Cryptography Research's Ben Jun to Participate in Expert Panel at Amphion Forum 2012

SAN FRANCISCO--(BUSINESS WIRE)-- Cryptography Research, Inc.:

Who: Ben Jun, vice president and chief technology officer at Cryptography Research, Inc.

Where: The Amphion Forum
Grand Hyatt San Francisco
San Francisco, Calif.

When: Wednesday, December 5, 2012

Ben Jun, vice president and chief technology officer of Cryptography Research, Inc. (CRI), a division of Rambus (NASDAQ:RMBS), will participate in an expert panel at [The Amphion Forum 2012](#).

Jun will provide his extensive expertise on the panel, "2013 — When Devices Take Over." The session, in line with the overall theme of the show, will cover security implications of the "Internet of Things," which now covers the billions of devices worldwide that are connected to the Internet. It will be held on Wednesday, December 5 at 8:30 a.m. PT, at the Grand Hyatt San Francisco.

Joining Jun on the panel will be Lee Cocking, vice president of corporate strategy at Fixmo, David Kleidermacher, CTO of Green Hills Software, and Daniel Shugrue, principal product manager of RSA. The panel will be moderated by Adrian Turner, CEO of Mocana.

CRI is also exhibiting and will be demonstrating and discussing its differential power analysis (DPA) countermeasures. Executives at the show are also available to discuss issues around cloning, embedded device security, and the overall implications of the "Internet of Things."
