AMBAC - COMPANY OVERVIEW

Ambac Financial Group, Inc. is a financial services holding company whose subsidiaries include Ambac Assurance Corporation, a guarantor of public finance and structured finance obligations in run-off. AFG's common stock trades on the New York Stock Exchange under the symbol "AMBC"

MISSION

- Optimize our business and its components to achieve maximum return for shareholders
- Aggressively pursue financially sound strategies to reduce risk and decrease the size of the insured portfolio

VISION

- Transition to a growth-oriented platform sufficiently capitalized to support businesses that are synergistic with Ambac's core competencies

VALUES

- Culture of respect, inclusion, collaboration and transparency
- Attract, retain and reward top performers who meet standards of excellence, integrity and collaboration

(1) Common Stock Market Cap based on AMBC common shares outstanding at the closing stock price of $13.04 on 8/3/2020
(2) Par throughout this presentation includes capital appreciation bonds, which are reported as the par amount at issuance of the policy, as opposed to the current accreted value of the bonds

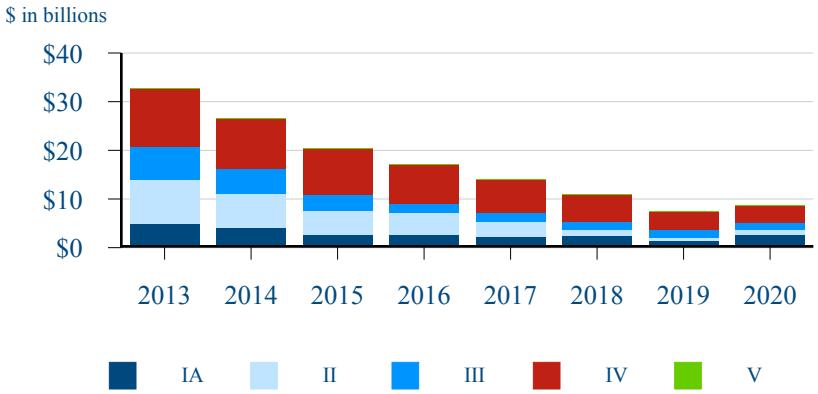

AMBAC STRATEGIC PRIORITIES

- Active runoff of Ambac Assurance and its subsidiaries through transaction terminations, policy commutations, reinsurance, settlements and restructurings, with a focus on our watch list credits and known and potential future Adversely Classified Credits ("ACC"), that we believe will improve our risk profile, and maximizing the risk-adjusted return on invested assets
- Ongoing rationalization of Ambac's and its subsidiaries' capital and liability structures
- Loss recovery through active litigation management and exercise of contractual and legal rights
- Ongoing review of the effectiveness and efficiency of Ambac's operating platform
- Evaluation of opportunities in certain business sectors that meet acceptable criteria that will generate long-term stockholder value with attractive risk-adjusted returns

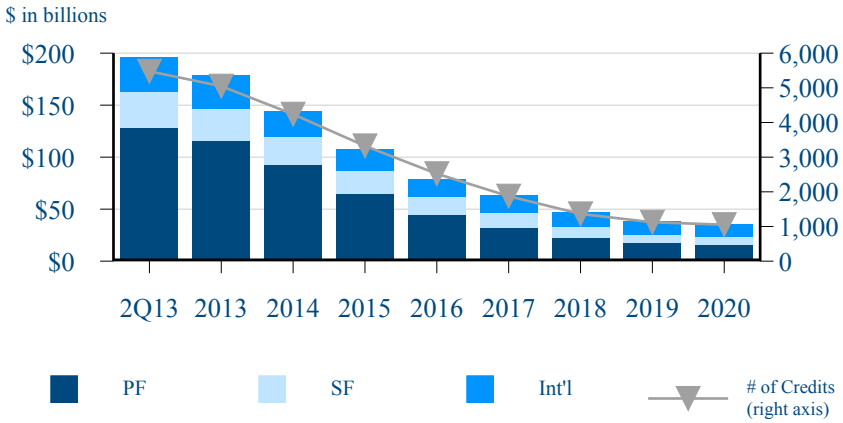

RISK MANAGEMENT – REDUCING INSURED LEGACY EXPOSURES

Natural run-off of exposure is complemented by proactive de-risking activities focused on reducing Adversely Classified and Watch List Credits…

