MAKING ENERGY WORK BETTER

November 2025

SAFE HARBOR

Except for the historical statements contained in this presentation, the matters discussed herein are forwardlooking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements, including those relating to 2025 and 2026 EPS guidance, long-term EPS and dividend growth rate objectives, future sales, future expenses, future tax rates, future operating performance, estimated base capital expenditures and financing plans, projected capital additions and forecasted annual revenue requirements with respect to rider filings, expected rate increases or refunds to customers, expectations and intentions regarding regulatory proceedings, expected pension contributions, and expected impact on our results of operations, financial condition and cash flows of interest rate changes, increased credit exposure, and legal proceeding outcomes, as well as assumptions and other statements are intended to be identified in this document by the words “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “objective,” “outlook,” “plan,” “project,” “possible,” “potential,” “should,” “will,” “would” and similar expressions. Actual results may vary materially. Forward-looking statements speak only as of the date they are made, and we expressly disclaim any obligation to update any forward-looking information. The following factors, in addition to those discussed in Xcel Energy’s Annual Report on Form 10-K for the fiscal year ended Dec. 31, 2024 and subsequent filings with the Securities and Exchange Commission, could cause actual results to differ materially from management expectations as suggested by such forward-looking information: operational safety, including our nuclear generation facilities and other utility operations; successful long-term operational planning; commodity risks associated with energy markets and production; rising energy prices and fuel costs; qualified employee workforce and third-party contractor factors; violations of our Codes of Conduct; our ability to recover costs and our subsidiaries’ ability to recover costs from customers; changes in regulation; reductions in our credit ratings and the cost of maintaining certain contractual relationships; general economic conditions, including recessionary conditions, inflation rates, monetary fluctuations, supply chain constraints and their impact on capital expenditures and/or the ability of Xcel Energy Inc. and its subsidiaries to obtain financing on favorable terms; availability or cost of capital; our customers’ and counterparties’ ability to pay their debts to us; assumptions and costs relating to funding our employee benefit plans and health care benefits; our subsidiaries’ ability to make dividend payments; tax laws; uncertainty regarding epidemics; effects of geopolitical events, including war and acts of terrorism; cybersecurity threats and data security breaches; seasonal weather patterns; changes in environmental laws and regulations; climate change and other weather events; natural disaster and resource depletion, including compliance with any accompanying legislative and regulatory changes; costs of potential regulatory penalties and wildfire damages in excess of liability insurance coverage; regulatory changes and/or limitations related to the use of natural gas as an energy source; challenging labor market conditions and our ability to attract and retain a qualified workforce; and our ability to execute on our strategies or achieve expectations related to environmental, social and governance matters including as a result of evolving legal, regulatory and other standards, processes, and assumptions, the pace of scientific and technological developments, increased costs, the availability of requisite financing, and changes in carbon markets.

BALANCED INVESTMENT THESIS

Regulated Utility that Consistently Delivers

- Met or exceeded earnings guidance for 20 consecutive years
- Dividend increases for 22 consecutive years
- Strong balance sheet and credit metrics

Resilient, Reliable and Affordable

- Average residential electric bills 28% below national average
- Five-year capital plan forecast keeps long-term customer bill growth at inflation
- Significant progress reducing system risk from extreme weather
- 57% reduction in carbon for electric operations

Transparent Long-Term Growth Plan

- Capital plan of \$60 billion, reflecting ~11% rate base CAGR from 2025 – 2030
- Balanced sales growth, including upside from data centers
- TSR of 10+%, reflecting 6-8+% EPS growth and ~3% dividend yield

WILDFIRE MITIGATION

WILDFIRE RISK MITIGATION STRATEGY

Aggressively deploy additional **situational awareness tools** – weather stations and AI cameras

Materially increase the number and **frequency of PSPS drills**

Rapidly develop more **mature meteorology, fire science, and risk modeling** capabilities

Investigate every ignition to ensure **risk-informed investment decisions**

Harden the system and deploy EPSS capabilities and system segmentation to reduce scope of PSPS customer impact

Pursue **State and Federal legislative outcomes** to protect our customers, and successfully conclude regulatory proceedings

Public facing mitigation plans in each of our states with approved plans in Colorado, New Mexico and Texas

