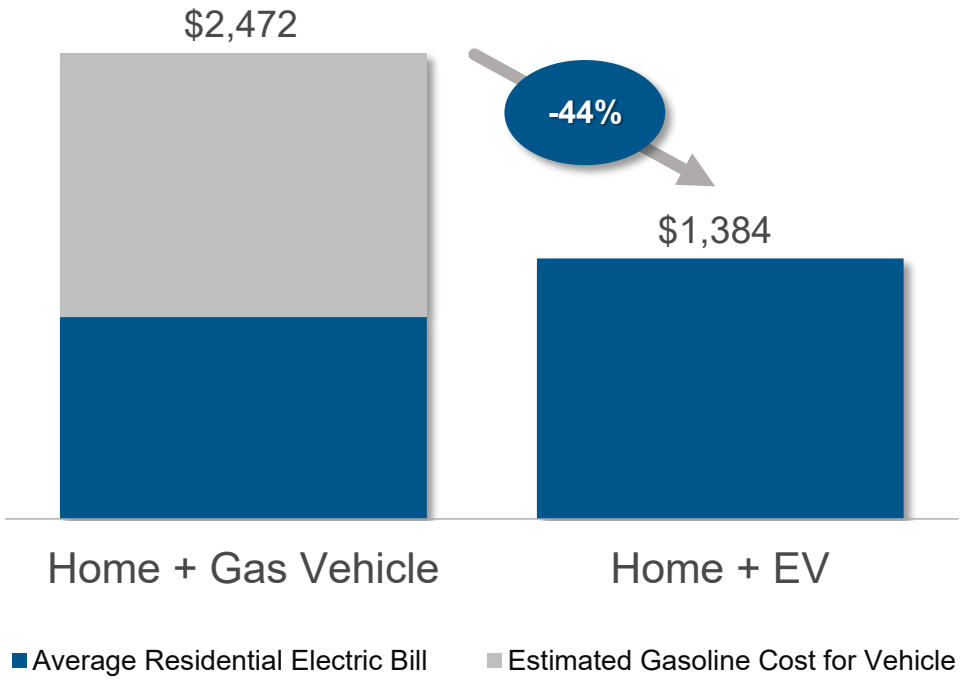

Reducing Customer Energy Costs

Residential Electric Share of Wallet*

Residential Electric + Gasoline Bill**

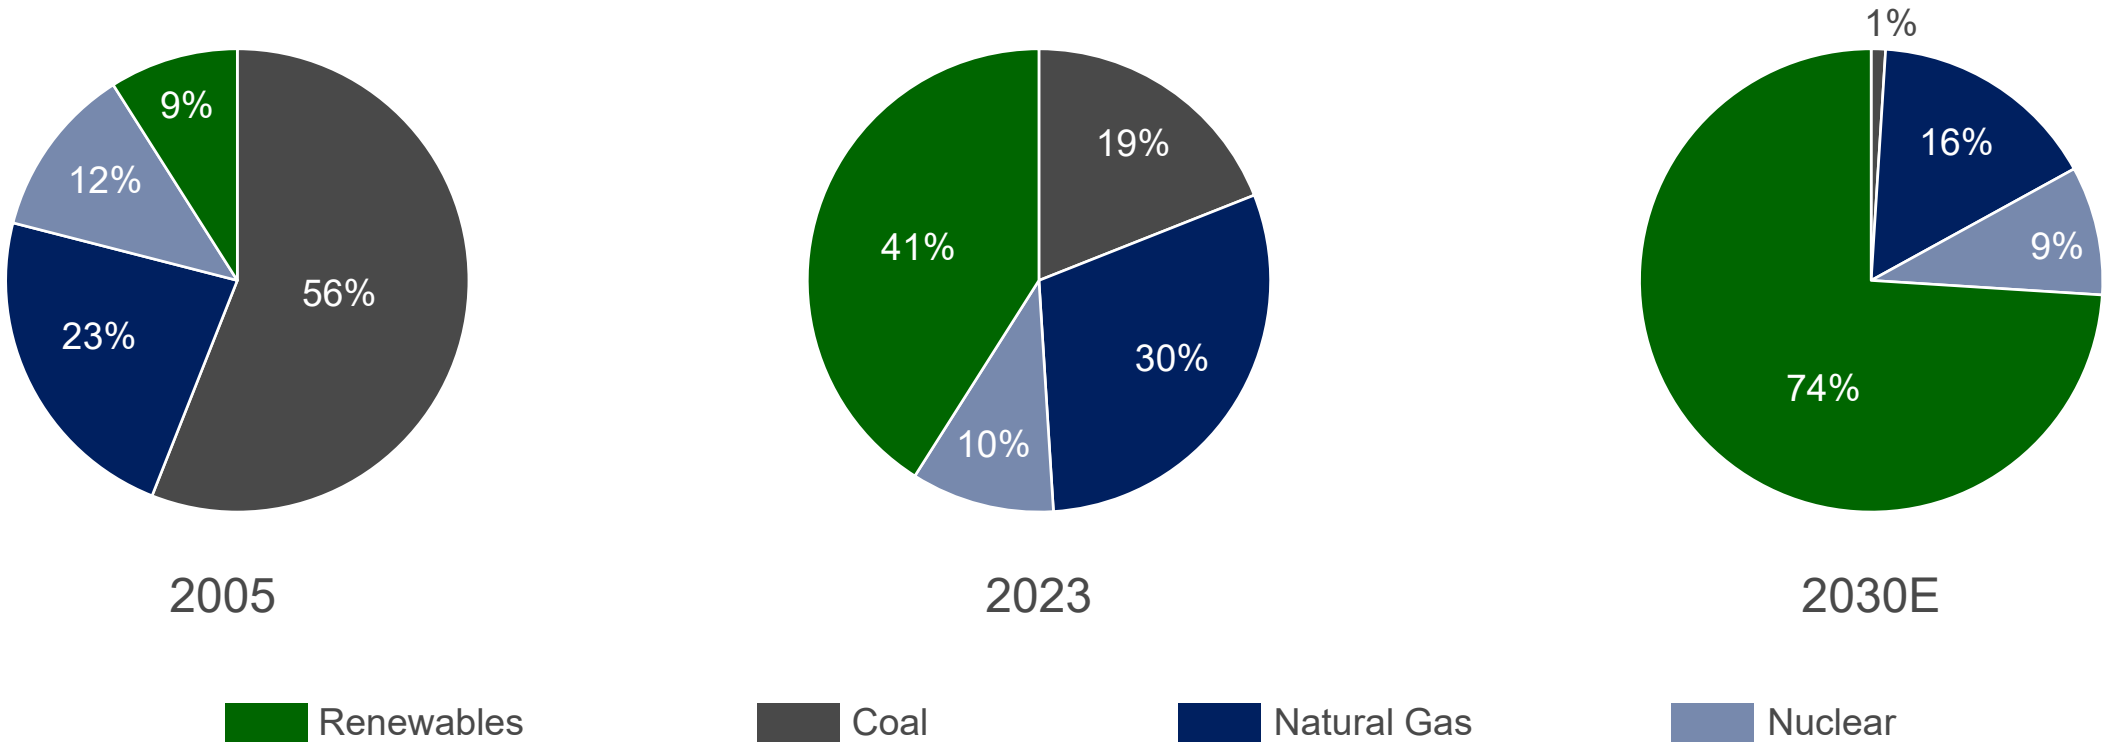

* Average Xcel Energy residential bill divided by household income

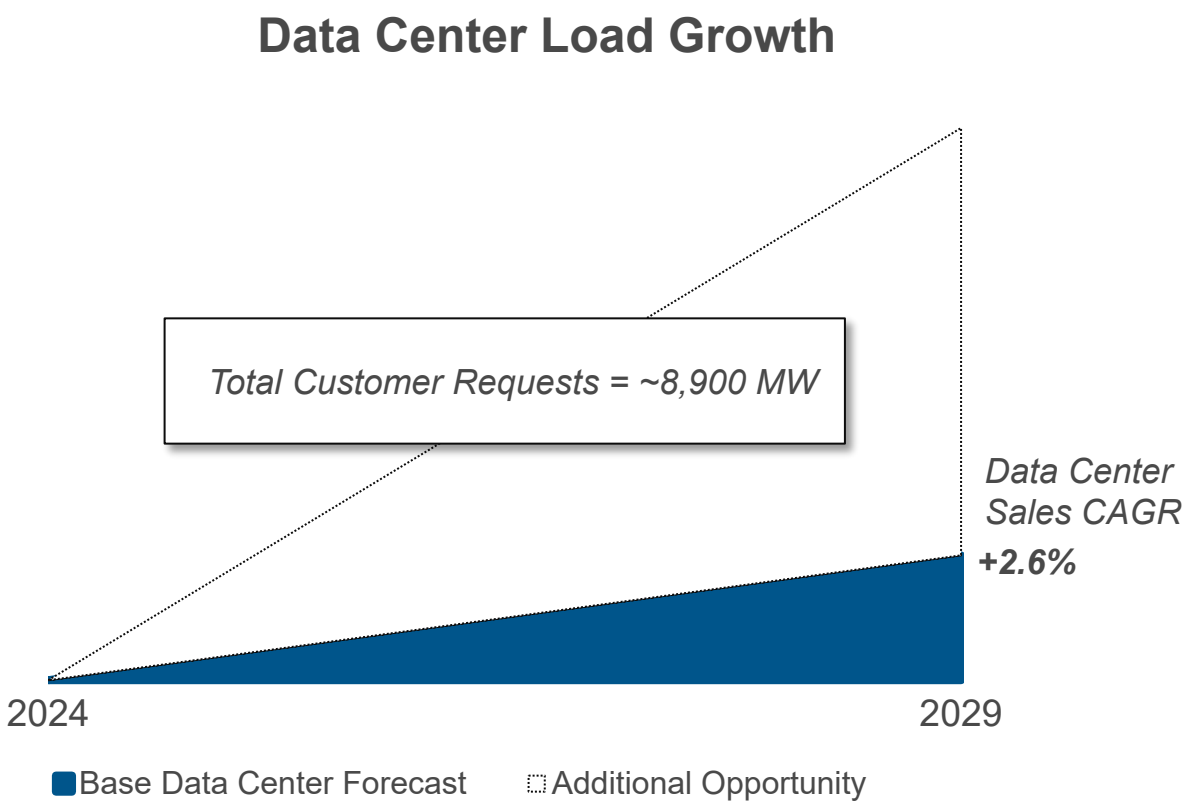

** Assumes 12,000 miles per year and 30 mpg for gas vehicle at $3.50 / gallon. EV charging assumes $0.11 / KWh (off peak charging)

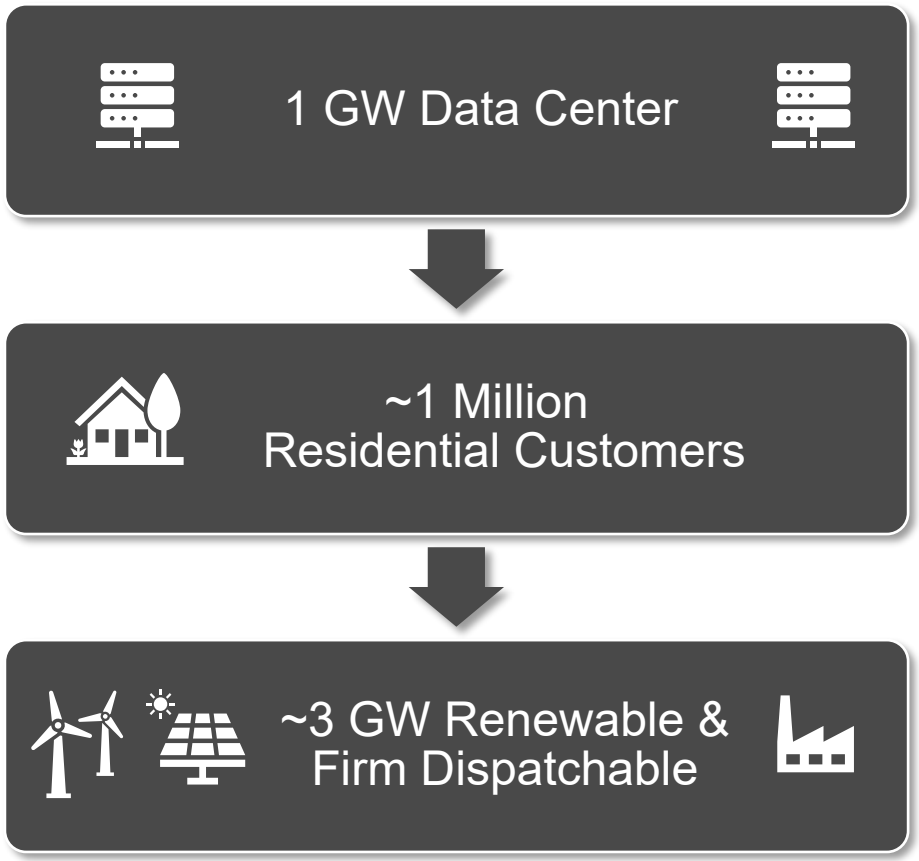

Increasing Decarbonization

Shifting Renewable and Zero Carbon Generation Mix

Data Center Growth

Principles for Future Data Center Opportunities

Data Center Contract Principles

- Maximize contributions to all other customers and recover capital investment
- Protect Xcel Energy's existing customers and the Company from stranded asset risk
- Risk avoidance through contractual provisions
- Advancement of innovative technologies to support carbon reduction and communities
- Balance opportunity to add beneficial sales with carbon emissions goals