2Q2020 FINANCIAL OVERVIEW

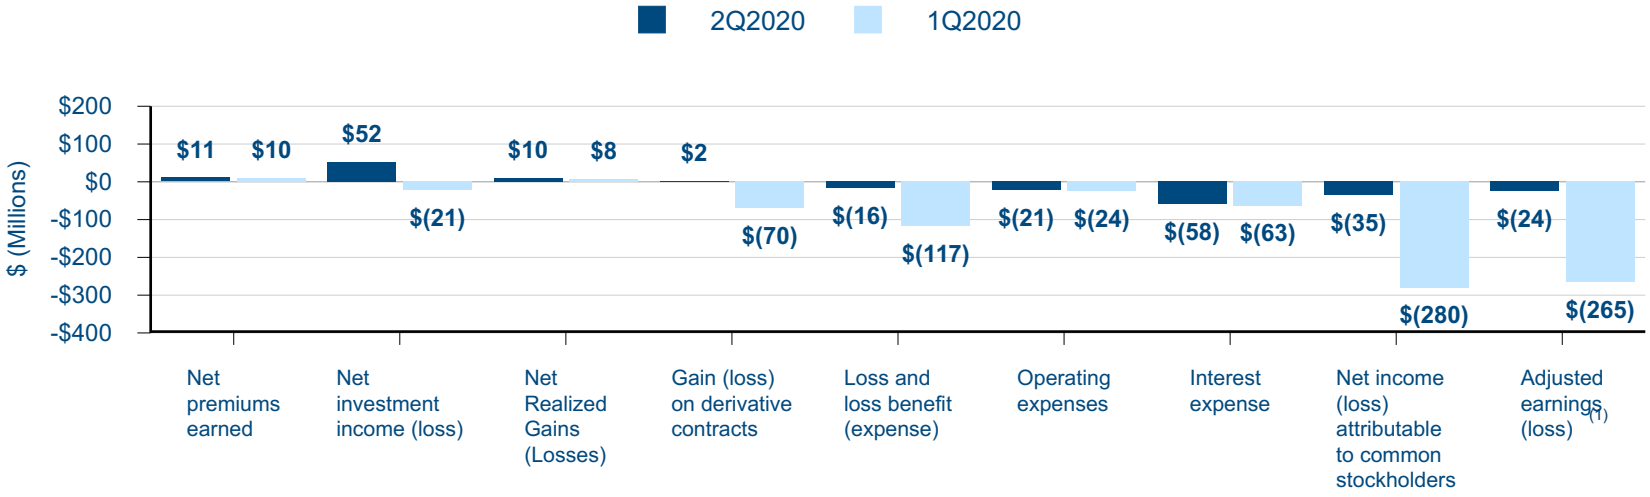

- **Net loss attributable to common stockholders for the 2Q2020 was $(35) million compared to $(280) million in 1Q2020**
  - **The lower net loss for the 2Q20 compared to the 1Q20 included lower loss and loss expenses and reflected the impact of the partial reversal of the 1Q20 financial market disruption. Improvements in the financial markets were driven by lower market risk premiums causing a sharp improvement in investment valuations. This was the primary influence of higher investment income and gains on derivative contracts for 2Q20**

($ in millions, except per share amounts)	2Q2020	1Q2020
Net income (loss) attributable to common stockholders	$ (35)	$ (280)
Net income (loss) per diluted share	$ (0.77)	$ (6.07)
Adjusted earnings (loss) [1]	$ (24)	$ (265)
Adjusted earnings (loss) per diluted share	$ (0.52)	$ (5.75)
Total Ambac Financial Group Inc. stockholders' equity (Book value)	$ 1,069	$ 1,002
Book value per share	$ 23.34	$ 21.88
Adjusted book value [1]	$ 965	$ 1,012
Adjusted book value per share	$ 21.06	$ 22.11

(1) Adjusted earnings and adjusted book value are non-GAAP financial measures of financial performance or financial position that excludes (or includes) amounts that are included in (or excluded from) net income attributable to common stockholders for Adjusted Earnings and Total Ambac Financial Group, Inc. stockholders' equity for Adjusted Book Value. A reconciliation between both financial measures can be found in Ambac's 2Q2020 Earnings Release included in Ambac's Current Report on Form 8-K filed with the SEC on August 6, 2020, and at the end of this document

