About Arcus Biosciences

Arcus Biosciences is a clinical-stage, global biopharmaceutical company focused on developing differentiated molecules and combination therapies for the treatment of cancer and immune diseases. Founded in 2015, Arcus pairs proven biology with exceptional chemistry to create medicines that deliver meaningful improvements for patients. The company has advanced two oncology programs to Phase 3 clinical trials, including casdatifan, a HIF-2α inhibitor for clear cell renal cell carcinoma, and quemliclustat, a small-molecule CD73 inhibitor for pancreatic cancer. Arcus is also applying its small-molecule, medicinal chemistry and antibody capabilities to expand into immunology. Every program is held to the highest standard: outperform the current standard of care.