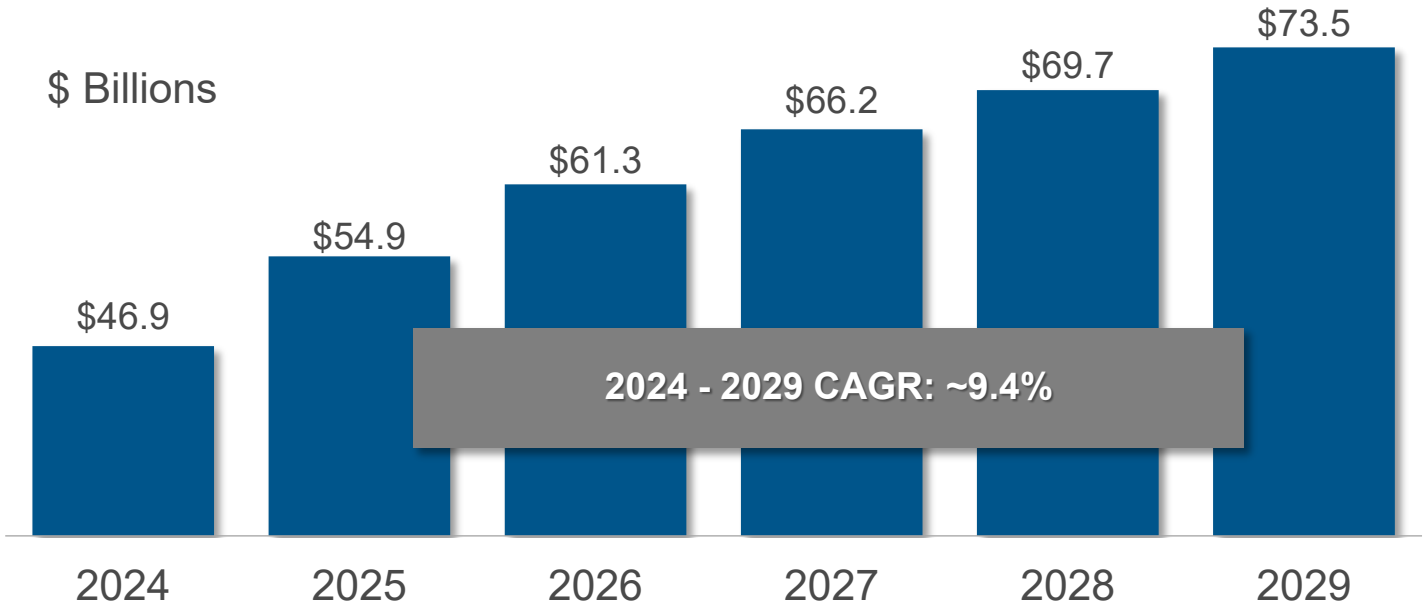

Illustrative Data Center Contract

Data Center Load	1,000 MW @ 24/7
Investment Requirements	$6 – 8 billion
Incremental Revenue	$0.9 – 1.3 billion / year*
Benefit to Other Customers	**Up to 10% Savings**

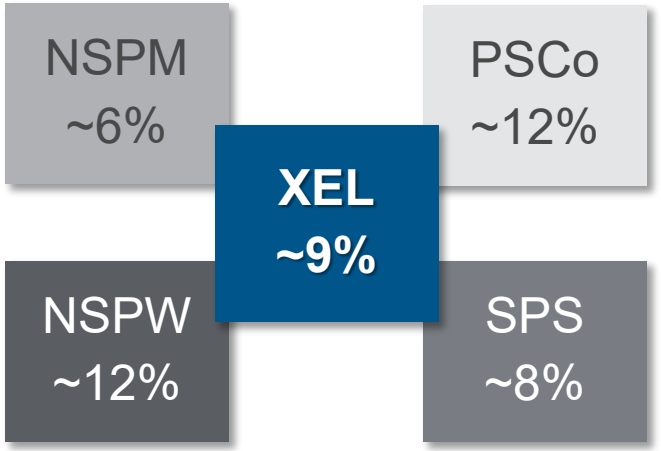

* Revenue varies based on data center contribution to investment requirements

Strong Rate Base Growth

Xcel Energy Consolidated Rate Base

OpCo Base CAGRs 2024 – 2029

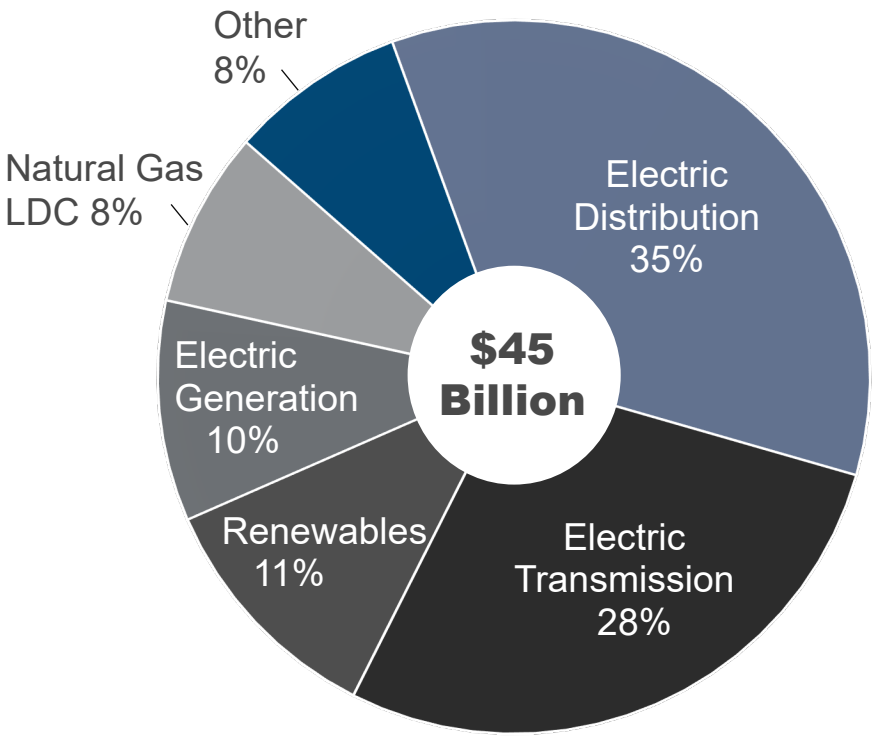

OpCo CAGRs exclude potential additional capital investment

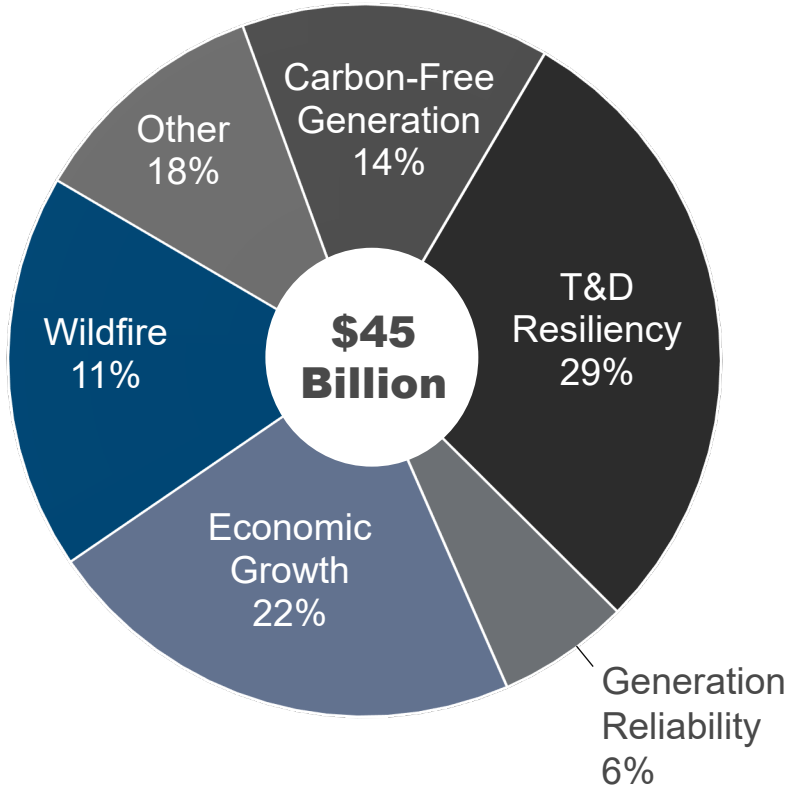

Base capital forecast excludes additional generation investment associated with resource plans and SPP and MISO Tranche 2 transmission projects