2Q2020 vs 1Q2020 - KEY FINANCIAL RESULTS

- **Net investment gains were $52 million, driven by mark-to-market gains within Ambac's pooled investment funds and investment income from available-for-sale securities**
- **Net realized investment gains were $10 million for the 2Q20 and $8 million for 1Q20 primarily driven by the sale of certain available-for-sale securities and foreign exchange gains for both periods**
- **Net gains on derivative contracts was $2 million included $8 million of positive counterparty credit adjustments driven by narrowing counterparty credit spreads**
- **Loss and loss expense was $16 million driven by Public Finance partially offset by a benefit in RMBS**
- **Interest expense decreased $5 million in 2Q20 from 1Q20 as a result of the partial redemption of $77 million of the Ambac Note in 1Q20, lower reset rates during 2Q20 on the Ambac Note and and lower discount accretion on surplus notes**

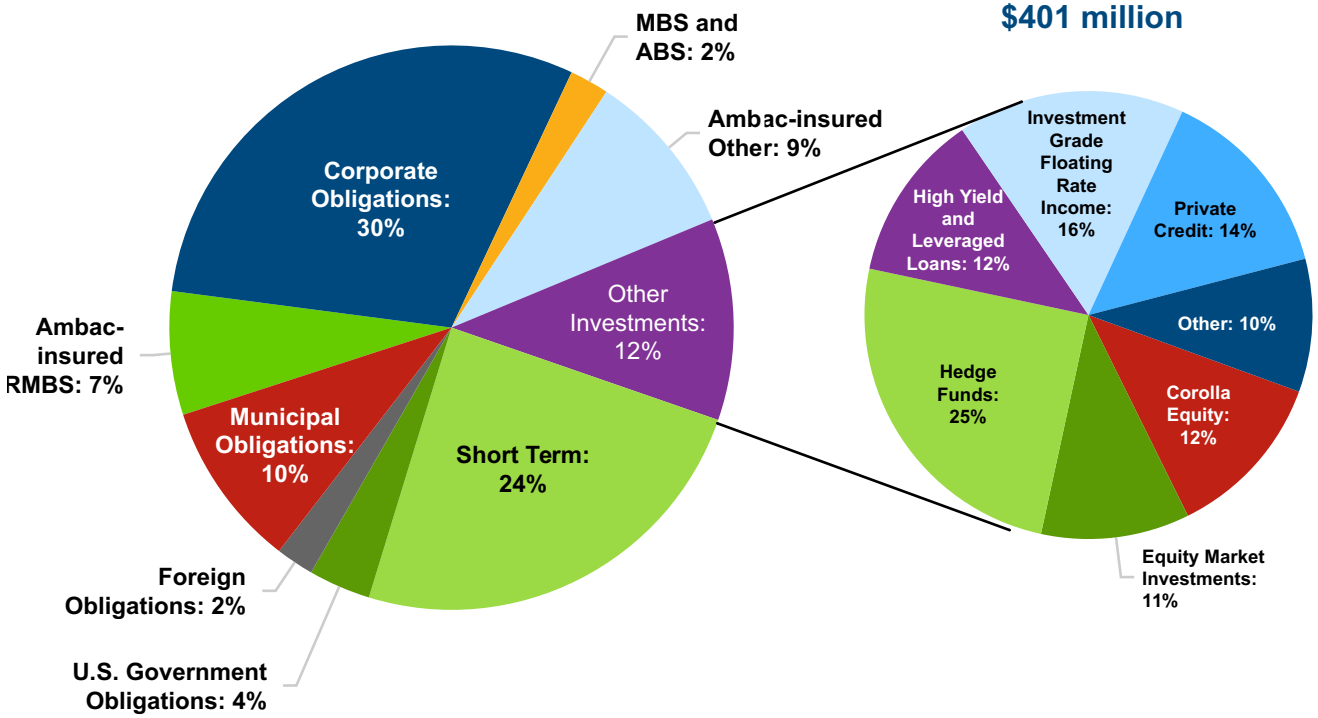

(1) Adjusted earnings (loss) is a non-GAAP financial measure of financial position that excludes (or includes) amounts that are included in (or excluded from) net income which is presented in accordance with GAAP. A reconciliation to Net income (loss) attributable to common shareholders can be found in Ambac's 2Q2020 Earnings Release, included in Ambac's Current Report on Form 8-K filed with the SEC on August 6, 2020 and at the end of this document

INVESTMENT PORTFOLIO PHILOSOPHY AND OBJECTIVES

Investment Philosophy

- Diversified portfolio
- Active asset and liability management
- Optimize risk-adjusted returns