RECENTLY APPROVED WILDFIRE MITIGATION & RESILIENCY PLANS

Updated Colorado Wildfire Mitigation Plan

- ~\$1.9 billion investment (Capital and O&M)
- Investments include:
 - 50 miles undergrounding
 - 165 miles small conductor replacement
 - 33 miles open wire / bare secondary conductor
 - 10K poles replaced
 - 82K overhead defect remediations
 - 125 miles of transmission line rebuilds
 - 300 EPSS reclosers
 - 135 AI-enabled cameras
 - 27K non-expulsion fuses
- Securitization mechanism for up to \$1.2 billion of proposed investments

Texas System Resiliency Plan

- ~\$495 million investment (Capital and O&M)
- Investments include:
 - 16K poles replaced or installed
 - 783 miles primary / small conductor replacement
 - 11 miles open wire / bare secondary conductor
 - 151 EPSS feeder upgrades
 - 68 AI-enabled cameras
 - 110 weather stations
 - Communications modernization (Private LTE)
- Deferral mechanism for distribution related costs

STATE AND FEDERAL POLICY

State

- Create authority for Wildfire Mitigation Plans and Public Safety Power Shutoffs
- Reform state tort law applicable to wildfires:
 - Legislation passed in Texas and North Dakota in 2025 with standard of care / prudence if following approved plan
- Develop cooperative plans with other local partners and industries
- Secure state programs for wildfire prevention
- Create backstop state fund

Federal

- Create federal fund as a liability backstop
- Address the broad scope of potential third party wildfire damages under state law
- Require wildfire mitigation plans to access federal fund
- Address insurance, federal lands and other associated issues

MARSHALL FIRE

- On September 23, 2025, Xcel Energy, Qwest and Teleport Communications America reached settlement agreements in principle that resolve all claims asserted by the subrogation insurers and individual plaintiffs
 - Definitive agreements will be executed with insurance carriers, who have authorized the settlement
 - Individual plaintiffs' attorneys, who have agreed to the settlement, are in process of executing individual settlement agreements with clients
- Xcel Energy expects to pay ~\$640 million related to the settlements; ~\$350 million of this will be funded by remaining insurance coverage
- Xcel Energy recognized a ~\$290 million (pre-tax), one-time charge to earnings as a result of these settlement agreements in the quarterly period ending September 30, 2025
- Xcel Energy disputes that its power lines caused the fire, and does not admit any fault or wrongdoing in connection with these settlement agreements

SMOKEHOUSE CREEK FIRE

- Our distribution poles appear to have been involved in an ignition of the Smokehouse Creek Fire and the smaller Reamer Fire (which burned into the Smokehouse Creek Fire)
 - We dispute claims that we acted negligently in maintaining and operating our infrastructure
 - We have established a claims process for those impacted by the Smokehouse Creek Fire
 - Resolved 212 of 254 claims received through claims process
 - Resolved 71 of 83 potential claims presented for mediation by parties represented by attorneys
 - 34 lawsuits filed. 21 have been settled or dismissed
 - Settlement signed with subrogation insurer plaintiffs in 2025 Q3
- \$410 million accrued as the low-end of range of estimated losses (liability based on current information and subject to change)
- \$361 million committed in finalized settlement agreements, of which \$219 million paid through 2025 Q3
- We have approximately \$500 million of insurance to cover potential 2024 policy period losses
- Xcel Energy is unable to reasonably estimate an upper end of the loss range due to unknown facts and legal considerations that may impact the potential liability

FINANCIAL SUPPLEMENT

FINANCING PLAN 2026 – 2030*

\$ Millions

* Financing plans reflect tax credit transferability and are subject to change. Impact from planned 2029 securitization in Colorado reflected in lower capital spend

** Cash from operations is net of dividends and pension funding
Additional capital investment above the Base Plan would be funded with approximately 40% equity and 60% debt

Credit metrics based on base capital forecast, include tax credit transferability, and do not reflect rating agency adjustments. The FFO/Debt and Debt/EBITDA ratios are non-GAAP financial measures. FFO is generally calculated as GAAP-basis net cash provided by operating activities, adjusted for working capital and other items. EBITDA is generally calculated as GAAP-basis net income before interest, taxes, depreciation and amortization. Due to the forward-looking nature of these measures, Xcel Energy is unable to provide a reconciliation of these measures to the corresponding GAAP measures.