Base Capital Forecast 2025 – 2029

Investment by Function

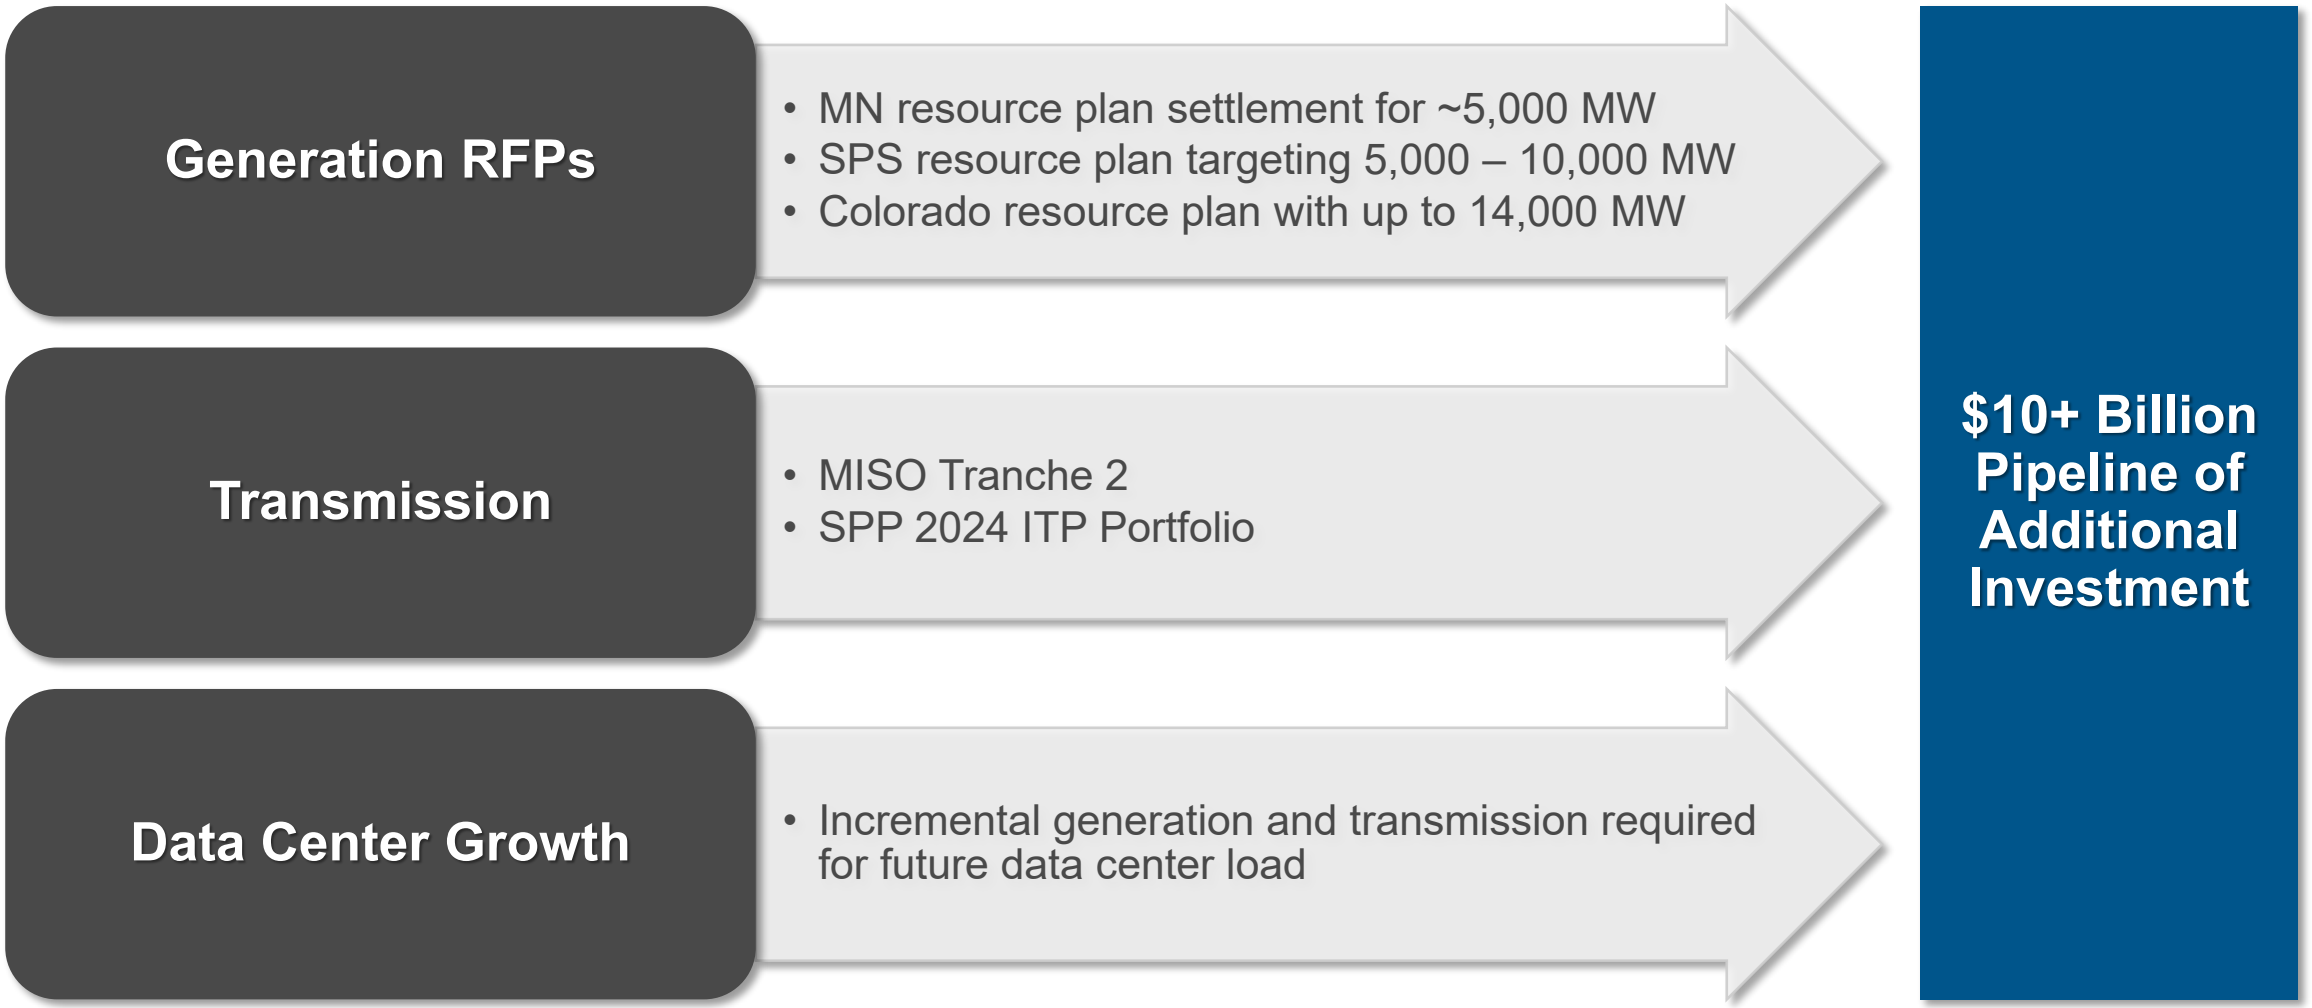

Investment by Driver

Base capital forecast excludes additional generation investment associated with resource plans and SPP and MISO Tranche 2 transmission projects

Additional Investment Pipeline

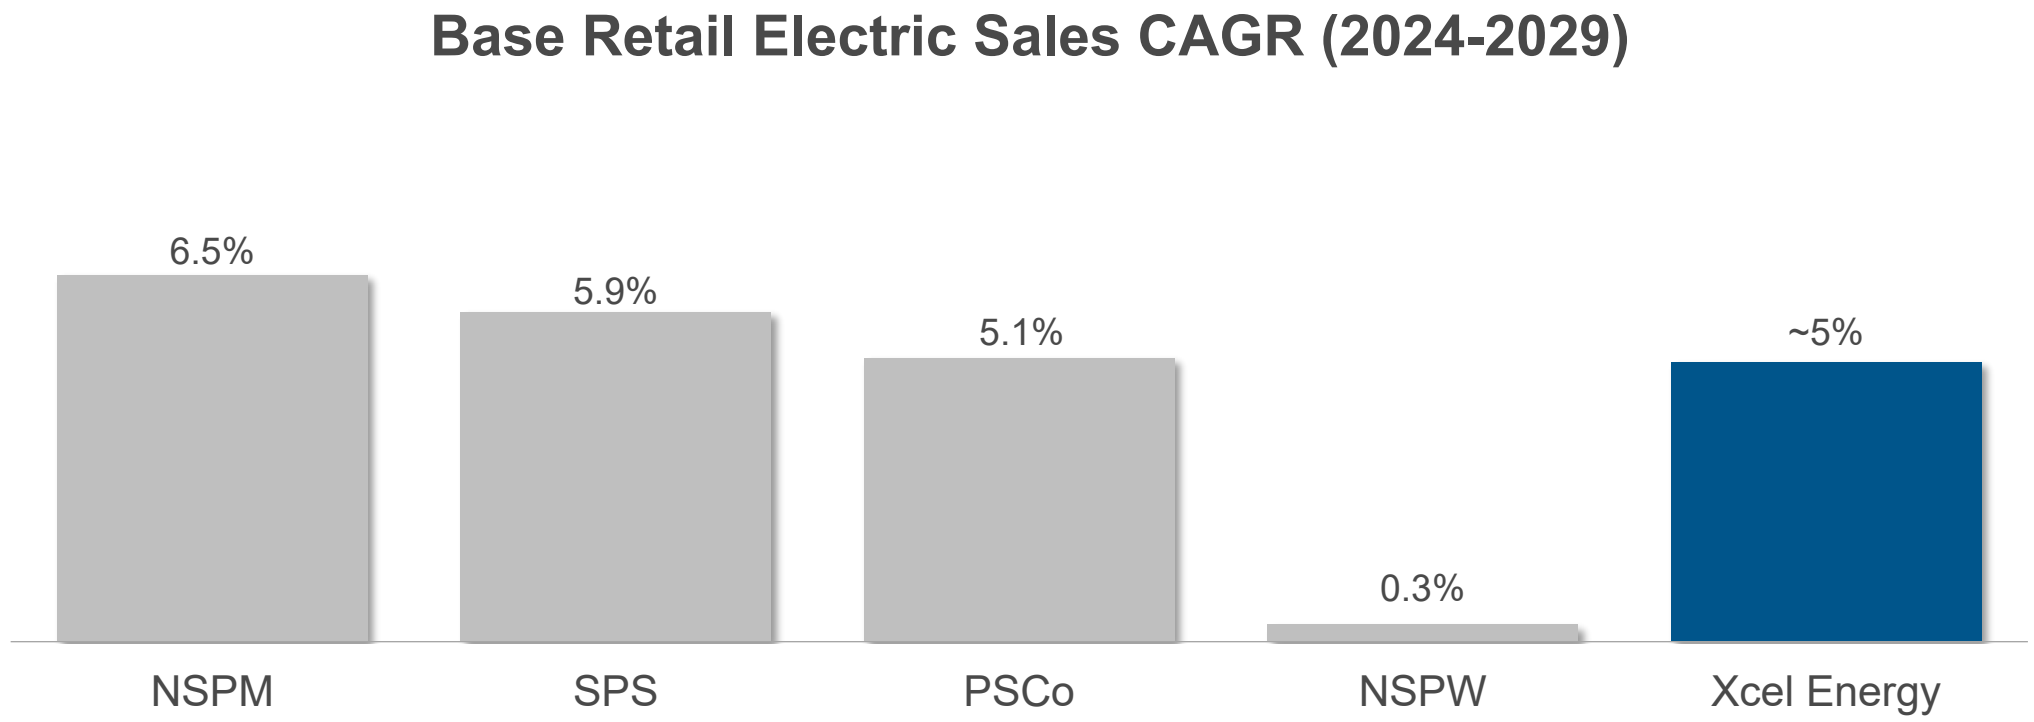

Every $1 billion of additional capital investment increases rate base growth by ~25-30 basis points

Resource Plan Updates

Colorado Resource Plan	• Filed October 2024 • Forecasted need of 5,000 – 14,000 MW of new capacity from 2028 to 2031 • Assumes 3 – 7% annual sales growth in resource scenarios • Commission decision expected by Fall 2025 • RFPs expected in early 2026
Minnesota Resource Plan	• Settlement filed October 2024 • Selected company owned resources: 420 MW natural gas CT; 300 MW battery • Need for 4,200 MW of additional resources from 2027-2030 • Life extension of Prairie Island (2053 / 2054) and Monticello (2050) • Requested Commission approval by 2025 Q1
SPS Resource Plan	• RFP issued in July 2024 for 5,000 – 10,000 MW of generation by 2030 • Proposed portfolio filing Summer 2025 • Commission decisions expected in 2026

Electric Sales Growth Forecast

Sales growth is back-end loaded in the five-year forecast, reflecting new data center load timing

Balanced Investment Thesis

Regulated Utility that Consistently Delivers

- Met or exceeded earnings guidance for 19 consecutive years
- Dividend increases for 21 consecutive years
- Strong balance sheet and credit metrics

Resilient, Reliable and Affordable

- Low customer bills and declining share of customer wallet
- Full coal retirement by 2030
- 80% reduction in carbon by 2030 for electric operations
- Reducing operational risks and improving outcomes for stakeholders

Transparent Long-Term Growth Plan

- Base capital plan of $45 billion, reflecting 9.4% rate base growth
- Pipeline of incremental capital opportunities in excess of $10 billion
- Strong sales growth with further upside from data centers
- TSR of 9-11%, reflecting 6-8% EPS growth and 4-6% dividend growth

