Littelfuse to Host Webinar: How to Prevent Electrocutions with Industrial GFCI's

CHICAGO, September 4, 2013, - Littelfuse, Inc., the global leader in circuit protection, together with Plant Services Magazine invites plant engineers, consulting specifying engineers and maintenance professionals to join our webinar, "How to Prevent Electrocutions with Industrial GFCI's." Littelfuse P.E., Tony Locker, will discuss the new UL 934C Standard for Industrial GFCI's, classifications and how and where to apply these devices to protect workers against electrocution. The webinar will take place on Tuesday, September, 10, 2013 at 2 pm EST.

Attendees will learn:

- New UL standards for GFCI's in industrial applications
- Advances in industrial GFCI technology
- Where and how to install GFCI's, including the SB6100 Industrial Shock-Block
- The major differences between Ground Fault Relays (GFRs) and Ground Fault Circuit Interrupters (GFCIs) and how GFCI's better protect against electrocution
- Case studies on how industrial GFCIs improve safety

There is no charge for the webinar and after the presentation, attendees will have the opportunity to ask questions in a live Q&A session.

To register for this webinar visit http://www.plantservices.com/webcasts/2013.html

About the presenter
Tony Locker, PE., is the Manager, Product Management for Littelfuse protection relays. He received his BSEE from Rose-Hulman Institute of Technology in 1995 and his MSEE from the Georgia Institute of Technology in 2005. Prior to joining Littelfuse, he held various technical and management positions with several resistor companies, specializing in the coordination and protection of power systems. Locker is active in the IAS and PES of IEEE, where he serves on several subcommittees and working groups. He is a registered Professional Engineer in Ohio and has two patents.

About Littelfuse
Founded in 1927, Littelfuse is the world leader in circuit protection with growing global platforms in power control and sensing. The company serves global customers in the electronics, automotive and industrial markets with technologies including fuses, semiconductors, polymers, ceramics, relays and sensors. Littelfuse has over 7,000 employees in more than 35 locations throughout the Americas, Europe and Asia. For more information, please visit the Littelfuse website: littelfuse.com.