Total Portfolio - $3.5 billion

Other Investments - $401 million

Investment Objectives

AAC & Ambac UK

- Achieve highest risk adjusted rate of return on a diversified portfolio of primarily Fixed Income and Pooled Investment Funds
- To ensure financial obligations are met as they fall due including policyholder claims

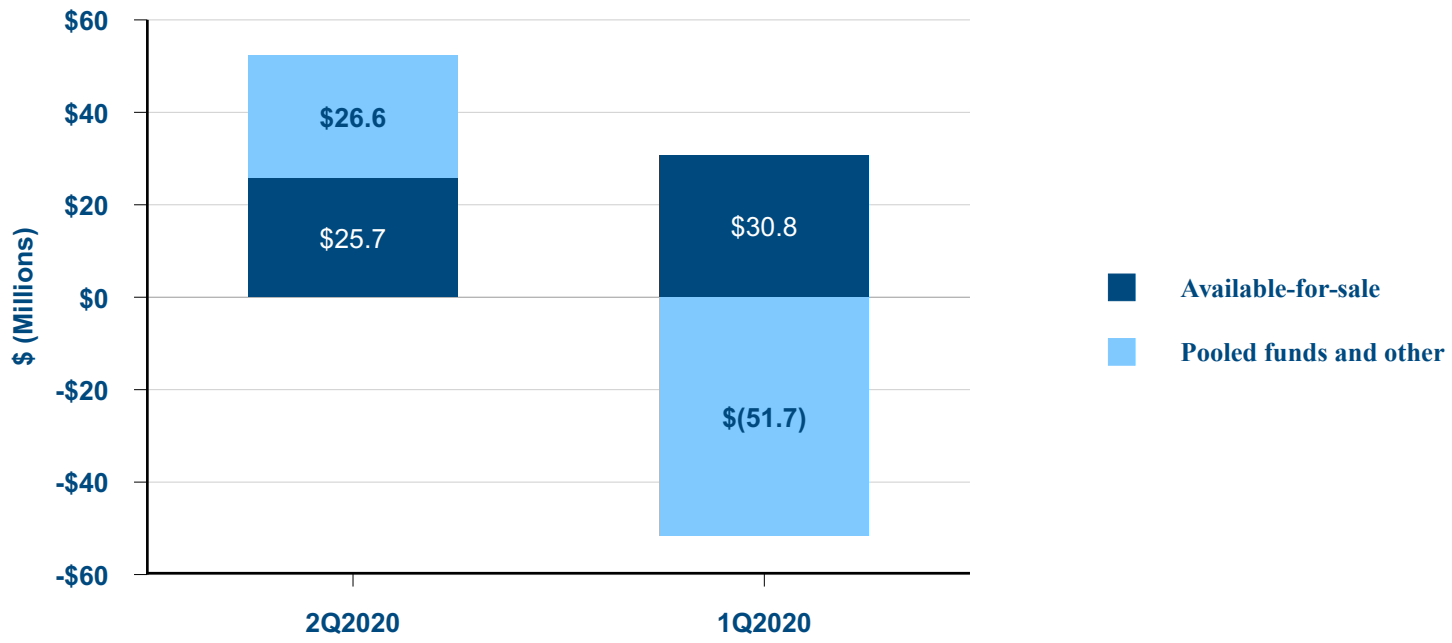

AFG

- To preserve capital and liquidity for strategic uses while maximizing income

NET INVESTMENT INCOME (LOSS)