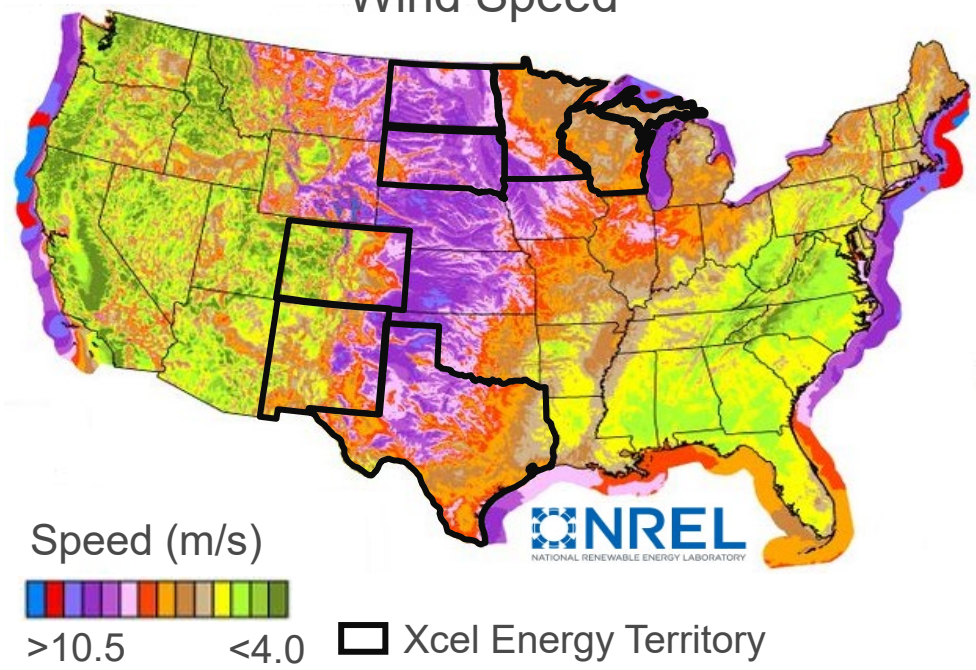

APPENDIX

STEEL FOR FUEL ADVANTAGE

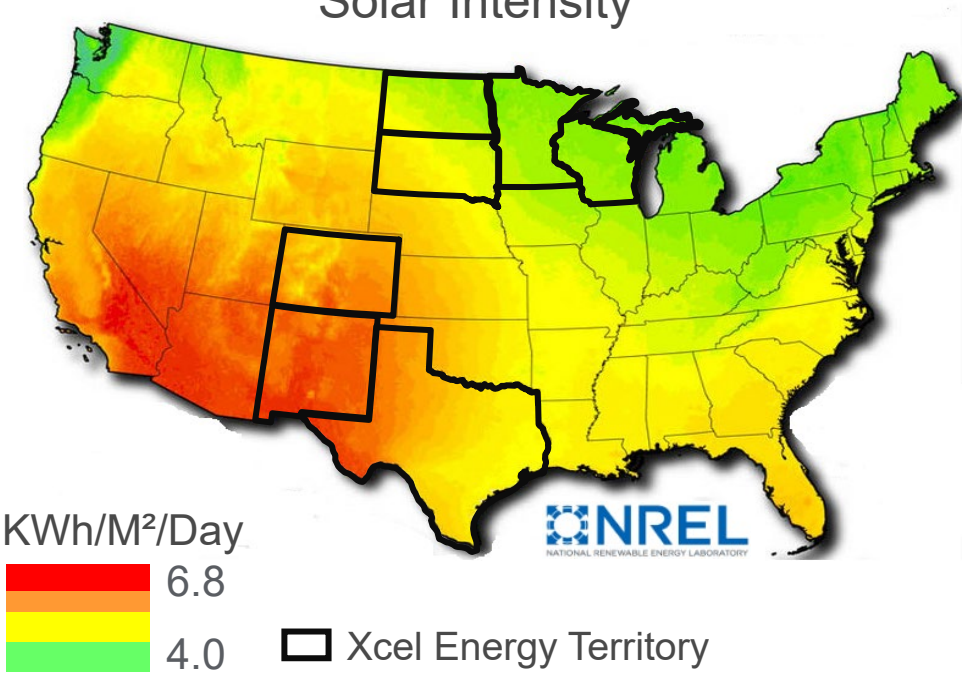

Geographic Advantage for Renewables

High-Capacity Factors Enable Greater Efficiency and Lower Costs

Wind Speed

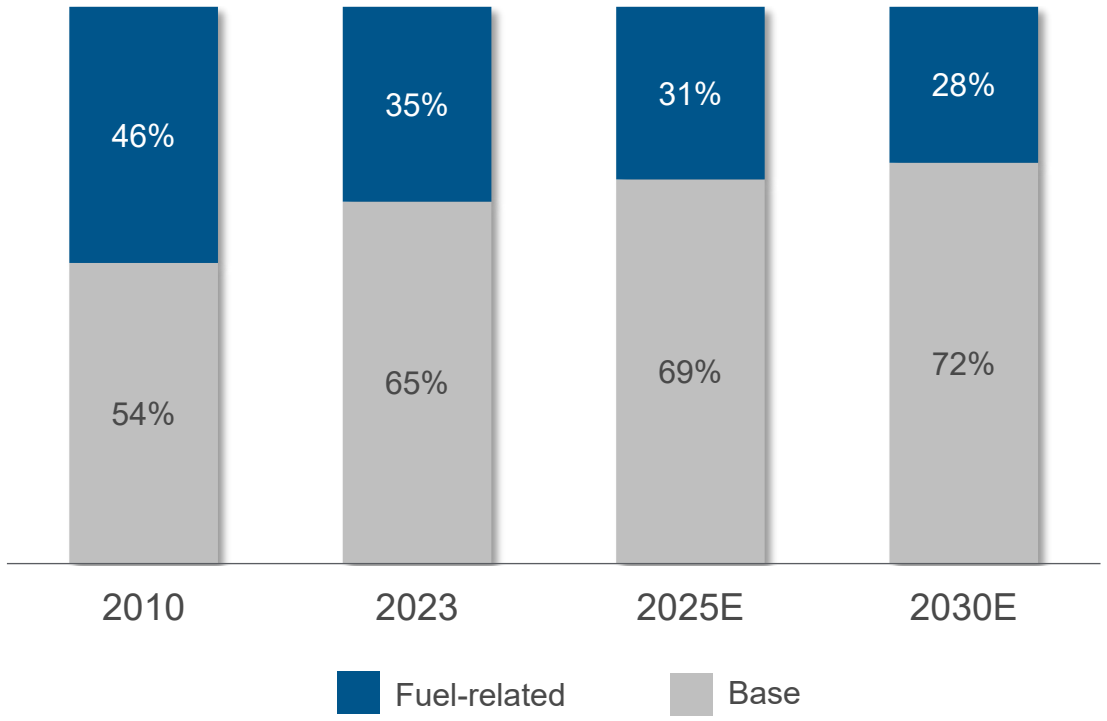

Solar Intensity

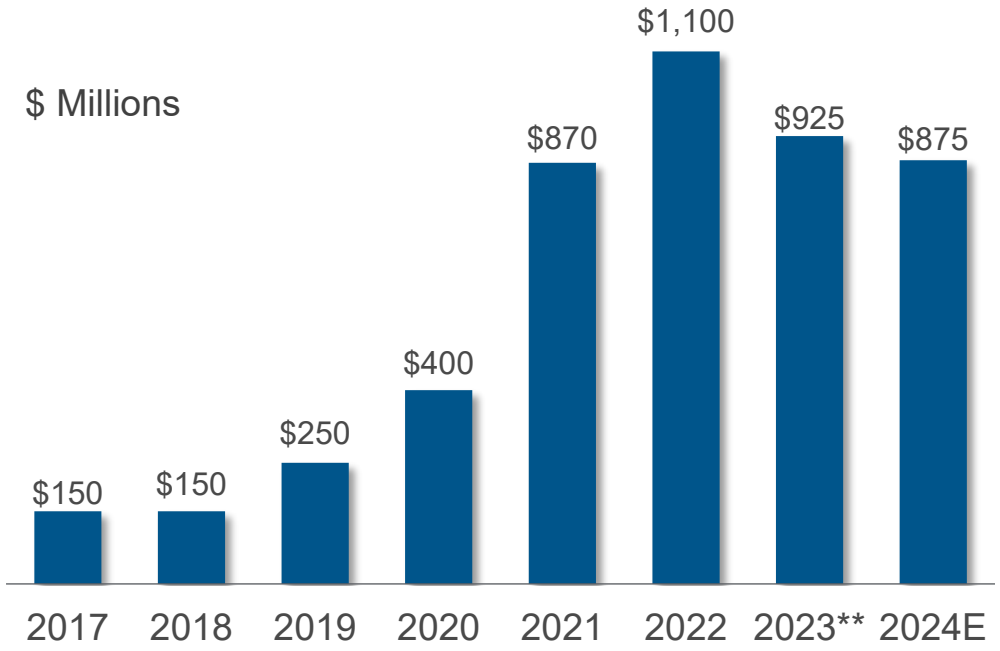

National Renewable Energy Laboratory with modification

Committed to Affordability

Declining Fuel Component of Bill

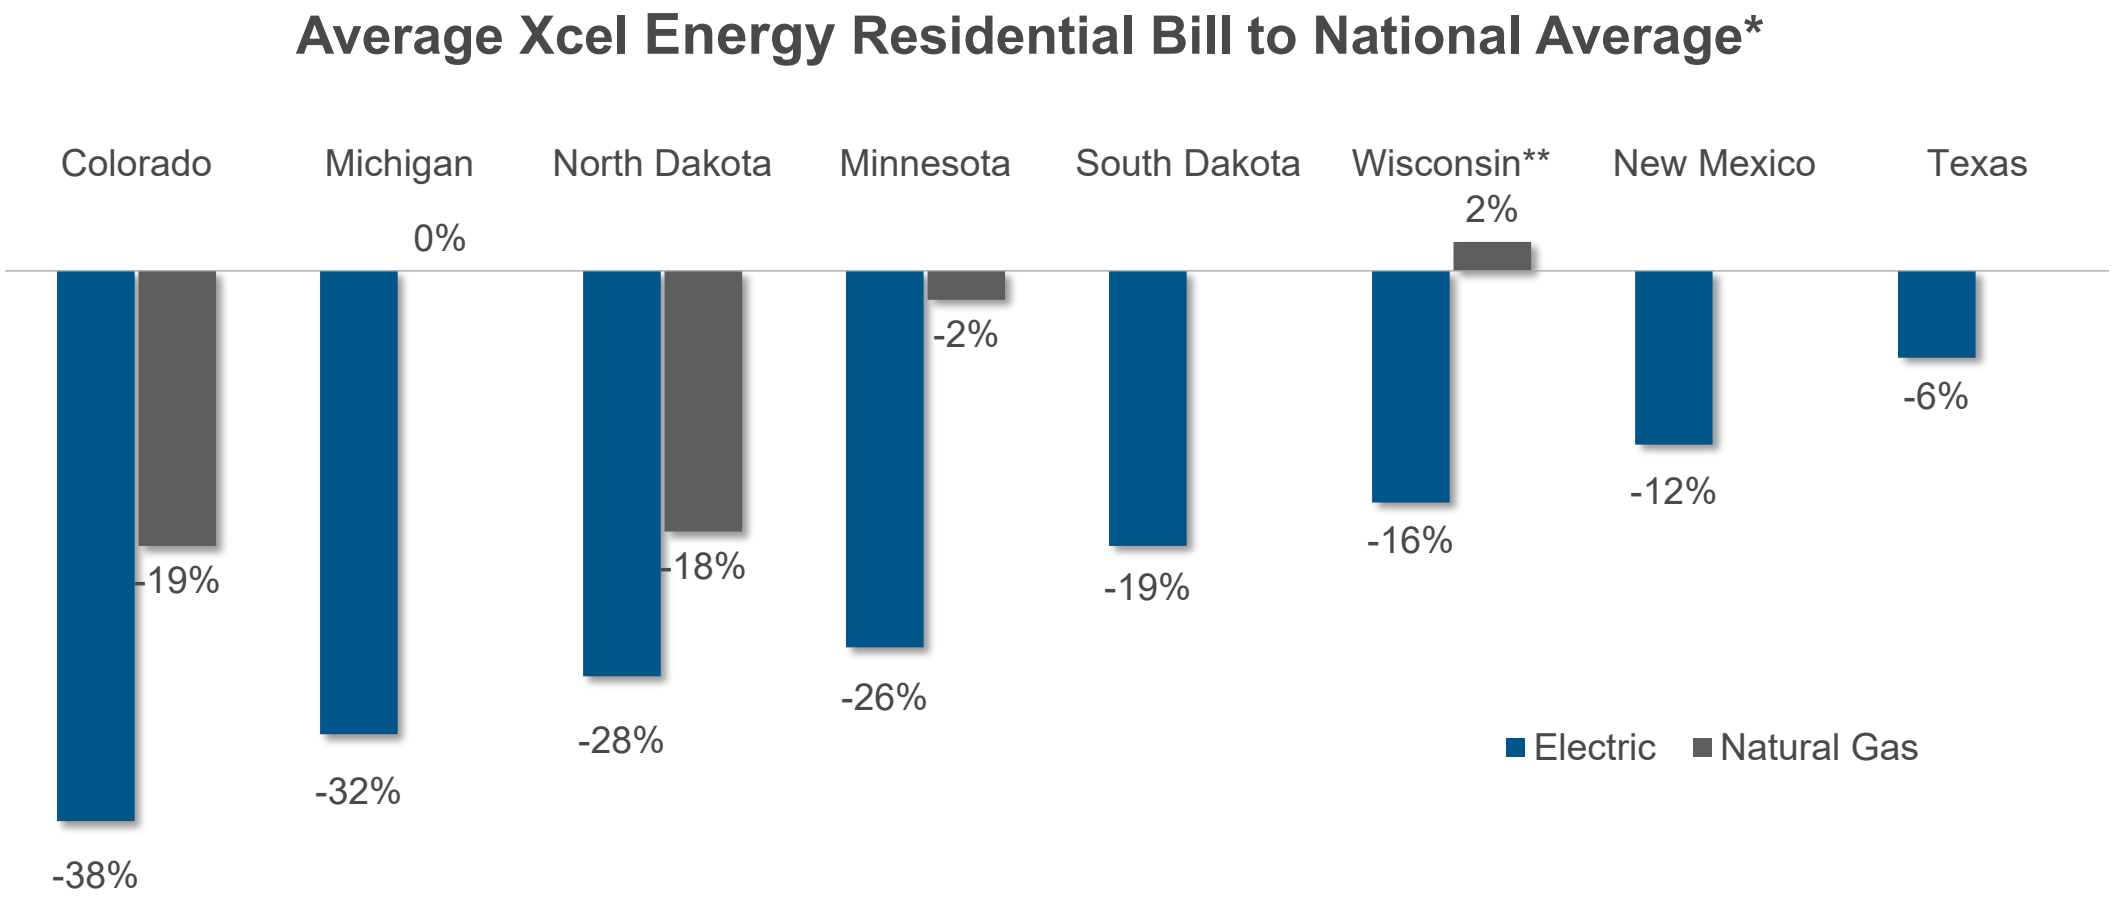

Customer Savings from Wind Energy*

* Includes avoided fuel costs and PTCs

** Reduction in 2023 vs. 2022 driven by decline in natural gas pricing

Committed to Affordability

* Electric based on 2019-2023 EIA data. Natural Gas based on 2018-2022 EIA data

** Includes recovery of Ashland manufactured gas plant remediation costs

SUSTAINABILITY

Comprehensive Sustainability Goals

	Electricity* (from 2005 levels)	Natural Gas Service** (from 2020 levels)	Transportation*** (from 2020 levels)
2030	**80%** lower carbon emissions	**25%** lower greenhouse gases	**1 in 5** vehicles are EVs in our states
2050	**ZERO** carbon emissions	**NET-ZERO** natural gas service	**ZERO-CARBON FUEL** accessible within 1 mile

≤ RATE OF INFLATION
customer bill increases

SOCIAL IMPACT
of coal closures mitigation

WORKFORCE
reflects our communities

70% LESS
water consumption by 2030

LOCAL COMMUNITIES
supported

25% SPEND
with diverse suppliers

* Companywide goal; work also underway to meet state clean energy goals in our service area

** Spans natural gas supply, delivery, and customer use

*** Includes the Xcel Energy fleet; zero-carbon fuel is electricity or other clean energy

Sustainability Goals – Tangible Progress

	GOAL	PROGRESS
CO_2	**80% lower carbon emissions by 2030, 100% carbon-free electricity by 2050***	54% reduction 2005 - 2023
	25% lower net GHG emissions by 2030, net-zero by 2050**	Clean Heat Plan approved in Colorado Filed Natural Gas Innovation Plan in Minnesota
	70% less water consumption by 2030*	27% reduction 2005 - 2023
	Bill increases ≤ rate of inflation	Residential electric 2014-2024E CAGR = 1.7% Residential natural gas 2014-2024E CAGR = (0.8)%
	1 in 5 EVs powered by 2030	Programs approved in MN, CO, WI, and NM
