Non-Solicitation

This communication shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Use of Non-GAAP (Adjusted) Financial Measures

The information provided in this presentation includes the non-GAAP financial measure Adjusted Earnings per Share. This non-GAAP financial measure excludes the effect of certain expenses and income not related directly to the underlying performance of fundamental business operations and should not be considered in isolation or a substitute for the comparable GAAP measure. A reconciliation of this non-GAAP financial measure to the most directly comparable GAAP measure is included in the appendix of this presentation.

Management believes that Adjusted Earnings per Share provides useful information to investors regarding operational performance because it enhances an investor's overall understanding of core financial performance and facilitates comparisons to historical results of operations, by excluding items that are not related directly to the underlying performance of fundamental business operations or were not part of business operations during a comparable period. Management believes that this non-GAAP financial measure is commonly used by financial analysts and others in the industries in which Littelfuse operates, and thus further provides useful information to investors. Management additionally uses this measure when assessing the performance of the business and for business planning purposes. Note that definitions of this non-GAAP financial measure differ from this term as defined or used by IXYS Corporation and may differ from the term as defined or used by other companies.