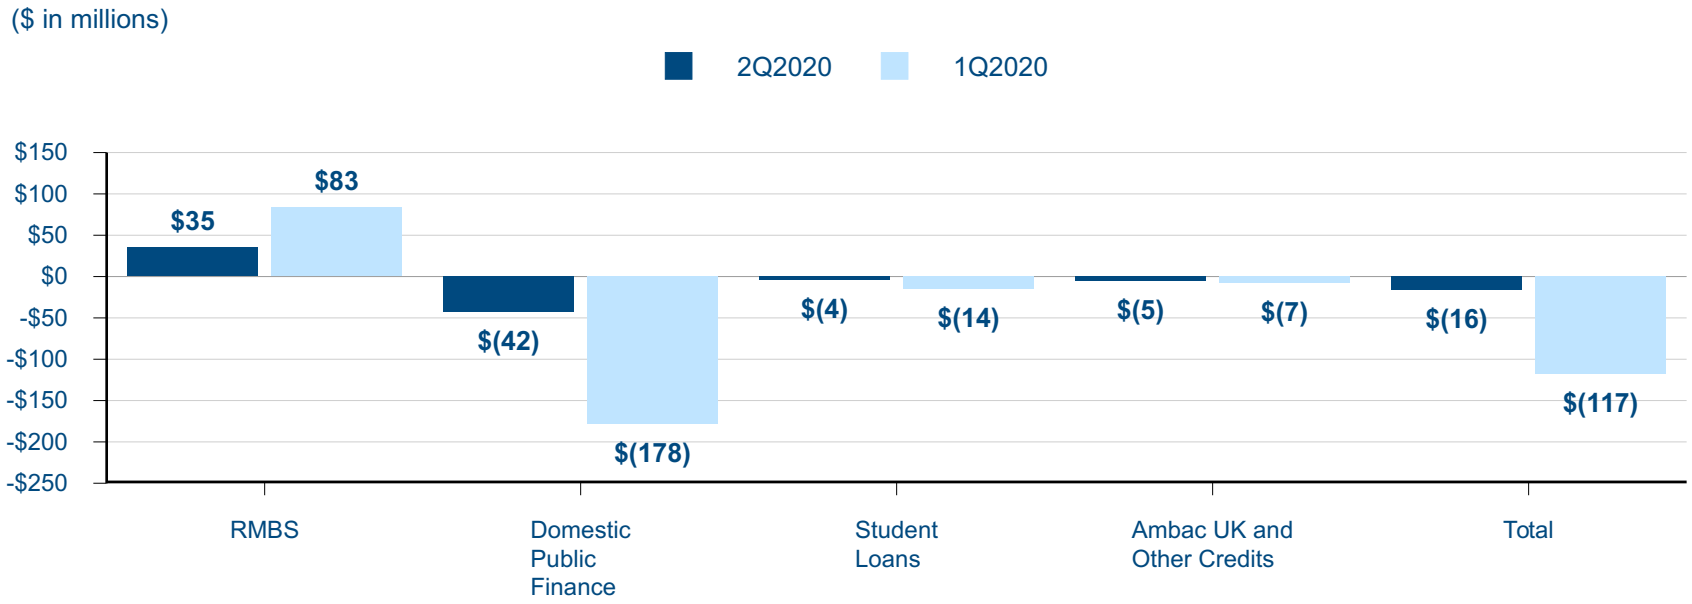

Net investment income for 2Q20 was $52 million, compared to a loss of $(21) million for 1Q20

- Gains on pooled investment funds of $27 million in 2Q20 compared to a loss of $(52) million in 1Q20 were driven by the partial recovery of fair value losses reported in 1Q20
- Lower investment income from available-for-sale securities of $26 million compared to $31 million in 1Q20 was driven mostly by lower interest rates on short-term and floating rate investments, redemptions of secured notes issued by Ambac LSNI included in Ambac's investment portfolio, and sales of certain securities early in in the quarter