	Coal plant closure impacts mitigated	23 units retired, no forced workforce reductions
$	**Local economies supported**	~63% supply chain spend local in 2023 ~$2.3 billion investment; 1,400 jobs in 2023
	Workforce reflects our communities	Board: 31% female, 15% diverse Workforce: 23% female, 19% diverse (YE 2023)
	25% of spend with diverse & small suppliers by 2025	~22% ($1.3 billion) in 2023

* Includes owned and purchased electricity serving customers

** Spans natural gas supply, distribution and customer use

Carbon Goals Aligned With Paris Accord: Electric Utility

Goals Align with Science-Based Scenarios Likely to Achieve 1.5° C

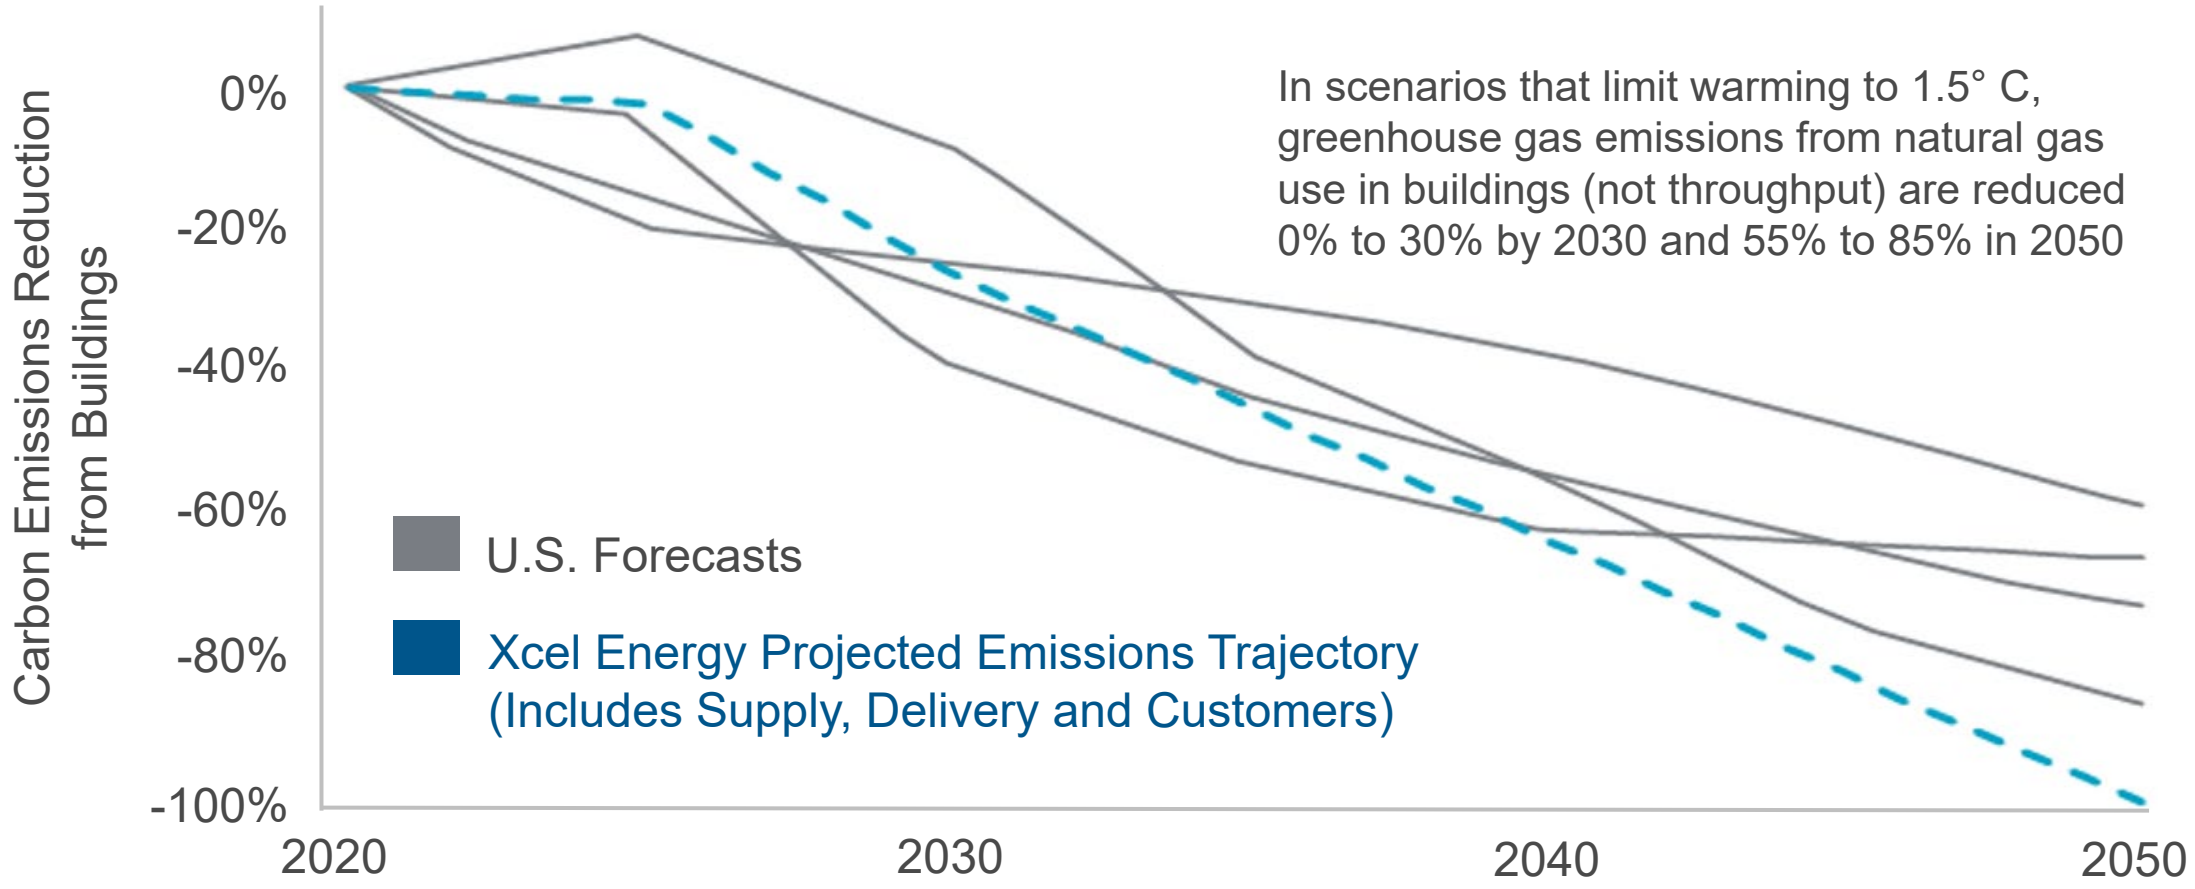

Validated by a lead author for the Intergovernmental Panel on Climate Change

Goal includes owned and purchased power

Carbon Goals Aligned With Paris Accord: Natural Gas Utility

Goals Align with Science-Based Scenarios Likely to Achieve 1.5° C

Validated by a lead author for the Intergovernmental Panel on Climate Change

Out of Coal by 2030

Coal Retirement Schedule

~9,200 MW

Retired

Year	Plant	Capacity
2006	MN Valley 3	47 MW
2007	High Bridge 3-6	353 MW
2010	Riverside 6-8	371 MW
2011	Cherokee 1	107 MW
2012	Cherokee 2	106 MW
2013	Arapahoe 3-4	144 MW
2013	Cameo 1-2	73 MW
2014	Bay Front 5*	20 MW
2015	Black Dog 3-4	282 MW
2015	Cherokee 3	152 MW
2017	Cherokee 4*	352 MW
2018	Valmont 5	184 MW
2020	Bay Front 1-2	47 MW
2022	Comanche 1	325 MW
2023	Sherco 2	682 MW
2024	Harrington*	1,018 MW

~4,400 MW

Planned

Year	Plant	Capacity
2025	Comanche 2	335 MW
2025	Craig 1	42 MW**
2026	Sherco 1	680 MW
2026	Pawnee*	505 MW
2027	Hayden 2	135 MW**
2028	Hayden 1	98 MW**
2028	Craig 2	40 MW**
2028	King	511 MW
2028	Tolk 1-2	1,067 MW
2030	Sherco 3	517 MW**
2030	Comanche 3***	500 MW**

0 MW

2006

2024

EOY 2030

* Converted from coal to natural gas

** Based on Xcel Energy's ownership interest

*** Comanche 3 was added to the system in 2010 and is not reflected in 2006 coal remaining

WILDFIRE MITIGATION

Wildfire Risk Reduction Framework

Situational awareness
Weather stations, cameras, meteorology

Stakeholder communications
Communication, coordination, and real-time data

Operational mitigations
Wildfire safety operations (WSO) and Public Safety Power Shutoff (PSPS)

