About Ambac

Ambac Financial Group, Inc. ("Ambac" or "AFG"), headquartered in New York City, is a financial services holding company whose principal subsidiaries, Ambac Assurance Corporation and Ambac Assurance UK Limited, are financial guarantee insurance companies currently in runoff. Outstanding policies include financial guarantees of public finance and structured finance obligations in the public and private sectors globally. Ambac's common stock trades on the New York Stock Exchange under the symbol "AMBC". The Amended and Restated Certificate of Incorporation of Ambac contains substantial restrictions on the ability to transfer Ambac's common stock. Subject to limited exceptions, any attempted transfer of common stock shall be prohibited and void to the extent that, as a result of such transfer (or any series of transfers of which such transfer is a part), any person or group of persons shall become a holder of 5% or more of Ambac's common stock or a holder of 5% or more of Ambac's common stock increases its ownership interest. Ambac is committed to providing timely and accurate information to the investing public, consistent with our legal and regulatory obligations. To that end, we use our website to convey information about our businesses, including the anticipated release of quarterly financial results, quarterly financial, statistical and business-related information, and the posting of updates to the status of certain residential mortgage backed securities litigations. (1) In addition to reporting Ambac's financial results in accordance with GAAP, Ambac reports two non-GAAP financial measures: Adjusted Earnings and Adjusted Book Value. A non-GAAP financial measure is a numerical measure of financial performance or financial position that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. We are presenting these non-GAAP financial measures because they provide greater transparency and enhanced visibility into the underlying drivers of our business. Adjusted Earnings and Adjusted Book Value are not substitutes for Ambac's GAAP reporting, should not be viewed in isolation and may differ from similar reporting provided by other companies, which may define non-GAAP measures differently.

(2) Per diluted share ("P.D.S.") and per share outstanding at balance sheet date ("P.S.").

(1) Reductions/(increases) to normal insurance premiums earned for changes in allowance for credit losses on premium receivables were $2 and $2 for the first and second quarter of 2020, respectively, and $0, $1, $6 and ($5) for the first, second, third and fourth quarters of 2019, respectively.

(2) Represents unearned premium amounts for both upfront and installment paying policies, net of deferred ceded premiums, which is reported separately as an asset on Ambac's Consolidated Balance Sheet. Depicts amortization of existing guaranteed portfolio, assuming no advance refunding as of June 30, 2020. Actual future installments may differ from estimated because borrowers may have the right to call or terminate a transaction or the guaranteed obligation may be subject to prepayment. The unearned premium amortization disclosed in the above table considers the use of contractual lives for many bond types that do not have homogeneous pools of underlying collateral, which may result in different unearned premium than if expected lives were considered. Therefore, if installment paying policies are retired early, premium earnings may be negative in the period of call or refinancing.

(3) Represents management's estimate of fees on credit derivative contracts and future installment premium collections, net of reinsurance. Actual premium collections may differ from estimated because borrowers may have the right to call or terminate a transaction or the guaranteed obligation may be subject to prepayment. Estimated net future installments exclude amounts eliminated as a result of consolidating variable interest entities ("Consolidated VIE") as required under the Consolidations Accounting Standard.

(4) Estimated net future installment amounts eliminated under the U.S. GAAP Consolidations Accounting Standard; not included in Estimated Net Future Installments.

Duration of Ambac Assurance and Subsidiaries fixed-income investment portfolio [3]	**3.7**

(1) Yield to maturity refers to the rate of interest to be earned over the remaining life of the fixed-income investments based on book value. For mortgage and other asset-backed securities remaining life is calculated using estimated future cash flows. For floating rate positions, yield to maturity is based on the current interest rate and not forward rates.

(2) Includes secured notes with a carrying value of $467 and amortized cost of $473 that were issued by Ambac LSNI, an unconsolidated special purpose entity, in connection with the Rehabilitation Exit Transactions.

(3) Excluded from the measure of duration are Ambac insured bonds that have underlying Ambac internal ratings of BIG and Ambac Assurance holdings of the secured notes issued by Ambac LSNI in connection with the Rehabilitation Exit Transactions. These securities represent 44% of the fair value of Ambac Assurance and Subsidiaries' fixed income investment portfolio of $2,374 at June 30, 2020.