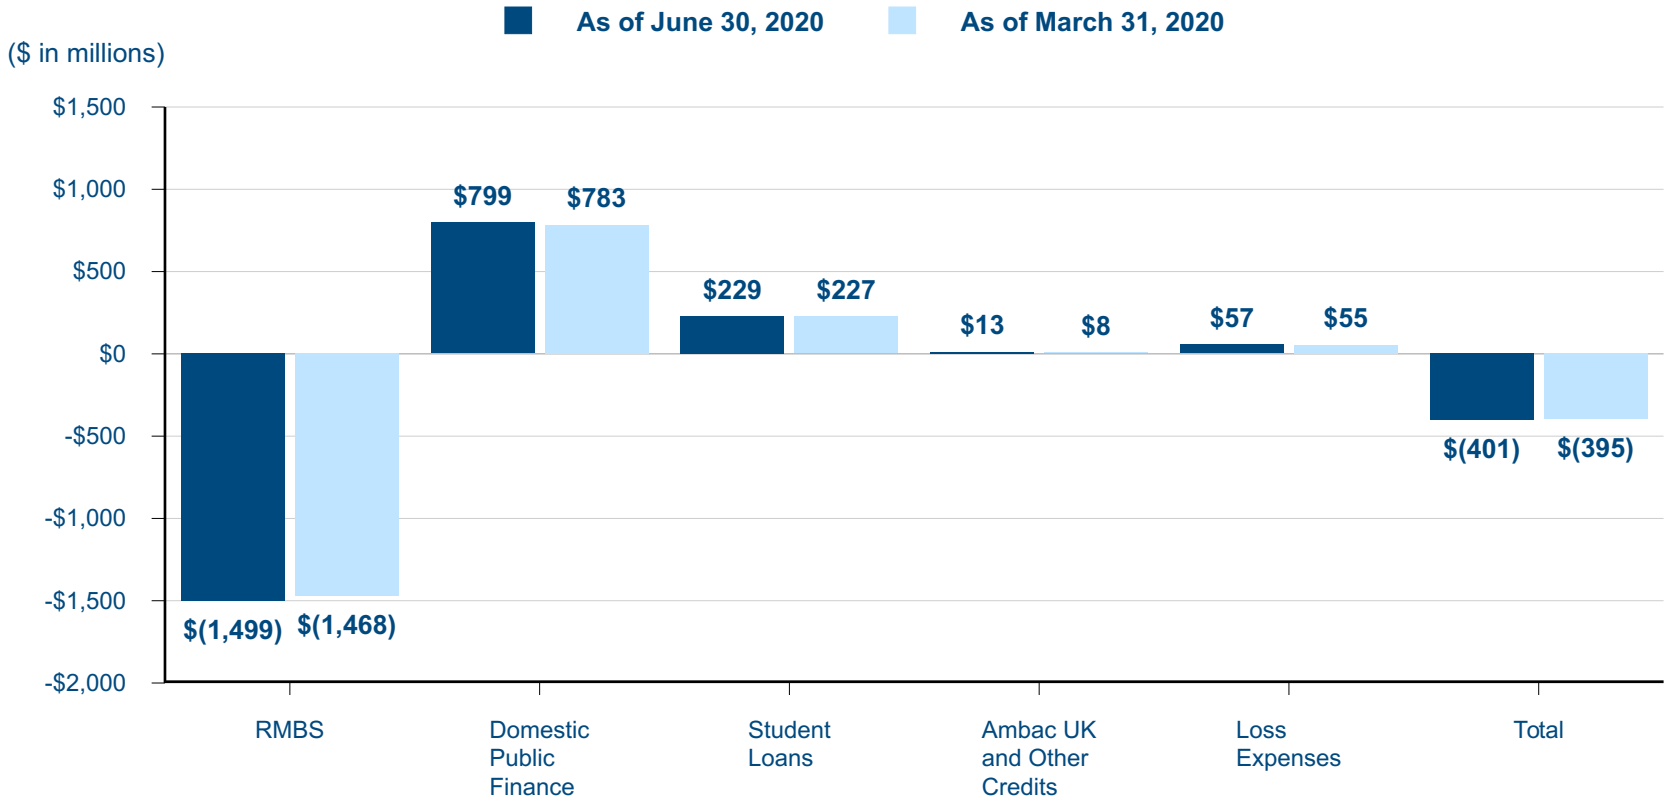

INCURRED (LOSSES) BENEFIT BY CATEGORY[1] - 2Q2020 vs 1Q2020

- **RMBS benefit of $35 million in 2Q2020 was a result of the favorable impact of lower interest rates on expected excess spread and better than forecasted credit factors, partially offset by higher loss expenses**
- **Domestic Public Finance losses of $42 million in 2Q2020 were largely due to an increase in Puerto Rico reserves driven by assumption changes and higher loss expenses**

(1) Components may not add to total due to rounding

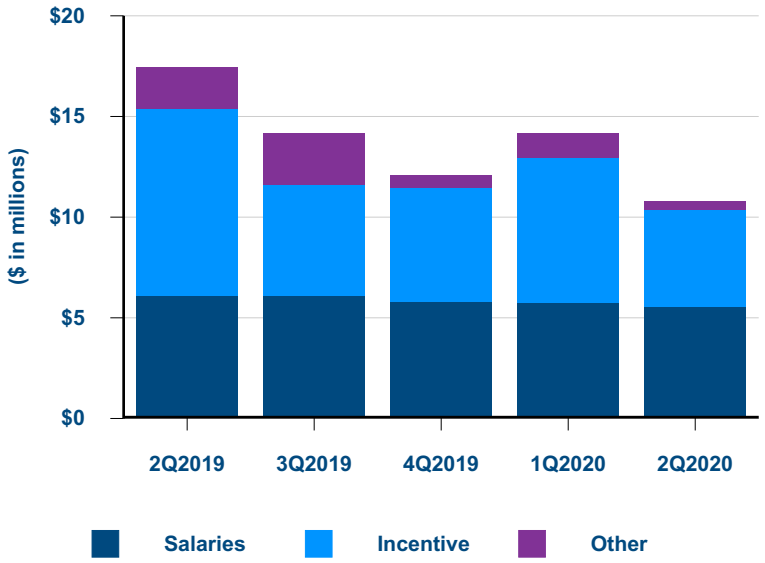

GROSS LOSS RESERVES BY CATEGORY[1]