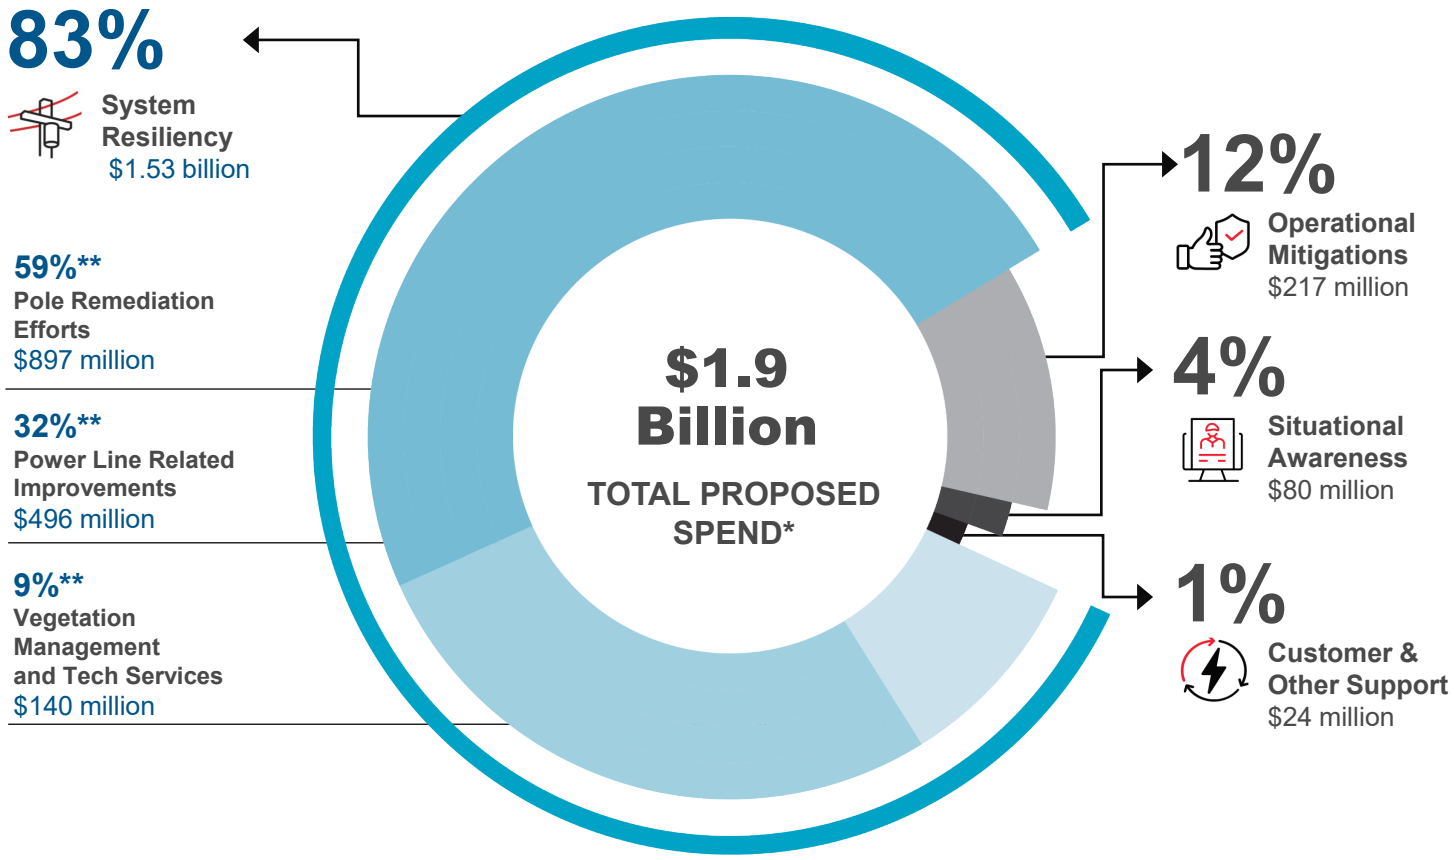

Data and technology
Innovative capabilities and a wildfire mitigation data platform

System resilience
System protections, infrastructure hardening, asset management, etc.

Resilient organization & operating model
Roles and responsibilities aligned to navigate changing environments

As of YE 2024, public-facing wildfire mitigation plans have been issued for all Xcel Energy states

Colorado Wildfire Mitigation Plan 2025 – 2027

* $1.6 billion capital and $250 million O&M

** Percent allocations total 100% of system resiliency budget

System Resiliency

50
miles of undergrounded power lines

10,000
pole replacements, with a focus on higher risk areas

Operational Mitigations

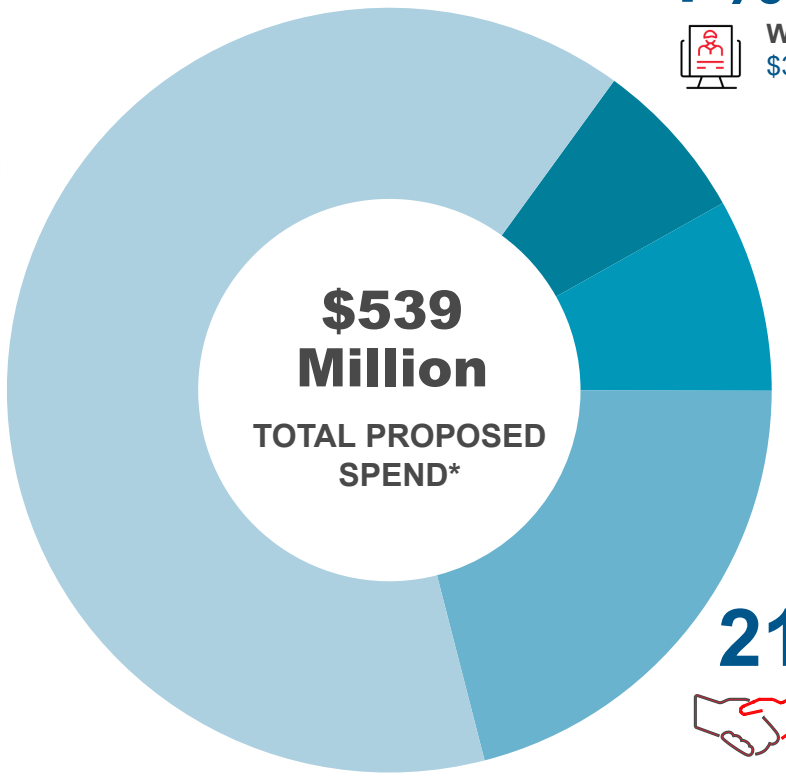

100%
feeders enabled with Enhanced Powerline Safety Settings (EPSS) capability for higher risk areas

Situational Awareness

3x
the number of AI-enabled wildfire monitoring cameras

29,000
non-traditional fault detection sensors deployed

Texas Resiliency Plan 2025-2028

64%
Distribution Resiliency
$345 Million

7%
Wildfire Mitigation
$37 million

8%
Operational Flexibility
$44 million

21%
Communication Modernization
$113 million

System Resiliency

743
automated reclosers installed

11,000
pole replacements, with a focus on higher risk areas

Communication Modernization

100%
coverage of higher risk areas with private cellular network

Wildfire Mitigation

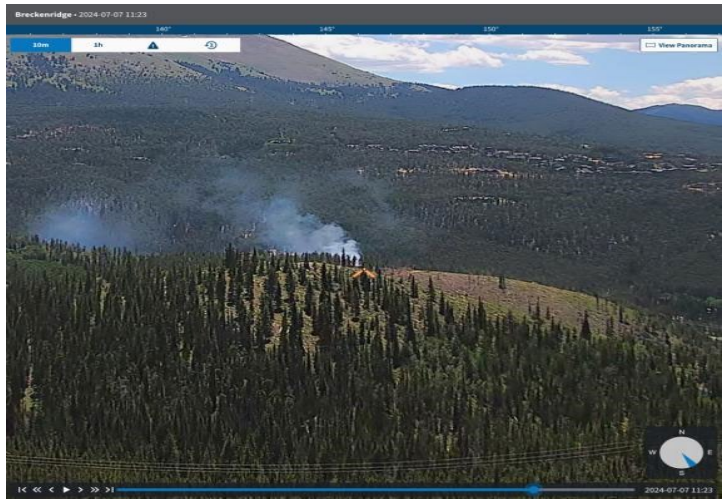

68
AI-enabled wildfire monitoring cameras covering higher risk areas

110
new weather stations installed

* $522 million capital and $17 million O&M

Situational Awareness – Pano AI

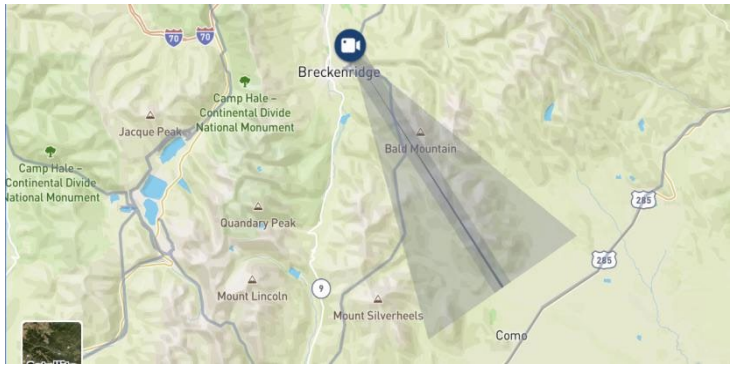

Detection

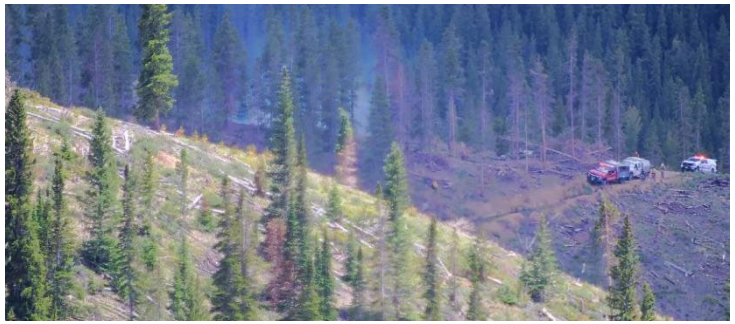

Pano AI detected an event caused by an abandoned campfire 21 minutes before WildCAD

Confirmation

Visual confirm, optical zoom, and maps enabled real-time situational awareness

Response

Early detection allowed for a quick multi-agency response

Coordinated State and Federal Policy Approach

State

- Create authority for Wildfire Mitigation Plans and Public Safety Power Shutoffs
- Reform state tort law applicable to wildfires:
  - Presumed prudence if following approved plan
- Develop cooperative plans with other local partners and industries
- Secure state programs for wildfire prevention
- Create backstop state fund

Federal

- Create federal fund as a liability backstop
- Address the broad scope of potential third party wildfire damages under state law
- Require wildfire mitigation plans to access federal fund
- Address insurance, federal lands and other associated issues

Smokehouse Creek Fire

- Our distribution poles appear to have been involved in an ignition of the Smokehouse Creek Fire and the smaller Reamer Fire (which burned into the Smokehouse Creek Fire)
  - We dispute claims that we acted negligently in maintaining and operating our infrastructure
  - We have established a claims process for those impacted by the Smokehouse Creek Fire
  - Received 185 claims
  - 97 claims resolved
  - 23 lawsuits filed
- We accrued a liability of $215 million with an offsetting insurance receivable (liability based on current information and subject to change)
- We have approximately $500 million of insurance to cover potential 2024 policy period losses
- Xcel Energy is unable to reasonably estimate an upper end of the loss range due to unknown facts and legal considerations that may impact the potential liability

Marshall Wildfire

- Xcel Energy agrees with the Sheriff that Twelve Tribes caused the first ignition – which was burning for more than an hour before the second ignition
- We strongly disagree with the conclusions in the Sheriff's report that we caused the second ignition, which reportedly started 80 to 110 feet away from Xcel Energy's power lines
- The Sherriff's report stated that it cannot be ruled out that the second ignition was caused by an underground coal fire
- Colorado courts do not apply strict liability. For negligence claims, Colorado courts look to whether a utility operated its system with a heightened duty of care consistent with the practical conduct of its business, and liability does not extend to occurrences that cannot be reasonably anticipated
- The Sheriff's report stated that no design, installation or maintenance defects were identified on our electrical circuit in the area of the second ignition
- Target trial date: September 2025. Trial will focus on determination of liability (vs damages)

