

ENVIRONMENTAL POLICY

GrafTech recognizes that every aspect of our global manufacturing operations must be conducted in a manner that minimizes the impact on our surrounding communities and local environments. Protecting the environment and reducing our environmental footprint are essential to our operations and the long-term success of our business.

To accomplish this, GrafTech is committed to the following:

- Maintaining an Environmental, Social and Governance Steering Committee to support Senior Leadership in overseeing GrafTech's efforts to minimize our environmental footprint.
- Maintaining and reviewing management systems, including policies, procedures and programs that serve as the foundation of compliance with GrafTech's requirements and applicable environmental laws, regulations and permits.
- Empowering local site management teams to integrate environmental topics, such as: greenhouse gas and air emissions, water usage and quality, and responsible waste management into our business and capital planning processes.
- Educating managers and employees of their responsibility to comply with this policy and all applicable environmental regulations and requirements.
- Integrating the evaluation of environmental risks and pollution prevention into daily operations to continuously improve our environmental performance.
- Identify and implement technically and economically feasible opportunities to minimize environmental impact through process improvements and new technologies focused on improving energy efficiency, reducing energy consumption, lowering greenhouse gas and air emissions, and reducing water use and waste generation.
- Conducting periodic environmental audits to verify our compliance with GrafTech's policies and procedures and applicable regulatory requirements.
- Ensuring that suppliers, contractors and vendors working at GrafTech's facilities comply with GrafTech policies and procedures and applicable environmental requirements.
- Evaluating and striving to reduce the environmental impacts within our supply chain.
- Maintaining, measuring and reviewing the environmental performance of our operations using quantitative objectives and targets and sharing the results with our stakeholders.

Timothy K. Flanagan
Chief Executive Officer and President
