

NEWS RELEASE

Arcus Biosciences to Present at Upcoming Investor Conferences

8/21/2019

HAYWARD, Calif--(BUSINESS WIRE)-- Arcus Biosciences, Inc. (NYSE:RCUS), a clinical-stage biopharmaceutical company focused on creating innovative cancer immunotherapies, today announced that the Company will participate in the following upcoming investor conferences:

- Citi's 14th Annual Biotech Conference on Wednesday, September 4, 2019, at 9:30 am Eastern Time in Boston. Terry Rosen, Ph.D., Chief Executive Officer, will participate in a panel discussion entitled, "New Targets in Cancer Immunotherapy and the Tumor Microenvironment."
- Morgan Stanley 17th Annual Global Healthcare Conference on Tuesday, September 10, 2019, at 11:10 am Eastern Time in New York. Terry Rosen, Ph.D., Chief Executive Officer, will participate in a fireside chat.

A live audio webcast of each presentation will be available by visiting the "Investors" section of the Arcus website at www.arcusbio.com. A replay of the webcasts will be available for 30 days following the live event.

About Arcus Biosciences

Arcus Biosciences is a clinical-stage biopharmaceutical company focused on creating innovative cancer therapies. Arcus has several programs targeting important oncology/immuno-oncology pathways, including a dual adenosine receptor antagonist, AB928, which is in a Phase 1/1b program to evaluate AB928 in combination with other agents in multiple tumor types, and an anti-PD-1 antibody, AB122, which is progressing into a Phase 1b trial in biomarker-selected patients. AB122 is expected to form the backbone for many of Arcus's intra-portfolio combinations. Arcus's other programs include AB154, an anti-TIGIT antibody, which is being evaluated in a Phase 1 trial as monotherapy

and in combination with AB122, and AB680, a small-molecule inhibitor of CD73, which is progressing into a Phase 1/1b trial in patients with pancreatic cancer. Arcus has extensive in-house expertise in medicinal chemistry, oncology, immunology, biochemistry, pharmacology and structural biology. Utilizing these unique capabilities, Arcus has developed a robust and active early-stage discovery effort focused on small-molecule pipeline expansion.