Marshall Fire Spread Timeline

By the time of the second ignition (~12:20 p.m.), fire from first ignition had already spread to Superior

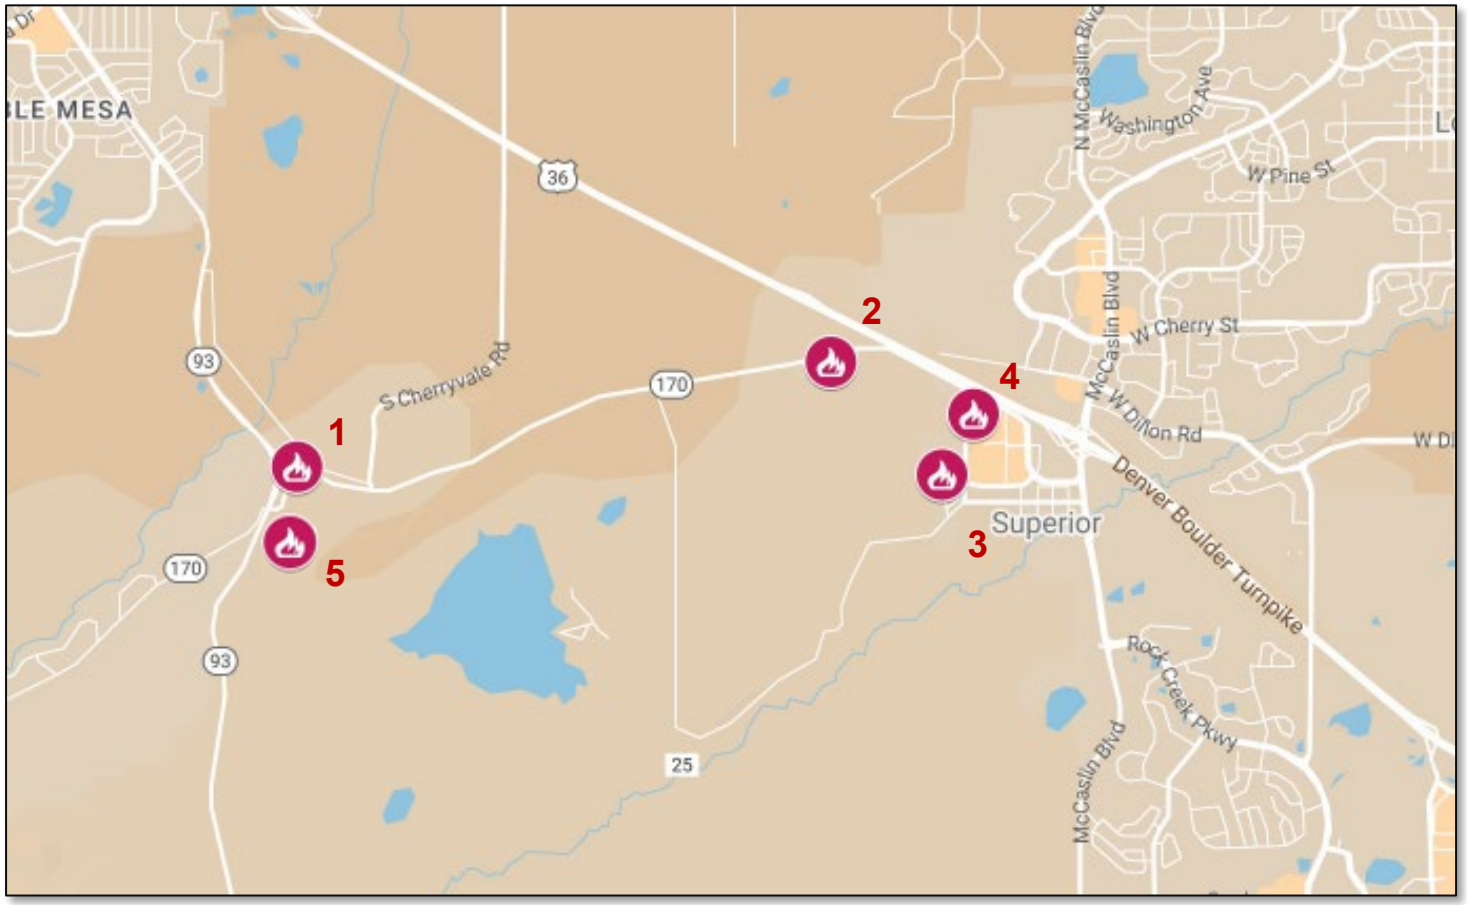

(1) Approximately 11 a.m. – First ignition on Twelve Tribe's property

(2) 12:03 p.m. – Fire reported past Howard Barry Water Treatment Plant

(3) 12:06 p.m. – "Flames reported at the back of Sagamore subdivision"

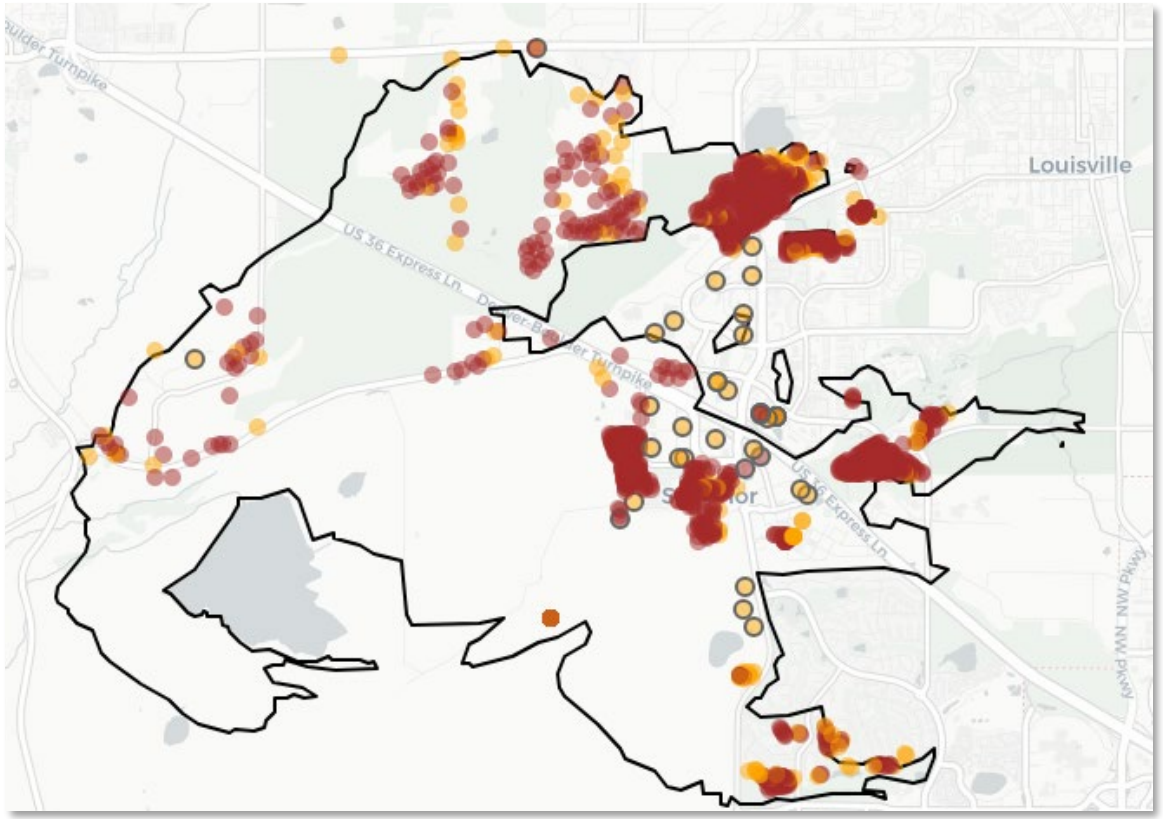

(4) 12:08 p.m. – Video shows embers showering Costco parking lot at 600 Marshall Road, approx. 3 miles from the location of first ignition

