CalAmp and Commonwealth of Pennsylvania Partner to Streamline Fleet Operations

1/18/2018

CalAmp FleetOutlook delivers data to drive most efficient use of state-owned vehicles

IRVINE, Calif., Jan. 18, 2018 /PRNewswire/ -- CalAmp (Nasdaq: CAMP), a telematics pioneer leading transformation in a global connected economy, and the Commonwealth of Pennsylvania's Bureau of Vehicle Management (BVM) today announced an initiative to reduce costs and streamline the operations of the state-owned vehicle fleets through the deployment of CalAmp's **FleetOutlook™**.

The Commonwealth's BVM oversees approximately 11,000 passenger, emergency and off-road vehicles and is responsible for ensuring the most efficient use of taxpayer resources. FleetOutlook will be deployed on nearly half its vehicles across the state in an effort to gain better insights into vehicle utilization and operational status in order to increase efficiency, proactively address maintenance issues and protect against vehicle theft. Driver assistance and real-time accident alerts are FleetOutlook capabilities that BVM will be leveraging to further encourage good driving behavior and improve worker safety.

"Understanding fleet utilization by gaining actionable intelligence is a valuable first step for government fleet operators to make more informed decisions about their vehicles and identify opportunities for efficiency gains," said Paul Washicko, senior vice president and general manager of CalAmp's Software and Subscription Services business. "FleetOutlook will help BVM save operating expenses and optimize operations of Pennsylvania's state-owned vehicles."

"We look forward to implementing CalAmp's IoT technologies in our efforts to improve the safety and management of the Commonwealth's vehicles fleet," said James Fiore, director, Pennsylvania Department of General Services, Bureau of Vehicle Management. "Pennsylvania has been able to achieve a high level of success when it comes to

the management of our fleet. We believe FleetOutlook's reporting, analysis and management features will complement our current systems and help us to continue our efforts through an easy-to-use platform that will enable us to collect and analyze data that will assist in making improvement decisions regarding fleet utilization, fuel cost savings and safer operation of our vehicles."

About CalAmp

CalAmp (Nasdaq: CAMP) is a telematics pioneer leading transformation in a global connected economy. We help reinvent businesses and improve lives around the globe with technology solutions that streamline complex IoT deployments and bring intelligence to the edge. Our software applications, scalable cloud services, and intelligent devices collect and assess business-critical data from mobile assets, cargo, companies, cities and people. We call this The New How, powering autonomous IoT interaction, facilitating efficient decision making, optimizing resource utilization, and improving road safety. CalAmp is headquartered in Irvine, California and has been publicly traded since 1983. LoJack is a wholly owned subsidiary of CalAmp.