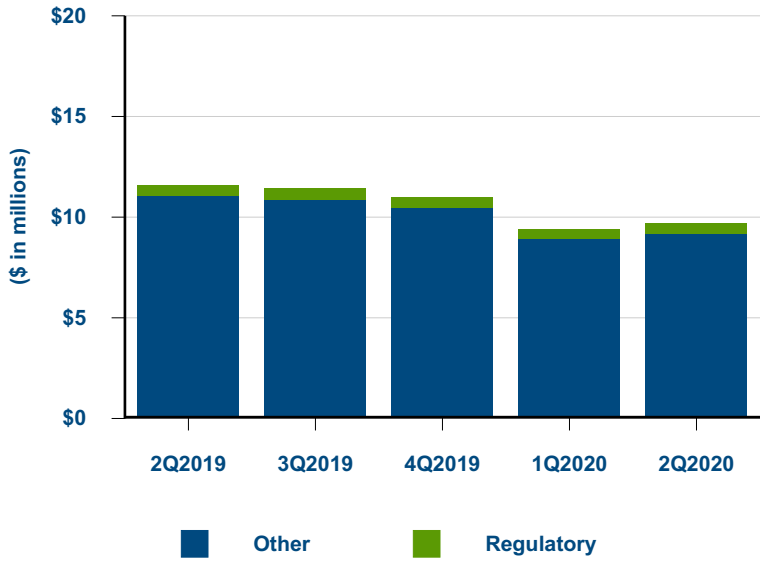

(1) Gross loss reserves are net of estimated R&W subrogation recoveries of $1.757 billion and $1.764 billion as of June 30, 2020 and March 31, 2020, respectively, and other subrogation recoveries of $0.8 billion as of June 30, 2020 and March 31, 2020.

EXPENSE MANAGEMENT

Compensation Expense

Non-Compensation Expenses

- **Compensation expense decreased $3.4 million in 2Q2020 to $10.8 from 1Q2020 due to 1Q2020 cyclical compensation costs, lower headcount and lower incentive compensation accruals**
- **Non-compensation expenses increased $0.3 million in 2Q2020 to $9.7 from 1Q2020**

NON-GAAP RECONCILIATIONS

AMBAC NON-GAAP FINANCIAL DATA

Non-GAAP Financial Data

Included in this presentation, the Company reports two non-GAAP financial measures: Adjusted Earnings and Adjusted Book Value. A non-GAAP financial measure is a numerical measure of financial performance or financial position that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. We are presenting these non-GAAP financial measures because they provide greater transparency and enhanced visibility into the underlying drivers of our business. Adjusted Earnings and Adjusted Book Value are not substitutes for the Company's GAAP reporting, should not be viewed in isolation and may differ from similar reporting provided by other companies, which may define non-GAAP measures differently

Adjusted Earnings [(1) (2)]

The following table reconciles net income attributable to common stockholders to the non-GAAP measure, adjusted earnings, for the periods listed:

Forward Looking Statement

In this presentation, we have included statements that may constitute "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Words such as "estimate," "project," "plan," "believe," "anticipate," "intend," "planned," "potential" and similar expressions, or future or conditional verbs such as "will," "should," "would," "could," and "may," or the negative of those expressions or verbs, identify forward-looking statements. We caution readers that these statements are not guarantees of future performance. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, which may by their nature be inherently uncertain and some of which may be outside our control. These statements may relate to plans and objectives with respect to the future, among other things which may change. We are alerting you to the possibility that our actual results may differ, possibly materially, from the expected objectives or anticipated results that may be suggested, expressed or implied by these forward-looking statements. Important factors that could cause our results to differ, possibly materially, from those indicated in the forward-looking statements include, among others, those discussed under "Risk Factors" in our most recent SEC filed quarterly or annual report.