(5) Approximately 12:20 p.m. – Second ignition at Marshall Mesa Trailhead Area

FINANCIAL SUPPLEMENT

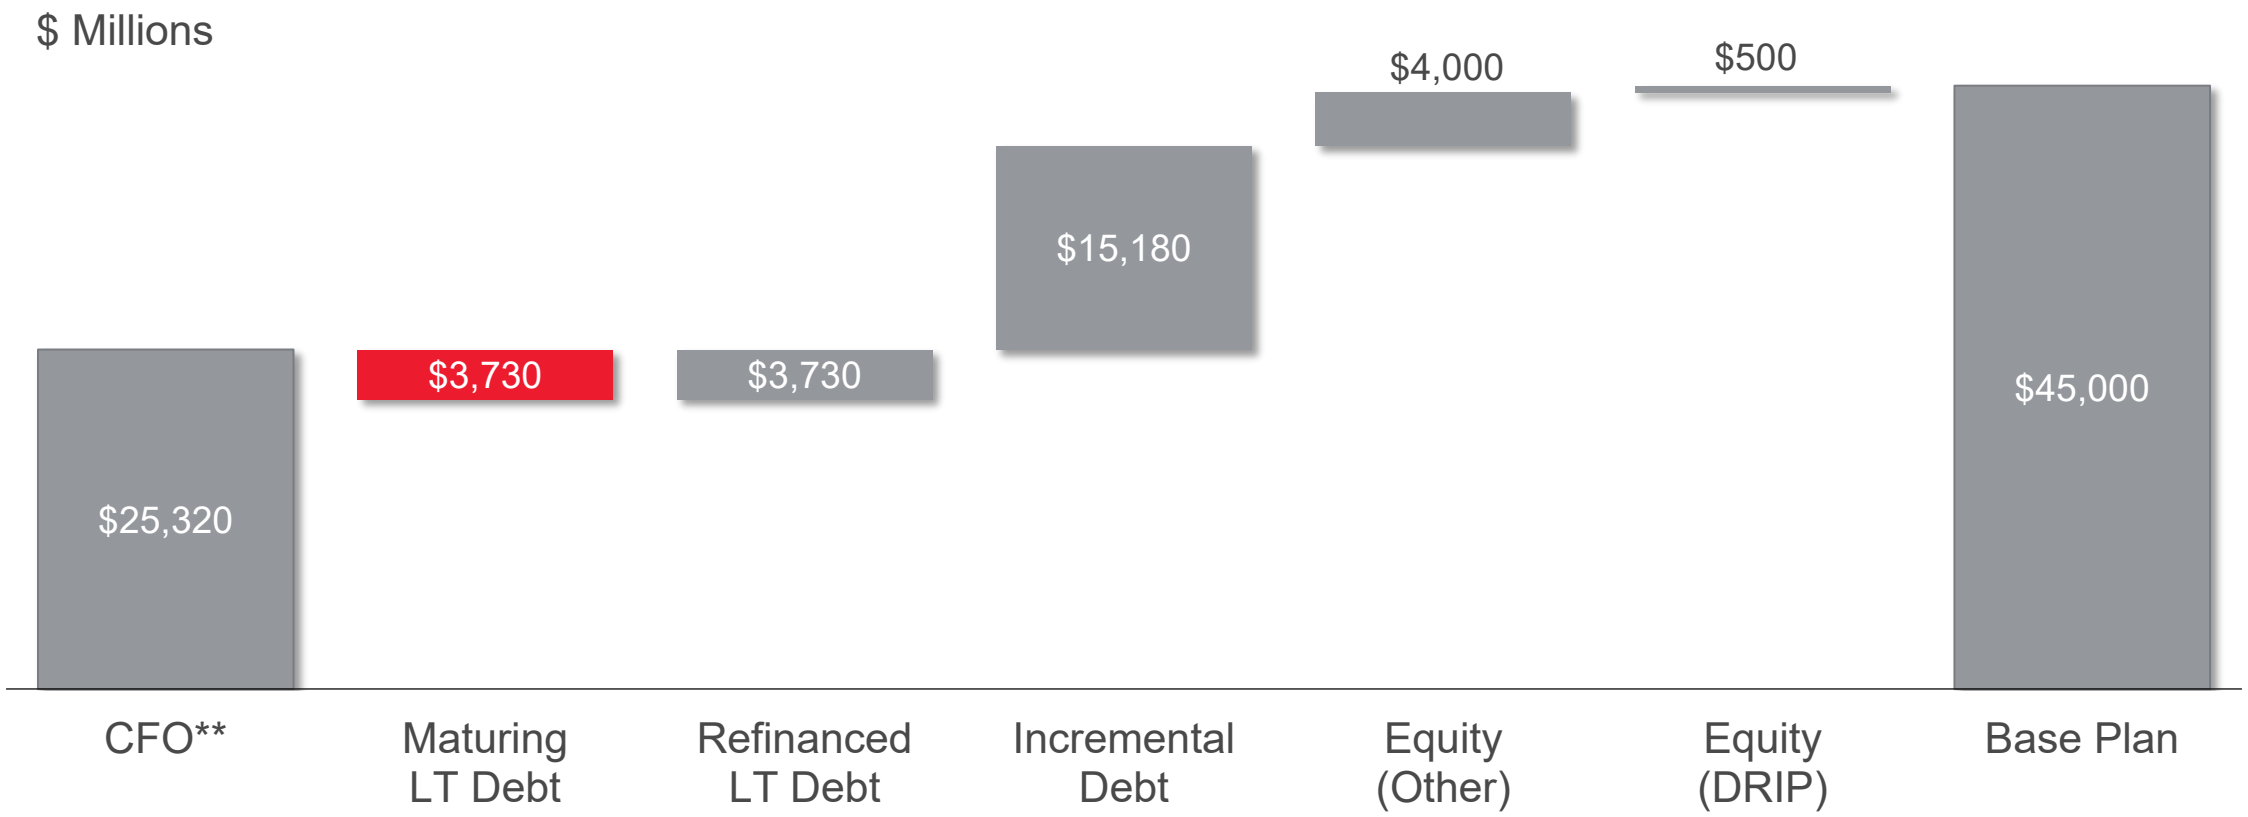

Strong Balance Sheet and Credit Metrics

Plan	2024	2025	2026	2027	2028	2029
FFO/Debt	~17%	~17%	~17%	~17%	~17%	~17%
Debt/EBITDA	5.3x	5.6x	5.4x	5.3x	5.1x	5.0x
Equity Ratio	40%	41%	41%	41%	41%	41%
Hold Co Debt/Total Debt	24%	23%	21%	22%	22%	22%

Credit Ratings	Moody's	S&P	Fitch
Xcel Energy Unsecured	Baa1	BBB	BBB+
NSPM Secured	Aa3	A	A+
NSPW Secured	A1	A	A+
PSCo Secured	A1	A	A+
SPS Secured	A3	A-	A-

Credit metrics based on base capital forecast, include tax credit transferability, and do not reflect rating agency adjustments. The FFO/Debt and Debt/EBITDA ratios are non-GAAP financial measures. FFO is generally calculated as GAAP-basis net cash provided by operating activities, adjusted for working capital and other items. EBITDA is generally calculated as GAAP-basis net income before interest, taxes, depreciation and amortization. Due to the forward-looking nature of these measures, Xcel Energy is unable to provide a reconciliation of these measures to the corresponding GAAP measures.

Financing Plan 2025 – 2029*

* Financing plans reflect tax credit transferability and are subject to change

** Cash from operations is net of dividends and pension funding

*** Additional capital investment above the Base Plan would be funded with approximately 40% equity and 60% debt

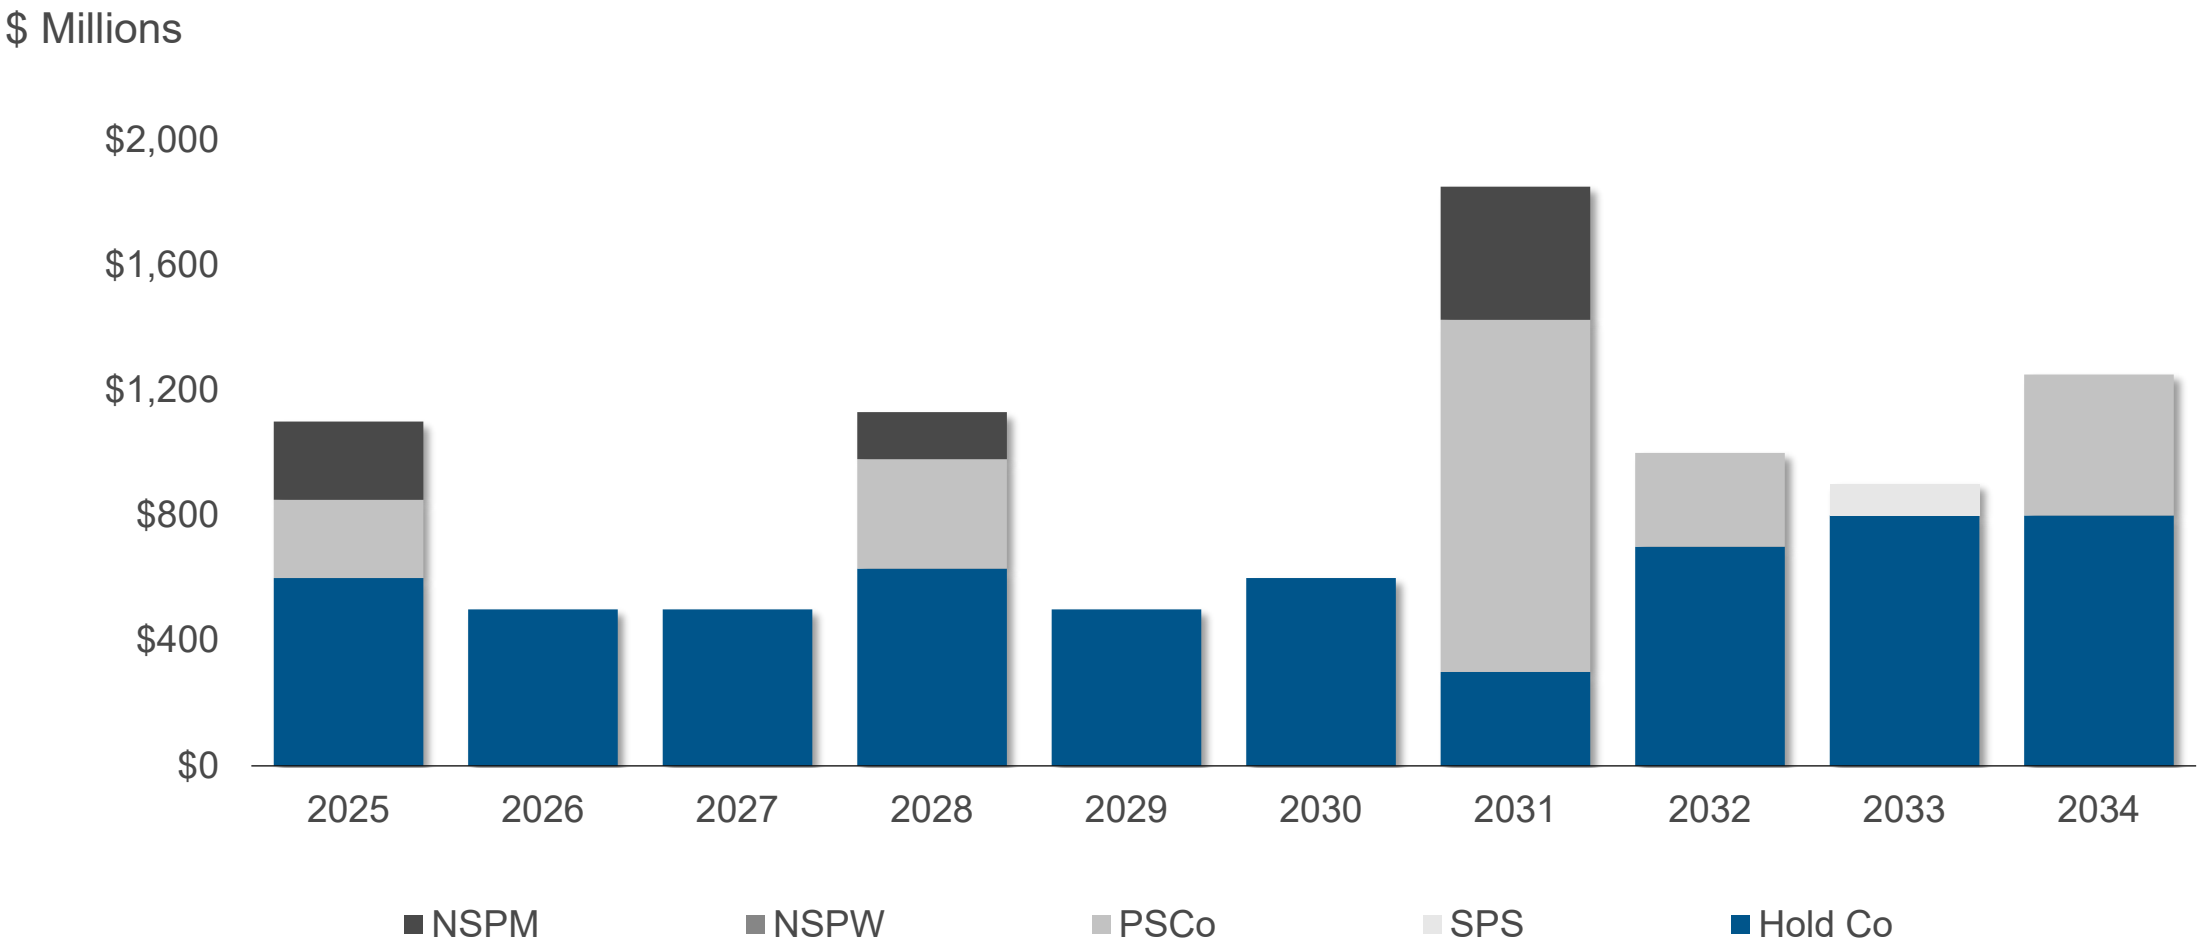

2025 Debt Financing Plan

$ Millions

Issuer	Security	Amount	Timing
Hold Co	Unsecured Bonds	$800	Q1
NSPM	First Mortgage Bonds	$1,100	Q2
NSPW	First Mortgage Bonds	$250	Q2
PSCo	First Mortgage Bonds	$2,000	Q2 & Q3
SPS	First Mortgage Bonds	$350	Q2

Financing plans are subject to change, depending on capital expenditures, regulatory outcomes, internal cash generation, market conditions, changes in tax policies, and other factors

Debt Maturities

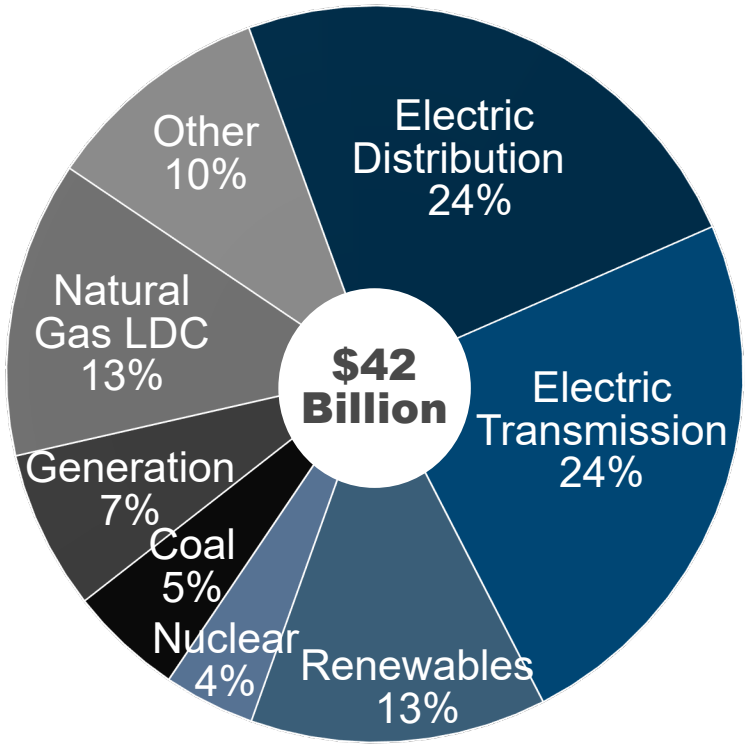

Reconciliation – Ongoing EPS to GAAP EPS

Xcel Energy's management believes that ongoing earnings reflects management's performance in operating the company and provides a meaningful representation of the performance of Xcel Energy's core business. In addition, Xcel Energy's management uses ongoing earnings internally for financial planning and analysis, for reporting of results to the Board of Directors, and when communicating its earnings outlook to analysts and investors.