Any or all of management's forward-looking statements here or in other publications may turn out to be incorrect and are based on management's current belief or opinions. Ambac's actual results may vary materially, and there are no guarantees about the performance of Ambac's securities. Among events, risks, uncertainties or factors that could cause actual results to differ materially are: (1) the highly speculative nature of AFG's common stock and volatility in the price of AFG's common stock; (2) uncertainty concerning the Company's ability to achieve value for holders of its securities, whether from Ambac Assurance Corporation ("Ambac Assurance") and its subsidiaries or from transactions or opportunities apart from Ambac Assurance and its subsidiaries, including new business initiatives; (3) changes in Ambac's estimated representation and warranty recoveries or loss reserves over time; (4) failure to recover claims paid on Puerto Rico exposures or incurrence of losses in amounts higher than expected; (5) adverse effects on AFG's share price resulting from future offerings of debt or equity securities that rank senior to AFG's common stock; (6) potential of rehabilitation proceedings against Ambac Assurance; (7) dilution of current shareholder value or adverse effects on AFG's share price resulting from the issuance of additional shares of common stock; (8) inadequacy of reserves established for losses and loss expenses and possibility that changes in loss reserves may result in further volatility of earnings or financial results; (9) increased fiscal stress experienced by issuers of public finance obligations or an increased incidence of Chapter 9 filings or other restructuring proceedings by public finance issuers, including an increased risk of loss on revenue bonds of distressed public finance issuers due to judicial decisions adverse to revenue bond holders; (10) Ambac's inability to realize the expected recoveries included in its financial statements; (11) insufficiency or unavailability of collateral to pay secured obligations; (12) credit risk throughout Ambac's business, including but not limited to credit risk related to residential mortgage-backed securities, student loan and other asset securitizations, public finance obligations (including obligations of the Commonwealth of Puerto Rico and its instrumentalities and agencies) and exposures to reinsurers; (13) credit risks related to large single risks, risk concentrations and correlated risks; (14) the risk that the Ambac's risk management policies and practices do not anticipate certain risks and/or the magnitude of potential for loss; (15) risks associated with adverse selection as Ambac's insured portfolio runs off; (16) adverse effects on operating results or the Company's financial position resulting from measures taken to reduce risks in its insured portfolio; (17) disagreements or disputes with Ambac's insurance regulators; (18) our inability to mitigate or remediate losses, commute or reduce insured exposures or achieve recoveries or investment objectives, or the failure of any transaction intended to accomplish one or more of these objectives to deliver anticipated results; (19) Ambac's substantial indebtedness could adversely affect its financial condition and operating flexibility; (20) Ambac may not be able to obtain financing or raise capital on acceptable terms or at all due to its substantial indebtedness and financial condition; (21) Ambac may not be able to generate the significant amount of cash needed to service its debt and financial obligations, and may not be able to refinance its indebtedness; (22) restrictive covenants in agreements and instruments may impair Ambac's ability to pursue or achieve its business strategies; (23) loss of control rights in transactions for which we provide insurance due to a finding that Ambac has defaulted; (24) the impact of catastrophic environmental or natural events, including catastrophic public health events like the COVID-19 pandemic, on significant portions of our insured and investment portfolios; (25) adverse tax consequences or other costs resulting from the characterization of Ambac Assurance's surplus notes or other obligations as equity; (26) risks attendant to the change in composition of securities in Ambac's investment portfolio; (27) changes in prevailing interest rates; (28) the expected discontinuance of the London Inter-Bank Offered Rate; (29) factors that may influence the amount of installment premiums paid to Ambac; (30) default by one or more of Ambac 's portfolio investments, insured issuers or counterparties; (31) market risks impacting assets in the Ambac's investment portfolio or the value of our assets posted as collateral in respect of interest rate swap transactions; (32) risks relating to determinations of amounts of impairments taken on investments; (33) the risk of litigation and regulatory inquiries or investigations, and the risk of adverse outcomes in connection therewith, which could have a material adverse effect on Ambac's business, operations, financial position, profitability or cash flows; (34) actions of stakeholders whose interests are not aligned with broader interests of Ambac's stockholders; (35) system security risks, data protection breaches and cyber attacks; (36) changes in accounting principles or practices that may impact Ambac's reported financial results; (37) the economic and regulatory impact of "Brexit"; (38) operational risks, including with respect to internal processes, risk and investment models, systems and employees, and failures in services or products provided by third parties; (39) Ambac's financial position that may prompt departures of key employees and may impact the its ability to attract qualified executives and employees; (40) fluctuations in foreign currency exchange rates could adversely impact the insured portfolio in the event of loss reserves or claim payments denominated in a currency other than US dollars and the value of non-US dollar denominated securities in our investment portfolio; and (41) other risks and uncertainties that have not been identified at this time.

ABOUT AMBAC
